3. **Dry mouth and throat:** Administration of *Mai Men Dong Tang* was associated with marked success in 258 patients with dry mouth and throat due to various causes (radiation treatment, pharyngitis, and others). The formula was given in extract form, at 9g per day, for 1 and 4 weeks.¹⁰
4. **Stomach cramps:** One study reported success using *Mai Men Dong Tang* to treat gastrointestinal cramps with nausea, vomiting, poor appetite, and other symptoms. A total of 3 packs of herbs were given in decoction.¹¹
5. **Gastritis:** One study reported 78.57% effectiveness using modified *Mai Men Dong Tang* to treat 70 cases of chronic gastritis. Modifications to the base formula included the addition of *Si Ni San* (Frigid Extremities Powder) for Liver and Stomach disharmony; *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium) for the presence of both cold and heat; *Li Zhong Tang* (Regulate the Middle Decoction) or *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction) for deficiency and cold of the Spleen and Stomach; and modifications of *Mai Men Dong Tang* for Stomach yin deficiency. The treatment

Mài Mén Dōng Tāng (Ophiopogonis Decoction)

protocol was to administer one pack of herbs in decoction daily, for each 1 month course of treatment.¹²

6. **Chronic atrophic gastritis:** In one study, 30 patients with chronic atrophic gastritis were treated with good results using *Mai Men Dong Tang*. Clinical results include relief of symptoms, such as bloating, distention, and abdominal pain.¹³
7. **Peptic ulcer disease:** One study reported a 95% effectiveness using modified *Mai Men Dong Tang* to treat 19 patients with peptic ulcer with a history of 1-5 years of illness. Most patients reported relief of symptoms within an average of 9 packs of herbs.¹⁴
8. **Bronchitis:** According to one study, use of 9 grams per day of extract of *Mai Men Dong Tang* was associated with marked improvement for treatment of chronic bronchitis in 20 patients (5 males and 15 females). The study noted that 17 of 20 patients had a dry non-productive cough.¹⁵
9. **Cough:** According to one study, administration of *Mai Men Dong Tang* was associated with marked antitussive effects in both asthmatic and non-asthmatic patients. *Mai Men Dong Tang* was found to significantly improve the cough threshold value in 76% of patients with bronchial asthma, and in 82% without bronchial asthma. The study stated that *Mai Men Dong Tang* is an effective therapeutic preparation for cough hypersensitivity accompanying chronic diseases involving coughing, especially in cases of severe allergic inflammation.¹⁶
10. **Cough from interstitial pneumonia:** According to one case report, use of *Mai Men Dong Tang* was associated with dramatic relief of intractable dry cough within 10 days in a 50 year-old woman with progressive systemic sclerosis accompanied by interstitial pneumonia. Prior to herbal treatment, she was given a variety of antitussive agents over a one year period without success. The researchers stated that *Mai Men Dong Tang* may be a good antitussive agent for interstitial pneumonia associated with a dry cough that is resistant to other antitussives.¹⁷
11. **Postinfectious cough:** *Mai Men Dong Tang* was shown in many studies to be effective in the management of postinfectious cough.^{18,19} According to one case study, use of *Mai Men Dong Tang* was associated with marked effects to suppress cough in a 63-year-old woman with interstitial lung disease and increased sensitivity of the cough reflex. Clinical improvements included subjective relief of cough, decreased cough scores, improved quality of life scores, and improved sensitivity of the cough reflex measured by inhalation of capsaicin.²⁰
12. **Sjogren's syndrome:** According to one reports, *Mai Men Dong Tang* was used successfully to treat Sjogren's syndrome, a chronic inflammatory autoimmune disease characterized by dryness of mucous membranes. In this

report, *Mai Men Dong Tang* significantly increased salivary secretion in 38 patients with Sjogren's syndrome.²¹

HERB-DRUG INTERACTION

- **Enalapril-induced cough:** Administration of *Mai Men Dong Tang* was found to be effective in treating 5 patients with dry cough induced by use of enalapril for 12 to 65 weeks. The treatment protocol was to administer the herbs in extract form, 9 grams per day in three equally-divided doses. Of 5 patients, the study reported significant improvement in 2 cases, moderate improvement in 2 cases, and no benefit in 1 case. Most patients responded within 2 to 4 days of herbal therapy, with no side effects noted.²² The mechanisms were attributed to antitussive and mucoactive effects of *Mai Men Dong Tang*.²³
- **Capsaicin-induced cough:** According to one study of 21 bronchial asthmatics with cough sensitivity to capsaicin, administration of 9 g/day of *Mai Men Dong Tang* significantly increased the cough threshold. The study noted that *Mai Men Dong Tang* was most effective in women, in asthmatic subjects with severe airway inflammation, and in patients having a disease duration of less than 1 year.²⁴

TOXICOLOGY

Administration of *Mai Men Dong Tang* was associated with one case report of Stevens-Johnson syndrome. According to the report, after ingestion of this herbal formula, a 66-year-old female started to develop bullous and eroded lesions on the skin of her entire body and the mucous membranes of her oral cavity, conjunctiva, and cornea. A challenge test was done with a one hundredth dose, and it was positive at 72 hours. She was treated with methylprednisolone for a total of 5 days.²⁵

Da Zao (Fructus Jujubae)

Mai Men Yang Yin Tang (Ophiopogonis Decoction to Nourish the Yin) primarily treats chronic consumptive disorders characterized by the presence of dryness and deficiencies of yin and body fluids. Clinical manifestations include thirst, dry mouth, non-productive cough, constipation, dry stools, and general presentation of dryness in chronic consumptive disorders affecting the Lung and Stomach. This formula contains herbs that nourish Lung and Stomach yin, replenish body fluids, and harmonize the middle *jiao*.

AUTHORS' COMMENTS

Lung and/or Stomach yin deficiency(ies) with deficiency fire rising is a delicate condition that needs to be treated carefully. Strong heat-clearing herbs such as *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae) are not appropriate, as they will consume yin and worsen the condition. Therefore, herbs such as *Mai Dong* (Radix Ophiopogonis) are used since they have gentle effects to nourish yin and clear deficiency fire. Because *Mai Dong* (Radix Ophiopogonis) is mild in potency, a large amount (60-70g) is needed or the effects will not be realized.

Mai Men Dong Tang and *Qing Zao Jiu Fei Tang* (Eliminate Dryness and Rescue the Lungs Decoction) both treat cough, dyspnea, and asthma caused by Lung yin deficiency.

- *Mai Men Dong Tang* moistens the Lung and replenishes Stomach yin to clear interior yin deficiency with heat.
- *Qing Zao Jiu Fei Tang* treats cough and Lung qi reversal caused by warm-dryness attacking from the exterior and injuring Lung yin.²⁶

Shā Shēn Mài Dōng Tāng (Glehnia and Ophiopogonis Decoction)

沙參麥冬湯

沙参麦冬汤

Pinyin Name: *Sha Shen Mai Dong Tang*

Literal Name: Glehnia and Ophiopogonis Decoction

Alternate Name: Glehnia and Ophiopogon Combination

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

COMPOSITION

<i>Sha Shen</i> (Radix Glehniae seu Adenophorae)	9g
<i>Mai Dong</i> (Radix Ophiopogonis)	9g
<i>Yu Zhu</i> (Rhizoma Polygonati Odorati)	6g
<i>Tian Hua Fen</i> (Radix Trichosanthis)	4.5g
<i>Sang Ye</i> (Folium Mori)	4.5g
<i>Bai Bian Dou</i> (Semen Lablab Album)	4.5g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	3g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients with 5 cups of water until the liquid is reduced to 2 cups. Take the decoction once daily.

CHINESE THERAPEUTIC ACTIONS

1. Clears and nourishes the Lung and Stomach
2. Promotes secretion of body fluids and moistens dryness

CLINICAL MANIFESTATIONS

Dryness damaging Lung and Stomach yin: dry throat, thirst, fever, dry coughing, and dry, sticky sputum.

CLINICAL APPLICATIONS

Atrophic gastritis, epigastric pain, lung cancer, pneumonia, bronchitis, dry cough, cough and wheezing in children, and diabetes mellitus.

EXPLANATION

Sha Shen Mai Dong Tang (Glehnia and Ophiopogonis Decoction) nourishes Lung and Stomach yin, promotes secretion of body fluids, and moistens dryness. It utilizes *Sha Shen* (Radix Glehniae seu Adenophorae) and *Mai Dong* (Radix Ophiopogonis) to promote generation of fluids, moisten dryness, and nourish Lung and Stomach yin. These two herbs also help to clear heat and dryness. *Yu Zhu* (Rhizoma Polygonati Odorati) and *Tian Hua Fen* (Radix Trichosanthis) promote generation of fluids and relieve thirst. *Sang Ye* (Folium Mori) releases warmth and dryness from the Lung. *Bai Bian Dou* (Semen Lablab Album) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) benefit qi, strengthen the middle *jiao*, and harmonize all of the herbs.

MODIFICATIONS

- With dry coughing and scanty sputum, add *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) and *Gua Lou* (Fructus Trichosanthis).
- With chronic cough due to heat, add *Di Gu Pi* (Cortex Lycii) and *Jie Geng* (Radix Platycodonis).
- With constipation, add *Xuan Shen* (Radix Scrophulariae) and *Di Huang* (Radix Rehmanniae).

PHARMACOLOGICAL EFFECTS

Gastrointestinal: *Sha Shen Mai Dong Tang* has been shown to have various effects on the gastrointestinal system. It has protective effects against ethanol-induced stomach ulcers and bleeding in rats. It has a marked protective effect against drug-induced damage to the stomach and its mucous membrane. The mechanism of action is attributed in part to the increased generation of stomach mucous membrane and decreased production of stomach acid. Lastly, the formula is deemed to be more effective at higher dose (20 g/kg) than lower dose (10 g/kg).^{1,2}

CLINICAL STUDIES AND RESEARCH

1. **Atrophic gastritis:** Administration of *Sha Shen Mai Dong Tang* was shown to effectively treat chronic atrophic gastritis. According to one study of 88 patients, improvement was seen in 97.7% of the patients, based on symptomatic evaluation, and improvement in 47.7% based on gastroscopy evaluation.³
2. **Epigastric pain:** *Sha Shen Mai Dong Tang* was used in 40 patients to treat epigastric pain characterized by yin deficiency. Most patients had a history of between 7 and 20 years of illness. Clinical manifestations included dull or burning pain, especially on an empty stomach, a red tongue with little moisture and few fissures, and a fine,

- rapid pulse. The herbal formula contained *Bei Sha Shen* (Radix Glehniae) 20g, *Mai Dong* (Radix Ophiopogonis) 12g, *Yu Zhu* (Rhizoma Polygonati Odorati) 10g, *Shi Hu* (Caulis Dendrobii) 15g, *Bai He* (Bulbus Lilii) 10g, *Shan Yao* (Rhizoma Dioscoreae) 15g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 15g, and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 10g. The treatment protocol was to cook the herbs in water and administer the decoction in two to three equally-divided doses. Of 40 patients, the study reported complete recovery in 21 patients, marked improvement in 15 patients, moderate improvement in 3 patients, and no benefit in 1 patient. The overall effectiveness was 97.5%.⁴
3. **Lung cancer:** According to one study, administration of *Sha Shen Mai Dong Tang* plus a 10% *Ya Dan Zi* (Fructus Bruceae) preparation in 23 patients with lung cancer was associated with partial relief in 21.74%, stabilization in 39.13%, and no benefit in 39.13% of patients.⁵
4. **Pneumonia:** One study of 25 children with pneumonia reported complete recovery in 22 patients, significant improvement in 2 patients, and no benefit in 1 patient, after treatment with modified *Sha Shen Mai Dong Tang*.⁶
5. **Dry cough:** One study reported 96% effectiveness using modified *Sha Shen Mai Dong Tang* to treat 154 patients with dry cough. The herbal formula contained *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Dong* (Radix Ophiopogonis), *Yu Zhu* (Rhizoma Polygonati Odorati), *Tian Hua Fen* (Radix Trichosanthis), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Sang Ye* (Folium Mori), *Bai Bian Dou* (Semen Lablab Album), and others. Furthermore, *Ge Gen* (Radix Puerariae Lobatae), *Bai Zhi* (Radix Angelicae Dahuricae), *Lian Qiao* (Fructus Forsythiae), *Chai Hu* (Radix Bupleuri), and *Ban Lan Gen* (Radix Isatidis) were added for cough with an exterior condition; and *Ku Xing Ren* (Semen Armeniacae Amarum), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Yu Xing Cao* (Herba Houttuyniae), and others were added for severe cough. The treatment protocol was to administer the herbs in decoction, for 2 to 5 days per treatment course. Of 154 patients, the study reported complete recovery in 76 patients, significant improvement in 54 patients, moderate improvement in 18 patients, and no benefit in 6 patients.⁷
6. **Cough and wheezing in children:** According to one study, 40 children with cough and wheezing were treated with good results using modified *Sha Shen Mai Dong Tang*. The herbal formula contained *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Dong* (Radix Ophiopogonis), *Tian Hua Fen* (Radix Trichosanthis), *Yu Zhu* (Rhizoma Polygonati Odorati), *Bai Bian Dou* (Semen Lablab Album), *Sang Ye* (Folium Mori), *Di Long* (Pheretima), *Jie Geng* (Radix Platycodonis), *Pi Pa Ye* (Folium Eriobotryae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). Additional modifications were made by adding *Huang Qin* (Radix Scutellariae), and *Shi Gao* (Gypsum Fibrosum) for fever; and *Ma Huang* (Herba Ephedrae) and *Ku Xing Ren* (Semen Armeniacae Amarum) for severe wheezing. The dose of herbs varied depending on the age of the children. Of 40 patients, the study reported complete recovery in 29 patients, improvement in 9 patients, and no benefit in 2 patients.⁸
7. **Diabetes mellitus:** Administration of *Sha Shen Mai Dong Tang* in 186 patients with diabetes mellitus was associated with marked benefit in 106 patients, moderate effectiveness in 60 patients, and no benefit in 20 patients. The overall rate of effectiveness was 89.2%.⁹

AUTHORS’ COMMENTS

The source text uses *Sha Shen* (Radix Glehniae seu Adenophorae) as the chief herb but does not specify

Shā Shēn Mài Dōng Tāng (Glehnia and Ophiopogonis Decoction)

whether it is *Bei Sha Shen* (Radix Glehniae) or *Nan Sha Shen* (Radix Adenophorae). Both herbs have similar functions to moisten Lung yin, nourish the Stomach and generate body fluids. However, *Bei Sha Shen* (Radix Glehniae) is stronger in nourishing the yin and clearing heat, while *Nan Sha Shen* (Radix Adenophorae) is better to nourish yin and dispel phlegm. Therefore, *Bei Sha Shen* (Radix Glehniae) is generally considered more suitable for *Sha Shen Mai Dong Tang*.

Qing Zao Jiu Fei Tang (Eliminate Dryness and Rescue the Lungs Decoction) and *Sha Shen Mai Dong Tang* both contain *Sang Ye* (Folium Mori), *Mai Dong* (Radix Ophiopogonis), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) to moisten dryness.

- *Qing Zao Jiu Fei Tang* also contains *Shi Gao* (Gypsum Fibrosum), *Ren Shen* (Radix et Rhizoma Ginseng), *Hei Zhi Ma* (Semen Sesami Nigrum), *E Jiao* (Colla Corii Asini), *Ku Xing Ren* (Semen Armeniacae Amarum), and *Pi Pa Ye* (Folium Eriobotryae). *Qing Zao Jiu Fei Tang* has a stronger effect to ventilate the Lung, dispel external dryness, and clear heat. It strongly nourishes yin and benefits qi.
- *Sha Shen Mai Dong Tang* also contains *Sha Shen* (Radix Glehniae seu Adenophorae), *Yu Zhu* (Rhizoma Polygonati Odorati), *Bai Bian Dou* (Semen Lablab Album), and *Tian Hua Fen* (Radix Trichosanthis). *Sha Shen Mai Dong Tang* has weaker action to ventilate exterior heat-dryness, as its main effect is to moisten the Lung and Stomach and treat dryness with less exterior symptoms.¹⁰

Sang Xing Tang (Mulberry Leaf and Apricot Kernel Decoction) and *Sha Shen Mai Dong Tang* both treat heat and dryness.

- *Sang Xing Tang* treats heat and dryness injuring the Lung at the exterior level, with manifestations of slight heat sensations in the body, occasional cough, and slight thirst.
- *Sha Shen Mai Dong Tang* treats heat and dryness injuring yin, manifesting in Lung and Stomach yin-deficient symptoms of more severe thirst, dry cough with scanty sputum, nausea, and poor appetite.¹¹

Yù Yè Tāng (Jade Fluid Decoction)

玉液湯

玉液汤

Pinyin Name: Yu Ye Tang

Literal Name: Jade Fluid Decoction

Original Source: *Yi Xue Zhong Zhong Can Xi Lu* (Records of Heart-Felt Experiences in Medicine with Reference to the West) by Zhang Xi-Chun in 1918-34

COMPOSITION

<i>Huang Qi</i> (Radix Astragali)	15g
<i>Shan Yao</i> (Rhizoma Dioscoreae)	30g
<i>Ge Gen</i> (Radix Puerariae Lobatae)	4.5g
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	18g
<i>Tian Hua Fen</i> (Radix Trichosanthis)	9g
<i>Ji Nei Jin</i> (Endothelium Corneum Gigeriae Galli)	6g
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	9g

Yù Yè Tāng (Jade Fluid Decoction)

DOSAGE / PREPARATION / ADMINISTRATION

Prepare the ingredients as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi, nourishes yin and generates body fluids
2. Moistens dryness and relieves thirst

CLINICAL MANIFESTATIONS

Xiao ke (wasting and thirsting) syndrome: polydipsia with constant thirst, polyuria with increased volume and frequency of urination, turbid urine, lethargy, shortness of breath, and a deficient, fine and forceless pulse.

CLINICAL APPLICATIONS

Diabetes mellitus, chronic gastritis, and epigastric pain.

EXPLANATION

Yu Ye Tang (Jade Fluid Decoction) treats chronic *xiao ke* (wasting and thirsting) syndrome with qi and yin deficiencies with dryness and Kidney deficiency. When qi is deficient, water cannot be distributed properly to various parts of the body. With Lung and Stomach dryness, yin and body fluids become damaged. As a result, there is constant thirst and increased intake of water. Because of Kidney deficiency and abnormal water fluid distribution, there may be polyuria with an increase in both volume and frequency of urination, and turbid urine. Lastly, because of qi deficiency, there may be lethargy and shortness of breath. A pulse that is deficient, fine and forceless indicates exhaustion of qi and body fluids.

Huang Qi (Radix Astragali) and *Shan Yao* (Rhizoma Dioscoreae), the two chief herbs, tonify qi and yin

respectively. *Huang Qi* (Radix Astragali) tonifies Spleen qi, which in turn helps to regulate water circulation to relieve thirst. *Shan Yao* (Rhizoma Dioscoreae) relieves polyuria by tonifying the Spleen and consolidating the Kidney, and stops polydipsia by moistening the Lung and generating body fluids. *Ge Gen* (Radix Puerariae Lobatae) causes qi to ascend, which helps to distribute the fluids to the *zang* (solid organs). *Zhi Mu* (Rhizoma Anemarrhenae) and *Tian Hua Fen* (Radix Trichosanthis) nourish yin and moisten dryness to relieve thirst. *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) assists the Spleen to properly distribute the fluids; its enzymes especially help the Spleen and Stomach with digestion. *Wu Wei Zi* (Fructus Schisandrae Chinensis) astringes yin and consolidates Kidney *jing* (essence).

MODIFICATIONS

- With more qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) or *Xi Yang Shen* (Radix Panacis Quinquifolii).
- With more severe polyuria, add *Shan Zhu Yu* (Fructus Corni).

PHARMACOLOGICAL EFFECTS

Hypoglycemic: *Yu Ye Tang* has been shown in many studies to effectively reduce plasma glucose levels in rabbits and mice. The onset of the hypoglycemic action was observed after approximately 2 to 3 hours, and lasted until 6 to 7.5 hours after oral ingestion of this formula.^{1,2,3}

CLINICAL STUDIES AND RESEARCH

1. **Diabetes mellitus:** *Yu Ye Tang* was shown in many studies to effectively treat diabetes mellitus. According to one study of 60 diabetic patients treated with modified *Yu Ye*

Yu Ye Tang (Jade Fluid Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs

Yù Yè Tāng (Jade Fluid Decoction)

Tang, 29 had marked improvement, 25 showed moderate improvement, and 6 had no effect. The herbal formula contained *Shan Yao* (Rhizoma Dioscoreae) 30g, *Tian Hua Fen* (Radix Trichosanthis) 30g, *Huang Qi* (Radix Astragali) 25g, *Zhi Mu* (Rhizoma Anemarrhenae) 15g, *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) 15g, *Ge Gen* (Radix Puerariae Lobatae) 15g, and *Wu Wei Zi* (Fructus Schisandrae Chinensis) 12g. Modifications included addition of *Shan Zhu Yu* (Fructus Corni) 15g, *Yi Zhi* (Fructus Alpiniae Oxyphyllae) 15g, *Fu Pen Zi* (Fructus Rubi) 20g, and *Sang Piao Xiao* (Ootheca Mantis) 30g for soreness of the lower back and knees, fatigue, frequent urination, and cloudy urine.⁴

Another study reported 94.1% effectiveness using modified *Yu Ye Tang* to treat 51 patients with diabetes characterized by qi and yin deficiencies. The herbal formula was based on the modification of *Yu Ye Tang*, and contained *Ren Shen* (Radix et Rhizoma Ginseng), *Zhi Mu* (Rhizoma Anemarrhenae), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Shan Yao* (Rhizoma Dioscoreae), *Huang Qi* (Radix Astragali), *Ge Gen* (Radix Puerariae Lobatae), and *Tian Hua Fen* (Radix Trichosanthis). The treatment protocol was to administer the formula in decoction daily, for 60 days per course of treatment, for a total of 3 to 6 courses. Of 51 patients, the study reported significant improvement in 22 cases, moderate improvement in 26 cases, and no effect in 3 cases.⁵

2. **Chronic gastritis:** One study reported a 69% success rate using modified *Yu Ye Tang* to treat chronic gastritis. Of 127 patients, the study reported complete recovery in 87 cases, improvement in 39 cases, and no effect in 1 case.⁶
3. **Epigastric pain:** Use of *Yu Ye Tang* was beneficial in treating 126 patients with epigastric pain characterized by Stomach yin deficiency. Western medical diagnoses included hypertrophic gastritis, gastric ulcer, duodenal ulcer, superficial gastritis, atrophic gastritis, and others. The herbal formula contained *Shan Yao* (Rhizoma Dioscoreae) 30g, *Huang Qi* (Radix Astragali) 15g, *Zhi Mu* (Rhizoma Anemarrhenae) 18g, *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) 6g, *Ge Gen* (Radix Puerariae Lobatae) 5g, *Wu Wei Zi* (Fructus Schisandrae Chinensis) 10g, and *Tian Hua Fen* (Radix Trichosanthis) 10g. Other modifications were made as needed. The herbs were cooked in water, and the decoction was administered in two to three equally-divided doses. Of 126 patients, the study reported complete recovery in 87 cases and improvement in 39 cases. The duration of treatment ranged from 30 to 100 packs of herbs.⁷

The main actions of *Xiao Ke Fang* (Wasting and Thirsting Formula) are to tonify qi, nourish yin, clear heat, and invigorate the blood to dispel stagnation. It treats chronic *xiao ke* (wasting and thirsting) syndrome with underlying qi and yin deficiencies, accompanied by the rising of deficiency heat and stagnation of blood.

AUTHORS' COMMENTS

Yu Ye Tang is best for chronic *xiao ke* (wasting and thirsting) syndrome with damage to qi and yin. Chief complaints include constant thirst, hunger, and frequent urination.

Yu Ye Tang and *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia) both treat *xiao ke* (wasting and thirsting) syndrome. However, there are some differences:

- *Yu Ye Tang* treats *xiao ke* (wasting and thirsting) syndrome caused by dryness secondary to Kidney deficiency, and inability of the qi to properly disseminate fluids throughout the body. Besides thirst and desire to drink, other symptoms include frequent and profuse urination, fatigue, shortness of breath, and a deficient, fine and forceless pulse.
- *Liu Wei Di Huang Wan* treats *xiao ke* (wasting and thirsting) syndrome caused by Kidney and Liver yin deficiencies. Associated symptoms include soreness and weakness of the lower back and knees, dizziness, tinnitus, dry throat and mouth, red tongue with scanty coating, and a fine, rapid pulse.⁸

Yù Quán Wán (Jade Spring Pill)

玉泉丸

Pinyin Name: Yu Quan Wan
Literal Name: Jade Spring Pill
Alternate Names: Yu Chuan Wan, Jade-Spring Pill, Jade Source Combination
Original Source: *Za Bing Yuan Liu Xi Zhu* (Wondrous Lantern for Peering into Origin and Development of Miscellaneous Diseases) by Shen Jin-Ao in 1773

COMPOSITION

<i>Tian Hua Fen</i> (Radix Trichosanthis)	45g
<i>Di Huang</i> (Radix Rehmanniae)	30g
<i>Ge Gen</i> (Radix Puerariae Lobatae)	45g
<i>Fu Ling</i> (Poria)	30g
<i>Mai Dong</i> (Radix Ophiopogonis)	30g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	30g
<i>Huang Qi</i> (Radix Astragali)	15g
<i>Huang Qi</i> (Radix Astragali), <i>mi zhi</i> (fried with honey)	15g
<i>Wu Mei</i> (Fructus Mume), <i>bei</i> (stone-baked)	30g
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	30g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	30g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to stone-bake *Wu Mei* (Fructus Mume), and fry 15g (which represents half of the total amount) of *Huang Qi* (Radix Astragali), with honey. Grind all of the ingredients into powder and form into pills with honey. The pills should resemble large bullets in size. Chew and swallow one pill per dose with warm water.

CHINESE THERAPEUTIC ACTIONS

- 1. Generates body fluids to relieve thirst
- 2. Nourishes yin to moisten dryness

CLINICAL MANIFESTATIONS

Xiao ke (wasting and thirsting) syndrome: irritability, thirst, increased intake of water, dry mouth and tongue, and increased urinary frequency. Patients may also have increased hunger, increased food intake, and turbid and sweet urine.

CLINICAL APPLICATIONS

Diabetes mellitus and diabetes insipidus.

EXPLANATION

Yu Quan Wan (Jade Spring Pill) treats *xiao ke* (wasting and thirsting) syndrome, a condition characterized by increased thirst and water intake, increased hunger with food intake, increased urination, and decreased body weight. The underlying etiology of *xiao ke* syndrome is yin deficiency with heat, especially in the Lung, Stomach, and Kidney. In addition to polydipsia, polyphagia, and polyuria, patients may also have irritability.

In this formula, *Tian Hua Fen* (Radix Trichosanthis) and *Di Huang* (Radix Rehmanniae) promote generation of body fluids and clear heat. *Ge Gen* (Radix Puerariae Lobatae) has an ascending function and disperses fluids to various parts of the body. These three herbs work synergistically to promote and disperse fluids, and treat

xiao ke (wasting and thirsting) syndrome. *Fu Ling* (Poria) strengthens the Spleen and Stomach and promotes normal urination. *Mai Dong* (Radix Ophiopogonis) nourishes the Lung and Stomach, and addresses the underlying yin deficiency. *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali) tonify qi. *Wu Mei* (Fructus Mume) and *Wu Wei Zi* (Fructus Schisandrae Chinensis) relieve thirst. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs in the formula.

MODIFICATIONS

- With more yin deficiency and interior heat, add *Bie Jia* (Carapax Trionycis) and *Mu Dan Pi* (Cortex Moutan).
- With summer-dampness and heat, add *Bai Bian Dou* (Semen Lablab Album).
- With phlegm, add *Chen Pi* (Pericarpium Citri Reticulatae) and *Ban Xia* (Rhizoma Pinelliae).
- With Kidney yang deficiency, add *Tu Si Zi* (Semen Cuscutae), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Rou Gui* (Cortex Cinnamomi), and *Xian Mao* (Rhizoma Curculiginis).
- With Kidney yin deficiency, add *Xuan Shen* (Radix Scrophulariae), *Gou Qi Zi* (Fructus Lycii), and *Gui Ban* (Plastrum Testudinis).
- With excessive hunger, add *Di Huang* (Radix Rehmanniae) and *Shu Di Huang* (Radix Rehmanniae Praeparata).

CAUTIONS / CONTRAINDICATIONS

Avoid acrid and spicy foods while taking *Yu Quan Wan*.¹

PHARMACOLOGICAL EFFECTS

Hypoglycemic: Administration of *Yu Quan Wan* in capsules or pills was associated with a reduction in plasma glucose levels in rabbits, with the action beginning approximately 3 hours after oral ingestion, and continuing for approximately 9 to 12 hours.²

CLINICAL STUDIES AND RESEARCH

1. **Diabetes mellitus:** Administration of *Yu Quan Wan* four times daily was associated with 86.35% effectiveness in treating 30 patients with type II diabetes mellitus.³ Another study also reported good results using modified *Yu Quan Wan* four times daily to treat 18 patients with diabetes mellitus characterized by polydipsia, polyphagia, polyuria, and weight loss.⁴
2. **Rebound phenomenon:** One study reported that *Yu Quan Wan* helped to stabilize patients and prevented rebound phenomena as they tapered off hormone treatment for acute arthritis.⁵

TOXICOLOGY

In one acute toxicology study, administration of *Yu Quan Wan* in powder form at 12.5 g/kg/day in two equally-divided doses for two days did not cause any abnormal reactions within a 72 hour period of observation.⁶

AUTHORS' COMMENTS

Yu Ye Tang (Jade Fluid Decoction) and *Yu Quan Wan* are two formulas that treat *xiao ke* (wasting and thirsting)

Yù Quán Wán (Jade Spring Pill)

syndrome with therapeutic effects to tonify qi, nourish yin, generate body fluids, and moisten dryness.

- *Yu Ye Tang* uses *Huang Qi* (Radix Astragali) and *Shan Yao* (Rhizoma Dioscoreae) as chief herbs, and has a stronger function to tonify qi and yin.
- *Yu Quan Wan* uses *Tian Hua Fen* (Radix Trichosanthis) and *Di Huang* (Radix Rehmanniae) as chief herbs, and has a more potent effect to clear deficiency heat and generate body fluids.

Zēng Yè Tāng (Increase the Fluids Decoction)

增液湯

增液湯

Pinyin Name: *Zeng Ye Tang*

Literat Name: Increase the Fluids Decoction

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

COMPOSITION

<i>Xuan Shen</i> (Radix Scrophulariae)	30g
<i>Mai Dong</i> (Radix Ophiopogonis)	24g
<i>Di Huang</i> (Radix Rehmanniae)	24g

DOSAGE / PREPARATION / ADMINISTRATION

Cook the ingredients with 8 cups of water and reduce it to 3 cups. For patients with dry mouth, take the entire decoction at once. Repeat this process if the patient does not have a bowel movement.

CHINESE THERAPEUTIC ACTIONS

1. Nourishes yin and clears heat
2. Moistens dryness and facilitates defecation

CLINICAL MANIFESTATIONS

Yangming fu (hollow organs) syndrome with yin and body fluid damage: lack of body fluids characterized by constipation, dry throat, thirst, and a deep, forceless pulse.

CLINICAL APPLICATIONS

Pharyngitis, cheilitis, rhinitis, stomatitis, constipation, hemorrhoids, morning sickness, post-surgical recovery, varicose veins, viral infection, and diabetes mellitus.

EXPLANATION

Zeng Ye Tang (Increase the Fluids Decoction) treats *yangming fu* (hollow organs) syndrome with severe damage

to yin and body fluids. Normally, *yangming fu* syndrome should be treated with downward draining herbs to quickly move stools in constipation. However, if yin and body fluids are already severely damaged due to heat and dryness, downward draining herbs could further damage the yin and body fluids. For this reason, yin-nourishing and dryness-moistening methods are employed in this condition, rather than downward draining herbs, to facilitate defecation.

Xuan Shen (Radix Scrophulariae), which is salty, bitter and cold, softens hardness, moistens dryness, and clears heat. *Mai Dong* (Radix Ophiopogonis) nourishes yin and body fluids. *Di Huang* (Radix Rehmanniae) nourishes yin and moistens dryness. All three herbs work synergistically to promote bowel movements by nourishing yin, moistening dryness, and clearing heat.

This formula is intended to promote defecation by nourishing yin and body fluids. Therefore, the dosage of this formula should be adjusted according to the severity of the constipation.

Zēng Yè Tāng (Increase the Fluids Decoction)

Zeng Ye Tang (Increase the Fluids Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Yangming fu (hollow organs) syndrome	<ul style="list-style-type: none"> • Constipation with dry throat and thirst: heat severely damaging yin and body fluids in the Intestines • Deep, forceless pulse: deficiency condition 	<ul style="list-style-type: none"> • Nourishes yin and clears heat • Moistens dryness and facilitates defecation 	<ul style="list-style-type: none"> • <i>Xuan Shen</i> (Radix Scrophulariae) softens hardness, moistens dryness, and clears heat. • <i>Mai Dong</i> (Radix Ophiopogonis) nourishes yin and body fluids. • <i>Di Huang</i> (Radix Rehmanniae) nourishes yin and moistens dryness.

MODIFICATIONS

- For constipation that is unresolved after taking this formula, add a small amount of *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas) to soften and purge the stool.
- For Stomach yin deficiency with mirror-like tongue coating, and dry lips and throat, add *Sha Shen* (Radix Glehniae seu Adenophorae), *Yu Zhu* (Rhizoma Polygonati Odorati), and *Shi Hu* (Caulis Dendrobii).

CAUTIONS / CONTRAINDICATIONS

Zeng Ye Tang should only be used for constipation caused by heat and dryness severely damaging yin and body fluids. It should not be used indiscriminately to treat constipation, since it does not have any direct purgative or laxative effects.

PHARMACOLOGICAL EFFECTS

1. **Effect on body fluids:** Administration of *Zeng Ye Tang* in mice effectively minimized the loss of body fluids and electrolytes by relieving diarrhea induced by overdose of *Fan Xie Ye* (Folium Sennae).¹
2. **Anti-inflammatory:** One study reported marked effectiveness in reducing inflammation in mice and rats using a preparation of *Zeng Ye Tang* given via intravenous injection at 25-30 mL/kg for 2 to 3 days.²
3. **Antipyretic:** One study reported that *Zeng Ye Tang* had a marked effect to reduce body temperature in rabbits with artificially-induced fever.³

CLINICAL STUDIES AND RESEARCH

1. **Pharyngitis:** One study reported 90.7% effectiveness using modified *Zeng Ye Tang* to treat 97 patients with chronic pharyngitis. The herbal formula contained *Xuan Shen* (Radix Scrophulariae), *Mai Dong* (Radix Ophiopogonis), *Jie Geng* (Radix Platycodonis), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). Of 97 patients, 63 had complete recovery, 25 had moderate improvement, and 9 received no benefit.⁴
2. **Cheilitis:** One study reported that use of modified *Zeng Ye Tang* was effective to treat inflammation of the

lips. The herbal formula contained *Xuan Shen* (Radix Scrophulariae), *Di Huang* (Radix Rehmanniae), *Mai Dong* (Radix Ophiopogonis), *Jin Yin Hua* (Flos Lonicerae Japonicae), *Shi Hu* (Caulis Dendrobii), *Mu Dan Pi* (Cortex Moutan), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). Of 15 patients, the study reported complete recovery in 12 cases, significant improvement in 2 cases, and slight improvement in 1 case.⁵

3. **Rhinitis:** One study reported improvement in 54 of 65 patients with atrophic rhinitis when treated with *Zeng Ye Tang* plus *Ba Zhen Tang* (Eight-Treasure Decoction). In addition to these two formulas, modifications were made by using *Shi Hu* (Caulis Dendrobii) and *Yu Zhu* (Rhizoma Polygonati Odorati) for Stomach yin deficiency; *Mo Han Lian* (Herba Ecliptae) and *Xian He Cao* (Herba Agrimoniae) for nosebleeds; and *Huang Bo* (Cortex Phellodendri Chinensis) and *Zhi Mu* (Rhizoma Anemarrhenae) for foul smells in the nose. Lastly for individuals who suffer from severe rhinitis in fall and winter, *Chi Shao* (Radix Paeoniae Rubra) and larger doses of *Chuan Xiong* (Rhizoma Chuanxiong) and *Dang Gui* (Radix Angelicae Sinensis) were added to the formula.⁶
4. **Stomatitis caused by radiation treatment:** Use of *Zeng Ye Tang* was beneficial among 120 patients with nose cancer to alleviate stomatitis associated with radiation treatment. Clinical manifestations included thirst, dry mouth, thickened saliva, feeling of stickiness in the mouth, redness and swelling of gums, and ulcerations of the oral cavity with severe pain. The herbal formula contained *Di Huang* (Radix Rehmanniae) 12-25g, *Xuan Shen* (Radix Scrophulariae) 18g, *Mai Dong* (Radix Ophiopogonis) 15g, and others as needed. The herbs were cooked in water, and the decoction was administered in three to four equally-divided doses daily. The study reported that the herbs were effective in alleviating side effects associated with radiation treatment such as thirst, thickened saliva, red and swollen gums, ulcerations of the mouth, and pain. Of 120 patients, the study reported complete recovery in 41 cases, significant improvement in 65 cases, moderate improvement in 13 cases, and no effect in 1 case.⁷

Zēng Yè Tāng (Increase the Fluids Decoction)

5. **Viral infection:** Administration of modified *Zeng Ye Tang* in 50 children with viral infection was associated with complete recovery in 17 cases, significant improvement in 18 cases, moderate improvement in 13 cases, and no effect in 2 cases. The overall rate of effectiveness was 90%.⁸
6. **Constipation:** One study reported great success using *Zeng Ye Tang* to treat constipation. Of 50 patients, 41 had normal bowel movement within 3 days and 9 within 6 days.⁹
7. **Diabetes mellitus:** Administration of *Zeng Ye Tang* plus *Dang Shen* (*Radix Codonopsis*), *Shan Zhu Yu* (*Fructus Corni*) and others was shown in one study to reduce blood glucose levels in 102 patients with type II diabetes mellitus. Of 102 patients, the study reported significant effects in 30 cases, moderate effect in 57 cases, and no effect in 15 cases. The overall rate of effectiveness was 85.3%.¹⁰
8. **Morning sickness:** Intravenous infusion of 500-1,000 mL of *Zeng Ye Tang* was effective in treating nausea and vomiting in 44 of 45 pregnant women.¹¹
9. **Post-surgical recovery:** One study reported good results using *Zeng Ye Tang* for 20 post-surgical patients. Improvements noted included faster recovery of intestinal peristalsis.¹²
10. **Varicose vein:** One study reported complete recovery in all 16 patients with varicose veins and associated sores of the legs, when treated with modified *Zeng Ye Tang*. Modifications included the addition of *Hai Zao* (*Sargassum*), *Kun Bu* (*Thallus Eckloniae*), and *Bie Jia* (*Carapax Trionycis*) for the presence of hardness and nodules in the legs; *Ze Xie* (*Rhizoma Alismatis*), *Fang Ji* (*Radix Stephaniae Tetrandrae*), and *Yi Yi Ren* (*Semen Coicis*) for sores and ulcerations with profuse discharge; *Chuan Lian Zi* (*Fructus Toosendan*) and *Yan Hu Suo* (*Rhizoma Corydalis*) for severe pain; and *Ji Xue Teng* (*Caulis Spatholobi*) and *Hong Hua* (*Flos Carthami*) for the presence of noticeable dark, purple spots on the legs. Herbs were also applied topically to treat sores and ulcerations.¹³

TOXICOLOGY

According to an acute toxicology study, the LD₅₀ of *Zeng Ye Tang* given via intravenous injection is 84.1 g/kg in mice. In a chronic toxicology study in rabbits, administration of a 10% *Zeng Ye Tang* preparation given via intravenous injection daily for 30 days did not contribute to any significant changes in body weight, blood exam, or abnormalities of liver, kidney or heart.¹⁴

AUTHORS' COMMENTS

In classic texts, constipation characterized by yin and fluid deficiencies is compared to a boat stuck in the riverbed due to low water flow. In such cases, forcefully pushing the boat down the river will only further damage the boat. Instead, the ideal solution is to direct the boat to deeper water, so that it may float and flow smoothly. Similarly, constipation marked by yin and fluid deficiencies cannot be forcefully treated with drastic purgatives and laxatives, which will only further damage yin and consume fluids. Instead, herbs that nourish the yin and moisten dryness must be used to treat the underlying cause of this condition.

Chapter 15 — Summary

— Dryness-Relieving Formulas

SECTION 1: DISPERSING AND MOISTENING FORMULAS

Name	Similarities	Differences
<i>Xing Su San</i> (Apricot Kernel and Perilla Leaf Powder)	Relieves cool-dryness	Dispels cool-dryness, ventilates the Lung, dissolves phlegm
<i>Sang Xing Tang</i> (Mulberry Leaf and Apricot Kernel Decoction)	Relieve warm-dryness	Gently clears warm-dryness
<i>Qing Zao Jiu Fei Tang</i> (Eliminate Dryness and Rescue the Lung Decoction)		Strongly clears warm-dryness, nourishes yin, moistens dryness

Xing Su San (Apricot Kernel and Perilla Leaf Powder) dispels exterior cool-dryness, ventilates the Lung, and dissolves phlegm. It is used for exterior cool-dryness characterized by aversion to cold, absence of perspiration, coughing with thin and watery sputum, and headache with stuffy nose.

Sang Xing Tang (Mulberry Leaf and Apricot Kernel Decoction) and *Qing Zao Jiu Fei Tang* (Eliminate Dryness and Rescue the Lung Decoction) both treat warm-dryness affecting the Lung.

- *Sang Xing Tang* is used for mild cases of exterior warm-dryness attacking the Lung. It ventilates the Lung and dispels warm-dryness from the Lung. Clinical manifestations include slight fever, dry coughing with little or no sputum, thirst, and dry throat.
- *Qing Zao Jiu Fei Tang* is employed for severe warm-dryness attacking the Lung. It strongly moistens dryness and nourishes the Lung. The main clinical manifestations include fever, thirst, coughing with no sputum, shortness of breath, and fullness and pain in the chest and hypochondriac region.

SECTION 2: NOURISHING AND MOISTENING FORMULAS

Name	Similarities	Differences
<i>Yang Yin Qing Fei Tang</i> (Nourish the Yin and Clear the Lung Decoction)	Nourish and tonify Lung and Kidney yin	Clears Lung heat
<i>Bai He Gu Jin Tang</i> (Lily Bulb Decoction to Preserve the Metal)		Dissolves phlegm, stops coughing
<i>Bu Fei E Jiao Tang</i> (Tonify the Lung Decoction with Ass-Hide Gelatin)	Nourish Lung yin	Clears heat, stops bleeding, alleviates coughing
<i>Qiong Yu Gao</i> (Beautiful Jade Paste)		Tonifies qi and strengthens the Spleen
<i>Mai Men Dong Tang</i> (Ophiopogonis Decoction)	Nourish and tonify Lung and Stomach yin	Redirects the reversed flow of qi, harmonizes the middle <i>jiao</i>
<i>Sha Shen Mai Dong Tang</i> (Glehnia and Ophiopogonis Decoction)		Promotes secretion of body fluids, moistens dryness
<i>Yu Ye Tang</i> (Jade Fluid Decoction)	Nourish yin, generate body fluids, and moisten dryness	Strongly tonifies qi and nourishes yin
<i>Yu Quan Wan</i> (Jade Spring Pill)		Strongly clears deficiency heat and generates body fluids
<i>Zeng Ye Tang</i> (Increase the Fluids Decoction)	Generates body fluids in the Large Intestine, moistens dryness	Clears heat

Chapter 15 — Summary

Yang Yin Qing Fei Tang (Nourish the Yin and Clear the Lung Decoction) nourishes Lung and Kidney yin and clears Lung heat. It is used mostly for diphtheria with swelling and pain in the throat, dry nose and lips, and a wheezing sound when breathing that resembles asthma conditions.

Bai He Gu Jin Tang (Lily Bulb Decoction to Preserve the Metal) nourishes Lung and Kidney yin, dissolves phlegm, and stops coughing. Due to Lung and Kidney yin-deficient fire, a sore throat and coughing with streaks of blood in the sputum may occur. Other clinical manifestations may include warm sensations in the palms and soles, steaming bones sensations, and night sweats.

Bu Fei E Jiao Tang (Tonify the Lung Decoction with Ass-Hide Gelatin) tonifies the Lung, nourishes yin, relieves coughing, and stops bleeding. Clinical manifestations include coughing, wheezing, dry throat, and bloody sputum.

Qiong Yu Gao (Beautiful Jade Paste) nourishes the Lung yin, benefits Spleen qi. This formula is used for prolonged, dry cough due to Lung yin deficiency. Because this is a chronic condition, qi-deficient signs of shortness of breath and lack of energy are also present.

Mai Men Dong Tang (Ophiopogonis Decoction) nourishes Lung and Stomach yin, corrects the reversed flow of qi, and harmonizes the middle *jiao*. It is used for Lung and Stomach yin deficiencies with manifestations of coughing, sputum that cannot be expectorated easily, vomiting, thirst, and a dry throat and mouth.

Sha Shen Mai Dong Tang (Glehnia and Ophiopogonis Decoction) nourishes the Lung and Stomach, promotes the secretion of body fluids, and moistens dryness. It is most effective for dryness damaging Lung and Stomach yin with signs and symptoms such as dry throat, thirst, fever, dry coughing, and dry, sticky sputum.

Yu Ye Tang (Jade Fluid Decoction) tonifies qi, nourishes yin, and generates body fluids. It is used for *xiao ke* (wasting and thirsting) syndrome with constant thirst, polyuria, turbid urine, lethargy, and shortness of breath.

Yu Quan Wan (Jade Spring Pill) generates body fluids to relieve thirst and nourishes yin to moisten dryness. It treats *xiao ke* (wasting and thirsting) syndrome with yin-deficient heat affecting the Lung, Stomach, and Kidney. Clinical manifestations include irritability, thirst, increased intake of water, dry mouth and tongue, and increased frequency of urination.

Zeng Ye Tang (Increase the Fluids Decoction) nourishes the yin, clears heat, moistens dryness, and promotes defecation. It is indicated for *yangming fu* (hollow organs) syndrome, in which yin has been damaged, resulting in constipation with dry stools.

Chapter 16

— Damp-Dispelling Formulas

王肯堂 Wāng Kěn-Tāng

王肯堂 Wāng Kěn-Tāng, 1549 - 1613.

王肯堂 Wāng Kěn-Tāng

症治準繩 *Zheng Zhi Zhun Sheng*
(Standards of Patterns and Treatments)
in 1602.

Wang Ken-Tang was born during the Ming dynasty. When he was 17 years old, his mother became seriously ill. She was treated by many famous doctors who made differing diagnoses and prescribed various, sometimes conflicting, treatments. In the end, no one was able to cure her. Her condition slowly deteriorated, and she eventually passed away. Wang Ken-Tang was inspired to study medicine because of this tragic loss.

In his pursuit of medicine, Wang studied many texts and integrated the knowledge of all of the schools of thought that he encountered. In addition to being an excellent clinician, he dedicated the last ten years of his life to documenting his clinical experiences. Wang wrote many books to detail the pathology and treatment of many disorders, including internal medicine, gynecology, pediatrics, external medicine, the treatment of sores and abscesses, and other miscellaneous illnesses. Among his most famous works are:

- 症治準繩 *Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments)
- 如症治準繩 *Fu Ke Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments in Gynecology)
- 儿科症治準繩 *Er Ke Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments in Pediatrics)
- 外科症治準繩 *Wai Ke Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments in External Medicine)
- 痈科症治準繩 *Yong Ke Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments in Sores and Abscesses)

Formulas written by Wang Ken-Tang include:

- *Shao Yao Tang* (Peony Decoction)
- *Qing Xin Li Ge Tang* (Clear the Epigastrium and Benefit the Diaphragm Decoction)
- *San Huang Shi Gao Tang* (Three-Yellow and Gypsum Decoction)
- *Qing Liang Yin* (Clearing and Cooling Decoction)
- *Qing Gu San* (Cool the Bones Powder)
- *Si Shen Wan* (Four-Miracle Pill)
- *Dao Shui Fu Ling Tang* (Poria Decoction to Drain Water)
- *Jian Pi Wan* (Strengthen the Spleen Pill)

Damp-Dispelling Formulas (Summary)	1143

Chapter 16 — Overview

— Damp-Dispelling Formulas

Definition: Damp-dispelling formulas dry dampness, resolve turbidity, promote urination, and relieve dysuria. Damp-dispelling formulas are used primarily to treat disorders characterized by the accumulation of dampness and water.

Dampness is a yin pathogen that is heavy and stagnant. Damp syndromes are characterized by slow onset, but prolonged duration and frequent recurrence of symptoms. Damp disorders are classified as being either on the exterior (contracted externally) or in the interior (generated internally), but often dampness affects the interior and exterior concomitantly because the external channels and muscles are closely interrelated with the internal *zang fu* organs.

- Externally-contracted dampness occurs as a result of prolonged exposure to wet or damp environmental conditions, such as: rain or humid weather; repeated, direct exposure to water; and wearing sweat-soaked clothes. Externally-contracted dampness invades the exterior levels of the body (skin, muscles, channels, and collaterals) to cause fever, aversion to cold, heaviness of the head and body, painful joints, and edema of the face.
- Internally-generated dampness occurs as a result of inappropriate dietary habits, such as over-consumption of cold or raw foods, sweet or fatty foods, alcohol, and dairy products. These foods create dampness and turbidity, which injure Spleen qi and affect its normal transformation and transportation functions, causing symptoms such as chest and epigastric distention, and stifling sensations, nausea, vomiting, diarrhea, jaundice, edema of the lower limbs, and *lin zheng* (dysuria syndrome).

Damp disorders affect the functioning of the Spleen, Lung, and Kidney. The Spleen absorbs water, the Lung distributes water, and the Kidney eliminates water. Disorders in any of these organs cause abnormal circulation of water, leading to the accumulation of water and formation of dampness. Furthermore, obstruction of the *San Jiao* pathway can cause damp accumulation, and obstruction of the Urinary Bladder may cause dysuria. Because damp disorders are frequently associated with imbalances of the *zang fu* organs, accurate diagnosis is essential to successful treatment.

In addition, dampness may be complicated by other disorders and factors. It can combine with other environmental factors (wind, cold, heat, and summer-heat); it may affect different parts of the body (exterior or interior, upper or lower); and it may affect patients with various constitutions (deficiency or excess). Treatment methods vary, depending on the complications and patient conditions. Generally, if dampness is located in the upper or external parts of the body, exterior-releasing herbs are used to disperse dampness. If dampness is located in the lower or internal parts of the body, one may use aromatic, bitter, and drying herbs to resolve dampness, or sweet and bland diuretic herbs to dispel dampness. If dampness is combined with cold factors, the yang should be warmed and cold dispelled. If dampness is combined with heat, herbs that clear heat should be employed as well. If the body is deficient and the dampness is abundant, one needs to strengthen the body and dispel dampness. Lastly, if damp accumulation causes qi stagnation, herbs that invigorate qi circulation should be added. Note: Formulas that dispel wind-damp to treat *bi zheng* (painful obstruction syndrome) are discussed in Chapter 17: Wind-Damp Dispelling Formulas.

~
Damp-dispelling formulas treat accumulation of dampness and water at the exterior or in the interior.
 ~

Chapter 16 — Overview

SUBCATEGORIES OF ACTION

Because of the complexity of damp disorders, damp-dispelling formulas are divided into four sub-categories to reflect the nature of the disorders, and the corresponding characteristics of the formulas.

1. Damp-Drying and Stomach-Harmonizing Formulas

These formulas treat damp stagnation and turbidity that are accompanied by disharmony of the Spleen and Stomach. Typical clinical manifestations include epigastric and abdominal distention and fullness, belching, nausea, vomiting, acid regurgitation, diarrhea, decreased appetite, and fatigue.

Dampness in patterns of Spleen and Stomach disharmony is usually treated with bitter and warm herbs to dry dampness, or with aromatic herbs to resolve dampness, such as *Cang Zhu* (Rhizoma Atractylodis), *Bai Bian Dou* (Semen Lablab Album), *Huo Xiang* (Herba Agastaches), and *Hou Po* (Cortex Magnoliae Officinalis). Exemplar formulas include *Ping Wei San* (Calm the Stomach Powder) and *Huo Xiang Zheng Qi San* (Agastache Powder to Rectify the Qi).

2. Heat-Clearing and Damp-Dispelling Formulas

These formulas address either exterior damp-heat, interior damp-heat, or damp-heat in the lower *jiao*. Clinical applications include summer-heat, jaundice, *re lin* (heat dysuria), and *wei bi* (atrophic painful obstruction).

Herbs commonly used to clear heat and resolve dampness include *Yin Chen* (Herba Artemisiae Scopariae), *Yi Yi Ren* (Semen Coicis), and *Hua Shi* (Talcum). Herbs that clear heat and dry dampness include *Huang Lian* (Rhizoma Coptidis), *Huang Bo* (Cortex Phellodendri Chinensis), *Huang Qin* (Radix Scutellariae), and *Zhi Zi* (Fructus Gardeniae). Representative formulas are *Yin Chen Hao Tang* (Artemisia Scoparia Decoction), *San Ren Tang* (Three-Nut Decoction), and *Ba Zheng San* (Eight-Herb Powder for Rectification).

3. Water-Regulating and Damp-Resolving Formulas

These formulas treat excess damp accumulation blocking the water pathways, with clinical manifestations of edema, uroschesis, retention of urine, turbid urine, and diarrhea. In this case, herbs are used to dispel dampness and resolve water accumulation through urination.

Commonly used herbs include *Fu Ling* (Poria), *Ze Xie* (Rhizoma Alismatis), and *Zhu Ling* (Polyporus). Exemplar formulas that regulate water and resolve dampness include *Wu Ling San* (Five-Ingredient Powder with Poria) and *Wu Pi Yin* (Five-Peel Decoction).

4. Warm Formulas that Dissolve Dampness

These formulas treat cold-type damp disorders, in which yang fails to transform water. Clinical manifestations include edema of the body and legs, urinary difficulty, *tan yin* (phlegm retention), *bi zheng* (painful obstruction syndrome), and leg *qi* caused by damp-cold accumulation.

These disorders are treated with herbs that warm yang and regulate water, such as *Gui Zhi* (Ramulus Cinnamomi), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Zi* (Radix Aconiti Lateralis Praeparata), and *Fu Ling* (Poria). Two representative formulas are *Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction) and *Zhen Wu Tang* (True Warrior Decoction).

CAUTIONS / CONTRAINDICATIONS

Damp-dispelling formulas often incorporate two general categories of herbs: aromatic, acrid, and warm herbs that dry dampness; and sweet and bland herbs that resolve dampness. Although effective, both types of herbs easily damage yin and body fluids. Therefore, these formulas should be used with caution: during pregnancy; in patients with constitutional yin or body fluid deficiencies; and in individuals who have general weakness after a chronic illness.

~
The Spleen absorbs water, the Lung distributes water, and the Kidney eliminates water. Disorders in any of these organs may cause accumulation of water and formation of dampness.

Chapter 16 — Overview

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

From the traditional Chinese medical perspective, dampness is a complex disorder that may be complicated by other factors and affect different parts of the body. Correspondingly, damp-dispelling formulas have a wide range of pharmacological effects and clinical applications.

Dampness is a complex disorder, and correspondingly, damp-dispelling formulas have a wide range of pharmacological effects and clinical applications.

- Damp-drying and Stomach-harmonizing formulas** are primarily used to treat gastrointestinal disorders.

 - **Gastrointestinal disorders:** *Ping Wei San* (Calm the Stomach Powder) and *Huo Xiang Zheng Qi San* (Agastache Powder to Rectify the Qi) are two of the most commonly used and researched formulas for treating gastrointestinal disorders. *Ping Wei San* has been used to treat gastritis,¹ ulcerative colitis,² epigastric pain from gastritis,³ peptic ulcer disease,⁴ and anorexia.⁵ *Huo Xiang Zheng Qi San* has been used to treat diarrhea,⁶ gastroenteritis,⁷ food poisoning,⁸ and enteritis.⁹
- Heat-clearing and damp-dispelling formulas** clear damp-heat from the Liver, Gallbladder, and lower *jiao*. Pharmacologically, these formulas have antibiotic and anti-inflammatory effects, and have been used successfully to treat infections, as well as liver, gallbladder, kidney, and urinary disorders.

 - **Infection:** Many heat-clearing and damp-dispelling formulas have antibiotic effects, and have been successfully used to treat various types of infections. For example, *San Ren Tang* (Three-Nut Decoction) has been shown to treat pneumonia and otitis media,^{10,11} *Gan Lu Xiao Du Dan* (Sweet Dew Special Pill to Eliminate Toxin) has been used to address encephalitis and laryngopharyngitis,^{12,13} and *Ba Zheng San* (Eight-Herb Powder for Rectification) is effective for urethritis and urinary tract infection.^{14,15}
 - **Liver disorders:** These formulas have hepatoprotective and antifibrotic effects.^{16,17,18} Clinical applications include acute viral hepatitis,¹⁹ acute icteric hepatitis,²⁰ acute infectious icteric hepatitis,²¹ and hepatitis with hepatomegaly.²² Exemplar formulas include *Yin Chen Hao Tang* (Artemisia Scoparia Decoction), *San Ren Tang* (Three-Nut Decoction), and *Gan Lu Xiao Du Dan* (Sweet Dew Special Pill to Eliminate Toxin).
 - **Gallbladder disorders:** These formulas have cholagogic and choleretic effects to stimulate and increase the production and release of bile acids to treat jaundice and cholestatic liver diseases.^{23,24,25} Additional clinical applications include biliary atresia,²⁶ cholecystitis,²⁷ and icteric hepatitis.^{28,29} Exemplar formulas include *Yin Chen Hao Tang* (Artemisia Scoparia Decoction) and *San Ren Tang* (Three-Nut Decoction).
 - **Kidney and urinary disorders:** These formulas have been used successfully to treat various kidney disorders (glomerulonephritis,³⁰ nephritis,³¹ pyelonephritis,³² and urinary stones³³) and urinary disorders (urethritis and urinary tract infection).^{34,35} Exemplar formulas include *San Ren Tang* (Three-Nut Decoction) and *Ba Zheng San* (Eight-Herb Powder for Rectification).
- Water-regulating and damp-resolving formulas** are used for excess damp accumulation that blocks the water pathways. From the perspectives of allopathic medicine, these formulas have a marked diuretic function, and are effective in treating various conditions characterized by water retention, such as cardiovascular, kidney, and urinary disorders.

 - **Edema:** Many of these formulas have a marked diuretic effect to increase the elimination of urine, sodium, chloride, potassium, and other electrolytes.³⁶ Clinically, *Wu Ling San* (Five-Ingredient Powder with Poria), *Zhu Ling Tang* (Polyporus Decoction), and *Wu Pi San* (Five-Peel Powder) are commonly used formulas for treating edema.^{37,38,39}
 - **Cardiovascular disorders:** Many of these formulas have a direct or indirect effect in treating cardiovascular disorders. Some formulas have a diuretic effect to eliminate water and reduce cardiovascular stress.^{40,41,42,43} Other formulas have vasodilative actions to reduce blood pressure.⁴⁴ Lastly, some formulas have positive chronotropic and inotropic effects on the heart.⁴⁵ Exemplar

Chapter 16 — Overview

formulas include *Wu Ling San* (Five-Ingredient Powder with Poria) and *Fang Ji Huang Qi Tang* (Stephania and Astragalus Decoction).

- **Kidney and urinary disorders:** Water-regulating and damp-resolving formulas have been successfully used to treat urinary disorders, such as nephritis,⁴⁶ acute nephritis,⁴⁷ renal failure,⁴⁸ urinary stones,^{49,50} hydrocephalus,⁵¹ uroschisis,⁵² and hydronephrosis.^{53,54} They can also be used for conditions such as hematuria,⁵⁵ galacturia,⁵⁶ and general urinary tract disorders.⁵⁷ The mechanisms of action are attributed in part to the diuretic effect of eliminating excess water retention,^{58,59} and protecting the kidneys by decreasing plasma levels of blood urea nitrogen and creatinine.⁶⁰ Exemplar formulas include *Wu Ling San* (Five-Ingredient Powder with Poria), *Wei Ling Tang* (Calm the Stomach and Poria Decoction), *Zhu Ling Tang* (Polyporus Decoction), and *Fang Ji Huang Qi Tang* (Stephania and Astragalus Decoction).

4. **Warm formulas that resolve dampness** are commonly used to treat cardiovascular, kidney, and urinary disorders.

- **Cardiovascular disorders:** These formulas have been used successfully to treat cardiovascular disorders such as hypertension,⁶¹ coronary artery disease,⁶² and cardiac failure.^{63,64} The pharmacological effects are attributed in part to circulatory improvements such as decreased resistance of blood flow, reduced blood viscosity, increased blood perfusion to internal organs, and decreased workload for the heart.⁶⁵ Exemplar formulas include *Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction) and *Zhen Wu Tang* (True Warrior Decoction).
- **Kidney disorders:** These formulas have been effectively used to treat nephritis,⁶⁶ hydronephrosis,⁶⁷ nephrotic syndrome,⁶⁸ and chronic renal failure.⁶⁹ The mechanism of action is attributed to the nephroprotective effect which reduces the amount of protein and cells in the urine.⁷⁰ Exemplar formulas include *Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction) and *Zhen Wu Tang* (True Warrior Decoction).
- **Urinary disorders:** Certain warm formulas that dispel dampness, such as *Bi Xie Fen Qing Yin* (Dioscorea Hypoglauca Decoction to Separate the Clear), have been successfully used to treat such urinary disorders as urethritis,⁷¹ galacturia,⁷² and *lin zheng* (dysuria syndrome).⁷³

燥湿和胃剂

— Damp-Drying and Stomach-Harmonizing Formulas

Píng Wèi Sǎn (Calm the Stomach Powder)

平胃散

Pinyin Name: *Ping Wei San*

Literal Name: Calm the Stomach Powder

Alternate Names: *Ping Wei San* (Wan), Stomach-Comforting Formula (Pill), Stomach-Calming Powder, Magnolia and Ginger FormulaOriginal Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Cang Zhu</i> (Rhizoma Atractylodis), <i>jin</i> (soaked) in rice water for 2 days	2,400g [15g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>chao</i> (dry-fried) with ginger juice till aromatic	1,500g [9g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	1,500g [9g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae), <i>cuo</i> (grated) and <i>chao</i> (dry-fried)	900g [4g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to grind the ingredients into a fine powder. Cook 6g of the powder with 2 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 2 pieces of *Da Zao* (Fructus Jujubae) in 1 bowl of water until it is reduced to 70% volume. Take the hot, strained decoction on an empty stomach before meals with the optional addition of a pinch of salt. The source text states that frequent use of this formula regulates qi, harmonizes the Stomach, removes chronic food stagnation, dissolves phlegm, and prevents invasion of wind, cold, and dampness.

Today, this formula is commonly prepared and administered in powder or decoction form. For powder, grind the herbs into a fine powder and take 3-5g per dose with a decoction made from *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae). For decoction, use the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Dries dampness and strengthens the Spleen
2. Activates qi circulation and harmonizes the Stomach

CLINICAL MANIFESTATIONS

Damp accumulation in the Spleen and Stomach: fullness and distention of the epigastrium and abdomen,

decreased or loss of appetite, decreased sense of taste, nausea, vomiting, belching, acid regurgitation, a feeling of heaviness in the body and limbs, fatigue, lassitude, feeling lazy with preference of inactivity, diarrhea, a thick, white, greasy tongue coating, and a moderate pulse.

CLINICAL APPLICATIONS

Acute and chronic gastritis, gastric ulcer, duodenal ulcer, ulcerative colitis, epigastric pain caused by gastritis, gastric neurosis, gastroatonia, gastrectasia, anorexia, indigestion, and impotence.

EXPLANATION

Ping Wei San (Calm the Stomach Powder) is the basic formula for treating damp accumulation in the Spleen and Stomach. The Spleen, which is responsible for transportation and transformation, prefers a dry environment. If dampness accumulates and stagnates in the Spleen, impairing its transportation and transformation functions, then loss of appetite, decreased sense of taste, and diarrhea may occur. Damp accumulation also causes qi stagnation, resulting in fullness and distention of the epigastrium and abdomen. If dampness impairs the descending functions of the Stomach qi and causes disharmony, then nausea, vomiting, belching, and acid regurgitation may occur. Heavy-feeling body and limbs,

Píng Wèi Sǎn (Calm the Stomach Powder)

Ping Wei San (Calm the Stomach Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Damp accumulation in the Spleen and Stomach	<ul style="list-style-type: none"> • Loss of appetite, decreased sense of taste and diarrhea: damp accumulation affecting the Spleen and Stomach • Fullness and distention of the epigastrium and abdomen: qi stagnation and damp accumulation • Nausea, vomiting, belching and acid regurgitation: reversed flow of Stomach qi • Feeling of heavy body and limbs, constant fatigue, and lassitude: damp accumulation • White, greasy tongue coating and a moderate pulse: damp accumulation 	<ul style="list-style-type: none"> • Dries dampness and strengthens the Spleen • Activates qi circulation and harmonizes the Stomach 	<ul style="list-style-type: none"> • <i>Cang Zhu</i> (Rhizoma Atractylodis) dries dampness and strengthens the Spleen. • <i>Hou Po</i> (Cortex Magnoliae Officinalis) activates qi, dispels dampness, and relieves fullness and distention. • <i>Chen Pi</i> (Pericarpium Citri Reticulatae) regulates qi and relieves stagnation. • <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Da Zao</i> (Fructus Jujubae) harmonize the Spleen and Stomach. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the middle <i>jiao</i> and the herbs.

constant fatigue, and lassitude are signs of damp accumulation. A white, greasy tongue coating and a moderate pulse are also indicators of dampness.

This formula's chief herb, *Cang Zhu* (Rhizoma Atractylodis), is bitter, dry, and warm, and dries dampness and strengthens the Spleen. The deputy herb, *Hou Po* (Cortex Magnoliae Officinalis), activates qi, dispels dampness, and relieves fullness and distention in the epigastrium and abdomen. *Chen Pi* (Pericarpium Citri Reticulatae) helps *Hou Po* (Cortex Magnoliae Officinalis) to regulate qi and relieve stagnation. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) harmonize the Spleen and Stomach. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the middle *jiao* and all of the herbs in the formula.

MODIFICATIONS

- With damp-heat accumulation, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- With damp-cold accumulation, add *Gan Jiang* (Rhizoma Zingiberis), *Cao Dou Kou* (Semen Alpiniae Katsumadai) and *Rou Gui* (Cortex Cinnamomi).
- With fullness and feelings of oppression in the chest and abdomen, add *Mu Xiang* (Radix Aucklandiae) and *Zhi Qiao* (Fructus Aurantii).
- With epigastric and abdominal pain, add *Yan Hu Suo* (Rhizoma Corydalis) and *Xiang Fu* (Rhizoma Cyperi).
- With indigestion and poor appetite, add *Shan Zha* (Fructus Crataegi), *Mai Ya* (Fructus Hordei Germinatus), and *Shen Qu* (Massa Fermentata).
- With poor appetite due to Spleen deficiency, add *Ren*

Shen (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).

- For stomach flu, add *Huo Xiang* (Herba Agastaches) and *Ban Xia* (Rhizoma Pinelliae), or *Huo Xiang Zheng Qi San* (Agastache Powder to Rectify the Qi).
- For diarrhea, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Yi Yi Ren* (Semen Coicis), and *Bai Bian Dou* (Semen Lablab Album).
- For diarrhea with blood due to heat, add *Huang Lian* (Rhizoma Coptidis).
- For diarrhea with mucus due to cold, add *Wu Zhu Yu* (Fructus Evodiae).
- For diarrhea due to dampness, add *Fu Ling* (Poria) and *Ze Xie* (Rhizoma Alismatis).
- For constipation, add *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas).
- For leukorrhea, add *Huang Qi* (Radix Astragali).
- For oliguria and dysuria, add *Fu Ling* (Poria) and *Ze Xie* (Rhizoma Alismatis).
- For edema and water retention, add *Sang Bai Pi* (Cortex Mori).

CAUTIONS / CONTRAINDICATIONS

Ping Wei San contains many bitter, acrid, warm and drying herbs that consume yin and blood. Therefore, use of this formula is contraindicated during pregnancy and in cases of yin or blood deficiency.¹

CLINICAL STUDIES AND RESEARCH

1. **Gastritis:** According to one study of 46 patients (12 with chronic superficial gastritis, 26 with superficial atrophic gastritis, and 8 with atrophic gastritis), administration

Píng Wèi Sǎn (Calm the Stomach Powder)

of modified *Ping Wei San* for one month per course of treatment was associated with complete recovery in 8 cases, significant improvement in 18 cases, moderate improvement in 16 cases, and no effect in 4 cases (all four had atrophic gastritis). The herbal formula contained *Ping Wei San* as the base formula, with the addition of *Ban Xia* (Rhizoma Pinelliae) and *Cao Guo* (Fructus Tsaoako) for more dampness; *Huang Lian* (Rhizoma Coptidis) and *Zhu Ru* (Caulis Bambusae in Taenia) for more damp-heat; dry-fried *Chai Hu* (Radix Bupleuri) and processed *Xiang Fu* (Rhizoma Cyperi) for qi stagnation; *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) for interior cold; and *Dang Shen* (Radix Codonopsis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for deficiency of the middle *jiao*.²

2. **Ulcerative colitis:** Administration of modified *Ping Wei San* was associated with approximately 80% effectiveness in treating ulcerative colitis. The herbal formula contained *Cang Zhu* (Rhizoma Atractylodis), *Hou Po* (Cortex Magnoliae Officinalis), *Fang Feng* (Radix Saposhnikoviae), *Sheng Ma* (Rhizoma Cimicifugae), *Dang Shen* (Radix Codonopsis), and *Huang Qi* (Radix Astragali). In addition, charred *Da Huang* (Radix et Rhizoma Rhei), charred *Jin Yin Hua* (Flos Lonicerae Japonicae), and charred *Di Yu* (Radix Sanguisorbae) were added for hematochezia.³
3. **Epigastric pain caused by gastritis:** Use of modified *Ping Wei San* was effective in treating epigastric pain caused by gastritis (other causes were ruled out). The herbal formula contained *Xiang Fu* (Rhizoma Cyperi) 12-15g, *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) 4-8g, *Tan Xiang* (Lignum Santali Albi) 4-6g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 15-30g, *Fo Shou* (Fructus Citri Sarcodactylis) 10g, *Wu Yao* (Radix Linderae) 10g, *Bai He* (Bulbus Lilii) 15-30g, *Huang Lian* (Rhizoma Coptidis) 3-4g, *Pu Gong Ying* (Herba Taraxaci) 30g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g. Furthermore, *Huang Qi* (Radix Astragali) and *Ren Shen* (Radix et Rhizoma Ginseng) were added for qi deficiency; *Gui Zhi* (Ramulus Cinnamomi) and *Bai Shao* (Radix Paeoniae Alba) were added, and *Huang Lian* (Rhizoma Coptidis) was removed, for the presence of cold; *Zi Su Geng* (Caulis Perillae) and *Xiang Yuan* (Fructus Citri) were added for epigastric fullness; *E Zhu* (Rhizoma Curcumae) or *Shi Xiao San* (Sudden Smile Powder) was added for blood stagnation; *Shi Hu* (Caulis Dendrobii) and a larger dose of *Bai Shao* (Radix Paeoniae Alba) were added and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) removed, for yin deficiency. The treatment protocol was to give 1 pack of herbs in decoction daily, for 1 month per course of treatment, for 1-3 courses total. Of 56 patients, the study reported complete recovery in 33 cases, improvement in 20 cases, and no effect in 3 cases. The overall rate of effectiveness was approximately 95%.⁴
4. **Peptic ulcer disease:** One study reported complete recovery in 22 of 35 patients using modified *Ping Wei San* to treat gastric and/or duodenal ulcers. The herbal formula contained *Bai Shao* (Radix Paeoniae Alba) 25g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 15g, *Chen Pi* (Pericarpium Citri Reticulatae) 15g, *Hou Po* (Cortex Magnoliae Officinalis) 15g, *Cang Zhu* (Rhizoma Atractylodis) 15g, *Huang Lian* (Rhizoma Coptidis) 5g, and *Wu Zhu Yu* (Fructus Evodiae) 5g. The duration of treatment ranged from 15-65 days, with an average of 45 days.⁵
5. **Anorexia:** One study reported success using modified *Ping Wei San* to treat 80 children with anorexia. The herbal formula contained *Cang Zhu* (Rhizoma Atractylodis) 7.5g, *Hou Po* (Cortex Magnoliae Officinalis) 6g, *Chen Pi* (Pericarpium Citri Reticulatae) 6g, *Fu Ling* (Poria) 6g, *Zhi Qiao* (Fructus Aurantii) 6g, *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) 9g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 5g. Additional modifications were made as needed. The duration of treatment ranged from 2-12 packs of herbs, with an average of 8 packs. The study reported improvement in appetite in all 80 children.⁶
6. **Impotence:** Administration of *Ping Wei San* was effective in treating impotence in 56 men (24 between 25-30 years of age; 27 between 31-40 years of age; and 5 between 41-45 years of age). The duration of illness ranged from 3 months to 10 years. The herbal formula contained *Cang Zhu* (Rhizoma Atractylodis) 20g, *Chen Pi* (Pericarpium Citri Reticulatae) 15g, *Hou Po* (Cortex Magnoliae Officinalis) 15g, *Shu Di Huang* (Radix Rehmanniae Praeparata) 25g, *Rou Gui* (Cortex Cinnamomi) 15g, *Fu Zi* (Radix Aconiti Lateralis Praeparata) 10g, *Jiu Cai Zi* (Semen Allii Tuberosi) 20g, and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 10g. Additional modifications were made as needed: *Yin Yang Huo* (Herba Epimedii) 15g was added for low sex drive; *Hong Hua* (Flos Carthami) 15g and *Wu Gong* (Scolopendra) 3 pieces for prolonged illness; *Fu Zi* (Radix Aconiti Lateralis Praeparata) 10g for yang deficiency; *Gou Qi Zi* (Fructus Lycii) 25g and *Dang Gui* (Radix Angelicae Sinensis) 15g for yin deficiency; *Long Gu* (Os Draconis) 20g and *Mu Li* (Concha Ostreae) 20g for spermatorrhea; *Huang Bo* (Cortex Phellodendri Chinensis) 25g for dampness in the genital area; *Suan Zao Ren* (Semen Ziziphi Spinosae) 15g for palpitations and insomnia; *Dang Shen* (Radix Codonopsis) 20g for poor appetite and lack of energy; *Xiang Fu* (Rhizoma Cyperi) 15g for chest congestion, hypochondriac pain, restlessness, and

Píng Wèi Sǎn (Calm the Stomach Powder)

anger; and addition of *Huang Bo* (Cortex Phellodendri Chinensis) 15g and *Bai Mao Gen* (Rhizoma Imperatae) 20g, and removal of *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Rou Gui* (Cortex Cinnamomi), for dysuria. Of 56 men, the study reported complete recovery in 46 cases (82.1%), improvement in 7 cases (12.5%), and no effect in 3 cases (5.4%). Overall effectiveness was 94.6%.⁷

<i>Hou Po</i> (Cortex Magnoliae Officinalis)	[6g]
<i>Cang Zhu</i> (Rhizoma Atractylodis)	[6g]

The source text states to prepare the ingredients with *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) as a decoction. Note: The doses of the herbs were not given in the source text. Suggested doses are listed above in brackets.

Chai Ping Tang (Bupleurum and Calm the Stomach Decoction) is formulated by combining two formulas: *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) and *Ping Wei San* (Calm the Stomach Powder). Thus, the main actions of this formula include harmonizing the *shaoyang*, harmonizing the Stomach, and dispelling dampness. Clinically, it may be used to treat patients with damp malaria characterized by intermittent chills and fever (more chills than fever), sensations of heaviness in the body and limbs, general body aches, distress in the epigastrium, nausea, a white, greasy tongue coating, and a soggy pulse.

CHINESE THERAPEUTIC ACTIONS

1. Strengthens the Spleen and Stomach
2. Harmonizes the middle *jiao*
3. Relieves food stagnation

CLINICAL MANIFESTATIONS

Damp accumulation in the Spleen and Stomach: indigestion, sensations of oppression in the chest, abdominal pain, nausea, vomiting, diarrhea, postpartum abdominal fullness and distention with nausea and vomiting.

CLINICAL APPLICATIONS

Indigestion, gastric neurosis, gastric prolapse, and decreased or absent intestinal peristalsis.

EXPLANATION

Jia Wei Ping Wei San (Modified Calm the Stomach Powder) treats indigestion with damp accumulation in the Spleen and Stomach. Overindulgence in food commonly leads to food and qi stagnation. With food and qi stagnation, patients will likely experience indigestion, lack of appetite, nausea, vomiting, and fullness and distention of the epigastrium and abdomen. Long-term stagnation damages the Spleen and Stomach, leading to compromised transformation and transportation of food, characterized by loss of appetite, decreased tasting ability, and diarrhea. Lastly, dampness produces feelings of heaviness in the extremities, constant fatigue, and lassitude.

This formula has *Shan Zha* (Fructus Crataegi) to improve digestion, relieve abdominal fullness and distention, and effectively eliminate stagnation of fatty or greasy food. *Mai Ya* (Fructus Hordei Germinatus) improves digestion, increases appetite, and most effectively clears food stagnation from starch or carbohydrates. *Chen Pi* (Pericarpium Citri Reticulatae) and *Qing Pi* (Pericarpium Citri Reticulatae Viride) promote qi circulation, improve digestion, and dispel dampness.

Because qi stagnation is often accompanied by blood stagnation, *Chuan Xiong* (Rhizoma Chuanxiong) is added to promote blood circulation and prevent blood stasis. *Cang Zhu* (Rhizoma Atractylodis), *Hou Po* (Cortex Magnoliae Officinalis), and *Sha Ren* (Fructus Amomi) are commonly used together to dry dampness, strengthen the Spleen and Stomach, activate qi circulation, and relieve fullness and distention in the epigastrium and abdomen. *Xiang Fu* (Rhizoma Cyperi) regulates qi and relieves pain. *Sheng Jiang* (Rhizoma Zingiberis Recens) harmonizes the Spleen and Stomach. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs in the formula.

MODIFICATIONS

- For more severe food stagnation, add *Zhi Shi* (Fructus Aurantii Immaturus).
- With nausea, vomiting, and abdominal pain, combine with *Huang Lian Tang* (Coptis Decoction).
- With phlegm accumulation leading to fullness and feelings of oppression, combine with *Er Chen Tang* (Two-Cured Decoction).
- For Spleen and Stomach deficiencies, combine with *Si Jun Zi Tang* (Four-Gentlemen Decoction).

Xiāng Shā Píng Wèi Sǎn

(Cyperus and Amomum Powder to Calm the Stomach)

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind all of the ingredients except *Mu Xiang* (Radix Aucklandiae), into a fine powder, cook the powder with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 snatch of *Lai Fu Zi* (Semen Raphani) in water. Take the warm, strained decoction with powdered *Mu Xiang* (Radix Aucklandiae).

CHINESE THERAPEUTIC ACTIONS

1. Harmonizes the middle *jiao* and resolves dampness
2. Regulates qi and reduces food stagnation

CLINICAL MANIFESTATIONS

Spleen and Stomach disharmony: nausea, vomiting, belching, chest fullness and distention, abdominal pain, diarrhea, and indigestion.

CLINICAL APPLICATIONS

Infantile malnutrition, indigestion, lack of appetite, diarrhea, and chronic disorders of the gastrointestinal tract.

EXPLANATION

Xiang Sha Ping Wei San (Cyperus and Amomum Powder to Calm the Stomach) treats disharmony of the Spleen and Stomach manifesting as impaired digestive functions. As a result, dampness accumulates in the middle *jiao*, causing reversed flow of qi upward. The resultant symptoms

include nausea, vomiting, and belching. Stagnation in the middle *jiao* causes indigestion, abdominal pain, distention, and fullness. Lastly, there may be diarrhea, as food cannot be digested and absorbed properly.

To properly address this condition, this formula has herbs that are aromatic, bitter, and warm to dry dampness, strengthen the Spleen, and harmonize the middle *jiao*. *Cang Zhu* (Rhizoma Atractylodis) dries dampness and strengthens the Spleen to relieve fullness and distention, treat poor appetite, and stop diarrhea. *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Qiao* (Fructus Aurantii) activate qi circulation to disperse stagnation. *Chen Pi* (Pericarpium Citri Reticulatae) and *Sha Ren* (Fructus Amomi) move qi, dry dampness, and eliminate phlegm. *Xiang Fu* (Rhizoma Cyperi) and *Mu Xiang* (Radix Aucklandiae) soothe Liver qi and relieve pain. *Shan Zha* (Fructus Crataegi), *Mai Ya* (Fructus Hordei Germinatus), and *Shen Qu* (Massa Fermentata) promote digestion and alleviate food stagnation. *Gan Jiang* (Rhizoma Zingiberis) warms the middle *jiao* and relieves nausea. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) relieves abdominal pain, and harmonizes the herbs in the formula.

MODIFICATIONS

- With Spleen deficiency, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Dang Shen* (Radix Codonopsis).

<i>Shen Qu</i> (Massa Fermentata)	[4g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	[2g]
<i>Bai Shao</i> (Radix Paeoniae Alba)	[4g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	[2g]

This formula dries dampness, strengthens the Spleen, and promotes digestion. It is commonly used to treat food stagnation due to inappropriate dietary habits. Clinical manifestations include abdominal pain with food ingestion, lack of desire to eat, abdominal fullness, acid reflux, and preference for cold drinks.

These two formulas have identical names, and very similar composition and functions.

- *Xiang Sha Ping Wei San* from *Wan Bing Hui Chun* (Restoration of Health from the Myriad Diseases) has a slightly stronger effect to regulate qi circulation and relieve abdominal pain, as it contains both *Xiang Fu* (Rhizoma Cyperi) and *Mu Xiang* (Radix Aucklandiae).
- *Xiang Sha Ping Wei San* from *Yi Zong Jin Jian* (Golden Mirror of the Medical Tradition) has a slightly better effect to nourish yin and relieve abdominal spasms and cramps, as it has both *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).

Bù Huàn Jīn Zhèng Qì Sǎn

(Rectify the Qí Powder Worth More than Gold)

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind equal amounts of the ingredients into a fine powder. Cook 9g of the powder with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 2 pieces of *Da Zao* (Fructus Jujubae) in 1.5 bowls of water until it is reduced to 80% volume. Take the hot, strained decoction before meals.

Today, this formula is prepared by grinding all of the ingredients into a fine powder. Take 3-6g of the powder with a decoction made from *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae).

CHINESE THERAPEUTIC ACTIONS

- 1. Activates qí and resolves dampness
- 2. Harmonizes the Stomach and stops vomiting

CLINICAL MANIFESTATIONS

Damp accumulation in the middle *jiao*: vomiting, diarrhea, fever and chills, abdominal fullness and distention, and other urgent conditions such as sudden turmoil disorder.

CLINICAL APPLICATIONS

Acute or chronic gastroenteritis, gastric neurosis, food poisoning with nausea, vomiting, indigestion, poor appetite, belching, and acid reflux.

EXPLANATION

Bu Huan Jin Zheng Qi San (Rectify the Qi Powder Worth More than Gold) is often used in cases in which there are exorbitant damp accumulation symptoms, such as fever and chills, vomiting, diarrhea, abdominal distention and

fullness, and other urgent symptoms associated with diseases such as malaria, dysentery, miasma and sudden turmoil disorder.

Bu Huan Jin Zheng Qi San is a modification of *Ping Wei San* (Calm the Stomach Powder), with the addition of *Huo Xiang* (Herba Agastaches) and *Ban Xia* (Rhizoma Pinelliae). The chief herb, *Cang Zhu* (Rhizoma Atractylodis), is bitter, drying, and warm and strongly dries dampness and strengthens the Spleen. The deputy herb *Hou Po* (Cortex Magnoliae Officinalis) activates qí, dispels dampness, and relieves fullness and distention in the epigastrium and abdomen. The assistant herb *Chen Pi* (Pericarpium Citri Reticulatae) regulates qí and relieves stagnation. Together, these three herbs dry dampness, strengthen the Spleen, and harmonize the Stomach. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs in the formula.

Adding *Huo Xiang* (Herba Agastaches) and *Ban Xia* (Rhizoma Pinelliae) to *Ping Wei San* (Calm the Stomach Powder) gives this formula a stronger ability to dispel dampness and regulate qí. *Huo Xiang* (Herba Agastaches), being strongly aromatic, activates qí, dispels dampness, harmonizes the Stomach to relieve nausea and vomiting, and eliminates exterior damp-heat. *Ban Xia* (Rhizoma Pinelliae) dries dampness and corrects reversed Stomach qí to relieve nausea and vomiting.

MODIFICATIONS

- With vomiting accompanied by excessive amount of sputum and saliva, add *Fu Ling* (Poria) and *Jie Geng* (Radix Platycodonis).

***Bu Huan Jin Zheng Qi San* (Rectify the Qi Powder Worth More than Gold)**

Bù Huàn Jīn Zhèng Qì Sǎn

(Rectify the Qí Powder Worth More than Gold)

- With severe diarrhea due to malaria, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- With wind-cold invasion, add *Fang Feng* (Radix Saposhnikoviae) and *Cong Bai* (Bulbus Allii Fistulosi).
- With severe diarrhea and vomiting, combine with *Huang Lian Tang* (Coptis Decoction).

- Avoid foods that are raw, cold, oily, or greasy while taking *Bu Huan Jin Zheng Qi San*.

AUTHORS' COMMENTS

Bu Huan Jin Zheng Qi San was originally designed to treat urgent conditions such as malaria, miasma and sudden turmoil disorder. Although these conditions are uncommon today, this formula may still be used to address general gastrointestinal conditions such as vomiting, diarrhea, and abdominal fullness and distention.

CAUTIONS / CONTRAINDICATIONS

- Since many herbs in this formula are warm and drying in nature, patients with yin or blood deficiencies should use this formula with caution.

<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	4.5g
<i>Zhi Shi</i> (Fructus Aurantii Immaturus)	6g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	12g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to cut the ingredients into small pieces, and cook them in 6 cups of water until the liquid is reduced to 1.8 cups. Take the strained decoction in three equally-divided doses.

the stomach, belching, or nausea; mild resistance in the epigastric region upon palpation.

CLINICAL APPLICATIONS

Gastritis, gastric prolapse, gastroptosis, acid reflux, gallstones, hiccups, and neurasthenia of the gastrointestinal tract.

CHINESE THERAPEUTIC ACTIONS

1. Strengthens the Spleen
2. Harmonizes the middle *jiao*
3. Resolves phlegm and dampness

EXPLANATION

Fu Ling Yin (Poria Decoction) treats phlegm and dampness in the chest, and is particularly indicated for patients who, after vomiting, experience symptoms such as excess gas in the stomach, a bloating sensation, and inability to eat. Patients may also experience other gastrointestinal symptoms such as belching and nausea.

CLINICAL MANIFESTATIONS

Stomach disorders including excessive gas and bloating, lack of appetite, inability to eat due to excessive gas in

Fú Líng Yīn (Poria Decoction)

Fu Ling Yin (Poria Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Stomach disorders	Excessive gas and bloating, lack of appetite or inability to eat, belching, and nausea; stagnation of phlegm and dampness	<ul style="list-style-type: none">• Strengthens the Spleen• Harmonizes the middle <i>jiao</i>• Resolves phlegm and dampness	<ul style="list-style-type: none">• <i>Fu Ling</i> (Poria) and <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) strengthen the Spleen and Stomach to dispel dampness in the middle <i>jiao</i>.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) tonifies qi and restores normal functioning of the Stomach.• <i>Chen Pi</i> (Pericarpium Citri Reticulatae) and <i>Zhi Shi</i> (Fructus Aurantii Immaturus) regulate qi circulation and strengthen the Spleen and Stomach.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) harmonizes the herbs.

In this formula, *Fu Ling* (Poria) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) strengthen the Spleen and Stomach to dispel water stagnation in the middle *jiao*. *Ren Shen* (Radix et Rhizoma Ginseng) tonifies qi and restores the normal functions of the Stomach. *Chen Pi* (Pericarpium Citri Reticulatae) and *Zhi Shi* (Fructus Aurantii Immaturus) regulate qi circulation to relieve feelings of fullness and bloating. These two herbs also strengthen the Spleen and Stomach to increase appetite. *Sheng Jiang* (Rhizoma Zingiberis Recens) harmonizes the formula.

MODIFICATIONS

- With nausea and belching, add *Ban Xia* (Rhizoma Pinelliae).
- With indigestion, add *Mai Ya* (Fructus Hordei Germinatus) and *Shan Zha* (Fructus Crataegi).
- With stagnation of phlegm and water, add *Ban Xia* (Rhizoma Pinelliae) and *Jie Geng* (Radix Platycodonis).
- With inability to eat, add *Sha Ren* (Fructus Amomi) and *Shen Qu* (Massa Fermentata).
- For gallstones, add *Yin Chen* (Herba Artemisiae Scopariae) and *Ban Xia* (Rhizoma Pinelliae).

Alternate Names: *Huo Hsiang Cheng Qi San (Wan)*, *Huo Xiang Zheng Qi San (Wan)*, Agastache Qi-Regulating Formula (Pill), Agastache Genuine-Qi Powder (Pill), Agastache Formula, Pogostemon Powder to Rectify the Qi, Pogostemon Formula

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Huo Xiang</i> (Herba Agastaches)	90g [15g]
<i>Zi Su Ye</i> (Folium Perillae)	30g [5g]
<i>Bai Zhi</i> (Radix Angelicae Dahuricae)	30g [5g]
<i>Ban Xia Qu</i> (Rhizoma Pinelliae Massa Fermentata)	60g [10g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	60g [10g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	60g [10g]
<i>Fu Ling</i> (Poria)	30g [5g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>zhi</i> (fried with ginger juice)	60g [10g]
<i>Da Fu Pi</i> (Pericarpium Arecae)	30g [5g]
<i>Jie Geng</i> (Radix Platycodonis)	60g [10g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	75g [12g]

Note: Two types of “*Huo Xiang*” have commonly been used in the history of Chinese herbal medicine: *Guang Huo Xiang* (Herba Pogostemonis) and *Huo Xiang* (Herba Agastaches). Consulting the 2005 edition of *Zhong Hua Ren Min Gong He Guo Yao Dian* (Pharmacopoeia of People’s Republic of China), *Guang Huo Xiang* (Herba Pogostemonis) is listed as an official entry, while *Huo Xiang* (Herba Agastaches) is not. Therefore, while many textbooks may still refer to “*Huo Xiang Zheng Qi San*” as “Agastache Powder to Rectify the Qi,” most contemporary herbal products now use *Guang Huo Xiang* (Herba Pogostemonis) as the chief ingredient, and translate the formula as “Pogostemon Powder to Rectify the Qi.”

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to grind the ingredients into a fine powder. Cook 6g of the powder with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae) in 1 large bowl of water until it is reduced to 70%. Take the strained decoction while hot. Additionally, the source text recommends covering the body with blankets to promote sweating.

Today, this formula is generally prepared by grinding the herbs into a fine powder. Take 6g of the powder per dose with a decoction made from *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae). This formula may also be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Releases the exterior and dispels dampness
2. Regulates qi and harmonizes the middle *jiao*

CLINICAL MANIFESTATIONS

Exterior wind-cold invasion accompanied by interior dampness: vomiting and diarrhea, fever, aversion to cold, headache, fullness and oppression in the chest and diaphragm, epigastric or abdominal pain, and a white, greasy tongue coating.

CLINICAL APPLICATIONS

Common cold or influenza in the summer, gastroenteritis, acute enteritis, acute colitis, diarrhea, food poisoning, heat stroke, fungal infection, and diaper rash.

EXPLANATION

Huo Xiang Zheng Qi San (Agastache Powder to Rectify the Qi) is commonly used to treat vomiting and diarrhea caused by an exterior wind-cold attack accompanied by interior dampness. Because of wind-cold at the exterior, headache, fever, and aversion to cold may be present. Damp stagnation and turbidity in the interior cause qi obstruction, leading to fullness and oppression in the chest and diaphragm, and epigastric or abdominal pain. Diarrhea and vomiting occur as dampness and turbidity accumulate in the Stomach and Intestines, which blocks clear qi from moving upward and turbid qi from moving

Huò Xiāng Zhèng Qì Sǎn (Agastache Powder to Rectify the Qi)

Huo Xiang Zheng Qi San (Agastache Powder to Rectify the Qi)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Exterior wind-cold accompanied by interior dampness	<ul style="list-style-type: none">• Headache, fever and aversion to cold: exterior wind-cold• Fullness and oppression in the chest and diaphragm, and epigastric or abdominal pain: damp accumulation in the interior• Diarrhea and vomiting: dampness and turbidity affecting the Spleen and Stomach• White, greasy tongue coating: interior dampness	<ul style="list-style-type: none">• Releases the exterior and dispels dampness• Regulates qi and harmonizes the middle <i>jiao</i>	<ul style="list-style-type: none">• <i>Huo Xiang</i> (Herba Agastaches) releases exterior wind-cold and dispels dampness.• <i>Zi Su Ye</i> (Folium Perillae) and <i>Bai Zhi</i> (Radix Angelicae Dahuricae) release the exterior wind-cold and dispel interior dampness and turbidity.• <i>Ban Xia Qu</i> (Rhizoma Pinelliae Massa Fermentata) and <i>Chen Pi</i> (Pericarpium Citri Reticulatae) dry dampness, harmonize the Stomach, and lower reversed flow of qi.• <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) and <i>Fu Ling</i> (Poria) strengthen the Spleen, dispel dampness, and harmonize the middle <i>jiao</i>.• <i>Hou Po</i> (Cortex Magnoliae Officinalis) and <i>Da Fu Pi</i> (Pericarpium Arecae) activate qi and dispel dampness.• <i>Jie Geng</i> (Radix Platycodonis) ventilates the Lung and resolves dampness.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>Da Zao</i> (Fructus Jujubae), and <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) regulate the Spleen and Stomach and harmonize the herbs.

downward. A white, greasy tongue coating is a sign of dampness in the interior.

To treat this syndrome, not only must the exterior wind-cold be expelled, but the interior dampness and turbidity must be eliminated. Moreover, the qi should be regulated and the middle *jiao* harmonized. This formula has a large dose of *Huo Xiang* (Herba Agastaches) to release exterior wind-cold and dispel dampness. In addition, *Huo Xiang* (Herba Agastaches) treats nausea and vomiting by enabling the clear qi to ascend and turbid qi to descend. *Zi Su Ye* (Folium Perillae) and *Bai Zhi* (Radix Angelicae Dahuricae) help *Huo Xiang* (Herba Agastaches) release the exterior wind-cold and dispel interior dampness and turbidity. *Ban Xia Qu* (Rhizoma Pinelliae Massa Fermentata) and *Chen Pi* (Pericarpium Citri Reticulatae) dry dampness, harmonize the Stomach, lower reversed flow of qi, and relieve vomiting. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria) strengthen the Spleen, dispel dampness, harmonize the middle *jiao*, and stop diarrhea. *Hou Po* (Cortex Magnoliae Officinalis) and *Da Fu Pi* (Pericarpium Arecae) activate qi to dispel dampness and relieve fullness. *Jie Geng* (Radix Platycodonis) ventilates the Lung to release exterior wind-cold and resolve dampness. *Sheng Jiang* (Rhizoma Zingiberis Recens),

Da Zao (Fructus Jujubae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) regulate the Spleen and Stomach, and harmonize all of the herbs in this formula.

The emphasis of this formula is on dispelling dampness and harmonizing the Stomach. It has only a minor focus on expelling exterior wind-cold. It is best suited for treating exterior syndromes accompanied by internal dampness, causing disharmony in the middle *jiao* during the summer months. Historically, this formula has also been used to treat malaria and sudden turmoil disorder.

MODIFICATIONS

- With more heat, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- With more cold, add *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis).
- With more dampness, add *Yi Yi Ren* (Semen Coicis) and *Cang Zhu* (Rhizoma Atractylodis).
- With abdominal pain and diarrhea, add *Cang Zhu* (Rhizoma Atractylodis) and *Huang Lian* (Rhizoma Coptidis).
- With thirst, diarrhea, and oliguria, combine with *Wu Ling San* (Five-Ingredient Powder with Poria).

Huò Xiāng Zhèng Qì Sǎn (Agastache Powder to Rectify the Qi)

- With scanty and difficult urination, add *Tong Cao* (Medulla Tetrapanacis), *Hua Shi* (Talcum), and *Ze Xie* (Rhizoma Alismatis).
- With tenesmus, add *Zhi Shi* (Fructus Aurantii Immaturus).
- With indigestion, add *Shen Qu* (Massa Fermentata) and *Shan Zha* (Fructus Crataegi).
- With epigastric and abdominal fullness and distention caused by qi stagnation, add *Mu Xiang* (Radix Aucklandiae) and *Yan Hu Suo* (Rhizoma Corydalis).

CAUTIONS / CONTRAINDICATIONS

- Most of the herbs in this formula are acrid and drying. Therefore, this formula is contraindicated in patients with yin and blood deficiencies.
- This formula should be used cautiously in patients with thirst and a yellow, greasy tongue coating due to damp-heat.
- Allergic reactions such as rashes, urticaria, and allergic purpura are sometimes associated with the use of *Huo Xiang Zheng Qi San*.¹

PHARMACOLOGICAL EFFECTS

1. **Antispasmodic:** *Huo Xiang Zheng Qi San* was shown in many studies to effectively relax the smooth muscles of the gastrointestinal tract to relieve spasms and cramps.^{2,3}
2. **Antiemetic:** One study reported that *Huo Xiang Zheng Qi San* was effective in relieving nausea and vomiting in pigeons with artificially-induced vomiting. The formula was given in liquid form, 11.64% concentration, at 20 mL/kg.⁴
3. **Antibacterial:** According to *in vitro* studies, administration of *Huo Xiang Zheng Qi San* was associated with an inhibitory effect against *Staphylococcus aureus*, *Salmonella typhi*, *Bacillus dysenteriae*, and *Bacillus proteus*.^{5,6}

CLINICAL STUDIES AND RESEARCH

1. **Diarrhea:** Use of *Huo Xiang Zheng Qi San* effectively treated diarrhea in infants between 6 months and 3 years of age. Of 96 patients, the study reported complete recovery in 85 cases, improvement in 6 cases, and no improvement in 5 cases. The diarrhea generally stopped within 12-72 hours.⁷
2. **Gastroenteritis:** Administration of *Huo Xiang Zheng Qi San* was associated with effective treatment of acute gastroenteritis. Of 150 patients treated with this formula in powder form, 95 had complete recovery and 55 had improvement. Of 40 patients treated with this formula in decoction form, 39 had complete recovery.⁸
3. **Enteritis:** One study reported 95% effectiveness using *Huo Xiang Zheng Qi San* to treat 50 patients with acute enteritis during the summer and fall seasons.⁹

4. **Food poisoning:** Administration of modified *Huo Xiang Zheng Qi San* was associated with complete recovery within 52 hours in all 33 patients with acute food poisoning. Clinical improvements included resolution of symptoms such as headache, body aches and pains, and abdominal fullness and distention.¹⁰
5. **Fungal infection:** One study reported 86.6% effectiveness using *Huo Xiang Zheng Qi San* as an herbal wash to treat fungal infections of the skin (hands, feet, and body).¹¹
6. **Diaper rash:** One study reported 95.8% effectiveness using *Huo Xiang Zheng Qi San* as an herbal wash to treat 48 babies with diaper rash. The treatment protocol was to apply the herbal solution to the affected area twice daily, for 7 days per course of treatment. Of 48 babies treated with one course of herbal therapy, 31 had significant improvement, 14 had moderate improvement, and 3 had no effect.¹²

TOXICOLOGY

No toxicity was reported in one acute toxicology study in laboratory animal subjects using *Huo Xiang Zheng Qi San* in powder extract form.¹³ According to another study, oral administration of a 53.2% *Huo Xiang Zheng Qi San* solution at 25 mL/kg twice daily (approximately 583 times the normal human dose) for 7 days did not cause any abnormal reactions or fatality.¹⁴

AUTHORS' COMMENTS

Huo Xiang Zheng Qi San strongly transforms dampness and harmonizes the Stomach. Its action of releasing exterior wind-cold, however, is not as strong as other exterior-releasing formulas. This formula is appropriate for stomach flu symptoms such as aversion to cold, fever, vomiting, and diarrhea, and a thick, white tongue coating. The patient should be advised to cover up with a blanket to induce sweating.

According to Dr. Chang Wei-Yen, *Huo Xiang Zheng Qi San* combines well with *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium) to treat vomiting, diarrhea, and epigastric pain caused by improper food intake. This combination is also effective for improving appetite in children.

Huo Xiang Zheng Qi San and *Liu He Tang* (Harmonize the Six Decoction) are two formulas that have been used to treat sudden turmoil disorder with vomiting and diarrhea.

- *Huo Xiang Zheng Qi San* contains *Huo Xiang* (Herba Agastaches) as the chief herb. The focus is to release exterior wind-cold and dispel interior dampness.

Huò Xiāng Zhèng Qì Sǎn (Agastache Powder to Rectify the Qi)

- *Liu He Tang* contains *Ren Shen* (Radix et Rhizoma Ginseng) as the chief herb. Its main emphasis is on strengthening the Spleen.

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to grind the ingredients into powder. Cook 12g of the powder with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae) in 1.5 bowls of water until it is reduced to 80% volume. Take the warm, strained decoction any time during the day. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Strengthens the Spleen and harmonize the Stomach
2. Resolves dampness and dispels summer-heat

CLINICAL MANIFESTATIONS

Damp accumulation caused by an inappropriate diet, leading to Spleen and Stomach dysfunctioning: nausea, vomiting, diarrhea, fullness and distention in the chest and diaphragm, and a white, greasy tongue coating.

CLINICAL APPLICATIONS

Heat stroke, hangover, and disturbance of the gastrointestinal system characterized by decreased appetite, vomiting, and diarrhea.

Liu Hé Tāng (Harmonize the Six Decoction)

EXPLANATION

Liu He Tang (Harmonize the Six Decoction) is indicated for patients with dampness attacking and damaging the Spleen and Stomach caused by an inappropriate diet. This condition often arises on hot and humid summer days after eating raw, cold, or uncooked foods. Damp accumulation creates disharmony of the Spleen and Stomach, which causes such symptoms as nausea and vomiting. Fullness and distention in the chest and diaphragm result from dampness obstructing qi. Diarrhea is caused by dampness affecting the Spleen. Historically, this formula has been used to treat sudden turmoil disorder with vomiting and diarrhea.

The treatment plan for this syndrome is to dispel dampness, harmonize the Stomach, and strengthen the Spleen. In this formula, *Ren Shen* (Radix et Rhizoma Ginseng) and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) strengthen the Spleen and dispel dampness. *Huo Xiang* (Herba Agastaches) and *Sha Ren* (Fructus Amomi) dispel dampness from the exterior and dry dampness in the interior. *Ban Xia* (Rhizoma Pinelliae), *Hou Po* (Cortex Magnoliae Officinalis), and *Ku Xing Ren* (Semen Armeniacae Amarum) regulate the qi flow and dispel dampness. *Xiang Ru* (Herba Moslae) and *Bai Bian Dou* (Semen Lablab Album) strengthen the Spleen and dispel dampness. *Mu Gua* (Fructus Chaenomelis) and *Chi Fu Ling* (Poria Rubra) dispel dampness, smooth the qi flow, and harmonize the middle *jiao*. *Zhi Gan Cao*

(Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) harmonize the Spleen and Stomach, and harmonize the rest of the herbs in this formula.

MODIFICATIONS

- With exterior cold, add *Zi Su Ye* (Folium Perillae) and *Xiang Fu* (Rhizoma Cyperi).
- With severe exterior summer-dampness, increase the doses of *Xiang Ru* (Herba Moslae) and *Huo Xiang* (Herba Agastaches).
- With severe damp-heat accumulation, add *Yi Yi Ren* (Semen Coicis), *Hua Shi* (Talcum), *Che Qian Cao* (Herba Plantaginis), and *Huang Lian* (Rhizoma Coptidis).
- For excessive alcohol intake, add *Ge Hua* (Flos Puerariae) and *Shen Qu* (Massa Fermentata).

CAUTIONS / CONTRAINDICATIONS

Liu He Tang is dry and aromatic; therefore, it is not suitable for patients who have yin or body fluid deficiencies.

<i>Hou Po</i> (Cortex Magnoliae Officinalis)	2.4g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	1.5g

This formula strengthens the Spleen, resolves dampness, lifts the clear and lowers the turbid. It is used to treat dampness injuring the Spleen and Stomach due to consumption of inappropriate foods during the summer. Clinical applications include sudden turmoil disorder, vomiting, diarrhea, feelings of fullness and distention in the chest and diaphragm, and a white slippery tongue coating.

These two formulas have the same name and very similar ingredients and indications.

- *Liu He Tang* from *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) contains *Xiang Ru* (Herba Moslae), and is slightly stronger in resolving dampness and releasing the exterior.
- *Liu He Tang* from *Yi Fang Kao* (Investigation of Medical Formulas) contains *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and is better at strengthening the Spleen and Stomach.

AUTHORS' COMMENTS

Liu He Tang, literally “Harmonize the Six Decoction,” refers to the purpose of harmonizing the Spleen and Stomach to ensure optimal absorption of the nutrients and proper nourishment of the “six” *fu* (hollow organs).

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into a fine powder. Take 9g of the powder with warm water.

The source text notes that this formula may induce mild sweating, an indication that the condition has resolved.

Gě Huā Jiě Chéng Sǎn

(Pueraria Flower Powder for Detoxification and Awakening)

CHINESE THERAPEUTIC ACTIONS

1. Strengthens and harmonizes the Spleen and Stomach
2. Clears damp-heat

CLINICAL MANIFESTATIONS

Damp-heat in the Spleen and Stomach: nausea, vomiting, headache, dizziness, chest distention, lack of appetite, and fatigue.

CLINICAL APPLICATIONS

Intoxication from alcohol consumption, hangover, nausea, vomiting, and headache associated with the use of alcohol.

EXPLANATION

Ge Hua Jie Cheng San (Pueraria Flower Powder for Detoxification and Awakening) specifically treats damp-heat in the Spleen and Stomach caused by overindulgence and intoxication of alcohol. When damp-heat travels upward, it leads to nausea, vomiting, and headache. When damp-heat affects the middle *jiao*, it produces abdominal pain and cramps, as well as lack of appetite. When damp-heat travels downward, it leads to diarrhea and dysuria.

In this formula, *Ge Hua* (Flos Puerariae) is the chief herb because it facilitates the breakdown of alcohol and

relieves the side effects of alcohol intoxication. *Dou Kou* (Fructus Amomi Rotundus) and *Sha Ren* (Fructus Amomi) strengthen the Spleen and dry dampness. *Mu Xiang* (Radix Aucklandiae), *Qing Pi* (Pericarpium Citri Reticulatae Viride), and *Chen Pi* (Pericarpium Citri Reticulatae) regulate qi circulation, direct qi downward, and relieve nausea and vomiting. *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Fu Ling* (Poria) strengthen the Spleen, tonify qi, and treat fatigue. *Shen Qu* (Massa Fermentata) facilitates the metabolism of alcohol in the stomach. *Gan Jiang* (Rhizoma Zingiberis) warms the middle *jiao* to relieve abdominal pain and cramps. *Zhu Ling* (Polyporus), *Ze Xie* (Rhizoma Alismatis), and *Lian Hua* (Flos Nelumbinis) drain dampness, regulate the water passages, and relieve dysuria.

MODIFICATIONS

- With headache, add *Chuan Xiong* (Rhizoma Chuanxiong) and *Bai Zhi* (Radix Angelicae Dahuricae).
- With severe nausea and vomiting, add *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Hou Po* (Cortex Magnoliae Officinalis).

Pinyin Name: *Yin Chen Hao Tang***Literal Name:** Artemisia Scoparia Decoction**Alternate Name:** Artemisia Combination**Original Source:** *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty**COMPOSITION***Yin Chen* (Herba Artemisiae Scopariae)

18g

Zhi Zi (Fructus Gardeniae)

14 pieces [9g]

Da Huang (Radix et Rhizoma Rhei)

6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to first cook *Yin Chen* (Herba Artemisiae Scopariae) in 12 cups [2,400 mL] of water until the liquid is reduced to 6 cups [1,200 mL]. Add the other two herbs and cook the decoction until the liquid is reduced to 3 cups [600 mL]. Take the strained decoction in three equally-divided doses.

The source text states that use of the formula will induce normal urine that resembles the juice of *Zao Jiao* (Fructus Gleditsiae), which is pure red in color. After one night, the abdominal fullness will be relieved and the yellow discoloration of the eyes and skin will come out with the urine. Today, this formula is generally prepared as a decoction by cooking all three herbs at the same time.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat
2. Resolves dampness
3. Relieves jaundice

CLINICAL MANIFESTATIONS

Damp-heat jaundice: bright yellow discoloration of the skin and sclera, slight abdominal fullness, dysuria, thirst, a yellow, greasy tongue coating, and a deep, rapid pulse.

CLINICAL APPLICATIONS

Hepatitis, infectious hepatitis, jaundice, biliary atresia, cholecystitis, cholelithiasis, hyperlipidemia, and seborrheic dermatitis.

EXPLANATION

Yin Chen Hao Tang (Artemisia Scoparia Decoction) is the formula of choice to treat damp-heat jaundice, a condition caused by stagnation of dampness and heat in the interior. This type of damp-heat jaundice, commonly referred to as yang jaundice, is characterized by a bright discoloration of the skin that resembles the color of fresh orange peel. The damp-heat can manifest outward to the muscles and skin, causing bright yellow discoloration of the skin and sclera. The damp-heat can also affect the lower *jiao*, producing slight abdominal fullness and dysuria. The heat may consume body fluids, causing thirst. A yellow, greasy tongue coating and a deep, rapid pulse both suggest damp-heat in the interior.

This formula contains *Yin Chen* (Herba Artemisiae Scopariae), the premier herb choice for clearing damp-heat jaundice. *Zhi Zi* (Fructus Gardeniae) clears damp-heat in the three *jiaos* and drains damp-heat out of the body through urination. *Da Huang* (Radix et Rhizoma Rhei) drains damp-heat through defecation. These three herbs

have a synergistic effect to maximize the treatment result.

• The use of this formula is contraindicated during pregnancy.¹

MODIFICATIONS

- For jaundice with more dampness, add *Fu Ling* (Poria), *Ze Xie* (Rhizoma Alismatis), and *Zhu Ling* (Polyporus).
- For jaundice with more heat, add *Huang Bo* (Cortex Phellodendri Chinensis) and *Long Dan* (Radix et Rhizoma Gentianae).
- For severe jaundice, add *Hu Zhang* (Rhizoma et Radix Polygoni Cuspidati) and *Pu Gong Ying* (Herba Taraxaci).
- With oliguria, add *Fu Ling* (Poria), *Ze Xie* (Rhizoma Alismatis), and *Hua Shi* (Talcum).
- With dysuria, add *Mu Tong* (Caulis Akebiae), *Hua Shi* (Talcum), and *Jin Qian Cao* (Herba Lysimachiae).
- With thirst and a feeling of fullness and oppression, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- With fever and chills, add *Chai Hu* (Radix Bupleuri) and *Huang Qin* (Radix Scutellariae).
- With scanty, yellow urine, add *Jin Qian Cao* (Herba Lysimachiae) and *Ze Xie* (Rhizoma Alismatis).
- With hypochondriac pain, add *Chai Hu* (Radix Bupleuri), *Chuan Lian Zi* (Fructus Toosendan), *Yu Jin* (Radix Curcumae), and *Xiang Fu* (Rhizoma Cyperi).
- With hypochondriac pain and abdominal fullness, add *Yu Jin* (Radix Curcumae), *Zhi Qiao* (Fructus Aurantii), and *Chuan Lian Zi* (Fructus Toosendan).
- With abdominal fullness and decreased food intake, add *Shan Zha* (Fructus Crataegi) and *Mai Ya* (Fructus Hordei Germinatus).
- With nausea and vomiting, add *Huang Lian* (Rhizoma Coptidis), *Bai Shao* (Radix Paeoniae Alba), and *Ban Xia* (Rhizoma Pinelliae).

CAUTIONS / CONTRAINDICATIONS

- Yin Chen Hao Tang* should be used only for damp-heat jaundice and **not** damp-cold jaundice.

PHARMACOLOGICAL EFFECTS

- Cholagogic:** *Yin Chen Hao Tang* was associated with stimulating an increased production and release of bile acids. The alcohol extract of the formula was determined to be more effective than the water extract. In comparison with the control group that did not receive any herbs, administration of the alcohol extract increased the production of bile by 51.28%, while administration of the water extract increased the production of bile by 45.85%.² Some researchers have noted that to obtain the maximum cholagogic effect, a larger dose of *Da Huang* (Radix et Rhizoma Rhei) should be used in its fresh form or should be post-decocted. *Yin Chen* (Herba Artemisiae Scopariae) should also be post-decocted.³
- Choleretic:** One study reported *Yin Chen Hao Tang* to be a potent therapeutic agent for a number of cholestatic liver diseases by enhancing the bile acid-independent secretory capacity of hepatocytes. This therapeutic effect was attributed in part to genipin, an active compound of *Zhi Zi* (Fructus Gardeniae).⁴
- Hepatoprotective:** *Yin Chen Hao Tang* has been shown in many studies to effectively protect the liver from various drug- or chemical-induced hepatitis, including acetaminophen, carbon tetrachloride, alpha-naphthylisothiocyanate (ANIT), and concanavalin A.^{5,6,7} This action was attributed to inhibited production of inflammatory cytokines and enhanced production of anti-inflammatory cytokines. The researchers also stated that administration of *Yin Chen Hao Tang* may be useful for treating severe acute hepatitis accompanying cholestasis in cases of autoimmune hepatitis.⁸
- Hepatoprotective and antifibrotic:** In 6 postoperative patients with biliary atresia, administration of *Yin Chen Hao Tang* was found to have a long-term protective and antifibrotic effect on the liver in patients with abnormal

Yīn Chén Hāo Tāng (Artemisia Scoparia Decoction)

levels of liver enzyme and hyaluronic acid.⁹ Another study showed that use of *Yin Chen Hao Tang* prevented artificially-induced liver fibrosis in rats.¹⁰

5. **Antihyperlipidemic:** Use of *Yin Chen Hao Tang* in mice was associated with a decrease in total cholesterol, LDL, and triglycerides levels, and an increase in HDL levels.¹¹

CLINICAL STUDIES AND RESEARCH

1. **Hepatitis:** *Yin Chen Hao Tang* has been shown in many studies to be beneficial in treating hepatitis. Administration of modified *Yin Chen Hao Tang* to 247 patients with acute infectious icteric hepatitis was associated with recovery in 83 cases within 7 days, 158 cases within 15 days, and 6 cases within 20 days. The herbal treatment consisted of this formula plus *Bai Jiang Cao* (Herba cum Radice Patriniae), *Huang Bo* (Cortex Phellodendri Chinensis), *Long Dan* (Radix et Rhizoma Gentianae), *Yu Jin* (Radix Curcumae), and others.¹² Another study of 50 patients with acute icteric hepatitis who were treated with modified *Yin Chen Hao Tang* showed recovery in 47 cases, improvement in 2 cases, and no effect in 1 case (98% overall effectiveness). The herbal treatment contained this formula with the following modifications: *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), and *Long Dan* (Radix et Rhizoma Gentianae) for more heat than dampness; *Cang Zhu* (Rhizoma Atractylodis), *Fu Ling* (Poria) and *Pei Lan* (Herba Eupatorii) for more dampness than heat; *Hou Po* (Cortex Magnoliae Officinalis) and *Lai Fu Zi* (Semen Raphani) for abdominal distention; *Zhu Ru* (Caulis Bambusae in Taenia), *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) for nausea and vomiting; and *Yan Hu Suo* (Rhizoma Corydalis) and *Chuan Lian Zi* (Fructus Toosendan) for hypochondriac pain.¹³ Lastly, one study reported good results using *Yin Chen Hao Tang* plus *Che Qian Zi* (Semen Plantaginis) and *Mu Tong* (Caulis Akebiae) to treat infants with acute viral hepatitis.¹⁴
2. **Jaundice:** It has been confirmed via numerous studies that *Yin Chen Hao Tang* is beneficial in treating jaundice. One study reported 90% effectiveness using modified *Yin Chen Hao Tang* to treat jaundice in 20 patients (16 with complete recovery, 2 with improvement, and 2 with no effect). The herbal treatment contained this formula plus *Bai Hua She She Cao* (Herba Hedyotis), *Da Qing Ye* (Folium Isatidis), *Ji Gu Cao* (Herba Abri), and others.¹⁵ According to another study, use of modified *Yin Chen Hao Tang* was associated with 91% effectiveness to treat patients with persistent jaundice even after surgical removal of the gallbladder. The herbal treatment contained this formula, plus *Huang Qin* (Radix Scutellariae), *Yu Jin* (Radix Curcumae), *Jin Qian Cao* (Herba Lysimachiae), and others. Of 12 patients in this study, 5 had significant improvement, 6 had moderate improvement, and 1 had no effect.¹⁶ Lastly, 32 patients with jaundice associated with viral hepatitis were treated with large doses of *Yin Chen Hao Tang* with good results. In addition to the base formula, modifications included the addition of *Ban Xia* (Rhizoma Pinelliae) and *Zhu Ru* (Caulis Bambusae in Taenia) for nausea and vomiting; *Zhu Ling* (Polyporus), *Fu Ling* (Poria), and *Da Fu Pi* (Pericarpium Arecae) for accumulation of water; *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Yu Jin* (Radix Curcumae) for hepatomegaly or splenomegaly; *Qin Jiao* (Radix Gentianae Macrophyllae) and *Qin Pi* (Cortex Fraxini) for itchy skin; and *Chai Hu* (Radix Bupleuri) and *Huang Qin* (Radix Scutellariae) for chills and fever. Of 32 patients, the study reported significant improvement in 23 cases and moderate improvement in 9 cases.¹⁷
3. **Biliary atresia:** Administration of *Yin Chen Hao Tang* was associated with beneficial effects in 18 postoperative biliary atresia patients between 3 and 23 years of age. Use of *Yin Chen Hao Tang* resulted in statistically significant improvements in glutamic oxaloacetic transaminase (GOT) (45%), glutamic pyruvic transaminase (GPT) (72%), gamma-glutamyl transpeptidase (gammaGTP) (72%), total bile acids (TBA) (72%), hyaluronic acid (HA) (67%), prolyl hydroxylase (PH) (40%), procollagen III peptide (PIIIP) (50%), and type IV collagen as markers of liver fibrosis (23%). The study concluded that long-term administration of *Yin Chen Hao Tang* in postoperative biliary atresia patients improved liver status as assessed by markers of liver function and fibrosis.¹⁸
4. **Hyperlipidemia:** Use of *Yin Chen Hao Tang* plus *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver) to treat hyperlipidemia was associated with a reduction of cholesterol levels in 77 of 88 patients. The patients were instructed to discontinue all other herbal and drug treatment for hyperlipidemia throughout the study.¹⁹
5. **Seborrheic dermatitis:** One study reported 89.06% effectiveness using herbs orally and topically to treat seborrheic dermatitis. For oral use, the herbal formula contained *Yin Chen Hao Tang* plus *Bai Hua She She Cao* (Herba Hedyotis) 15g, *Ku Shen* (Radix Sophorae Flavescentis) 10g, *She Chuang Zi* (Fructus Cnidii) 10g, and *Di Fu Zi* (Fructus Kochiae) 10g. For topical application, the herbal formula contained *Ku Shen* (Radix Sophorae Flavescentis) 30g, *Ma Chi Xian* (Herba Portulacae) 30g, *Liu Huang* (Sulfur) 30g, *Ye Ju Hua* (Flos Chrysanthemi Indici) 20g, and *Bai Bu* (Radix Stemonae) 20g. Of 128 patients, the study reported complete recovery in 78 cases, significant improvement in 28 cases, moderate improvement in 8 cases, and no effect in 14 cases.²⁰

RELATED FORMULAS

Zhī Zǐ Bái Pí Tāng

(Gardenia and Phellodendron Decoction)

梔子柏皮湯

梔子柏皮汤

Pinyin Name: *Zhi Zi Bai Pi Tang*

Literal Name: Gardenia and Phellodendron Decoction

Alternate Name: *Zhi Zi Bo Pi Tang*

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

Zhi Zi (Fructus Gardeniae) 15 pieces [9g]

Zhi Gan Cao (Radix et Rhizoma

Glycyrrhizae Praeparata cum Melle) 3g

Huang Bo (Cortex Phellodendri Chinensis) 6g

The source text instructs to cook the herbs in 4 cups [800 mL] of water until the liquid is reduced to 1.5 cups [300 mL]. Take the strained decoction while warm.

Zhi Zi Bai Pi Tang (Gardenia and Phellodendron Decoction) clears heat and dispels dampness. It is used for patients with a recent history of an exterior syndrome that transformed into interior heat. Clinically, the patient may show symptoms of fever, yellow discoloration of the skin, irritability, heartburn, thirst, and a yellow tongue coating.

Yin Chen Hao Tang and *Zhi Zi Bai Pi Tang* (Gardenia and Phellodendron Decoction) both treat damp-heat jaundice.

- *Yin Chen Hao Tang* is generally considered the formula of choice for treating damp-heat jaundice.
- *Zhi Zi Bai Pi Tang* is more suitable for jaundice characterized by more heat than dampness. This formula has a stronger action to clear heat and a weaker action to dispel dampness.

Yīn Chén Sì Nǐ Tāng

(Artemisia Scoparia Decoction for Frigid Extremities)

茵陳四逆湯

Fu Zi (Radix Aconiti Lateralis Praeparata),

pao (blast-fried)

1 piece [9g]

The source text instructs to prepare the ingredients as a decoction, and take the decoction after it is cooled to room temperature. The main actions of this formula are to tonify yang, warm the interior, dispel dampness, and relieve jaundice. Clinically, *Yin Chen Si Ni Tang* (Artemisia Scoparia Decoction for Frigid Extremities) may be used for patients with damp-cold (yin type) jaundice with symptoms such as dark, lusterless, and yellow discoloration of the skin, lethargy, withered *shen* (spirit), lack of appetite, cold extremities, and a deep, fine and forceless pulse.

Yin Chen Hao Tang and *Yin Chen Si Ni Tang* (Artemisia Scoparia Decoction for Frigid Extremities) both treat jaundice.

- *Yin Chen Hao Tang* is cold in nature, and more suitable for damp-heat (yang-type) jaundice with bright yellow discoloration.
- *Yin Chen Si Ni Tang* is warm in nature, and more suitable for damp-cold (yin-type) jaundice with dark yellow discoloration.

Yīn Chén Wǔ Líng Sǎn (Artemisia Scoparia and Five-Ingredient Powder with Poria)

茵陳五苓散
茵陈五苓散

Pinyin Name: Yin Chen Wu Ling San

Literal Name: Artemisia Scoparia and Five-Ingredient Powder with Poria

Alternate Names: Capillaries and Hoelen Five Formula, Artemisia and Hoelen Five Formula

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Yin Chen</i> (Herba Artemisiae Scopariae)	7.5g
<i>Wu Ling San</i> (Five-Ingredient Powder with Poria)	3.75g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into powder. Take one spoonful [6g] of the powder three times daily after meals.

CHINESE THERAPEUTIC ACTIONS

Dispels dampness and treats jaundice

CLINICAL MANIFESTATIONS

Damp-heat jaundice (more damp than heat) with dysuria.

CLINICAL APPLICATIONS

Jaundice, hepatitis, nephritis, renal cirrhosis, and hyperlipoproteinemia.

Yīn Chén Wǔ Líng Sǎn

(Artemisia Scoparia and Five-Ingredient Powder with Poria)

EXPLANATION

Yin Chen Wu Ling San (Artemisia Scoparia and Five-Ingredient Powder with Poria) is comprised of *Yin Chen* (Herba Artemisiae Scopariae) plus *Wu Ling San* (Five-Ingredient Powder with Poria). *Yin Chen* (Herba Artemisiae Scopariae) clears damp-heat and relieves jaundice. *Wu Ling San* (Five-Ingredient Powder with Poria) regulates water circulation, dispels dampness, and relieves dysuria. Clinically, this formula may be used to treat damp-heat jaundice (more damp than heat) with dysuria.

Please refer to *Wu Ling San* (Five-Ingredient Powder with Poria) for a detailed explanation of this formula.

MODIFICATIONS

- With fever and thirst, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).
- With dysuria, add *Mu Tong* (Caulis Akebiae) and *Di Huang* (Radix Rehmanniae).

PHARMACOLOGICAL EFFECTS

1. **Diuretic:** Administration of *Yin Chen Wu Ling San* at normal doses in adults did not significantly affect the urine output or concentration of electrolytes. However, at higher doses, it did increase the urine output without changing the concentration of the electrolytes.¹
2. **Hepatoprotective:** One study reported that *Yin Chen Wu Ling San* had a protective effect against alcohol-induced liver damage in mice.²

CLINICAL STUDIES AND RESEARCH

1. **Yellow discoloration of the palms and soles:** Use of *Yin Chen Wu Ling San* plus *Bai Mao Gen* (Rhizoma Imperatae), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Hua Shi* (Talcum) was associated with a 100% success rate in treating 6 patients with yellow discoloration of the palms and soles. The cause of this illness was unrelated to jaundice, as confirmed by Western medicine. The traditional Chinese medical diagnosis was Spleen and blood deficiencies, with damp-heat accumulation.³
2. **Hyperlipoproteinemia:** Sixty patients with hyperlipoproteinemia were divided into two groups of 30 patients

each and treated with herbs. Group one received *Yin Chen Wu Ling San*, and group two received a preparation of *Jiao Gu Lan* (Rhizoma seu Herba Gynostemmatis). In group one, the study reported significant improvement in 19 cases, moderate improvement in 9 cases, and no effect in 2 cases (93% effectiveness). In group two, the study reported significant improvement in 6 cases, moderate improvement in 20 cases, and no effect in 4 cases (86.7% effectiveness).⁴

3. **Hepatitis and jaundice:** It has been shown in many studies that use of *Yin Chen Wu Ling San* with pharmaceuticals was associated with marked success in treating individuals with hepatitis and/or jaundice. One formula that successfully treated jaundice contained the following ingredients: *Yin Chen* (Herba Artemisiae Scopariae) 30g, dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 30g, *Chi Fu Ling* (Poria Rubra) 30g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 30g, *Fu Zi* (Radix Aconiti Lateralis Praeparata) 10-30g, *Ting Li Zi* (Semen Descurainiae seu Lepidii) 10-20g, *Ze Xie* (Rhizoma Alismatis) 15g, *Dang Shen* (Radix Codonopsis) 10g, *Gui Zhi* (Ramulus Cinnamomi) 10g, and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 10g.⁵ For icteric hepatitis, one successful formula contained the following ingredients: *Yin Chen Wu Ling San* plus *Chuan Xiong* (Rhizoma Chuanxiong), *Dang Gui* (Radix Angelicae Sinensis), and *Da Huang* (Radix et Rhizoma Rhei).⁶

AUTHORS' COMMENTS

Yin Chen Hao Tang (Artemisia Scoparia Decoction), *Zhi Zi Bai Pi Tang* (Gardenia and Phellodendron Decoction) and *Yin Chen Wu Ling San* all treat damp-heat jaundice.

- *Yin Chen Hao Tang* is the most effective formula, and generally considered the first choice for damp-heat jaundice. Yellow discoloration of the skin and sclera and yellow urine are the diagnostic signs.
- *Zhi Zi Bai Pi Tang* is more suitable for jaundice characterized by more heat than dampness. In addition to yellow discoloration of the skin and sclera, there may be fever and irritability.

Sān Rén Tāng (Three-Nut Decoction)

三仁湯

三仁汤

Pinyin Name: *San Ren Tang*

Literal Name: Three-Nut Decoction

Alternate Name: Triple Nut Combination

Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

COMPOSITION

<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	15g [12g]
<i>Dou Kou</i> (Fructus Amomi Rotundus)	6g
<i>Yi Yi Ren</i> (Semen Coicis)	18g
<i>Hua Shi</i> (Talcum), <i>shui fei</i> (refined with water)	18g
<i>Tong Cao</i> (Medulla Tetrapanacis)	6g
<i>Zhu Ye</i> (Herba Phyllostachys)	6g
<i>Ban Xia</i> (Rhizoma Pinelliae)	15g [10g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook the ingredients with 8 bowls of fresh spring water until it is reduced to 3 bowls. Take 1 bowl three times daily. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Ventilates and smoothes the qi

2. Clears damp-heat

CLINICAL MANIFESTATIONS

Early stage of damp-warmth affecting the *qi* (energy) level: headache, aversion to cold, heaviness and pain of the body, chest oppression and discomfort, absence of hunger and thirst, a feeling of heat in the afternoon, pale, yellow face, pale tongue, and a wiry and fine or soggy pulse.

CLINICAL APPLICATIONS

Pneumonia, otitis media, fever, altitude stress, cardio-pulmonary diseases, hepatitis, cholecystitis, pyelonephritis, glomerulonephritis, gastroenteritis, priapism, restless legs syndrome, arthritis, obesity with dizziness, and lymphadenitis.

EXPLANATION

San Ren Tang (Three-Nut Decoction) treats early stage damp-warmth (more dampness than heat) affecting the *qi* (energy) level. This condition usually occurs in late summer when there is an abundance of damp-warmth in the environment, and in those individuals with Spleen deficiency. Damp-warmth in the environment may affect the exterior of the body, causing headache and aversion to cold. Spleen deficiency may lead to damp production and subsequent formation of heat. The dampness and heat

Sān Rén Tāng (Three-Nut Decoction)

San Ren Tang (Three-Nut Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Early stage of damp-warmth affecting the <i>qi</i> (energy) level	<ul style="list-style-type: none"> • Headache and aversion to cold: damp-warmth affecting the exterior • Heaviness and pain of the body, chest oppression and discomfort: accumulation of dampness obstructing <i>qi</i> circulation • Pale, yellow face: Spleen deficiency with damp accumulation • Pale tongue: <i>qi</i> deficiency 	<ul style="list-style-type: none"> • Ventilates and smoothes <i>qi</i> • Clears damp-heat 	<ul style="list-style-type: none"> • <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) ventilates and regulates Lung <i>qi</i> and relieves chest oppression. • <i>Dou Kou</i> (Fructus Amomi Rotundus) dries dampness and activates the <i>qi</i> flow. • <i>Yi Yi Ren</i> (Semen Coicis) dispels dampness and strengthens the Spleen. • <i>Hua Shi</i> (Talcum), <i>Tong Cao</i> (Medulla Tetrapanacis) and <i>Zhu Ye</i> (Herba Phyllostachys) clear heat, dispel dampness and clear heat via urination. • <i>Ban Xia</i> (Rhizoma Pinelliae) and <i>Hou Po</i> (Cortex Magnoliae Officinalis) activate <i>qi</i> circulation, dispel dampness, and relieve distention.

may obstruct *qi* flow, causing pain, a feeling of heaviness, and chest oppression and discomfort. A pale, yellow face is a sign of Spleen deficiency with damp accumulation. A pale tongue is common for *qi*-deficient patients. A wiry, fine pulse may be present in patients suffering from pain and *qi* deficiency, while a soggy pulse may be present with severe damp accumulation.

This formula contains *Ku Xing Ren* (Semen Armeniacae Amarum) to ventilate and regulate the Lung *qi* and relieve chest oppression. Because the Lung is the organ that regulates water metabolism, restoring the normal flow of Lung *qi* helps to resolve dampness in the entire body. *Dou Kou* (Fructus Amomi Rotundus) is an acrid and aromatic herb that dries dampness and activates the *qi* flow. *Yi Yi Ren* (Semen Coicis) dispels dampness and strengthens the Spleen. *Hua Shi* (Talcum), *Tong Cao* (Medulla Tetrapanacis), and *Zhu Ye* (Herba Phyllostachys) clear heat, dispel dampness, and clear heat via urination. *Ban Xia* (Rhizoma Pinelliae) and *Hou Po* (Cortex Magnoliae Officinalis) activate *qi* circulation, dispel dampness, and relieve distention.

MODIFICATIONS

- For the initial stages of *wen bing* (warm disease) with dampness affecting the *wei* (defensive) level, add *Huo Xiang* (Herba Agastaches) and *Xiang Ru* (Herba Moslae).
- With alternating chills and fever, add *Qing Hao* (Herba Artemisiae Annuae) and *Cao Guo* (Fructus Tsaoko).
- With heat and a bitter taste in the mouth, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).

- With epigastric and abdominal fullness, distention, and a feeling of incomplete evacuation of stools, add *Lai Fu Zi* (Semen Raphani) and *Shen Qu* (Massa Fermentata).

CAUTIONS / CONTRAINDICATIONS

San Ren Tang treats conditions characterized by more dampness than heat. It is not suitable in cases characterized by more heat than dampness, or with the presence of dryness and heat.

CLINICAL STUDIES AND RESEARCH

1. **Pneumonia:** Forty patients with pneumonia were treated with *San Ren Tang* with complete recovery in 36 cases and improvement in 4 cases. The average duration of treatment was 4.8 days. The treatment used *San Ren Tang* as the base formula with the addition of *Da Qing Ye* (Folium Isatidis) for heat, *Sang Bai Pi* (Cortex Mori) for excessive perspiration, *Tai Zi Shen* (Radix Pseudostellariae) for weakness and deficiency, *Sha Shen* (Radix Glehniae seu Adenophorae) for damaged body fluids, and *Gua Lou Zi* (Semen Trichosanthis) for constipation.¹
2. **Otitis media:** Modified *San Ren Tang* was used with good results for treatment of catarrhal otitis media. The modifications are as follows: *Ma Huang* (Herba Ephedrae) and *Shi Chang Pu* (Rhizoma Acori Tatarinowii) were added for nasal obstruction; and *Ze Xie* (Rhizoma Alismatis), *Che Qian Zi* (Semen Plantaginis), and *Ting Li Zi* (Semen Descurainiae seu Lepidii) were added for accumulation of fluids in the ear. Out of 110 patients, the study reported complete recovery in 66 cases, marked improvement in 17 cases, improvement in 19 cases, and no effect in 8 cases.²

Sān Rén Tāng (Three-Nut Decoction)

3. **Cardiopulmonary diseases:** Thirty-two patients with chronic cardiopulmonary diseases were treated with modified *San Ren Tang* with complete recovery in 21 cases, marked effect in 7 cases, and slight improvement in 4 cases. Clinical presentations of the patients prior to herbal treatment included palpitations, shortness of breath, shallow and hurried respiration, dizziness, fatigue, white scanty sputum, a dark purple tongue with spots, a white greasy tongue coating, and a wiry, slippery or deep, rapid and fine pulse.³
4. **Hepatitis:** Use of modified *San Ren Tang* was associated with beneficially treating acute icteric hepatitis characterized by damp-heat affecting all three *jiaos*. The herbal treatment contained the following ingredients: *Yin Chen* (Herba Artemisiae Scopariae) 30g, *Tu Yin Chen* (Herba Origani), *Ku Xing Ren* (Semen Armeniacae Amarum) 5g, *Dou Kou* (Fructus Amomi Rotundus) 5g, *Yi Yi Ren* (Semen Coicis) 12g, *Hou Po* (Cortex Magnoliae Officinalis) 9g, *Dan Zhu Ye* (Herba Lophatheri) 6g, *Ban Xia* (Rhizoma Pinelliae) 9g, *Tong Cao* (Medulla Tetrapanacis) 5g, *Hua Shi* (Talcum) 18g, and *Zhi Zi* (Fructus Gardeniae) 12g. The herbs were administered in decoction form daily for 12 days.⁴
5. **Cholecystitis:** *San Ren Tang* was used to treat 38 patients with cholecystitis with complete recovery in 15 cases and improvement in 23 cases. The herbal formula used *San Ren Tang* as the base formula. *Chai Hu* (Radix Bupleuri) and *Huang Qin* (Radix Scutellariae) were added for aversion to cold and bitter taste in the mouth; *Yan Hu Suo* (Rhizoma Corydalis) and *Yu Jin* (Radix Curcumae) were added for hypochondriac pain; *Huo Xiang* (Herba Agastaches) and *Pei Lan* (Herba Eupatorii) were added for nausea, vomiting and abdominal distention; *Yin Chen* (Herba Artemisiae Scopariae) for jaundice; *Shan Zha* (Fructus Crataegi), *Mai Ya* (Fructus Hordei Germinatus), and *Shen Qu* (Massa Fermentata) were added for aversion to greasy, oily foods; and *Zhi Shi* (Fructus Aurantii Immaturus) was added for constipation.⁵
6. **Glomerulonephritis:** One hundred and twenty patients with glomerulonephritis (78 males and 42 females; between 6-45 years of age) were treated with complete recovery in 103 cases, significant improvement in 11 cases, and no effect in 6 cases. The herbal formula contained *Ku Xing Ren* (Semen Armeniacae Amarum) 15g, *Dou Kou* (Fructus Amomi Rotundus) 15g, *Yi Yi Ren* (Semen Coicis) 20g, *Hou Po* (Cortex Magnoliae Officinalis) 15g, *Ban Xia* (Rhizoma Pinelliae) 15g, *Tong Cao* (Medulla Tetrapanacis) 10g, *Hua Shi* (Talcum) 15g, *Zhu Ye* (Herba Phyllostachys) 20g, *Shi Wei* (Folium Pyrrosiae) 30g, *Bai Mao Gen* (Rhizoma Imperatae) 30g, and others as needed. The duration of treatment ranged from 6-30 days, with an average of 12 days.⁶
7. **Gastroenteritis:** One study reported marked success using modified *San Ren Tang* to treat 300 patients with acute gastroenteritis. Clinical manifestations included edema, decreased urination, hematuria, proteinuria, elevated blood pressure, chest congestion with shortness of breath, cough with a small amount of foamy sputum, epigastric fullness, poor appetite, and nausea. The herbal formula contained *Ku Xing Ren* (Semen Armeniacae Amarum) 10g, *Dou Kou* (Fructus Amomi Rotundus) 10g, *Yi Yi Ren* (Semen Coicis) 30g, *Hua Shi* (Talcum) 15g, *Zhu Ye* (Herba Phyllostachys) 10g, *Hou Po* (Cortex Magnoliae Officinalis) 15g, *Tong Cao* (Medulla Tetrapanacis) 15g, *Ban Xia* (Rhizoma Pinelliae) 10g, charred *Shan Zha* (Fructus Crataegi) 15g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 5g. Additional modifications were made as needed. The herbs were cooked in water, and administered via decoction daily. The duration of treatment ranged from 2 to 8 packs of herbs. The study reported complete recovery or improvement in all 300 patients.⁷
8. **Priapism:** Use of modified *San Ren Tang* was effective in treating one case of priapism (prolonged, painful erection) and inability to ejaculate. The herbal formula contained *San Ren Tang* plus *Niu Xi* (Radix Achyranthis Bidentatae), *Wang Bu Liu Xing* (Semen Vaccariae), *Che Qian Zi* (Semen Plantaginis), *Pu Gong Ying* (Herba Taraxaci), and others. After 6 packs of herbal therapy, the priapism was resolved and the patient was able to ejaculate normally.⁸ Interestingly, there are also case reports that *San Ren Tang* can effectively treat impotence.^{9,10}
9. **Altitude stress:** Use of modified *San Ren Tang* was associated with good success in treating patients with acute altitude stress. The treatment protocol was to use *San Ren Tang* as the base formula. Modifications included *Chai Hu* (Radix Bupleuri) and *Fang Feng* (Radix Saposhnikoviae) for concurrent viral infection; *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Shou Wu Teng* (Caulis Polygoni Multiflori) for insomnia and palpitations; *Ting Li Zi* (Semen Descurainiae seu Lepidii) and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) for severe cough; *Gua Lou* (Fructus Trichosanthis) for chest oppression; and the addition of *Bai Mao Gen* (Rhizoma Imperatae) and *Mo Han Lian* (Herba Ecliptae), with the removal of *Ban Xia* (Rhizoma Pinelliae), for epistaxis. Out of 50 patients, 39 had complete recovery, 6 had marked improvement, 2 had slight improvement, and 3 had no effect. The rate of complete recovery was 78%, and the overall effectiveness was 95%.¹¹

<i>Hou Po</i> (Cortex Magnoliae Officinalis)	3g
<i>Ban Xia</i> (Rhizoma Pinelliae), <i>zhu</i> (boiled) with ginger	4.5g
<i>Chi Fu Ling</i> (Poria Rubra)	9g
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	9g
<i>Yi Yi Ren</i> (Semen Coicis)	9g
<i>Dou Kou</i> (Fructus Amomi Rotundus)	9g
<i>Zhu Ling</i> (Polyporus)	4.5g
<i>Dan Dou Chi</i> (Semen Sojae Praeparatum)	9g
<i>Ze Xie</i> (Rhizoma Alismatis)	4.5g

The source text instructs to prepare the ingredients as a decoction. The main actions of this formula are to release the exterior and resolve dampness. Clinically, *Huo Po Xia Ling Tang* (Agastache, Magnolia Bark, Pinellia, and Poria Decoction) may be used for patients having an initial onset of damp-warmth invasion (more dampness than heat), characterized by symptoms such as fever, chills, lethargy, chest oppression, a thin, white tongue coating, and a soggy, moderate pulse.

Huáng Qín Huá Shí Tāng
(Scutellaria and Talcum Decoction)

黃芩滑石湯
黄芩滑石汤

Pinyin Name: *Huang Qin Hua Shi Tang*
Literal Name: Scutellaria and Talcum Decoction
Original Source: *Wen Bing Tiao Bian* (Systematic Differentiation of Warm Disease) by Wu Ju-Tong in 1798

<i>Huang Qin</i> (Radix Scutellariae)	9g
<i>Hua Shi</i> (Talcum)	9g
<i>Fu Ling Pi</i> (Cortex Poria)	9g
<i>Da Fu Pi</i> (Pericarpium Arecae)	6g
<i>Dou Kou</i> (Fructus Amomi Rotundus)	3g
<i>Tong Cao</i> (Medulla Tetrapanacis)	3g
<i>Zhu Ling</i> (Polyporus)	9g

The source text instructs to prepare the ingredients as a decoction. *Huang Qin Hua Shi Tang* (Scutellaria and Talcum Decoction) clears heat and dispels dampness. Clinically, it is often used for damp-warmth stagnation in the middle *jiao*, leading to such symptoms as persistent fever that temporarily decreases with perspiration but later rebounds, generalized body aches, thirst with little or no desire to drink water, a light yellow, slippery tongue coating, and a moderate pulse.

AUTHORS' COMMENTS

San Ren Tang, literally “Three-Nut Decoction,” is so named because this formula contains three *ren* (seeds, nuts or fruits): *Ku Xing Ren* (Semen Armeniacae Amarum), *Yi Yi Ren* (Semen Coicis), and *Dou Kou* (Fructus Amomi Rotundus), which is also known as *Bai Dou Ren*.

San Ren Tang, *Huo Po Xia Ling Tang* (Agastache, Magnolia Bark, Pinellia and Poria Decoction), and *Huang Qin Hua Shi Tang* (Scutellaria and Talcum Decoction) all treat various presentations of damp-warmth. Their functions and indications vary, however.

- *San Ren Tang* clears heat and resolves dampness. It is generally used for the early stage of damp-warmth (more dampness than heat) affecting the *qi* (energy) level.
- *Huo Po Xia Ling Tang* resolves dampness and releases the exterior. It is appropriate for the early stage of damp-warmth invasion (more dampness than heat), with exterior signs and symptoms.
- *Huang Qin Hua Shi Tang* also clears heat and resolves dampness. It is used primarily for damp-warmth (with equal amounts of dampness and heat) affecting the middle *jiao*.

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to sun-dry the ingredients and grind them into a fine powder. Take 9g of the powder per dose with boiled water. This formula is also given in pill form, and is prepared by mixing the powdered herbs with *Shen Qu* (Massa Fermentata) to form pills. Take 1 pill [9g] per dose with boiled water. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Resolves dampness and dissolves turbidity
2. Clears heat and eliminates toxins

CLINICAL MANIFESTATIONS

Damp-warmth febrile disorder or epidemic diseases affecting the *qi* (energy) level: fever, lethargy, chest oppression, abdominal fullness, soreness of the extremities, sore throat, swelling of the lower cheeks, yellow discoloration of the skin, vomiting, diarrhea, thirst, scanty, dark, turbid urine, and a pale and white, a thick and greasy, or a dry and yellow tongue coating.

CLINICAL APPLICATIONS

Hepatitis, icteric infectious hepatitis, cholecystitis, jaundice, fever, enteric fever, encephalitis, gastritis, stomatitis, laryngopharyngitis, acute gastroenteritis, pyelonephritis, and leptospirosis.

EXPLANATION

Gan Lu Xiao Du Dan (Sweet Dew Special Pill to Eliminate Toxin) treats febrile disorder or epidemic diseases affecting the *qi* (energy) level. Warmth and dampness (equal amounts of each) may each intensify the severity of the other, causing fever, lethargy, and soreness of the extremities. Damp-warmth can cause qi stagnation, leading to chest oppression, abdominal fullness, vomiting or diarrhea. Furthermore, damp-warmth may rise upward and cause sore throat and swelling of the lower cheeks. It may also travel downward to produce scanty, dark, turbid urine; and travel outward to the skin to cause yellow discoloration. Lastly, a pale and white tongue coating may be apparent if the patient is weak and the qi is severely deficient; a thick and greasy tongue coating may be apparent if the patient has severe damp accumulation; and a dry and yellow tongue coating indicates of excess heat.

This formula contains *Hua Shi* (Talcum) to clear damp-heat, *Yin Chen* (Herba Artemisiae Scopariae) to dispel damp-heat and drain the yellow discoloration of the skin, and *Huang Qin* (Radix Scutellariae) to dry dampness and eliminate heat-toxins. *Shi Chang Pu* (Rhizoma Acori Tatarinowii), *Dou Kou* (Fructus Amomi Rotundus), and *Huo Xiang* (Herba Agastaches) are acrid and aromatic herbs that resolve dampness and turbidity and activate qi circulation. *She Gan* (Rhizoma Belamcandae), *Bo He*

Gān Lù Xiāo Dú Dān (Sweet Dew Special Pill to Eliminate Toxin)

Gan Lu Xiao Du Dan (Sweet Dew Special Pill to Eliminate Toxin)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Damp-warmth febrile disorder or epidemic diseases affecting the <i>qi</i> (energy) level	<ul style="list-style-type: none"> • Fever, lethargy, and soreness of the extremities: presence of damp-warmth • Chest oppression, abdominal fullness, vomiting or diarrhea: qi stagnation due to damp-warmth accumulation • Sore throat and swelling of the lower cheeks: damp-warmth traveling upward • Scanty, dark turbid urine: damp-warmth traveling downward • Yellow discoloration of the skin: damp-warmth traveling outward 	<ul style="list-style-type: none"> • Resolves dampness and turbidity • Clears heat and eliminates toxins 	<ul style="list-style-type: none"> • <i>Hua Shi</i> (Talcum), <i>Yin Chen</i> (Herba Artemisiae Scopariae), and <i>Huang Qin</i> (Radix Scutellariae) clear heat, dry dampness, and eliminate toxins. • <i>Shi Chang Pu</i> (Rhizoma Acori Tatarinowii), <i>Dou Kou</i> (Fructus Amomi Rotundus), and <i>Huo Xiang</i> (Herba Agastaches) resolve dampness and turbidity and activate qi circulation. • <i>She Gan</i> (Rhizoma Belamcandae), <i>Bo He</i> (Herba Menthae) and <i>Chuan Bei Mu</i> (Bulbus Fritillariae Cirrhosae) lower Lung qi and relieve soreness and swelling. • <i>Mu Tong</i> (Caulis Akebiae) clears damp-heat through diuresis. • <i>Lian Qiao</i> (Fructus Forsythiae) clears heat and eliminates toxins.

(Herba Menthae) and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) lower Lung qi and relieve sore throat. *Mu Tong* (Caulis Akebiae) helps *Hua Shi* (Talcum) and *Yin Chen* (Herba Artemisiae Scopariae) clear damp-heat through diuresis; and *Lian Qiao* (Fructus Forsythiae) helps *Huang Qin* (Radix Scutellariae) clear heat and eliminate toxins.

MODIFICATIONS

- With prominent signs of jaundice, add *Zhi Zi* (Fructus Gardeniae) and *Da Huang* (Radix et Rhizoma Rhei).
- With severe sore throat, add *Shan Dou Gen* (Radix et Rhizoma Sophorae Tonkinensis) and *Ban Lan Gen* (Radix Isatidis).
- With fever, add *Ku Shen* (Radix Sophorae Flavescentis) and *Huang Lian* (Rhizoma Coptidis).
- For cholecystitis, add *Jin Qian Cao* (Herba Lysimachiae).
- For pyelonephritis, add *Qu Mai* (Herba Dianthi), *Bian Xu* (Herba Polygoni Avicularis), *Bai Mao Gen* (Rhizoma Imperatae), *Da Ji* (Herba Cirsii Japonici), *Xiao Ji* (Herba Cirsii), and *Shi Wei* (Folium Pyrrosiae).
- For infectious hepatitis, increase the dose of *Yin Chen* (Herba Artemisiae Scopariae), add *Zhi Zi* (Fructus Gardeniae), *Huang Bo* (Cortex Phellodendri Chinensis), and *Da Huang* (Radix et Rhizoma Rhei).

CAUTIONS / CONTRAINDICATIONS

- *Gan Lu Xiao Du Dan* should be used with caution in cases of damp-heat with underlying yin and body fluid deficiencies.¹
- Avoid eating foods that are raw, cold, spicy, pungent, oily, or greasy while taking this formula.²

PHARMACOLOGICAL EFFECTS

1. **Antipyretic:** Administration of *Gan Lu Xiao Du Dan* via oral ingestion in rats was associated with reduced body temperature in both normal subjects and those with artificially-induced fever. The duration of action was approximately 2 hours.³
2. **Hepatoprotective:** Use of *Gan Lu Xiao Du Dan* had protective effects against liver damage induced by carbon tetrachloride. The formula was administered as an oral decoction for a total of 12 days.⁴

CLINICAL STUDIES AND RESEARCH

1. **Gastritis:** Use of modified *Gan Lu Xiao Du Dan* was associated with 91% effectiveness in treating 66 patients with gastritis characterized by damp-heat. Of 66 patients, 51 had complete recovery, 5 had significant improvement, 4 had slight improvement, and 6 had no effect.⁵
2. **Laryngopharyngitis:** One study reported marked success using *Gan Lu Xiao Du Dan* to treat both acute and chronic laryngopharyngitis. Of 58 patients, the study reported complete recovery in 30 cases and significant improvement in 28 cases.⁶
3. **Stomatitis:** One study reported complete recovery from recurrent stomatitis using *Gan Lu Xiao Du Dan* to treat ulcers, and upon healing, using *Yu Ping Feng San* (Jade Windscreen Powder) to prevent recurrence.⁷
4. **Hepatitis:** According to one study, 26 infants with acute infectious hepatitis were treated with modified *Gan Lu Xiao Du Dan* with marked effects. The treatment protocol was to administer the herbs in decoction, with duration of treatment up to 5 weeks. Clinical improvement

Gān Lù Xiāo Dú Dān (Sweet Dew Special Pill to Eliminate Toxin)

included relief of jaundice, decrease of liver enzyme levels, reduction of hepatomegaly, and improved appetite.⁸ Another study reported marked success treating 182 cases of acute icteric jaundice in children using *Gan Lu Xiao Du Dan* plus *Chai Hu* (Radix Bupleuri), *Fo Shou* (Fructus Citri Sarcodactylis), and *Yu Jin* (Radix Curcumae).⁹

5. **Fever:** One study reported 94.8% effectiveness using modified *Gan Lu Xiao Du Dan* to treat 78 patients with fever due to infectious disorders. Clinical manifestations included chills, fever, resolution of chills but not fever after perspiration, headache, feeling of heaviness in the head, fatigue, and loose stools. In addition to *Gan Lu Xiao Du Dan*, modifications included addition of *Yi Yi Ren* (Semen Coicis) and *Ban Xia* (Rhizoma Pinelliae) for excess dampness; and *Shi Gao* (Gypsum Fibrosum) for high fever. Of 78 patients, the study reported significant improvement in 31 cases, improvement in 43 cases, and no effect in 4 cases.¹⁰
6. **Encephalitis:** One study reported complete recovery from encephalitis in 13 of 16 patients using modified *Gan Lu Xiao Du Dan*. Modifications were made based on the individual condition of the patients. For early stage of encephalitis with fever, gradual onset of symptoms, presence of dampness, and greasy tongue coating, *She Gan* (Rhizoma Belamcandae) and *Lian Qiao* (Fructus Forsythiae) were removed, and *Dan Dou Chi* (Semen Sojae Praeparatum) and *Ku Xing Ren* (Semen Armeniacae Amarum) were added to the herbal formula. For middle stage of encephalitis with the disease migrating to the interior, and dampness turning into heat, with symptoms such as a bitter taste in the mouth, restlessness, and a red tongue body with yellow tongue coating, *Bo He* (Herba Menthae), *She Gan* (Rhizoma Belamcandae) and *Bei*

Mu (Bulbus Fritillariae) were removed, and *Huang Lian* (Rhizoma Coptidis), *Zhi Zi* (Fructus Gardeniae) and a larger dose of *Huang Qin* (Radix Scutellariae) were added. For late stage of encephalitis, with restlessness and muscle spasms, *She Gan* (Rhizoma Belamcandae), *Bo He* (Herba Menthae) and *Mu Tong* (Caulis Akebiae) were removed, and *Yu Jin* (Radix Curcumae) was added. Lastly, drugs such as dexamethasone were given if necessary.¹¹

AUTHORS' COMMENTS

San Ren Tang (Three-Nut Decoction) and *Gan Lu Xiao Du Dan* both treat damp-warmth syndrome affecting the *qi* (energy) level.

- *San Ren Tang* treats early stage damp-warmth with more dampness than heat.
- *Gan Lu Xiao Du Dan* treats warmth and dampness (equal amounts of each) with the presence of heat-toxins.

Líán Pò Yǐn (Coptis and Magnolia Bark Decoction)

連樸飲 连朴饮

Pinyin Name: *Lian Po Yin*

Literal Name: Coptis and Magnolia Bark Decoction

Alternate Name: Coptis and Magnolia Bark Combination

Original Source: *Huo Luan Lun* (Discussion of Sudden Turmoil Disorders) by Wan Shi-Xiong in 1862

COMPOSITION

<i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>zhi</i> (prepared)	6g
<i>Huang Lian</i> (Rhizoma Coptidis), <i>chao</i> (dry-fried) with ginger juice	3g
<i>Zhi Zi</i> (Fructus Gardeniae), <i>chao jiao</i> (dry-fried to burnt)	9g
<i>Dan Dou Chi</i> (Semen Sojae Praeparatum), <i>chao</i> (dry-fried)	9g
<i>Shi Chang Pu</i> (Rhizoma Acori Tatarinowii)	3g
<i>Ban Xia</i> (Rhizoma Pinelliae), <i>zhi</i> (prepared)	3g
<i>Lu Gen</i> (Rhizoma Phragmitis)	60g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to prepare the ingredients as a decoction and take it while warm.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and resolves dampness
2. Regulates qi and harmonizes the middle *jiao*

CLINICAL MANIFESTATIONS

Accumulation of dampness and heat: excessive vomiting and diarrhea in sudden turmoil disorder, chest and epigastric distention and oppression, dark, scanty urine, and a yellow, greasy tongue coating.

CLINICAL APPLICATIONS

Gastrointestinal disorders, such as superficial gastritis, gastritis, duodenal ulcer, acute gastroenteritis, bacterial dysentery, and stomach influenza.

EXPLANATION

Lian Po Yin (Coptis and Magnolia Bark Decoction) was originally designed to treat severe vomiting and diarrhea associated with sudden turmoil disorder characterized by accumulation of dampness and heat. Dampness and heat affect the normal ascending and descending functions of the Spleen and Stomach, which causes vomiting and diarrhea. These two pathogens may also cause qi stagnation, resulting in feelings of distention and oppression in the chest and epigastric region. Dark, scanty urine and a yellow, greasy tongue coating indicate dampness and heat in the interior.

This formula contains *Hou Po* (Cortex Magnoliae Officinalis) to regulate qi and resolve dampness. *Huang Lian*

(Rhizoma Coptidis) clears heat and dries dampness. *Zhi Zi* (Fructus Gardeniae) and *Dan Dou Chi* (Semen Sojae Praeparatum) clear stagnant heat in the chest and epigastrium. *Shi Chang Pu* (Rhizoma Acori Tatarinowii), an aromatic herb, dissolves dampness to awaken the Spleen. *Ban Xia* (Rhizoma Pinelliae) dries dampness and lowers the reversed flow of Stomach qi downward. *Lu Gen* (Rhizoma Phragmitis), used at an exceptionally large dose, is especially effective for clearing heat, harmonizing the Stomach, and stopping vomiting.

MODIFICATIONS

- With severe diarrhea, add *Bai Bian Dou* (Semen Lablab Album) and *Yi Yi Ren* (Semen Coicis).
- With diarrhea and rectal tenesmus, add *Mu Xiang* (Radix Aucklandiae) and *Bing Lang* (Semen Arecae).
- With indigestion and food stagnation, add *Shan Zha* (Fructus Crataegi) and *Shen Qu* (Massa Fermentata).
- For conditions with more heat than dampness, add *Huang Qin* (Radix Scutellariae), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *Lian Qiao* (Fructus Forsythiae).

CAUTIONS / CONTRAINDICATIONS

- *Lian Po Yin* treats vomiting and diarrhea caused by sudden turmoil disorder marked by accumulation of damp-heat. It should not be used if the condition is characterized by cold.
- Individuals with severe vomiting and diarrhea may experience dehydration from excessive loss of fluids. Electrolytes and fluids should be replenished accordingly.

CLINICAL STUDIES AND RESEARCH

Gastrointestinal disorders: Use of *Lian Po Yin* was reported effective in treating 39 patients with various

Lián Pò Yīn (Coptis and Magnolia Bark Decoction)

Lian Po Yin (Coptis and Magnolia Bark Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Accumulation of dampness and heat	<ul style="list-style-type: none"> Excessive vomiting and diarrhea: accumulation of dampness and heat affecting the Spleen and Stomach Chest and epigastric distention and oppression: qi stagnation due to accumulation of dampness and heat Dark, scanty urine: dampness and heat traveling down to the lower <i>jiao</i> Yellow, greasy tongue coating: dampness and heat in the interior 	<ul style="list-style-type: none"> Clears heat and resolves dampness Regulates qi and harmonizes the middle <i>jiao</i> 	<ul style="list-style-type: none"> <i>Hou Po</i> (Cortex Magnoliae Officinalis) activates qi and resolves dampness. <i>Huang Lian</i> (Rhizoma Coptidis) clears heat and dries dampness. <i>Zhi Zi</i> (Fructus Gardeniae) and <i>Dan Dou Chi</i> (Semen Sojae Praeparatum) clear stagnant heat in the chest and epigastrium. <i>Shi Chang Pu</i> (Rhizoma Acori Tatarinowii) dissolves dampness to awaken the Spleen. <i>Ban Xia</i> (Rhizoma Pinelliae) dries dampness and guides the reversed flow of Stomach qi downward. <i>Lu Gen</i> (Rhizoma Phragmitis) clears heat, harmonizes the Stomach, and stops vomiting.

types of gastrointestinal disorders (superficial gastritis, gastritis, duodenal ulcers, etc.) characterized by damp-heat affecting the Spleen and Stomach. Of 39 patients, the study reported significant improvement in 29 cases, moderate improvement in 9 cases, and no effect in 1 case. The overall effectiveness was 97.4%.¹

AUTHORS’ COMMENTS

Lian Po Yin is indicated for sudden turmoil disorder caused by accumulation of dampness and heat with symptoms such as excessive vomiting and diarrhea.

The main emphasis of the formula is to treat the cause (dampness and heat) by using herbs to clear heat, resolve dampness, regulate qi circulation, and harmonize the middle *jiao*. The formula does not focus on treating the symptoms (nausea and vomiting) because once dampness and heat are eliminated, all of the other symptoms will be resolved.

Cán Shǐ Tāng (Silkworm Droppings Decoction)

蠶矢湯 蚕矢汤

Pinyin Name: *Can Shi Tang*

Literal Name: Silkworm Droppings Decoction

Original Source: *Huo Luan Lun* (Discussion of Sudden Turmoil Disorders) by Wan Shi-Xiong in 1862

COMPOSITION

<i>Can Sha</i> (Faeces Bombycis)	15g
<i>Mu Gua</i> (Fructus Chaenomelis)	9g
<i>Da Dou Huang Juan</i> (Semen Glycines Germinatum)	12g
<i>Yi Yi Ren</i> (Semen Coicis)	12g
<i>Huang Qin</i> (Radix Scutellariae), <i>chao</i> (dry-fried) with liquor	3g
<i>Huang Lian</i> (Rhizoma Coptidis), <i>chao</i> (dry-fried) with ginger juice	9g
<i>Zhi Zi</i> (Fructus Gardeniae), <i>chao jiao</i> (dry-fried till burnt)	5g
<i>Ban Xia</i> (Rhizoma Pinelliae), <i>zhi</i> (prepared)	3g
<i>Tong Cao</i> (Medulla Tetrapanacis)	3g
<i>Wu Zhu Yu</i> (Fructus Evodiae), <i>pao</i> (blast-fried)	0.9g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook the ingredients with “muddy water” or “yin yang water.” Take the decoction in small sips after it cools down slightly. Today, it is normally prepared as a decoction. Note: “Muddy water” refers to fresh water from the well mixed with a small amount of soil. “Yin yang water” refers to the mixture of cold water from the well and hot water that has been boiled. These types of water had been described to have better effect to harmonize yin and yang, and normalize the ascending and descending qi.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and resolves dampness
2. Separates the clear (pure nutrients) from the turbid

CLINICAL MANIFESTATION

Spasms and cramps caused by sudden turmoil disorder due to damp-heat accumulation: abdominal pain, vomiting and diarrhea, thirst, irritability, restlessness, a yellow, thick, dry tongue coating, and a soggy, rapid pulse.

CLINICAL APPLICATIONS

Acute gastroenteritis, diarrhea, dysentery, and rheumatoid arthritis.

EXPLANATION

Can Shi Tang (Silkworm Droppings Decoction) treats spasms and cramps in sudden turmoil disorder due to damp-heat accumulation. According to traditional Chinese medicine, the Stomach is responsible for guiding the turbid qi downward, while the Spleen raises the clear qi upward. If damp-heat interferes with the normal ascending

and descending functions of the Spleen and Stomach, there will be abdominal pain, vomiting, and diarrhea. Furthermore, damp-heat rising upward leads to thirst and irritability. Lastly, as damp-heat consumes body fluids and excessive vomiting and diarrhea causes loss of body fluids, spasms and cramps occur due to severe loss of body fluids and malnourishment of the muscles. A yellow, thick, dry tongue coating indicates excess heat and loss of body fluids, while a soggy, rapid pulse suggests damp-heat in the interior.

As one of the most effective herbs for treating sudden turmoil disorder, *Can Sha* (Faeces Bombycis) treats vomiting and diarrhea by leading turbidity downward and guiding the pure nutrients upward. *Mu Gua* (Fructus Chaenomelis) dissolves dampness and harmonizes the middle *jiao*. Moreover, the combination of *Can Sha* (Faeces Bombycis) and *Mu Gua* (Fructus Chaenomelis) is effective in relieving muscle spasms and cramps in sudden turmoil disorder. *Da Dou Huang Juan* (Semen Glycines Germinatum) dissolves dampness and raises pure nutrients upward. *Yi Yi Ren* (Semen Coicis) dispels dampness and expels turbidity through urination. *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), and *Zhi Zi* (Fructus Gardeniae) clear heat and dry dampness. *Ban Xia* (Rhizoma Pinelliae) dries dampness and corrects reversed flow of Stomach qi to stop vomiting. *Tong Cao* (Medulla Tetrapanacis) dispels turbidity through urination. *Wu Zhu Yu* (Fructus Evodiae) has a downward-guiding effect to help *Ban Xia* (Rhizoma Pinelliae) redirect the qi; it also assists *Huang Lian* (Rhizoma Coptidis) to clear heat and stop vomiting.

Cán Shǐ Tāng (Silkworm Droppings Decoction)

Can Shi Tang (Silkworm Droppings Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Vomiting and diarrhea due to damp-heat accumulation	<ul style="list-style-type: none">Abdominal pain, vomiting, and diarrhea: damp-heat affecting the Spleen and StomachThirst and irritability: damp-heat rising upwardsSpasms and cramps: loss of body fluidsYellow, thick, dry tongue coating: heat consuming body fluidsSoggy, rapid pulse: damp-heat in the interior	<ul style="list-style-type: none">Clears heat and resolves dampnessSeparates the clear (pure nutrients) from the turbid	<ul style="list-style-type: none">Can Sha (Faeces Bombycis) leads turbidity downward and guides the pure nutrients upward to treat vomiting and diarrhea.Mu Gua (Fructus Chaenomelis) dissolves dampness and harmonizes the middle jiao.Da Dou Huang Juan (Semen Glycines Germinatum) dissolves dampness and raises up pure nutrients.Yi Yi Ren (Semen Coicis) dispels dampness and expels turbidity through urination.Huang Qin (Radix Scutellariae), Huang Lian (Rhizoma Coptidis) and Zhi Zi (Fructus Gardeniae) clear heat and dry dampness.Ban Xia (Rhizoma Pinelliae) dries dampness and stops vomiting.Tong Cao (Medulla Tetrapanacis) dispels turbidity through urination.Wu Zhu Yu (Fructus Evodiae) guides the formula downward.

CAUTIONS / CONTRAINDICATIONS

- Can Shi Tang treats vomiting and diarrhea in sudden turmoil disorder due to damp-heat accumulation. It should not be used if the condition is characterized by cold.
- Individuals with severe vomiting and diarrhea may experience dehydration from excessive loss of fluids. Electrolytes and fluids should be replenished accordingly.
- For individuals with nausea and vomiting, this formula may be given in room-temperature decoction to minimize symptoms.

AUTHORS’ COMMENTS

- Lian Po Yin (Coptis and Magnolia Bark Decoction) and Can Shi Tang both treat sudden turmoil disorder characterized by damp-heat accumulation.
- Lian Po Yin emphasizes harmonizing the Stomach and relieving vomiting and diarrhea.
 - Can Shi Tang focuses more on alleviating severe spasms and cramps.

Bā Zhèng Sǎn (Eight-Herb Powder for Rectification)

八正散

Pinyin Name: *Ba Zheng San*

Literal Name: Eight-Herb Powder for Rectification

Alternate Names: *Pa Cheng San*, Dianthus Formula, Eight Corrections Powder

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Mu Tong</i> (Caulis Akebiae)	480g [9g]
<i>Qu Mai</i> (Herba Dianthi)	480g [9g]
<i>Bian Xu</i> (Herba Polygoni Avicularis)	480g [9g]
<i>Hua Shi</i> (Talcum)	480g [9g]
<i>Che Qian Zi</i> (Semen Plantaginis)	480g [9g]
<i>Zhi Zi</i> (Fructus Gardeniae)	480g [9g]
<i>Da Huang</i> (Radix et Rhizoma Rhei), <i>wei</i> (roasted), <i>qie</i> (sliced) and <i>bei</i> (stone-baked)	480g [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	480g [9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text advises to grind equal amounts of the ingredients into a fine powder. Cook 6g of the powder with *Deng Xin Cao* (Medulla Junci) in 1 bowl of water until the liquid is reduced to 70% volume. Take the warm, strained decoction after meals and before bedtime. For children, reduce the dose accordingly. Today it is ground into powder and taken 6-9g per dose. This formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and sedates fire
2. Regulates water circulation and relieves *lin zheng* (dysuria syndrome)

CLINICAL MANIFESTATIONS

Downward flow of damp-heat to the lower *jiao*: *re lin* (heat dysuria) syndrome, *xue lin* (bloody dysuria) syndrome, turbid and red-colored urine, painful sensation during urination, scanty drips of urine or anuria in severe cases, lower abdominal pain and fullness, dry mouth and throat, a yellow, greasy tongue coating, and a slippery, rapid pulse.

CLINICAL APPLICATIONS

Urinary tract infection, dysuria, urethritis, cystitis, pyelonephritis, nephritis, glomerulonephritis, pyonephritis, uroschisis, urolithiasis, prostatic hypertrophy, prostatitis, and gout.

EXPLANATION

Ba Zheng San (Eight-Herb Powder for Rectification) treats the downward flow of damp-heat to the lower

jiao. Stagnant damp-heat in the Urinary Bladder causes various urinary disorders, such as *re lin* (heat dysuria), *xue lin* (bloody dysuria), uroschisis, and many others as listed above. Heat in the interior consumes body fluids and causes dry mouth and throat. The tongue and pulse presentations indicate damp-heat in the body.

In this formula, *Mu Tong* (Caulis Akebiae), *Qu Mai* (Herba Dianthi), *Bian Xu* (Herba Polygoni Avicularis), *Hua Shi* (Talcum), and *Che Qian Zi* (Semen Plantaginis) induce urination, relieve dysuria, and clear damp-heat. *Zhi Zi* (Fructus Gardeniae) sedates damp-heat in all three *jiaos*. *Da Huang* (Radix et Rhizoma Rhei) purges heat and sedates fire. *Deng Xin Cao* (Medulla Junci) leads the heat down and out through urination. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs and relieves pain.

MODIFICATIONS

- For *xue lin* (bloody dysuria), add *Xiao Ji* (Herba Cirsii) and *Bai Mao Gen* (Rhizoma Imperatae).
- For *shi lin* (stone dysuria), add *Jin Qian Cao* (Herba Lysimachiae) and *Hai Jin Sha* (Spora Lygodii).
- For *gao lin* (cloudy dysuria), add *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) and *Shi Chang Pu* (Rhizoma Acori Tatarinowii).
- For *shi-re lin* (damp-heat dysuria) with severe burning sensations and dark yellow urine, add *Huang Bo* (Cortex Phellodendri Chinensis), *Jin Yin Hua* (Flos Lonicerae Japonicae), *Pu Gong Ying* (Herba Taraxaci), *Bai Hua She She Cao* (Herba Hedyotis), and *Zi Hua Di Ding* (Herba Violae).
- With oliguria, add *Yan Hu Suo* (Rhizoma Corydalis) and *Zhi Qiao* (Fructus Aurantii).

Bā Zhèng Sǎn (Eight-Herb Powder for Rectification)

Ba Zheng San (Eight-Herb Powder for Rectification)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Downward flow of damp-heat to the lower <i>jiao</i>	<ul style="list-style-type: none">• Dysuria or anuria, urination with burning sensations or pain, turbid and red-colored urine, or scanty drips of urine: damp-heat in the Urinary Bladder• Dry mouth and throat: damp-heat consuming body fluids• Yellow, greasy tongue coating and a slippery, rapid pulse: damp-heat in the interior	<ul style="list-style-type: none">• Clears heat and sedates fire• Regulates water circulation and relieves <i>lin zheng</i> (dysuria syndrome)	<ul style="list-style-type: none">• <i>Mu Tong</i> (Caulis Akebiae), <i>Qu Mai</i> (Herba Dianthi), <i>Bian Xu</i> (Herba Polygoni Avicularis), <i>Hua Shi</i> (Talcum), and <i>Che Qian Zi</i> (Semen Plantaginis) induce urination, relieve dysuria, and clear damp-heat.• <i>Zhi Zi</i> (Fructus Gardeniae) sedates damp-heat in all three <i>jiaos</i>.• <i>Da Huang</i> (Radix et Rhizoma Rhei) purges heat and sedates fire.• <i>Deng Xin Cao</i> (Medulla Junci) leads the heat down and out through urination.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs and relieves pain.

- With more pain and burning sensations during urination, add *Huang Lian* (Rhizoma Coptidis) and *Di Huang* (Radix Rehmanniae).
- With more fullness and distention in the lower abdominal region, add *Wu Yao* (Radix Linderae) and *Chuan Lian Zi* (Fructus Toosendan).
- With edema, add *Fu Ling Pi* (Cortex Poria) and *Ze Xie* (Rhizoma Alismatis).

proteus, *Bacillus paratyphosus*, *Bacillus dysenteriae*, *Staphylococcus aureus*, and others.¹

CLINICAL STUDIES AND RESEARCH

1. **Lin zheng (dysuria syndrome):** Modified *Ba Zheng San* was used successfully to treat *lin zheng* (dysuria syndrome) infections transmitted via sexual intercourse. The herbal treatment included *Tu Fu Ling* (Rhizoma Smilacis Glabrae) 30g, *Hua Shi* (Talcum) 30g, *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) 20g, *Cang Zhu* (Rhizoma Atractylodis) 15g, *Huang Bo* (Cortex Phellodendri Chinensis) 15g, *Che Qian Zi* (Semen Plantaginis) 15g, *Mu Tong* (Caulis Akebiae) 10g, *Bian Xu* (Herba Polygoni Avicularis) 10g, *Zhi Zi* (Fructus Gardeniae) 10g, *Da Huang* (Radix et Rhizoma Rhei) 10g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g. Additional modifications were made as needed. The treatment protocol was to administer the decoction in three equally-divided doses, for 3 days per course of treatment. Out of 32 patients, the study reported complete recovery in 18 cases, marked improvement in 13 cases, and no effect in 1 case.²
2. **Urethritis:** Administration of *Ba Zheng San* has been associated with marked effect in numerous studies. In one study, use of modified *Ba Zheng San* in 36 patients showed complete recovery in 20 cases, marked effect in 15 cases, and no effect in 1 case.³ In another study, oral administration of modified *Ba Zheng San* in 48 patients resulted in complete recovery in 26 cases, marked improvement in 21 cases, and no effect in one case.⁴
3. **Urinary tract infection:** Ninety-seven patients with urinary tract infection were treated with good results using *Ba Zheng San*. Clinical presentations included frequent urination, urinary urgency, dysuria, low back

CAUTIONS / CONTRAINDICATIONS

- *Ba Zheng San* contains many strong herbs that are bitter and cold. It should be used with caution during pregnancy. It is not suitable for patients with weakness or generalized deficiencies since these herbs may cause weakness, light-headedness, and a decline in the overall constitution of the patient. This formula should be discontinued when the desired effects are achieved. Long-term use of this formula is contraindicated.
- Patients with a sensitive gastrointestinal tract may wish to take *Ba Zheng San* without *Da Huang* (Radix et Rhizoma Rhei) since *Da Huang* (Radix et Rhizoma Rhei) may cause diarrhea and discomfort.
- *Ba Zheng San* is formulated to treat *re lin* (heat dysuria), *xue lin* (bloody dysuria), and uroschisis. This formula should be modified accordingly (see Modifications) prior to its use for other types of *lin zheng* (dysuria syndrome). It is contraindicated in *gao lin* (cloudy dysuria), *qi lin* (qi dysuria), and *lao lin* (fatigue dysuria) unless modified accordingly.

PHARMACOLOGICAL EFFECTS

Antibacterial: *Ba Zheng San* has been shown in *in vitro* studies to have an inhibitory effect against *E. coli*, *Bacillus*

Bā Zhèng Sǎn (Eight-Herb Powder for Rectification)

pain, and fever. The study reported 96.91% success, with complete recovery in 76 cases, moderate improvement in 18 cases, and no effect in 3 cases.⁵

4. **Pyelonephritis:** Administration of modified *Ba Zheng San* was associated with a 88.5% success in female patients with pyelonephritis. Out of 67 cases, the study reported complete recovery in 54 cases, improvement in 5 cases, and no effect in 8 cases.⁶
5. **Nephritis:** Administration of *Ba Zheng San* was shown to have therapeutic results when used to treat acute nephritis. Out of 11 cases, there was complete recovery in 4 cases, marked improvement in 5 cases, and slight improvement in 2 cases. Immediate improvements included alleviation of edema and proteinuria. Kidney function was restored to normal in most cases.⁷
6. **Urinary stones:** Administration of *Ba Zheng San* contributed to successful passage of urinary stones in 21 of 34 patients. The treatment protocol was to use a large dose of *Ba Zheng San* plus *Di Long* (*Pheretima*), *Ji Nei Jin* (*Endothelium Corneum Gigeriae Galli*), and *Hu Po* (*Succinum*). The patients were instructed to continue taking the herbs until the successful passage of stones. The duration of treatment varied from 3 to 108 days, with an average of 42.2 days.⁸
7. **Prostatic hypertrophy:** Administration of *Ba Zheng San* was associated with 89.3% effectiveness in treating geriatric men with prostatic hypertrophy. Out of 28 patients, the study showed recovery in 8 cases, marked effect in 12 cases, improvement in 5 cases, and no results in 3 cases.⁹
8. **Gout:** Modified *Ba Zheng San* was used to treat 15 patients with gout. For individuals with abnormal liver function, the herbal formula added *Yin Chen* (*Herba Artemisiae Scopariae*) 30g, *Chai Hu* (*Radix Bupleuri*) 10g, *Chi Shao* (*Radix Paeoniae Rubra*) 15g, *Bai Shao* (*Radix Paeoniae Alba*) 15g, and *Wu Wei Zi* (*Fructus Schisandrae Chinensis*) 10g. After one course of treatment, all patients showed varying decreases in plasma uric acid levels. Out of 15 patients, 9 had normal levels of uric acid and 6 had over 30% reduction. All patients had improvement of pain.¹⁰
9. **Edema during pregnancy:** Administration of modified *Ba Zheng San* for 14-50 days was effective in 33 out of 36 pregnant women with edema.¹¹ Note: *Ba Zheng San* must be used with caution during pregnancy as it contains many strong herbs that are bitter and cold.

Fu Fang Ba Zheng San (Revised Eight-Herb Powder) is based on the principles and ingredients of two classic formulas: *Ba Zheng San* (Eight-Herb Powder for Rectification) to clear heat and sedate fire in the lower *jiao*, and *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver) to drain damp-heat in the Liver and Gallbladder channels. Clinically, this formula treats a wide variety of infectious and inflammatory conditions such as vaginitis, pelvic inflammatory disease, genito-urinary infections, pyelonephritis, urinary tract infection, and cystitis.

Ze Xie (Rhizoma *Alismatis*)

San Jin Pai Shi Tang (Three Gold Decoction to Expel Stone) clears heat and promotes normal urination. It is most effective in treating *shi lin* (stone dysuria) with painful urination. Clinical applications include treatment of kidney and urinary stones.

AUTHORS' COMMENTS

Ba Zheng San is the representative formula for the treatment of damp-heat in the lower *jiao*. The key signs and symptoms include frequent urination, painful sensations during urination, turbid and dark urine, a red tongue body with a yellow, greasy coating, and a slippery, rapid pulse.

According to Dr. Chang Wei-Yen, *Ba Zheng San* can be combined with other formulas and herbs to treat different conditions:

- For nephritis and glomerulonephritis, combine *Ba Zheng San* with *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), *Shui Ding Xiang* (Herba *Ludwigiae Prostratae*), and *Xian Feng Cao* (Herba *Bidentis*). For chronic nephritis, add *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia).
- For glaucoma and increased pressure in the eyes, combine *Ba Zheng San* with *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), *Ma Bian Cao* (Herba *Verbenae*), *Qian Li Guang* (Herba *Senecionis Scandens*), *Hu Zhang* (Rhizoma et Radix *Polygoni Cuspidati*), and *Hu Yao Huang* (Herba *Leucas Mollissimae*).
- For gout and high uric acid, combine *Ba Zheng San* with *Wan Dian Jin* (Radix *Ilicis Asprellae*), *Shan Pu Tao* (Radix *Vitis Amurensis*), and *Shui Ding Xiang* (Herba *Ludwigiae Prostratae*).

Wǔ Lín Sǎn (Five-Ingredient Powder for Painful Urinary Dysfunction)

五淋散

Pinyin Name: *Wu Lin San*

Literal Name: Five-Ingredient Powder for Painful Urinary Dysfunction

Alternate Names: Five-Strangury Formula, Gardenia and Hoelen Formula

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Chi Fu Ling</i> (Poria Rubra)	180g [9g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	150g [7g]
<i>Chi Shao</i> (Radix Paeoniae Rubra)	600g [15g]
<i>Zhi Zi</i> (Fructus Gardeniae)	600g [15g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	150g [7g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into a fine powder. Cook 6g of the powder with 1 bowl of water until the liquid is reduced to 80% volume. Take the decoction on an empty stomach before meals. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and cools the blood
2. Regulates water circulation and relieves *lin zheng* (dysuria syndrome)

CLINICAL MANIFESTATIONS

Heat in the Urinary Bladder: *xue lin* (bloody dysuria) with blood in the urine and severe pain upon urination; and cloudy urine with a feeling of sandy particles in the urine.

CLINICAL APPLICATIONS

Urethritis, cystitis, urolithiasis, and gonorrhea.

EXPLANATION

Wu Lin San (Five-Ingredient Powder for Painful Urinary Dysfunction) clears heat, cools the blood, and promotes normal urination. It treats *xue lin* (bloody dysuria) and *re lin* (heat dysuria) syndromes characterized by heat in the Urinary Bladder, with symptoms such as hematuria, dysuria, or cloudy urine.

In this formula, *Chi Fu Ling* (Poria Rubra) clears heat and promotes urination. *Dang Gui* (Radix Angelicae Sinensis) and *Chi Shao* (Radix Paeoniae Rubra) nourish the blood and moisten dryness. *Zhi Zi* (Fructus Gardeniae) clears heat and cools the blood. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) relieves pain and harmonizes the formula.

MODIFICATIONS

- For *xue lin* (bloody dysuria), add *Xiao Ji* (Herba Cirsii), *Mo Han Lian* (Herba Ecliptae), and *Bai Mao Gen* (Rhizoma Imperatae).
- For *re lin* (heat dysuria), add *Huang Lian* (Rhizoma Coptidis).
- For *shi lin* (stone dysuria), add *Hai Jin Sha* (Spora Lygodii), *Jin Qian Cao* (Herba Lysimachiae), and *Shi Wei* (Folium Pyrrosiae).
- For *lin zheng* (dysuria syndrome) with qi deficiency in elderly patients, add *Ren Shen* (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), and *Sheng Ma* (Rhizoma Cimicifugae).
- For *lin zheng* (dysuria syndrome) with blood stagnation, add *Tao Ren* (Semen Persicae), *Mu Dan Pi* (Cortex Moutan), *Yan Hu Suo* (Rhizoma Corydalis), and *Hu Po* (Succinum).
- With thirst due to heat and fire, add *Hua Shi* (Talcum) and *Shi Gao* (Gypsum Fibrosum).
- With jaundice, add *Yin Chen* (Herba Artemisiae Scopariae) and *Huang Qin* (Radix Scutellariae).

Qing Re Tong Lin Tang (Clear Heat to Unblock Dysuria Decoction) treats *lin zheng* (dysuria syndrome) characterized by heat, blood stagnation, and underlying deficiency and weakness. It contains herbs to promote normal urination, clear heat from the lower *jiao*, activate blood circulation, and tonify the blood. Clinically, this formula is commonly used to treat enlarged prostate with incontinence, frequent urination, or painful urination.

AUTHORS’ COMMENTS

Ba Zheng San (Eight-Herb Powder for Rectification) and *Wu Lin San* both clear damp-heat from the Urinary Bladder to treat *re lin* (heat dysuria) and *xue lin* (bloody dysuria).

- *Ba Zheng San*, with its heat-clearing and damp-dispelling actions, is more suitable for treating *re lin* (heat dysuria) syndrome.
- *Wu Lin San*, stronger in clearing heat and cooling the blood, is more suitable for *xue lin* (bloody dysuria) syndrome.

Wu Lin San (Five-Ingredient Powder for Painful Urinary Dysfunction) and *Wu Ling San* (Five-Ingredient Powder with Poria) have similar pinyin names, but different functions.

- *Wu Lin San* contains five herbs to treat *lin zheng* (dysuria syndrome).
- *Wu Ling San* contains five herbs, with *Fu Ling* (Poria) as a main ingredients, to relieve water accumulation.

Section 3

利水渗湿剂

— Water-Regulating and Damp-Resolving Formulas

Wǔ Líng Sǎn (Five-Ingredient Powder with Poria)

五苓散

Pinyin Name: *Wu Ling San***Literal Name:** Five-Ingredient Powder with Poria**Alternate Names:** Five-Ling Formula, Poria Powder with Five Herbs, Hoelen Five Herb Formula**Original Source:** *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty**COMPOSITION**

<i>Ze Xie</i> (Rhizoma Alismatis)	3.75g [15g]
<i>Zhu Ling</i> (Polyporus)	2.25g [9g]
<i>Fu Ling</i> (Poria)	2.25g [9g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	2.25g [9g]
<i>Gui Zhi</i> (Ramulus Cinnamomi)	1.5g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into powder and take 1 spoonful [6g] with boiled water three times daily. The source text recommends drinking plenty of warm water to promote sweating. Today, it is normally taken in powder form, 3-6g per dose. This formula may also be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Regulates water circulation and dispels dampness
2. Warms yang and disperses water accumulation

CLINICAL MANIFESTATIONS

1. Exterior syndrome accompanied by accumulation of water and dampness in the interior: headache, fever, irritability, thirst with a strong desire to drink but vomiting immediately after drinking, urinary difficulty, white tongue coating, and a superficial pulse.
2. Accumulation of water and dampness in the interior: edema, loose stools, urinary difficulty, vomiting, and diarrhea due to sudden turmoil disorder.
3. *Tan yin* (phlegm retention): abdominal pulsation below the umbilicus, vomiting of foamy saliva, vertigo, shortness of breath, and possibly coughing.

CLINICAL APPLICATIONS

Acute and chronic nephritis, renal failure, gestational hypertension, urolithiasis, urinary tract infection, liver cirrhosis and ascites, acute enteritis with diarrhea, hydrocephalus, and Meniere's syndrome.

EXPLANATION

Wu Ling San (Five-Ingredient Powder with Poria), as originally used in *Shang Han Lun* (Discussion of Cold-Induced Disorders), treats water accumulation syndrome caused by disorders of both the *taiyang* channel and the *taiyang* organ. This syndrome begins with *taiyang* exterior (channel) syndrome, and, if left untreated, the pathogen may travel via the *taiyang* channel to affect the *taiyang* organ of the Urinary Bladder. At this point, the patient can be said to be suffering from both *taiyang* exterior (channel) and interior (organ) syndromes. Because the exterior condition has not been treated, there will still be exterior symptoms, such as headache and fever. Moreover, the pathogenic factors have moved interiorly to the *taiyang* organ of the Urinary Bladder to impair its water-dispersing function. Because fluids have accumulated in the lower *jiao* and are not being properly dispersed, irritability and a strong desire to drink are present. And since there is already fluid accumulation in the body, vomiting may occur after intake of water. The treatment

Wǔ Líng Sǎn (Five-Ingredient Powder with Poria)

Wu Ling San (Five-Ingredient Powder with Poria)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Exterior syndrome accompanied by accumulation of water and dampness in the interior	<ul style="list-style-type: none">• Headache and fever: exterior condition• Urinary difficulty, strong desire to drink with vomiting after drinking: accumulation of water and dampness in the interior• Superficial pulse: exterior condition	<ul style="list-style-type: none">• Regulates water circulation and dispels dampness• Warms yang and disperses water accumulation	<ul style="list-style-type: none">• <i>Ze Xie</i> (Rhizoma Alismatis) induces urination and eliminates water accumulation.• <i>Zhu Ling</i> (Polyporus) and <i>Fu Ling</i> (Poria) strengthen the Spleen, resolve dampness, and eliminate water accumulation.• <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen to dispel water and dampness.• <i>Gui Zhi</i> (Ramulus Cinnamomi) releases the exterior and promotes the flow of yang qi in the interior.

plan for this syndrome is to dispel water accumulation in the interior quickly through diuresis, and to release the *taiyang* syndrome at the exterior.

Ze Xie (Rhizoma Alismatis), the chief herb, directly enters the Urinary Bladder to induce urination and eliminate water accumulation. *Zhu Ling* (Polyporus) and *Fu Ling* (Poria) act as deputy herbs to strengthen the diuretic function of *Ze Xie* (Rhizoma Alismatis). *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen to dispel water and dampness. *Gui Zhi* (Ramulus Cinnamomi) relieves the *taiyang* syndrome with its exterior-releasing action, and promotes the flow of yang qi in the interior to help invigorate the function of the Urinary Bladder.

This formula can also be used to treat edema or urinary difficulty. In addition, since this formula can help the body excrete water through urination, it can also treat the type of diarrhea caused by excessive water or dampness traveling with the feces. The diarrhea stops once the water is separated from the feces and is directed out of the body through urination.

MODIFICATIONS

- With cold and dampness, add *Cang Zhu* (Rhizoma Atractylodis).
- With exterior symptoms, add *Yue Bi Tang* (Maidservant from Yue Decoction).
- With urinary incontinence and *zhong* (central) qi deficiency, add *Dang Shen* (Radix Codonopsis).
- With damp-heat jaundice, add *Yin Chen* (Herba Artemisiae Scopariae).
- With edema due to Spleen deficiency, add *Wu Pi Yin* (Five-Peel Decoction) and *Dang Shen* (Radix Codonopsis).

- With edema due to Kidney yang deficiency, add *Wu Pi Yin* (Five-Peel Decoction) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With edema due to Liver qi stagnation, add *Wu Pi Yin* (Five-Peel Decoction), *Qing Pi* (Pericarpium Citri Reticulatae Viride), and *Mu Xiang* (Radix Aucklandiae).
- With severe edema, add *Da Fu Pi* (Pericarpium Arecae), *Sang Bai Pi* (Cortex Mori), and *Chen Pi* (Pericarpium Citri Reticulatae).
- For diarrhea due to heat, remove *Gui Zhi* (Ramulus Cinnamomi) and add *Che Qian Zi* (Semen Plantaginis) and *Mu Tong* (Caulis Akebiae).
- For diarrhea due to damp-heat, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Yin Chen* (Herba Artemisiae Scopariae).
- For diarrhea due to summer-dampness, add *Huo Xiang* (Herba Agastaches) and *Pei Lan* (Herba Eupatorii).
- For diarrhea due to summer-heat invasion, add *San Wu Xiang Ru Yin* (Mosla Three Decoction).
- With abdominal bloating and distention, add *Hou Po* (Cortex Magnoliae Officinalis) and *Chen Pi* (Pericarpium Citri Reticulatae).
- With thirst due to summer-heat, add *Bai Hu Tang* (White Tiger Decoction).
- With general thirst, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).
- With thirst and constipation, add *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Hua Shi* (Talcum), *Zhi Zi* (Fructus Gardeniae), and *Deng Xin Cao* (Medulla Junci).
- With body aches due to cold and damp accumulation, add *Qiang Huo* (Rhizoma et Radix Notopterygii).

CAUTIONS / CONTRAINDICATIONS

- Because this formula eliminates excess body fluids through the urine, it should not be used for a prolonged period of time.

Wǔ Líng Sǎn (Five-Ingredient Powder with Poria)

- This formula is contraindicated in individuals who have depleted body fluids from profuse perspiration or excessive vomiting or diarrhea, as its use could lead to further loss of body fluids
- *Wu Ling San* is contraindicated in cases of damp-heat accumulation or urinary difficulty due to yin deficiency.
- In order to restore normal water metabolism, the Spleen and Kidney must be tonified if they are deficient, as these two organs regulate water circulation.

PHARMACOLOGICAL EFFECTS

1. **Diuretic:** *Wu Ling San* had a marked diuretic effect in rats 1-2 hours after oral ingestion.¹ Another study reported that intravenous injection of *Wu Ling San* in dogs was associated with increased elimination of urine, sodium, chloride, potassium, and other electrolytes.² Lastly, administration of *Wu Ling San* in healthy adults was associated with 112% increase in urine output without any side effects.³
2. **Antihypertensive:** One study reported a significant and prolonged reduction in blood pressure using a *Wu Ling San* preparation in rats. The mechanism of this antihypertensive effect was attributed to the diuretic and vasodilative actions of the formula. The herbal formula contained the following ingredients: *Zhu Ling* (Polyporus) 9g, *Ze Xie* (Rhizoma Alismatis) 15g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 9g, *Fu Ling* (Poria) 9g, and *Gui Zhi* (Ramulus Cinnamomi) 6g.⁴
3. **Nephroprotective:** Administration of *Wu Ling San* was associated with protecting the kidneys by decreasing plasma levels of blood urea nitrogen (BUN) and creatinine (Cr). This formula was found to also increase urine output, as well as elimination of electrolytes such as sodium, chloride, potassium, calcium, and magnesium.⁵
4. **Hepatoprotective:** *Wu Ling San* has been shown to have a remarkable hepatoprotective effect in mice, especially against alcohol-induced liver damage.⁶
5. **Gestational hypertension:** Use of modified *Wu Ling San* was associated with a 75% success rate in treating hypertension during pregnancy. Of 209 patients, the study reported complete recovery in 156 cases. The treatment protocol was to administer the herbs in decoction daily for 10 days per course of treatment. The herbal formula included *Wu Ling San* plus *Sang Ji Sheng* (Herba Taxilli), *Da Fu Pi* (Pericarpium Arecae), *Mu Gua* (Fructus Chaenomelis), and *Sha Ren* (Fructus Amomi).¹⁰
6. **Urolithiasis:** One study reported marked effect using modified *Wu Ling San* to treat urinary stones. Of 53 patients, 33 successfully passed stones. The duration of treatment varied between 2-50 packs of herbs.¹¹
7. **Liver cirrhosis and ascites:** Use of modified *Wu Ling San* was associated with 89% effectiveness for treatment of 43 patients with liver cirrhosis and ascites. The herbal formula contained *Wu Ling San* plus *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Che Qian Zi* (Semen Plantaginis), *Bai Mao Gen* (Rhizoma Imperatae), *Da Fu Pi* (Pericarpium Arecae), *Dang Gui* (Radix Angelicae Sinensis), and *Chi Shao* (Radix Paeoniae Rubra) given in decoction. 30g of *Da Huang* (Radix et Rhizoma Rhei) were given via rectal enema. Of 43 patients, the study reported complete recovery in 23 cases, improvement in 13 cases, and no effect in 4 cases. The average duration of treatment was 31 days. Information was unavailable on 3 individuals who did not complete the study.¹²
8. **Hydrocephalus:** Use of modified *Wu Ling San* was beneficial in 4 patients with hydrocephalus. The herbal formula was given in decoction, and contained *Fu Ling* (Poria) 15g, *Da Fu Pi* (Pericarpium Arecae) 15g, *Zhu Ling* (Polyporus) 10g, *Ze Xie* (Rhizoma Alismatis) 10g, *Niu Xi* (Radix Achyranthis Bidentatae) 10g, *Che Qian Zi* (Semen Plantaginis) 10g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 5g, and *Gui Zhi* (Ramulus Cinnamomi) 2g.¹³
9. **Meniere's syndrome:** One study reported success using modified *Wu Ling San* to treat 61 patients with Meniere's syndrome. The herbal treatment contained *Wu Ling San* plus *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali), with additional modifications as needed. The overall effectiveness varied from 71.4-96.8%, depending on the traditional Chinese medical diagnosis. Those diagnosed with Spleen and Heart deficiencies were least responsive, while those with phlegm and damp accumulation were most responsive.¹⁴

CLINICAL STUDIES AND RESEARCH

1. **Acute nephritis:** According to one study, 36 of 38 patients with acute nephritis had complete recovery using herbs in decoction. The herbal formula contained *Wu Ling San*, *Bai Mao Gen* (Rhizoma Imperatae) and other herbs as deemed necessary. The study reported resolution of edema in 25 cases within 1-5 days, and 13 cases within 6-10 days. The duration of treatment was 15 days or less in 27 cases, 16-30 days in 9 cases, and over 1 month in 2 cases.⁷
2. **Renal failure:** Modified *Wu Ling San* had good results in treating early stages of renal failure. Out of 20 patients, one study reported a marked improvement in 6 cases

Wǔ Líng Sǎn (Five-Ingredient Powder with Poria)

HERB-DRUG INTERACTION

Selective serotonin reuptake inhibitors (SSRIs): Use of *Wu Ling San* was beneficial in relieving adverse gastrointestinal events such as nausea and dyspepsia associated with the use of SSRIs in 20 patients (17 females and 3 males, between 21 to 74 years of age). After adding this formula to the previous drug regimen, the study reported complete disappearance of nausea and dyspepsia in 9 cases, improvement in 4 cases, slight improvement in 2 cases, and no change in 5 cases. Addition of *Wu Ling San* to SSRIs did not cause any adverse events in the 20 patients.¹⁵

RELATED FORMULAS

Sì Líng Sǎn (Four-Ingredient Powder with Poria)

四苓散

Pinyin Name: *Sì Líng Sǎn*

Literal Name: Four-Ingredient Powder with Poria

Original Source: *Ming Yi Zhi Zhang* (Displays of Enlightened Physicians) by Huang Fu-Zhong in 16th century

<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	9g
<i>Fu Ling</i> (Poria)	9g
<i>Zhu Ling</i> (Polyporus)	9g
<i>Ze Xie</i> (Rhizoma Alismatis)	9g

The source text states to prepare the ingredients as a decoction. *Sì Líng Sǎn* (Four-Ingredient Powder with Poria) is essentially *Wu Ling San* minus *Gui Zhi* (Ramulus Cinnamomi). Its main actions are to regulate water circulation and drain dampness. Clinically, this formula is used to treat interior dampness due to an inappropriate diet (such as excessive intake of dairy, greasy or deep-fried foods), resulting in such symptoms as scanty urine (oliguria) and loose stools.

Bái Máo Gēn Tāng (Imperata Decoction)

白茅根湯

白茅根汤

Pinyin Name: *Bái Máo Gēn Tāng*

Literal Name: Imperata Decoction

Original Source: *Guang An Men Yi Yuan* (Guang An Men Hospital) in 1990

<i>Bai Mao Gen</i> (Rhizoma Imperatae)
<i>Huang Qi</i> (Radix Astragali)
<i>Lu Xian Cao</i> (Herba Pyrolae)

<i>Huang Bo</i> (Cortex Phellodendri Chinensis)
<i>Fu Ling</i> (Poria)

Mu Li (Concha Ostreae)

Jin Ying Zi (Fructus Rosae Laevigatae)

Shi Wei (Folium Pyrosiae)

Bai Mao Gen Tang (Imperata Decoction) treats chronic *lin zheng* (dysuria syndrome) with urinary difficulty or anuria. It contains herbs that clear heat, promote normal urination, and eliminate water accumulation. Clinically, it is used to treat kidney disorders such as chronic nephritis, chronic nephrotic syndrome, and proteinuria.

Fú Líng Tāng (Poria Decoction)

茯苓湯

茯苓汤

Pinyin Name: *Fú Líng Tāng*

Literal Name: Poria Decoction

Original Source: *Guang An Men Yi Yuan* (Guang An Men Hospital) in 1990

<i>Fu Ling</i> (Poria)
<i>Zhu Ling</i> (Polyporus)
<i>Ze Xie</i> (Rhizoma Alismatis)
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)
<i>Sang Bai Pi</i> (Cortex Mori)
<i>Yi Yi Ren</i> (Semen Coicis)
<i>Gui Zhi</i> (Ramulus Cinnamomi)
<i>Hua Shi</i> (Talcum)
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)
<i>Xiang Fu</i> (Rhizoma Cyperi)
<i>He Zi</i> (Fructus Chebulae)
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)

Fu Ling Tang (Poria Decoction) treats edema and urinary difficulty caused by water accumulation. Clinical manifestations include edema, generalized swelling, feelings of heaviness or sluggishness in the body, fatigue, and hypersomnia. This formula contains herbs to strengthen the Spleen, resolve dampness, promote normal urination, and eliminate edema.

AUTHORS' COMMENTS

There are four formulas with similar compositions that regulate water and dispel dampness:

- *Wu Ling San* (Five-Ingredient Powder with Poria) is generally considered the standard formula. It has a dual function to release the exterior syndrome and dispel accumulation of water and dampness in the interior.
- *Sì Líng Sǎn* (Four-Ingredient Powder with Poria) is formulated by removing *Gui Zhi* (Ramulus Cinnamomi) from *Wu Ling San*. It dispels accumulation of water and dampness in the interior, but does not release the exterior.

Wǔ Líng Sǎn (Five-Ingredient Powder with Poria)

- *Wei Ling Tang* (Calm the Stomach and Poria Decoction) combines *Ping Wei San* (Calm the Stomach Powder) and *Wu Ling San*. It dispels dampness and harmonizes the Stomach to treat accumulation of water and dampness in the interior causing abdominal distention and edema.
- *Yin Chen Wu Ling San* (Artemisia Scoparia and Five-Ingredient Powder with Poria) is formulated by adding *Yin Chen* (Herba Artemisiae Scopariae) to *Wu Ling San* to treat damp-heat jaundice (more heat than dampness) with urinary difficulty.

Wèi Líng Tāng (Calm the Stomach and Poria Decoction)

胃苓湯

胃苓汤

Pinyin Name: *Wei Ling Tang*

Literal Name: Calm the Stomach and Poria Decoction

Alternate Names: Weiling Decoction, Stomach-Comforting with Five-Ling Decoction, Magnolia and Hoelen Combination

Original Source: *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) by Zhu Zhen-Heng in 1481

COMPOSITION

<i>Ping Wei San</i> (Calm the Stomach Powder)	3g
<i>Wu Ling San</i> (Five-Ingredient Powder with Poria)	3g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook the ingredients with *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae). Take the decoction on an empty stomach.

CHINESE THERAPEUTIC ACTIONS

Dispels dampness and harmonizes the Stomach

CLINICAL MANIFESTATIONS

External cold damaging the Stomach and Spleen during the late summer and early fall: loose stools containing undigested food, continuous diarrhea, edema, fullness of the abdomen, and dysuria.

CLINICAL APPLICATIONS

Chronic gastritis, gastric neurosis, acute enteritis, diarrhea, ascites, nephritis, nephritic and cardiac edema, urinary retention, and Meniere's syndrome.

EXPLANATION

Wei Ling Tang (Calm the Stomach and Poria Decoction) is composed of *Ping Wei San* (Calm the Stomach Powder) plus *Wu Ling San* (Five-Ingredient Powder with Poria). Thus, this formula harmonizes the Stomach and dispels dampness. Clinically, it is often used for external cold damaging the Stomach and Spleen during the late summer and early fall. Patients in this case may have loose stools containing undigested food, continuous diarrhea, edema, abdominal fullness, and dysuria.

Wèi Líng Tāng (Calm the Stomach and Poria Decoction)

Wei Ling Tang (Calm the Stomach and Poria Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
External cold damaging the Stomach and Spleen	<ul style="list-style-type: none">• Loose stools containing undigested food, thirst, and diarrhea: dampness affecting the Spleen and Stomach• Edema, fullness of the abdomen, and dysuria: obstructed water circulation	<ul style="list-style-type: none">• Dispels dampness• Harmonizes the Stomach	<ul style="list-style-type: none">• <i>Ping Wei San</i> (Calm the Stomach Powder) dries dampness, activates qi circulation, strengthens the Spleen, and harmonizes the Stomach.• <i>Wu Ling San</i> (Five-Ingredient Powder with Poria) warms yang, dispels dampness, and disperses water accumulation

Please refer to *Ping Wei San* (Calm the Stomach Powder) and *Wu Ling San* (Five-Ingredient Powder with Poria) for additional and detailed explanations of these two formulas.

MODIFICATIONS

- With exterior wind-cold, add *Bai Shao* (Radix Paeoniae Alba) and *Chai Hu* (Radix Bupleuri).
- With diarrhea, dysentery, and abdominal pain, add *Xiang Fu* (Rhizoma Cyperi) and *Sha Ren* (Fructus Amomi).
- With vomiting of phlegm and saliva, add *Jie Geng* (Radix Platycodonis) and *Ban Xia* (Rhizoma Pinelliae).

CLINICAL STUDIES AND RESEARCH

1. **Nephritis:** Twenty children with acute nephritis (duration of illness ranged from 5 to 63 days) were treated with marked improvement using modified *Wei Ling Tang*. Clinical presentation of the patients included edema and presence of red blood cells, white blood cells, and protein in the urine. The herbal formula contained *Cang Zhu* (Rhizoma Atractylodis) 6g, *Hou Po* (Cortex Magnoliae Officinalis) 9g, *Zhi Qiao* (Fructus Aurantii) 9g, *Zhu Ling* (Polyporus) 9g, *Ze Xie* (Rhizoma Alismatis) 9g, *Mu Tong* (Caulis Akebiae) 9g, *Che Qian Zi* (Semen Plantaginis) 9g, *Mu Xiang* (Radix Aucklandiae) 1g, *Chen Pi* (Pericarpium Citri Reticulatae) 3g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g, and others as deemed necessary. The study reported satisfactory results in all 20 cases.¹
2. **Meniere’s syndrome:** Modified *Wei Ling Tang* was used in one clinical study to treat 32 patients with Meniere’s syndrome with success. The herbal formula contained *Fu Ling* (Poria) 30g, *Gui Zhi* (Ramulus Cinnamomi) 15g, *Chen Pi* (Pericarpium Citri Reticulatae) 12g, *Cang Zhu* (Rhizoma Atractylodis) 10g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 10g, *Hou Po* (Cortex Magnoliae Officinalis) 10g, *Ze Xie* (Rhizoma Alismatis) 10g, *Zhu*

Ling (Polyporus) 10g, *Ju Hua* (Flos Chrysanthemi) 10g, post-decocted *Gou Teng* (Ramulus Uncariae cum Uncis) 6g, and *Sheng Jiang* (Rhizoma Zingiberis Recens) 3 slices. Additional modifications were made if needed as follows: *Huang Qi* (Radix Astragali) 30g and *Dang Shen* (Radix Codonopsis) 10g for qi deficiency; *Bai Shao* (Radix Paeoniae Alba) 20g and *Dang Gui* (Radix Angelicae Sinensis) 15g for blood deficiency; *Ban Xia* (Rhizoma Pinelliae) 15g and *Zhu Li* (Succus Bambusae) 10 mL for damp and phlegm accumulation; *Fang Feng* (Radix Saposhnikoviae) 10g and *Jing Jie* (Herba Schizonepetae) 10g for aversion to wind; *Zhi Zi* (Fructus Gardeniae) 10g, *Dan Dou Chi* (Semen Sojae Praeparatum) 10g, *Huang Lian* (Rhizoma Coptidis) 10g, and *Long Dan* (Radix et Rhizoma Gentianae) 10g for excess fire. Of 32 patients, the study reported complete recovery in 28 cases and improvement in 4 cases. The duration of treatment ranged from 3 to 15 packs of herbs, with an average of 6 packs of herbs.²

3. **Diarrhea:** *Wei Ling Tang* has been shown in various studies to effectively treat diarrhea. According to one study, use of this formula was associated with 90% effectiveness in 31 children with acute diarrhea.³ In another study, diarrhea due to acute enteritis in 125 patients was treated with complete recovery in 105 cases, significant improvement in 6 cases, moderate improvement in 4 cases, and no effect in 10 cases.⁴

Zhū Líng Tāng (Polyporus Decoction)

豬苓湯
猪苓汤

Pinyin Name: *Zhu Ling Tang*
Literal Name: Polyporus Decoction
Alternate Names: *Chu Ling Tang*, Polyporus Combination
Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Zhu Ling</i> (Polyporus)	3g [9g]
<i>Fu Ling</i> (Poria)	3g [9g]
<i>Ze Xie</i> (Rhizoma Alismatis)	3g [9g]
<i>Hua Shi</i> (Talcum), <i>fen sui</i> (pulverized)	3g [9g]
<i>E Jiao</i> (Colla Corii Asini)	3g [9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook all of the ingredients, except *E Jiao* (Colla Corii Asini), with 4 cups [800 mL] of water until the liquid is reduced to 2 cups [400 mL]. Discard the residue, and completely dissolve *E Jiao* (Colla Corii Asini) in the strained decoction. Take 0.7 cup [140 mL] of the warm decoction three times daily. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

- 1. Regulates water circulation
- 2. Clears heat and nourishes yin

CLINICAL MANIFESTATIONS

- 1. Interlocking of water and heat: dysuria, fever, thirst with a strong desire to drink, irritability, insomnia, with or without coughing, nausea, vomiting, and diarrhea.

- 2. *Xue lin* (bloody dysuria) syndrome: extreme painful urination, difficult urination with dripping of urine, and fullness and pain in the lower abdomen.

CLINICAL APPLICATIONS

Urinary tract infection, urethritis, dysuria, edema, nephritis, cystitis, hematuria, urolithiasis, uroschesis, hydronephrosis, galacturia, and prostatitis.

EXPLANATION

Zhu Ling Tang (Polyporus Decoction) was first introduced in *Shang Han Lun* (Discussion of Cold-Induced Disorders) for treating the condition of interlocking of water and heat. This condition starts as a *taiyang* syndrome at the exterior, and then transforms into a *yangming* or *shaoyang* syndrome and forms heat. This heat, when interlocked with water inside the body, impairs the proper distribution of water. Clinical presentations include

Zhu Ling Tang (Polyporus Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Interlocking of water and heat	<ul style="list-style-type: none">• Dysuria, difficult urination with dribbling of urine, painful urination, and blood in the urine: impaired distribution of water due to interlocking of water and heat• Desire to drink: heat consuming body fluids• Irritability and insomnia: heat disturbing the <i>shen</i> (spirit)• Coughing: interlocking of water and heat affecting the Lung• Nausea and vomiting: interlocking of water and heat affecting the Stomach• Diarrhea: interlocking of water and heat affecting the Large Intestine	<ul style="list-style-type: none">• Regulates water circulation• Clears heat and nourishes yin	<ul style="list-style-type: none">• <i>Zhu Ling</i> (Polyporus), <i>Fu Ling</i> (Poria) and <i>Ze Xie</i> (Rhizoma Alismatis) dispel water accumulation and dampness through urination.• <i>Hua Shi</i> (Talcum) clears heat and relieves dysuria.• <i>E Jiao</i> (Colla Corii Asini) nourishes yin and moistens dryness.

Zhū Líng Tāng (Polyporus Decoction)

dysuria, difficult urination with dribbling of urine, painful urination, and blood in the urine. The interlocking of heat and water also injures the yin and causes thirst with a strong desire to drink, irritability, and insomnia. Lastly, interlocking of water and heat also affects the Lung to cause coughing, the Stomach to cause nausea and vomiting, and the Large Intestine to cause diarrhea.

The treatment plan is to regulate water circulation and dispel dampness through urination, as well as to clear heat and nourish yin. *Zhu Ling* (Polyporus), *Fu Ling* (Poria), and *Ze Xie* (Rhizoma Alismatis) dispel water accumulation and dampness through urination. *Hua Shi* (Talcum) clears heat and relieves dysuria. *E Jiao* (Colla Corii Asini) nourishes yin and moistens dryness. These five herbs have a proper balance to drain water without injuring yin, and to nourish yin without creating more stagnation.

MODIFICATIONS

- For *re lin* (heat dysuria), add *Zhi Zi* (Fructus Gardeniae) and *Che Qian Zi* (Semen Plantaginis), or *Ba Zheng San* (Eight-Herb Powder for Rectification).
- For *xue lin* (bloody dysuria), add *Bai Mao Gen* (Rhizoma Imperatae) and *Xiao Ji* (Herba Cirsii), or *Xiao Ji Yin Zi* (Cirsium Decoction).
- For *shi lin* (stone dysuria), add *Hai Jin Sha* (Spora Lygodii) and *Jin Qian Cao* (Herba Lysimachiae).
- For severe dysuria, add *Mu Tong* (Caulis Akebiae) and *Di Huang* (Radix Rehmanniae).
- With frequent urination, add *Cang Zhu* (Rhizoma Atractylodis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- With insomnia or irritability, add *Hu Po* (Succinum) and *Zhi Zi* (Fructus Gardeniae), or *Qing Xin Lian Zi Yin* (Lotus Seed Decoction to Clear the Heart).
- With restlessness, irritability, and thirst, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).

CAUTIONS / CONTRAINDICATIONS

Zhu Ling Tang primarily regulates water circulation and dispels water accumulation. Although it has a minor effect to nourish yin and moisten dryness, it should not be used in cases of extreme thirst due to severe damage of body fluids, such as from profuse perspiration.¹

PHARMACOLOGICAL EFFECTS

1. **Diuretic:** Administration of *Zhu Ling Tang* at 10 times the normal dose for 1 month was associated with a marked diuretic effect in rats. The study noted that there were no noticeable changes to the electrolyte levels, such as calcium, magnesium, and potassium.^{2,3}

2. **Nephroprotective:** One study reported that *Zhu Ling Tang* given via oral ingestion at 1 g/kg for 12 months was associated with protective and healing effects on the kidneys, and with prolonged life.⁴

3. **Effect on urinary stones:** One study reported that *in vitro* and *in vivo* administrations of *Zhu Ling Tang* corresponded with prevention of urinary stones by reducing struvite crystal formation and increasing the spontaneous discharge of stones in the urine.⁵

CLINICAL STUDIES AND RESEARCH

1. **Edema:** Administration of an herbal extract of *Zhu Ling Tang* to 11 patients at 2.5g per dose, twice daily for 1 month, was associated with marked increase in urination and reduction of edema. There were no significant changes to the blood levels of sodium and potassium.⁶
2. **Hematuria:** Use of modified *Zhu Ling Tang* was associated with 88.2% effectiveness in treating patients with blood in the urine due to various causes. Of 68 patients, the study reported complete recovery in 46 cases, improvement in 14 cases, and no effect in 8 cases.⁷
3. **Urolithiasis:** One study reported 97.1% effectiveness using modified *Zhu Ling Tang* to treat 35 patients with urinary stones. In addition to the base formula, modifications were made by adding *Pu Huang* (Pollen Typhae), *Da Ji* (Herba Cirsii Japonici), *Xiao Ji* (Herba Cirsii), and *Di Long* (Pheretima) for hematuria; and *Bai Shao* (Radix Paeoniae Alba) and *Mu Gua* (Fructus Chaenomelis) for severe colicky pain. The study reported relief of colicky pain within 20 minutes to 7 days. Stones were successfully expelled within 3 to 28 days in 31 of 35 patients.⁸ According to another study, administration of *Zhu Ling Tang* was helpful in reducing the number of days (from an average of 21.5 days to 16.0 days) to successfully eliminate urinary stones.⁹
4. **Uroschesis:** One study reported a marked effect in treating 60 geriatric patients with uroschesis using modified *Zhu Ling Tang*. Modifications included addition of *Rou Gui* (Cortex Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata) for aversion to cold, and soreness and weakness of the lower back and knees; *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali) for soft, weak voice; *Chuan Shan Jia* (Squama Manis) and *Jin Qian Cao* (Herba Lysimachiae) for dysuria with lower abdominal fullness and distention; and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and *Jian Shen Qu* (Massa Fermentata Praeparata) for poor appetite. Most patients were able to resume normal urination within 3-6 packs of herbal treatment. Of 60 patients, the study reported complete recovery in 56 cases, improvement in 3 cases, and no effect in 1 case.¹⁰

Zhū Líng Tāng (Polyporus Decoction)

5. **Hydronephrosis:** One study reported 91.1% effectiveness using modified *Zhu Ling Tang* to treat 45 patients with hydronephrosis. Modifications to the base formula included the addition of *Jin Qian Cao* (Herba *Lysimachiae*), *Hai Jin Sha* (*Spora Lygodii*), *Shi Wei* (*Folium Pyrrosiae*), *Wang Bu Liu Xing* (*Semen Vaccariae*), *Niu Xi* (*Radix Achyranthis Bidentatae*), and *Ji Nei Jin* (*Endothelium Corneum Gigeriae Galli*) for urinary stones; *Mu Tong* (*Caulis Akebiae*) and *Bian Xu* (*Herba Polygoni Avicularis*) for frequent, urgent, and painful urination; *Da Huang* (*Radix et Rhizoma Rhei*) for constipation; *Qian Cao* (*Radix et Rhizoma Rubiae*), *Mo Han Lian* (*Herba Ecliptae*), and *Bai Mao Gen* (*Rhizoma Imperatae*) for hematuria; and *Ze Lan* (*Herba Lycopi*), *Yi Mu Cao* (*Herba Leonuri*), *Gui Zhi* (*Ramulus Cinnamomi*), and others for prostatic hypertrophy. Of 45 patients, the study reported complete recovery in 38 cases, improvement in 3 cases, and no effect in 4 cases.¹¹
6. **Galacturia:** All 10 patients with galacturia had complete recovery when treated using an herbal formula that contained *Zhu Ling Tang* plus *Huang Bo* (*Cortex Phellodendri Chinensis*), *Bai Mao Gen* (*Rhizoma Imperatae*), *Bian Xu* (*Herba Polygoni Avicularis*), and other herbs. The average duration of treatment was 8 packs of herbs, with some needing up to 21 packs.¹²
7. **Cystitis:** One study reported marked success in treating 107 patients with acute cystitis using 1-6 packs of modified *Zhu Ling Tang*.¹³
8. **Urinary tract disorder:** According to one study of 30 patients who complained of lower urinary tract symptoms without pyuria, administration of *Zhu Ling Tang* was associated with an efficacy rate of 92.9% for pollakisuria, 85.8% for miction pain, 85.7% for voiding discomfort, and 76.0% for total efficacy rate. No side effects were reported.¹⁴

AUTHORS' COMMENTS

Wu Ling San (Five-Ingredient Powder with Poria) and *Zhu Ling Tang* both regulate water circulation, dispel dampness, and treat urinary difficulty.

- *Wu Ling San* treats accumulation of water and dampness in the interior accompanied by exterior symptoms.
- *Zhu Ling Tang* treats accumulation of water and dampness with heat in the interior.

Fáng Jǐ Huáng Qí Tāng (Stephania and Astragalus Decoction)

防己黃耆湯
防己黃芪湯

Pinyin Name: Fang Ji Huang Qi Tang
Literal Name: Stephania and Astragalus Decoction
Alternate Name: Stephania and Astragalus Combination
Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

Fang Ji (Radix Stephaniae Tetrandrae)	3g [6-12g]
Huang Qi (Radix Astragali)	3.75g [9-15g]
Bai Zhu (Rhizoma Atractylodis Macrocephalae)	2.25g [4.5-9g]
Gan Cao (Radix et Rhizoma Glycyrrhizae), <i>chao</i> (dry-fried)	1.5g [4.5-6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to grind the ingredients into a coarse powder. Cook the powder [15g] with 4 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae) in 1.5 bowls of water until the liquid is reduced to 80% volume. After taking the warm, strained decoction, cover the body with blankets to promote mild sweating. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

- 1. Tonifies qi and dispels wind
- 2. Strengthens the Spleen and regulates water circulation

CLINICAL MANIFESTATIONS

Feng shui (wind water) or *feng shi* (wind damp) syndromes due to qi deficiency at the exterior: perspiration, aversion to wind, heaviness of the body, urinary difficulty, a pale tongue with a white tongue coating, and a superficial pulse.

CLINICAL APPLICATIONS

Arthritis, rheumatism, rheumatoid arthritis, periarthrititis of shoulder, bone fractures, acute glomerulonephritis, chronic nephritis, hydronephrosis, idiopathic edema, edema in the legs, hydrocele, ascites, perspiration, and hircismus.

EXPLANATION

Fang Ji Huang Qi Tang (Stephania and Astragalus Decoction) treats *feng shui* (wind water) and *feng shi* (wind damp) syndromes at the exterior due to qi deficiency. *Feng shui* (wind water) syndrome is a condition caused by invasion of wind at the exterior parts of the body, leading to swelling and water accumulation. *Feng shi* (wind damp) syndrome is a condition caused by invasion of wind-damp, leading to pain and limited movements of the joints, muscles and bones. Both syndromes begin with qi deficiency at the exterior leading to invasion of wind, water and/or dampness at the exterior aspects of the body (skin, muscles, and joints). Perspiration and aversion to

<i>Feng shui</i> (wind water) or <i>feng shi</i> (wind damp) syndromes due to qi deficiency	<ul style="list-style-type: none">• Perspiration and aversion to wind: exterior wind and qi deficiency• Heaviness of the body and urinary difficulty: accumulation of water and dampness• Pale tongue with white coating: qi deficiency• Superficial pulse: exterior condition	<ul style="list-style-type: none">• Tonifies qi and dispels wind• Strengthens the Spleen and regulates water circulation	<ul style="list-style-type: none">• <i>Fang Ji</i> (Radix Stephaniae Tetrandrae) dispels wind and regulates water circulation.• <i>Huang Qi</i> (Radix Astragali) tonifies qi, consolidates the exterior, regulates water circulation, and reduces swelling.• <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) tonifies qi, strengthens the Spleen, and dries dampness.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Da Zao</i> (Fructus Jujubae) harmonize the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonifies qi and harmonizes the herbs.

Fāng Jǐ Huáng Qí Tāng (Stephania and Astragalus Decoction)

wind are both due to exterior wind and qi deficiency. A sensation of heaviness of the body and urinary difficulty are the results of accumulation of water and dampness. A pale tongue with white coating suggests qi deficiency, and a superficial pulse indicates that the disease is located at the exterior.

Normally, an exterior syndrome should be treated with only exterior-releasing herbs. However, in the situation of an exterior condition complicated by qi deficiency and accompanied by water and damp accumulation, using only exterior-releasing herbs is both inappropriate and insufficient. It is inappropriate because herbs that release the exterior will only further deplete qi and invite more wind to attack the exterior. It is insufficient because exterior-releasing herbs cannot effectively dispel water and damp accumulation. Therefore, optimal treatment requires a balanced combination of exterior-releasing, qi-tonifying, and damp-dispelling herbs.

This formula contains *Fang Ji* (Radix Stephaniae Tetrandrae) to dispel wind and regulate water circulation. *Huang Qi* (Radix Astragali) tonifies qi, consolidates the exterior, regulates water circulation, and reduces swelling. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) tonifies qi, strengthens the Spleen, and dries dampness. It also assists *Huang Qi* (Radix Astragali) to consolidate *wei* (defensive) qi. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonifies qi and harmonizes all of the herbs in this formula. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) harmonize the *ying* (nutritive) and *wei* (defensive) levels.

MODIFICATIONS

- With edema, aversion to wind, and absence of sweating due to exterior wind attack, add *Ma Huang* (Herba Ephedrae), *Cang Zhu* (Rhizoma Atractylodis), *Fu Ling* (Poria), and *Yi Yi Ren* (Semen Coicis).
- With edema and swelling due to dampness, combine with *Wu Ling San* (Five-Ingredient Powder with Poria).
- With chest and abdominal fullness and distention, add *Chen Pi* (Pericarpium Citri Reticulatae) and *Hou Po* (Cortex Magnoliae Officinalis).
- With wheezing and dyspnea, add *Ma Huang* (Herba Ephedrae).
- With accelerated respiration and dyspnea, add *Ting Li Zi* (Semen Descurainiae seu Lepidii), *Hou Po* (Cortex Magnoliae Officinalis), and *Ku Xing Ren* (Semen Armeniacae Amarum).
- With abdominal pain due to Liver and Spleen disharmony, add *Bai Shao* (Radix Paeoniae Alba).

- With heaviness and pain of the joints, add *Cang Zhu* (Rhizoma Atractylodis), *Yi Yi Ren* (Semen Coicis), *Wei Ling Xian* (Radix et Rhizoma Clematidis), and *Mu Gua* (Fructus Chaenomelis).
- With numbness and pain in *bi zheng* (painful obstruction syndrome), add *Dang Gui* (Radix Angelicae Sinensis) and *Gui Zhi* (Ramulus Cinnamomi).

CAUTIONS / CONTRAINDICATIONS

- *Fang Ji Huang Qi Tang* treats edema characterized by qi deficiency and damp accumulation. It is contraindicated in edema caused by excess or heat conditions.
- Overdose of this formula has been associated with nausea and poor appetite.¹

PHARMACOLOGICAL EFFECTS

Chronotropic and inotropic: *Fang Ji Huang Qi Tang* has positive chronotropic and inotropic effects via direct stimulation of the beta-adrenoceptor and/or the norepinephrine release from the postganglionic nerve terminals in the heart.²

CLINICAL STUDIES AND RESEARCH

1. **Perspiration:** Use of modified *Fang Ji Huang Qi Tang* was effective in treating profuse perspiration due to various reasons. In addition to the base formula, modifications were made as follows: a large amount of *Huang Qi* (Radix Astragali) was used for spontaneous perspiration due to yang deficiency; *Ma Huang Gen* (Radix et Rhizoma Ephedrae), *Fu Xiao Mai* (Fructus Triticis Levis), and calcined *Mu Li* (Concha Ostreae) for profuse perspiration; *Dang Gui* (Radix Angelicae Sinensis), *Shu Di Huang* (Radix Rehmanniae Praeparata), and *Di Huang* (Radix Rehmanniae) for yin-deficient fire; *Di Gu Pi* (Cortex Lycii), *Zhi Mu* (Rhizoma Anemarrhenae), and *Bie Jia* (Carapax Trionycis) for tidal fever.³
2. **Idiopathic edema:** One study reported 90.4% effectiveness using modified *Fang Ji Huang Qi Tang* to treat 52 patients with idiopathic edema. Modifications to the original formula were made based on the condition of each individual patient. For severe edema around the eyes, *Nu Zhen Zi* (Fructus Ligustri Lucidi), *Yi Mu Cao* (Herba Leonuri), and *Che Qian Zi* (Semen Plantaginis) were added. For emotional instability, *Chai Hu* (Radix Bupleuri), *Da Zao* (Fructus Jujubae), and *Yuan Zhi* (Radix Polygalae) were added. For hypotension, *Ren Shen* (Radix et Rhizoma Ginseng) was added. For edema during menstruation, *Xiang Fu* (Rhizoma Cyperi), *Yu Jin* (Radix Curcumae), and *Zhu Ling* (Polyporus) were added. Of 52 patients, the study reported complete recovery in 30 cases, improvement in 17 cases, and no effect in 5 cases.⁴

Fáng Jǐ Huáng Qí Tāng (Stephania and Astragalus Decoction)

3. **Hydronephrosis:** Twenty-three patients with hydronephrosis were treated with complete recovery in 4 cases, improvement in 18 cases, and no effect in 1 case. The overall effectiveness was 95.6%. The herbal treatment contained *Fang Ji Huang Qi Tang* plus *Che Qian Zi* (Semen Plantaginis), *Jin Qian Cao* (Herba Lysimachiae), and others as needed.⁵
4. **Arthritis:** One study reported marked effect using modified *Fang Ji Huang Qi Tang* for 6 months to treat 200 cases of arthritis with various clinical presentations. In addition to the base formula, modifications were made based on the classification of arthritis. For arthritis due to damp-heat, *Jin Yin Hua* (Flos Lonicerae Japonicae), *Ye Ju Hua* (Flos Chrysanthemi Indici), *Lei Gong Teng* (Radix Tripterygii Wilfordii), and *Mu Dan Pi* (Cortex Moutan) were added. Of 65 patients with this diagnosis, 17 had resolution of all symptoms, 20 had marked improvement, 25 had moderate improvement, and 3 had no effect. For arthritis due to damp-cold, *Xi Xin* (Radix et Rhizoma Asari), *Gui Zhi* (Ramulus Cinnamomi), *Fu Zi* (Radix Aconiti Lateralis Praeparata), and *Zhi Chuan Wu* (Radix Aconiti Praeparata) were added. Of 135 patients with this diagnosis, 40 had resolution of all symptoms, 35 had marked improvement, 45 had moderate improvement, and 15 had no effect.⁶
5. **Rheumatoid arthritis:** Administration of *Fang Ji Huang Qi Tang* for 6 weeks showed good results in treating rheumatoid arthritis. Of 32 patients, the study reported significant improvement in 14 cases, moderate improvement in 5 cases, slight change in 9 cases, and deterioration in 4 cases.⁷
6. **Periarthritis of shoulder:** One study reported 96.6% effectiveness for treatment of periarthritis of the shoulder using acupuncture and herbs. The herbal formula contained *Fang Ji Huang Qi Tang* plus *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami) and *Chuan Xiong* (Rhizoma Chuanxiong). Of 30 patients, the study reported complete recovery in 22 cases, significant improvement in 5 cases, moderate improvement in 2 cases, and no effect in 1 case. Note: Details of the acupuncture treatment were unavailable at the time of publication.⁸
7. **Bone fractures:** Administration of modified *Fang Ji Huang Qi Tang* reduced swelling and inflammation among 97 patients with bone fractures. The herbal treatment contained this formula as the base, with the addition of *Gui Zhi* (Ramulus Cinnamomi) and *Ting Li Zi* (Semen Descurainiae seu Lepidii) for bone fractures in the arms; and *Fu Ling* (Poria) and *Ze Xie* (Rhizoma Alismatis) for fractures in the legs. Of 97 patients, the study reported complete recovery in 78 cases, improvement in 14 cases, and no effect in 5 cases. The overall effectiveness was 94.85%.⁹

8. **Hircismus:** Use of modified *Fang Ji Huang Qi Tang* was effective in treating 12 patients (3 males and 9 females; between 14-48 years of age; with 1 to 25 years history) with an offensive odor of the axillae. The herbal formula contained *Fang Ji* (Radix Stephaniae Tetrandrae) 30g, *Huang Qi* (Radix Astragali) 30g, dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 15g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, *Sheng Jiang* (Rhizoma Zingiberis Recens) 9g, and *Da Zao* (Fructus Jujubae) 20g. Furthermore, *Bai Mao Gen* (Rhizoma Imperatae), *Che Qian Zi* (Semen Plantaginis), and *Che Qian Cao* (Herba Plantaginis) were added for excessive dampness; *Fu Ling Pi* (Cortex Poria) and *Ze Xie* (Rhizoma Alismatis) were added for Spleen deficiency; and *Yin Chen* (Herba Artemisiae Scopariae) and charred *Shan Zha* (Fructus Crataegi) were added for obesity. The study reported complete recovery in all 12 patients after a duration of 2 to 6.5 months of treatment.¹⁰

RELATED FORMULA

Fáng Jǐ Fú Líng Tāng (Stephania and Poria Decoction)

防己茯苓湯

防己茯苓汤

Pinyin Name: *Fang Ji Fu Ling Tang*

Literal Name: Stephania and Poria Decoction

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

<i>Fang Ji</i> (Radix Stephaniae Tetrandrae)	9g
<i>Huang Qi</i> (Radix Astragali)	9g
<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g
<i>Fu Ling</i> (Poria)	18g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g

The source text instructs to cook the herbs in 6 cups [1,200 mL] of water until it is reduced down to 2 cups [400 mL]. Take the warm, strained decoction in three equally-divided doses.

The main actions of this formula are to benefit the qi, promote the normal circulation of yang, and regulate water metabolism. Clinically, this formula is often used to treat edema of the extremities with a feeling of heaviness and urinary difficulty.

Fang Ji Huang Qi Tang and *Fang Ji Fu Ling Tang* (Stephania and Poria Decoction) both treat edema by tonifying qi and regulating water circulation.

- *Fang Ji Huang Qi Tang* is more suitable for edema due to qi deficiency with such symptoms as perspiration,

Fáng Jǐ Huáng Qí Tāng (Stephania and Astragalus Decoction)

aversion to wind, a feeling of heaviness in the body, and a superficial pulse.

- *Fang Ji Fu Ling Tang* is more suitable for edema with yang deficiency with such symptoms as general edema, edema of the extremities, and dysuria.

AUTHORS' COMMENTS

Fang Ji Huang Qi Tang is designed to treat accumulation of water and dampness due to qi deficiency. However, today this formula is used mainly for weight loss in patients with Spleen deficiency. Most of these patients do not have big appetite, but still gain weight regardless of how little they eat. They retain excessive amount of dampness and water because the transportation and water-metabolizing functions of the Spleen are impaired. Also, as the Spleen is the organ that controls the muscles, these patients often show flaccid or no muscle tone, in addition to obesity.

Wǔ Pí Sǎn (Five-Peel Powder)

五皮散

Pinyin Name: *Wu Pi San*

Literal Name: Five-Peel Powder

Alternate Names: *Wu Pi Yin*, Five-Pi Drink, Five Kinds of Peels Drink, Hoelen and Areca Combination

Original Source: *Zhong Zang Jing* (Treasury Classic) by Hua-Tuo in the Han Dynasty

COMPOSITION

<i>Fu Ling Pi</i> (Cortex Poria)	[9g]
<i>Sheng Jiang Pi</i> (Pericarpium Zingiberis Recens)	[9g]
<i>Sang Bai Pi</i> (Cortex Mori)	[9g]
<i>Da Fu Pi</i> (Pericarpium Arecae)	[9g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	[9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind equal amounts of the ingredients into a coarse powder. Cook 9g of the powder with 1.5 bowls of water until the liquid is reduced to 80% volume. Take the warm, strained decoction any time during the day. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CLINICAL MANIFESTATIONS

Pi shui (skin water) due to Spleen deficiency and damp accumulation: generalized edema of the whole body, heaviness of the body and extremities, epigastric and abdominal fullness or distention, shortness of breath, rapid breathing, urinary difficulty, edema during pregnancy, white, greasy tongue coating, and a deep, moderate pulse.

CHINESE THERAPEUTIC ACTIONS

1. Dispers dampness and reduces swelling and edema
2. Regulates qi and strengthens the Spleen

CLINICAL APPLICATIONS

Cardiac and nephritic edema, chronic nephritis, edema during pregnancy, generalized edema, and traumatic injuries.

Wǔ Pí Sǎn (Five-Peel Powder)

EXPLANATION

When the Spleen is deficient, damp accumulates in the interior, which then overflows to the skin and muscles, causing generalized edema and swelling throughout the body and extremities. Damp accumulation can obstruct the flow of qi and cause epigastric and abdominal fullness and distention. If the damp accumulation affects the Lung, shortness of breath and rapid breathing may occur. Because water circulation is impaired, urinary difficulty may also occur.

Wu Pi San (Five-Peel Powder) uses *Fu Ling Pi* (Cortex Poria) to dispel dampness and relieve edema through diuresis. This herb also strengthens the Spleen and improves its transformation and transportation functions. *Sheng Jiang Pi* (Pericarpium Zingiberis Recens) disperses accumulation of water and dampness. *Sang Bai Pi* (Cortex Mori) redirects the rising Lung qi and restores normal water metabolism. *Da Fu Pi* (Pericarpium Arecae) activates qi circulation to disperse fluids and relieve fullness and distention. *Chen Pi* (Pericarpium Citri Reticulatae) harmonizes Stomach qi and disperses turbid dampness.

MODIFICATIONS

- With water accumulation above the waist, add *Zi Su Ye* (Folium Perillae), *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), and *Qin Jiao* (Radix Gentianae Macrophyllae).
- With water accumulation below the waist, add *Chi Xiao Dou* (Semen Phaseoli), *Fu Ling* (Poria), *Ze Xie* (Rhizoma Alismatis), *Fang Ji* (Radix Stephaniae Tetrandrae), and *Che Qian Zi* (Semen Plantaginis).

- With severe edema, add *Wu Ling San* (Five-Ingredient Powder with Poria).
- With facial edema, add *Chen Pi* (Pericarpium Citri Reticulatae) and *Sang Bai Pi* (Cortex Mori).
- With edema during pregnancy, remove *Sang Bai Pi* (Cortex Mori), and add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- With generalized weakness and deficiency, add *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- With coldness, add *Gan Jiang* (Rhizoma Zingiberis) and *Rou Gui* (Cortex Cinnamomi).
- With abdominal fullness and distention, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Cang Zhu* (Rhizoma Atractylodis).

CAUTIONS / CONTRAINDICATIONS

Avoid foods that are raw, cold, oily, greasy or hard to digest while taking *Wu Pi San*.

CLINICAL STUDIES AND RESEARCH

1. **Edema:** *Wu Pi San* was shown in two studies to have satisfactory results in treating edema.¹
2. **Traumatic injuries with swelling and inflammation:** Sixty-three patients with swelling and inflammation due to external trauma were effectively treated using *Wu Pi San* plus *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *San Qi* (Radix et Rhizoma Notoginseng). *Gui Zhi* (Ramulus Cinnamomi) and *Sang Zhi* (Ramulus Mori) were added if the upper extremities were affected, and *Chuan Niu Xi* (Radix Cyathulae) was added for the lower extremities. The study reported marked effectiveness in all 63 patients, with swelling reduced in 18 cases after 2 days, 30 cases after 3 days, and 15 cases after 7 days.²

(Areca Nine Decoction plus Evodia and Poria)

DOSAGE / PREPARATION / ADMINISTRATION
The source text instructs to prepare the ingredients as a decoction.

- CHINESE THERAPEUTIC ACTIONS**
- 1. Dispels water accumulation
 - 2. Disperses qi and blood stagnation
 - 3. Relieves constipation

CLINICAL MANIFESTATION
Water accumulation in the legs with qi and blood stagnation: beriberi, pitting edema, numbness, fatigue, and weakness of the legs, palpitations, distention beneath the heart, and constipation.

CLINICAL APPLICATIONS
Hypertension, myocarditis, congestive heart failure, beriberi, neurosis, and multiple neuritis.

EXPLANATION
Jiu Wei Bing Lang Jia Wu Fu Tang (Areca Nine Decoction plus Evodia and Poria) treats water accumulation in the legs accompanied by qi and blood stagnation. Pitting edema in the legs is diagnostic of water accumulation. As

water accumulation affects the upper and middle *jiaos*, patients may experience palpitations, shortness of breath, and a feeling of distention beneath the heart. Water accumulation may also contribute to damp stagnation, leading to a feeling of fullness and distention. Furthermore, chronic water accumulation leads to qi and blood stagnation, which is characterized by numbness, fatigue, and weakness of the legs.

In this formula, *Bing Lang* (Semen Arecae) breaks up qi stagnation, eliminates water accumulation, and dispels phlegm. *Chen Pi* (Pericarpium Citri Reticulatae) regulates qi and dries dampness. *Hou Po* (Cortex Magnoliae Officinalis) dispels dampness, removes stagnation, and disperses distention. *Mu Xiang* (Radix Aucklandiae) promotes qi circulation and relieves pain and distention. *Zi Su Ye* (Folium Perillae), with its light and acrid properties, regulates qi circulation and harmonizes the middle *jiao*. *Wu Zhu Yu* (Fructus Evodiae) and *Gui Zhi* (Ramulus Cinnamomi) warm the yang to eliminate water and phlegm stagnation. *Fu Ling* (Poria) strengthens the Spleen, dispels dampness, and eliminates water accumulation. *Da Huang* (Radix et Rhizoma Rhei) relieves constipation. *Sheng Jiang* (Rhizoma Zingiberis Recens)

Jiu Wei Bing Lang Jia Wu Fu Tang (Areca Nine Decoction plus Evodia and Poria)

AUTHORS' COMMENTS

Jiu Wei Bing Lang Jia Wu Fu Tang can be combined with *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction) to treat hypertension with edema and water retention. These formulas have a downward draining effect to guide fire down and out of the body.

Jiu Wei Bing Lang Jia Wu Fu Tang can be used with *Gua Lou Xie Bai Bai Jiu Tang* (Trichosanthes Fruit, Chinese Chive, and Wine Decoction) to treat hypertension complicated by high cholesterol and arteriosclerosis. Together, these two formulas eliminate accumulation of water and phlegm and dispel stagnation of qi and blood.

Mù Fáng Jǐ Tāng (Cocculus Decoction)

木防己湯
木防己汤

Pinyin Name: *Mu Fang Ji Tang*

Literal Name: Cocculus Decoction

Alternate Names: *Mu Fang Chi Tang*, Cocculus and Ginseng Combination

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Mu Fang Ji</i> (Radix Cocculi Trilobi)	9g
<i>Shi Gao</i> (Gypsum Fibrosum)	12 pieces [18g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	12g
<i>Gui Zhi</i> (Ramulus Cinnamomi)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook the ingredients in 6 cups [1,200 mL] of water and reduce the liquid to 2 cups [400 mL]. Take the warm, strained decoction in two equally-divided doses.

CHINESE THERAPEUTIC ACTIONS

1. Activates water circulation to eliminate stagnation
2. Guides the reversed flow of qi downward

CLINICAL MANIFESTATIONS

Water accumulation in the upper *jiao*: shortness of breath, increased dyspnea when lying down, asthma, abdominal pain, fullness and distention in the epigastrium and chest, dark facial complexion, scanty urination, edema, and a deep, tight pulse.

CLINICAL APPLICATIONS

Congestive heart failure, cardiac asthma, edema due to nephritis, bronchial asthma, and pitting edema.

EXPLANATION

Mu Fang Ji Tang (Cocculus Decoction) treats water accumulation in the upper *jiao*, manifesting in an increase in pressure leading to chest distention and fullness, and abdominal pain. Water accumulation in the chest will directly affect the function of the Lungs, causing shortness of breath, dyspnea, and possibly asthma. Additionally, when the patient is in a horizontal position, the pressure in the lungs further increases, thereby aggravating the shortness of breath and dyspnea. Water accumulation also affects blood circulation, leading to palpitations, edema, and a dark facial complexion. Other symptoms and signs include scanty urination and a deep, tight pulse.

Mù Fāng Jǐ Tāng (Cocculus Decoction)

Mu Fang Ji Tang (Cocculus Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Water accumulation in the upper jiao	<ul style="list-style-type: none">• Chest distention and fullness, shortness of breath, and dyspnea: water accumulation affecting the Lung• Palpitations, edema, and a dark facial complexion: water accumulation affecting the Heart	<ul style="list-style-type: none">• Activates water circulation to eliminate stagnation• Guides the reversed flow of qi downward	<ul style="list-style-type: none">• <i>Mu Fang Ji</i> (Radix Cocculi Trilobi) promotes water circulation and eliminates water accumulation to relieve shortness of breath and dyspnea.• <i>Shi Gao</i> (Gypsum Fibrosum) clears Lung heat and relieves dyspnea.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) relieves dyspnea and facilitates the elimination of water accumulation in the chest and diaphragm.• <i>Gui Zhi</i> (Ramulus Cinnamomi) opens the channels and collaterals and prevents the reversed flow of qi from rising to the Lung.

In this prescription, herbs are formulated to activate water circulation and eliminate water accumulation. *Mu Fang Ji* (Radix Cocculi Trilobi), acrid and warm, relieves shortness of breath and dyspnea by promoting water circulation and eliminating water accumulation. *Shi Gao* (Gypsum Fibrosum), sweet and cold, clears Lung heat and relieves dyspnea. *Ren Shen* (Radix et Rhizoma Ginseng) relieves dyspnea and facilitates the elimination of water accumulation in the chest and diaphragm. *Gui Zhi* (Ramulus Cinnamomi) opens the channels and collaterals and prevents the reversed flow of qi from rising to the Lung. *Mu Fang Ji* (Radix Cocculi Trilobi) and *Gui Zhi* (Ramulus Cinnamomi) both have a diuretic effect to promote urination and eliminate water accumulation.

MODIFICATION

With wheezing and dyspnea due to congestive heart failure, add *Sang Bai Pi* (Cortex Mori), *Zi Su Zi* (Fructus Perillae), and *Sheng Jiang* (Rhizoma Zingiberis Recens).

CLINICAL STUDIES AND RESEARCH

Congestive heart failure: Administration of *Mu Fang Ji Tang* showed a protective effect against myocardial injury leading to congestive heart failure in an animal model.¹

AUTHORS' COMMENTS

Because *Mu Fang Ji* (Radix Cocculi Trilobi) is not a commonly used herb and is sometimes difficult to obtain, it has been substituted in the past with *Fang Ji* (Radix Stephaniae Tetrandrae) (also known as *Han Fang Ji* or *Fen Fang Ji*) or *Guang Fang Ji* (Radix Aristolochia Westlandi). Although these three herbs function similarly as diuretics, they are, in fact, derived from different plant species, and should **not** be used interchangeably.

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook the ingredients with 1 slice of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Deng Xin Cao* (Medulla Junci) in water to make a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Strengthens the Spleen
2. Regulates qi circulation to relieve fullness and distention
3. Regulates the water passages to eliminate water stagnation

CLINICAL MANIFESTATIONS

1. Severe abdominal fullness and distention due to Spleen deficiency: severe fullness and drum-like distention in the abdomen, decreased food intake, decreased appetite, acid regurgitation, dysuria, and scanty urine.
2. Water stagnation due to Spleen deficiency: feeling of fullness, distention, and oppression in the chest and abdomen, ascites, edema, belching, acid reflux, scanty urine, and constipation.

CLINICAL APPLICATIONS

Peritonitis, pitting edema, nephritis, and liver cirrhosis with ascites.

EXPLANATION

Fen Xiao Tang (Separate and Reduce Decoction) treats severe abdominal fullness with drum-like distention characterized by Spleen deficiency and damp accumulation.

Spleen deficiency, besides giving rise to damp accumulation, may cause inadequate transportation and transformation of nutrients. The dampness and untransformed nutrients usually accumulate in the abdomen, causing fullness and distention. Loss of appetite is the result of Spleen deficiency, and acid regurgitation arises from Stomach disharmony. Dysuria and scanty urine are the results of dampness and fluids being unable to pass out of the body through urination.

There are two major categories of herbs employed in this treatment strategy: herbs to strengthen the Spleen and Stomach, and herbs to eliminate dampness and water stagnation. *Cang Zhu* (Rhizoma Atractylodis) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), both bitter, dry, and warm, resolve dampness and strengthen the Spleen. *Hou Po* (Cortex Magnoliae Officinalis) activates qi circulation, dispel dampness, and relieve fullness and distention in the epigastrium and abdomen. *Chen Pi* (Pericarpium Citri Reticulatae), *Mu Xiang* (Radix Aucklandiae), and *Xiang Fu* (Rhizoma Cyperi) regulate qi and relieve stagnation. *Zhi Shi* (Fructus Aurantii Immaturus), *Da Fu Pi* (Pericarpium Arecae), and *Sha Ren* (Fructus Amomi) strengthen the Spleen and Stomach to restore the normal food transformation and transportation. *Sheng Jiang* (Rhizoma Zingiberis Recens) harmonizes the Spleen and Stomach. *Zhu Ling* (Polyporus), *Ze Xie* (Rhizoma Alismatis), and *Fu Ling* (Poria) dispel water and dampness through diuresis. *Deng Xin Cao* (Medulla

Junci) has a wide variety of clinical functions, including regulating qi, harmonizing the Spleen, inducing diuresis, and clearing heat.

MODIFICATIONS

- With increased respiration rate, add *Chen Xiang* (Lignum Aquilariae Resinatum).
- With swelling and fullness in the abdomen due to food stagnation, add *Lai Fu Zi* (Semen Raphani).
- With a bitter taste in the mouth and hypochondriac fullness and distention, combine with *Xiao Chai Hu Tang* (Minor Bupleurum Decoction).

AUTHORS’ COMMENTS

This formula is also used to treat severe cases of water accumulation (such as ascites and edema) caused by Spleen deficiency. Ascites is generally described as a drum-like distention in the abdomen, while edema is characterized by prolonged pits produced by pressure. Ascites and pitting edema are two diagnostic signs for prescribing this formula.

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to prepare the ingredients as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Disperses stagnant water and dries dampness
2. Eliminates water from the Lung
3. Harmonizes the Spleen

CLINICAL MANIFESTATIONS

Severe water accumulation: general edema of the body and extremities, dysuria, oliguria, and dyspnea.

CLINICAL APPLICATIONS

Nephrosclerosis, chronic nephritis, edema secondary to nephritis, edema and dyspnea secondary to congestive heart failure, beriberi, dysuria and ascites.

EXPLANATION

Dao Shui Fu Ling Tang (Poria Decoction to Drain Water) treats severe fluid accumulation affecting both urination and breathing. With fluid accumulation, patients often experience pitting edema, dysuria, and oliguria. This kind of edema in which the tissue shows prolonged pits produced by pressure is commonly described as “rotten melon.” Dysuria and oliguria are characterized by sharp, cutting pain with very little volume of urine. Because the

Lung regulates the water passages, excess water retention will affect its normal functions. The patient will experience wheezing and dyspnea, especially at night and when lying in a horizontal position.

To effectively treat this condition, this formula has herbs that dispel stagnant water from the body. *Chi Fu Ling* (Poria Rubra) and *Ze Xie* (Rhizoma Alismatis) are diuretic herbs that eliminate water accumulation through diuresis. *Chi Fu Ling* (Poria Rubra) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) strengthen the Spleen and dry dampness. *Mu Gua* (Fructus Chaenomelis) dispels dampness from the lower body, and is especially effective in treating beriberi. *Bing Lang* (Semen Arecae) eliminates water and disperses stagnant qi in the chest. *Mai Dong* (Radix Ophiopogonis) nourishes the Lung, suppresses cough, and eliminates phlegm. *Zi Su Ye* (Folium Perillae) directs qi downward and relieves chest fullness. *Deng Xin Cao* (Medulla Junci) promotes normal urination and eliminates dampness and swelling. *Chen Pi* (Pericarpium Citri Reticulatae), *Mu Xiang* (Radix Aucklandiae), and *Sha Ren* (Fructus Amomi) regulate qi and reduce qi stagnation. *Sang Bai Pi* (Cortex Mori) regulates Lung qi to relieve wheezing and dyspnea. *Da Fu Pi* (Pericarpium Arecae) regulates water circulation and treats edema and abdominal fullness and distention.

<i>Gui Zhi</i> (Ramulus Cinnamomi)	9g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	6g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to cook the ingredients with 6 cups [1,200 mL] of water until the liquid is reduced to 3 cups [600 mL]. Take the warm, strained decoction in three equally-divided doses.

CHINESE THERAPEUTIC ACTIONS

1. Warms and dissolves *tan yin* (phlegm retention)
2. Strengthens the Spleen and dispels dampness

CLINICAL MANIFESTATIONS

Tan yin (phlegm retention) syndrome caused by yang deficiency of the middle *jiao*: chest and hypochondriac fullness, dizziness, vertigo, palpitations, shortness of breath, coughing, white, slippery tongue coating, and a wiry, slippery pulse.

CLINICAL APPLICATIONS

Coronary artery disease, cardiac failure, Meniere's syndrome, motor dysfunction, dizziness and vertigo, nephrotic syndrome, chronic nephritis, hydronephrosis,

edema, neurosis, anxiety, hysteria, polyhydramnios, Keshan disease, chronic bronchitis, and chronic gastritis.

EXPLANATION

According to the source text, *Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction) was originally used to treat individuals who developed yang deficiency in the middle *jiao* after being incorrectly treated with emetic or downward draining methods for an exterior syndrome. As yang becomes deficient, the Spleen loses its ability to transform and transport food, resulting in water and dampness turning into *tan yin* (phlegm retention). If this phlegm becomes stagnated in the chest, fullness of the chest and epigastrium occurs. If the phlegm blocks the passage of the ascending yang qi, dizziness and vertigo occur. If it affects the Lung and disrupts the circulation of qi, coughing and shortness of breath occur. If it affects the circulation of qi around the Heart, palpitations occur.

In this formula, *Fu Ling* (Poria) acts as the chief herb to strengthen the Spleen, dispel dampness, and disperse

phlegm. *Gui Zhi* (Ramulus Cinnamomi) disperses accumulated fluids and warms the body to dissolve phlegm. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen and dries dampness. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonifies the qi and harmonizes the herbs.

effective in preventing irregular heartbeat and increasing resistance against ischemia.¹

2. **Sedative and hypnotic:** Administration of *Ling Gui Zhu Gan Tang* was associated with a sedative and hypnotic effect. It prolonged sleeping time induced by barbiturates and reduced spontaneous activities in mice.²

MODIFICATIONS

- With nausea or vomiting from profuse phlegm accumulation, add *Er Chen Tang* (Two-Cured Decoction).
- With abdominal pain due to deficiency and cold, combine with *Li Zhong Tang* (Regulate the Middle Decoction).
- With diarrhea caused by Spleen qi deficiency and damp accumulation, add *Ping Wei San* (Calm the Stomach Powder).
- With generalized weakness and fatigue, combine with *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction).
- With epigastric distention or gurgling water sounds in the abdomen, add *Zhi Shi* (Fructus Aurantii Immaturus).
- With cough with profuse sputum, add *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae).
- With edema of the limbs and decreased urination, add *Zhu Ling* (Polyporus) and *Ze Xie* (Rhizoma Alismatis).

CAUTIONS / CONTRAINDICATIONS

Ling Gui Zhu Gan Tang contains many warm and drying herbs which may consume or injure body fluids. Therefore, it is contraindicated in cases of yin and/or body fluid deficiencies.

PHARMACOLOGICAL EFFECTS

1. **Cardiovascular:** Administration of *Ling Gui Zhu Gan Tang* via intraperitoneal injection at 20 mL/kg in mice was

CLINICAL STUDIES AND RESEARCH

1. **Coronary artery disease:** Use of modified *Ling Gui Zhu Gan Tang* in 16 patients with coronary artery disease and angina was associated with marked improvement in 10 cases, moderate improvement in 5 cases, and no effect in 1 case.³
2. **Meniere's syndrome:** Use of *Ling Gui Zhu Gan Tang* plus *Ze Xie* (Rhizoma Alismatis) and *Zhe Shi* (Haematitum) in 53 patients with Meniere's syndrome was associated with significant recovery in 32 cases, improvement in 17 cases, and no effect in 4 cases (92.5% effectiveness).⁴ According to another study, 72 patients with Meniere's syndrome were treated successfully using *Ling Gui Zhu Gan Tang* plus *Ze Xie* (Rhizoma Alismatis), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Yuan Zhi* (Radix Polygalae), *Ge Gen* (Radix Puerariae Lobatae), and others as needed. Injection of dexamethasone into the tympanic cavity was given as an adjunct therapy.⁵
3. **Cardiac failure:** Ninety-six patients who were unresponsive to digitalis after long-term use or intolerant because of side effects were treated with *Ling Gui Zhu Gan Tang* plus *Sheng Mai San* (Generate the Pulse Powder) or *Zhi Gan Cao Tang* (Honey-Fried Licorice Decoction) with good results. Of 96 patients, the study reported significant improvement in 39 cases, moderate improvement in 36 cases, and no effect in 21 cases. The overall effectiveness was 77%.⁶

Líng Guì Zhú Gān Tāng

(Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction)

4. **Dizziness and vertigo:** Use of *Ling Gui Zhu Gan Tang* plus *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) in 60 patients with dizziness and vertigo was associated with complete recovery in 52 cases, improvement in 6 cases, and no effect in 2 cases (96.7% effectiveness).⁷
5. **Nephrotic syndrome:** One study reported good results using both herbs and drugs to treat 17 patients with severe nephrotic syndrome. The herbal treatment contained *Ling Gui Zhu Gan Tang* plus *Yi Mu Cao* (Herba Leonuri), *Qian Shi* (Semen Euryales), *Ze Xie* (Rhizoma Alismatis), *Bai Mao Gen* (Rhizoma Imperatae), and others as needed. Hormonal drug treatment was given as needed. After 3 months of treatment, the study reported complete remission in 9 cases, near-complete remission in 5 cases, partial remission in 2 cases, and no effect in 1 case.⁸
6. **Hydronephrosis:** Use of modified *Ling Gui Zhu Gan Tang* in 33 patients with hydronephrosis was associated with significant improvement in 21 cases, moderate improvement in 9 cases, and no effect in 3 cases. Additions to the original formula included *Chuan Lian Zi* (Fructus Toosendan) and *Chi Shao* (Radix Paeoniae Rubra) for low back pain; *Shi Wei* (Folium Pyrrosiae) for painful urination; *Bai Mao Gen* (Rhizoma Imperatae) and *Hu Po* (Succinum) for hematuria; and *Ban Xia* (Rhizoma Pinelliae) for nausea and vomiting.⁹
7. **Polyhydramnios:** Thirty-two patients with acute excess amniotic fluids were treated with modified *Ling Gui*

Zhu Gan Tang, with complete recovery in 22 cases, improvement in 7 cases, and no effect in 3 cases.¹⁰

8. **Keshan disease:** One study reported satisfactory results using modified *Ling Gui Zhu Gan Tang* to treat 16 patients with cardiomyopathy associated with selenium deficiency. The herbal formula contained *Ling Gui Zhu Gan Tang* plus *Yin Chen* (Herba Artemisiae Scopariae) and *Shan Zha* (Fructus Crataegi). Clinical improvements included relief of edema and swelling after 2 weeks, and increased force of heart contraction after one month.¹¹

<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g
<i>Fu Ling</i> (Poria)	12g

Gān Cǎo Gān Jiāng Fú Líng Bái Zhú Tāng

(Licorice, Ginger, Poria, and Atractylodes Macrocephala Decoction)

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook the ingredients with 5 cups [1,000 mL] of water until the liquid is reduced to 3 cups [600 mL]. Take the warm, strained decoction in three equally-divided doses. Today, it is normally prepared as a decoction.

- CHINESE THERAPEUTIC ACTIONS**
- 1. Warms yang and strengthens the Spleen
 - 2. Dispels cold and dampness

CLINICAL MANIFESTATION

Cold and dampness in the lower body: coldness and pain of the lower back and body, feeling of extreme heavy sensation in the lower back, normal appetite and diet, absence of thirst, and normal urination.

CLINICAL APPLICATIONS

Low back pain, sciatica, lumbago, enuresis, superficial gastritis, duodenal ulcer, arthritis, impotence, gastritis, atrophic gastritis, and diarrhea.

EXPLANATION

Gan Cao Gan Jiang Fu Ling Bai Zhu Tang (Licorice, Ginger, Poria and Atractylodes Macrocephala Decoction) is often used for patients with cold and dampness in the lower half of the body, characterized by low back pain, extremely weak back, and cold sensations in the lower back. Because cold and dampness only affect the muscles, and not the interior *zang fu* organs, urination and diet are both normal.

Gan Jiang (Rhizoma Zingiberis), being acrid and warm, is used at a high dose to warm the Kidney and dispel cold fixed in the lower back. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Gan Cao* (Radix et Rhizoma

Glycyrrhizae) strengthen the middle *jiao* and resolve dampness. *Fu Ling* (Poria), in addition to strengthening the middle *jiao*, also eliminates dampness through urination. In short, this formula focuses on both the Kidney and Spleen to address cold and dampness fixed in the lower body.

- MODIFICATIONS**
- With severe pain, add *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Xi Xin* (Radix et Rhizoma Asari).

AUTHORS' COMMENTS

Because this formula treats cold and dampness located in the lower back around the kidney area, it is also known as 肾著汤 *Shen Zhuo Tang* (Kidney Fixity Decoction). It is important to note that this formula treats cold and dampness affecting the muscles near the kidney area. It does *not* address Kidney imbalance nor treat kidney diseases.

- Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction) and *Gan Cao Gan Jiang Fu Ling Bai Zhu Tang* have similar ingredients and indications. They are both excellent formulas to strengthen the Spleen, warm yang, and dispel dampness.
- *Ling Gui Zhu Gan Tang* uses *Fu Ling* (Poria) as the chief herb and *Gui Zhi* (Ramulus Cinnamomi) as the deputy herb. The main emphasis of this formula is to warm yang and dispel dampness to resolve *tan yin* (phlegm retention).
 - *Gan Cao Gan Jiang Fu Ling Bai Zhu Tang* uses *Gan Jiang* (Rhizoma Zingiberis) as the chief herb and *Fu Ling* (Poria) as the deputy herb. The main focus of this formula is to warm the middle *jiao*, dispel cold, and dispel dampness to treat cold and dampness in the lower back.

Zhēn Wǔ Tāng (True Warrior Decoction)

真武湯 真武汤

Pinyin Name: *Zhen Wu Tang*

Literal Name: True Warrior Decoction

Alternate Names: *Chen Wu Tang*, Ginger, Aconite, Hoelen and Peony Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata), <i>pao</i> (blast-fried)	1 piece [9g]
<i>Fu Ling</i> (Poria)	9g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	9g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	6g
<i>Bai Shao</i> (Radix Paeoniae Alba)	9g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook the ingredients with 8 cups [1,600 mL] of water until the liquid is reduced to 3 cups [600 mL]. Take 0.7 cup [140 mL] of the warm, strained decoction three times daily.

CHINESE THERAPEUTIC ACTIONS

Warms yang and regulates water

CLINICAL MANIFESTATIONS

1. Spleen and Kidney yang deficiencies with water accumulation: urinary difficulty, heaviness and pain in the four limbs, abdominal pain, diarrhea, swelling and edema of the limbs, absence of thirst, white tongue coating, and a deep pulse.
2. *Taiyang* disorder: presence of exterior condition and fever unresolved after sweating, palpitations, vertigo and muscle twitching.

CLINICAL APPLICATIONS

Chronic renal failure, nephritis, chronic nephritis, edema, hypertension, amenorrhea, restless legs, rheumatoid arthritis, asthma, allergic sinusitis, Meniere's syndrome, leukorrhea, hypothyroidism, chronic enteritis, cardiac failure, arrhythmia, cough, cardiopulmonary diseases, insomnia, and dizziness.

EXPLANATION

Zhen Wu Tang (True Warrior Decoction) is the main formula for treating water accumulation caused by Spleen and Kidney yang deficiencies. The Spleen and Kidney are two very important organs involved in water metabolism. The Spleen is responsible for dispersing and distributing water, while the Kidney is responsible for eliminating water. If the yang of these two organs is deficient, the body cannot maintain normal water metabolism. If water and dampness accumulate in the body, they will overflow to the skin and muscles causing swelling, pain, and heavy

Zhen Wu Tang (True Warrior Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Spleen and Kidney yang deficiencies with water accumulation	<ul style="list-style-type: none">• Urinary difficulty: stagnant water circulation• Heaviness and pain and/or swelling and edema in the limbs: accumulation of damp and water• Abdominal pain, loose stools or diarrhea: Spleen and Kidney yang deficiencies• White tongue coating and a deep pulse: damp and cold condition	<ul style="list-style-type: none">• Warms the yang and regulates water	<ul style="list-style-type: none">• <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) warms Spleen and Kidney yang.• <i>Fu Ling</i> (Poria) strengthens the Spleen, induces urination, and dispels water accumulation.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) warms the body, dispels cold, and disperses water accumulation.• <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen and dries dampness.• <i>Bai Shao</i> (Radix Paeoniae Alba) relieves pain, and balances and prevents the warm herbs from injuring yin.

Zhēn Wǔ Tāng (True Warrior Decoction)

sensations in the limbs. If water and dampness block the normal rising of yang qi, vertigo will manifest. If water and dampness travel downward, loose stools or diarrhea may occur. Since the water circulation is stagnant, urinary difficulty also manifests.

Fu Zi (Radix Aconiti Lateralis Praeparata), the chief herb in this formula, warms the Spleen and Kidney to raise the yang. *Fu Ling* (Poria), the deputy herb, strengthens the Spleen, induces urination, and dispels water accumulation. *Sheng Jiang* (Rhizoma Zingiberis Recens) has two main functions: it helps *Fu Zi* (Radix Aconiti Lateralis Praeparata) warm the body to dispel cold, and it assists *Fu Ling* (Poria) to disperse and dispel water. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), the assistant herb, strengthens the Spleen and dries dampness to promote the Spleen's transformation functions. *Bai Shao* (Radix Paeoniae Alba), in addition to preventing the acrid, warm herbs in this formula from injuring yin, also relieves abdominal pain.

This formula may also be used to treat *taiyang* disorder where the exterior condition remains after sweating. As a result of sweating, yin and body fluids are both damaged, leading to palpitations, vertigo, and muscle twitching.

MODIFICATIONS

- Without urinary difficulty, remove *Fu Ling* (Poria) to prevent excessive loss of body fluids.
- With cough due to cold and water affecting the Lung, add *Gan Jiang* (Rhizoma Zingiberis), *Xi Xin* (Radix et Rhizoma Asari), and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- With severe edema, add *Wu Ling San* (Five-Ingredient Powder with Poria).
- For arthritis characterized by wind and dampness, add *Gui Zhi* (Ramulus Cinnamomi) and *Dang Shen* (Radix Codonopsis).
- With chronic and stubborn rashes and eczema, add *Ma Huang* (Herba Ephedrae), *Lian Qiao* (Fructus Forsythiae), and *Chi Xiao Dou* (Semen Phaseoli).
- With pain in the limbs, add *Ma Huang* (Herba Ephedrae) and *Xi Xin* (Radix et Rhizoma Asari).
- With diarrhea, remove *Bai Shao* (Radix Paeoniae Alba) and add *Gan Jiang* (Rhizoma Zingiberis).
- With vomiting, remove *Fu Zi* (Radix Aconiti Lateralis Praeparata) and add a large dose of *Sheng Jiang* (Rhizoma Zingiberis Recens).

CAUTIONS / CONTRAINDICATIONS

Zhen Wu Tang treats water accumulation caused by Spleen and Kidney yang deficiencies. Use of this formula

is inappropriate if the water accumulation is caused only by excess condition.

PHARMACOLOGICAL EFFECTS

1. **Circulatory:** Administration of this formula for 22 days was associated with decreased resistance of blood flow, reduced blood viscosity, increased blood perfusion to internal organs, and decreased workload for the heart.¹
2. **Nephroprotective:** Administration of *Zhen Wu Tang* was associated with beneficial effects in rats with chronic renal failure.² In one study of 18 patients with compromised renal functions, use of modified *Zhen Wu Tang* was associated with a reduction of IgA, IgG, IgM, and TF in the urine.³

CLINICAL STUDIES AND RESEARCH

1. **Cardiac failure:** Administration of modified *Zhen Wu Tang* has been shown to have a beneficial effect in treating cardiac failure. One study used *Zhen Wu Tang* plus *Wu Jia Pi* (Cortex Acanthopanax), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Yi Mu Cao* (Herba Leonuri) as the base formula for treating heart failure.⁴ Another study used *Zhen Wu Tang* plus *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) as the base formula to treat cardiopulmonary disorder with heart failure.⁵
2. **Hypertension:** One study reported 93% effectiveness using *Zhen Wu Tang* with *Fang Ji Fu Ling Tang* (Stephania and Poria Decoction) to treat 63 patients with hypertension characterized by yang deficiency.⁶
3. **Nephritis:** One study reported 80% effectiveness using modified *Zhen Wu Tang* to treat 30 patients with nephritis with edema. The study reported increased urination after an average of 17 days, and relief of edema after an average of 57 days.⁷
4. **Chronic renal failure:** *Zhen Wu Tang* has been reported in several studies to have beneficial effects in treating chronic renal failure. According to one study, use of modified *Zhen Wu Tang* in 12 patients with chronic renal failure was associated with remission in 3 cases, marked improvement in 5 cases, moderate improvement in 2 cases, and no effect in 2 cases.⁸ In another study, use of modified *Zhen Wu Tang* was associated with 94.4% success in treating chronic renal disorder characterized by Kidney yang deficiency. Of 18 patients, the study reported remission of all symptoms in 8 cases, partial remission of symptoms in 9 cases, and no effect in 1 case.⁹
5. **Amenorrhea:** One study reported successful treatment of amenorrhea characterized by Kidney yang deficiency in 54 of 60 patients using modified *Zhen Wu Tang*.¹⁰

Zhēn Wǔ Tāng (True Warrior Decoction)

6. **Restless legs:** One study reported 90% success using modified *Zhen Wu Tang* to treat 25 patients with restless leg syndrome. Clinical presentations include unilateral or bilateral spasms and cramps of legs with feelings of soreness, numbness, swelling, and mild aches and pains.¹¹
7. **Asthma:** Use of modified *Zhen Wu Tang* in 286 patients with bronchial asthma was associated with complete recovery in 92 cases, significant improvement in 134 cases, moderate improvement in 36 cases, and no effect in 24 cases.¹²
8. **Allergic sinusitis:** One study reported good results using modified *Zhen Wu Tang* to treat allergic sinusitis. In addition to the base formula, modifications included the addition of *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali) for qi deficiency; and *Cang Er Zi* (Fructus Xanthii) and *Xin Yi Hua* (Flos Magnoliae) for nasal obstruction. Of 50 patients, the study reported complete recovery in 13 cases, significant improvement in 36 cases, and slight improvement in 1 case.¹³
9. **Meniere's syndrome:** *Zhen Wu Tang* has been shown to effectively treat dizziness and vertigo in many studies. According to one study of 42 patients with Meniere's syndrome, use of herbs was associated with complete recovery in 40 cases and improvement in 2 cases. In addition to *Zhen Wu Tang*, *Wu Zhu Yu* (Fructus Evodiae) and *Ban Xia* (Rhizoma Pinelliae) were added for frequent nausea and vomiting; *Ci Shi* (Magnetitum) for tinnitus; and *Long Gu* (Os Draconis) for Liver wind rising.¹⁴

RELATED FORMULA

Fù Zǐ Tāng (Prepared Aconite Decoction)

附子湯

附子湯

Pinyin Name: *Fu Zi Tang*

Literal Name: Prepared Aconite Decoction

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

Fu Zi (Radix Aconiti Lateralis Praeparata),

pao (blast-fried) 2 pieces [12-18g]

Fu Ling (Poria) 9g

Ren Shen (Radix et Rhizoma Ginseng) 6g

Bai Zhu (Rhizoma Atractylodis Macrocephalae) 12g

Bai Shao (Radix Paeoniae Alba) 9g

The source text instructs to cook the ingredients with 8 cups [1,600 mL] of water until the liquid is reduced to 3 cups [600 mL]. Take 1 cup [200 mL] of the warm, strained decoction three times daily.

The main functions of this formula are to warm the channels, tonify yang, dispel cold, and resolve dampness. This formula is often used to relieve muscle aches and joint pain caused by yang deficiency accompanied by damp-cold invading the body. Clinically, the patient may show muscle aches, joint pain, cold limbs, aversion to cold, white, slippery tongue coating, and a deep, faint pulse.

Zhen Wu Tang and *Fu Zi Tang* (Prepared Aconite Decoction) both warm yang to dispel cold and dampness.

- *Zhen Wu Tang* contains *Sheng Jiang* (Rhizoma Zingiberis Recens), and is more suitable for relieving edema and water accumulation caused by yang deficiency.
- *Fu Zi Tang* contains *Ren Shen* (Radix et Rhizoma Ginseng) and larger doses of *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae). Therefore, this formula is more suitable for treating joint and muscle pain caused by yang deficiency accompanied by cold and dampness in the body.

AUTHORS' COMMENTS

Zhen Wu Tang is one of the best formulas for treating edema or excess water retention due to Spleen and Kidney yang deficiencies. It effectively treats edema associated with hypothyroidism since the underlying cause of a low-functioning thyroid is Kidney yang deficiency. In addition to the signs and symptoms listed above, the patients often show cold hands and feet, aversion to cold, absence of thirst, white tongue coating, and a deep, slow or a deep, weak pulse.

Shí Pí Sǎn (Bolster the Spleen Powder)

實脾散

实脾散

Pinyin Name: *Shi Pi San*

Literal Name: Bolster the Spleen Powder

Original Source: *Chong Ding Ji Sheng Fang* (Revised Formulas to Aid the Living)

COMPOSITION

<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata), <i>pao</i> (blast-fried)	30g [6g]
<i>Gan Jiang</i> (Rhizoma Zingiberis), <i>pao</i> (blast-fried)	30g [6g]
<i>Fu Ling</i> (Poria)	30g [6g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	30g [6g]
<i>Mu Gua</i> (Fructus Chaenomelis)	30g [6g]
<i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>chao</i> (dry-fried) with ginger	30g [6g]
<i>Mu Xiang</i> (Radix Aucklandiae), do not expose to heat	30g [6g]
<i>Bing Lang</i> (Semen Arecae)	30g [6g]
<i>Cao Guo</i> (Fructus Tsaoko)	30g [6g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	15g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into a coarse powder. Cook 12g of the powder with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae) in 1.5 bowls of water until the liquid is reduced to 70% volume. Take the warm, strained decoction any time during the day. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Warms yang and strengthens the Spleen
2. Activates qi and promotes water circulation

CLINICAL MANIFESTATIONS

Yin shui (yin edema) due to Spleen and Kidney yang deficiencies: severe edema in the lower half of the body, cold hands and feet, absence of thirst, chest and abdominal fullness and distention, loose stools, thick, greasy tongue coating, and a deep, slow pulse.

CLINICAL APPLICATIONS

Edema, hydramnios, chronic nephritis, and early stage liver cirrhosis and ascites.

EXPLANATION

Shi Pi San (Bolster the Spleen Powder) is commonly used to treat *yin shui* (yin edema) due to Spleen and Kidney yang deficiencies. According to traditional Chinese medicine theory, the Spleen transforms and transports water. If Spleen yang becomes deficient and cannot carry

out its normal functions, water and dampness accumulates, leading to edema in the lower limbs. Accumulation of water and dampness will affect qi circulation, leading to chest and abdominal fullness and distention. Moreover, the deficient Spleen yang will not be able to warm the body, causing cold hands and feet. Loose stools reflect Spleen and Kidney yang deficiencies and failure of yang to disperse the water upward. A thick, greasy tongue coating also indicates damp accumulation. A deep, slow pulse also indicates Spleen and Kidney yang deficiencies.

This formula has *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis) to warm Spleen and Kidney yang, activate water circulation and relieve edema. *Fu Ling* (Poria) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) tonify the Spleen and dispel dampness via urination. *Mu Gua* (Fructus Chaenomelis) awakens the Spleen, dissolves dampness and eliminates water accumulation. *Hou Po* (Cortex Magnoliae Officinalis), *Mu Xiang* (Radix Aucklandiae), *Bing Lang* (Semen Arecae), and *Cao Guo* (Fructus Tsaoko) activate qi, regulate water circulation, and dissolve dampness. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), *Sheng Jiang* (Rhizoma Zingiberis Recens), and *Da Zao* (Fructus Jujubae) tonify the Spleen and harmonize the herbs in this formula.

MODIFICATIONS

- With dysuria and severe edema, add *Zhu Ling* (Polyporus) and *Ze Xie* (Rhizoma Alismatis).
- With loose stools, add *Da Fu Pi* (Pericarpium Arecae).

Shí Pí Sǎn (Bolster the Spleen Powder)

Shi Pi San (Bolster the Spleen Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Yin shui (yin edema) due to Spleen and Kidney yang deficiencies	<ul style="list-style-type: none"> Severe edema in the lower half of the body: yang deficiency unable to regulate water circulation Loose stools: yang deficiency unable to disperse the water upward Cold hands and feet: yang deficiency unable to warm the extremities Thick greasy tongue coating: damp accumulation Deep, slow pulse: Spleen and Kidney yang deficiencies 	<ul style="list-style-type: none"> Warms yang and strengthens the Spleen Activates qi and promotes water circulation 	<ul style="list-style-type: none"> <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) and <i>Gan Jiang</i> (Rhizoma Zingiberis) warm Spleen and Kidney yang. <i>Fu Ling</i> (Poria) and <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) tonify the Spleen and dispel dampness. <i>Mu Gua</i> (Fructus Chaenomelis) awakens the Spleen, dissolves dampness and eliminates water accumulation. <i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>Mu Xiang</i> (Radix Aucklandiae), <i>Bing Lang</i> (Semen Arecae), and <i>Cao Guo</i> (Fructus Tsaoko) activate qi, regulate water circulation, and dissolve dampness. <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle), <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), and <i>Da Zao</i> (Fructus Jujubae) tonify the Spleen and harmonize the herbs.

- With lethargy due to qi deficiency, add *Dang Shen* (Radix Codonopsis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Huang Qi* (Radix Astragali).
- With severe swelling and edema, and decreased urinary output, add *Zhu Ling* (Polyporus) and *Ze Xie* (Rhizoma Alismatis).

CAUTIONS / CONTRAINDICATIONS

Shi Pi San treats edema due to deficiency. It is inappropriate for edema characterized by an excess condition.

CLINICAL STUDIES AND RESEARCH

Hydramnios: Use of *Shi Pi San* was associated with 93% effectiveness in treating hydramnios. Of 18 patients, the study reported complete recovery in 16 cases and no effect in 2 cases.¹

AUTHORS' COMMENTS

Because the main emphasis of *Shi Pi San* is to strengthen the Spleen to activate qi and regulate water metabolism, it is named as "Bolster the Spleen Powder."

Zhen Wu Tang (True Warrior Decoction) and *Shi Pi San* have similar functions and compositions. Both formulas contain herbs that warm Spleen and Kidney yang to facilitate water circulation and elimination.

- *Zhen Wu Tang* is used primarily to treat water accumulation due to Kidney yang deficiency, with symptoms such as abdominal pain and swelling of the lower limbs.
- *Shi Pi San* is used mainly to treat water accumulation due to Spleen yang deficiency, with symptoms such as chest and abdominal fullness.

Original Source: *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) by Zhu Zhen-Heng in 1481

COMPOSITION

<i>Fen Bi Xie</i> (Rhizoma Dioscoreae Hypoglaucae)	[9g]
<i>Yi Zhi</i> (Fructus Alpiniae Oxyphyllae)	[9g]
<i>Wu Yao</i> (Radix Linderae)	[9g]
<i>Shi Chang Pu</i> (Rhizoma Acori Tatarinowii)	[9g]

DOSAGE / PREPARATION / ADMINISTRATION

EXPLANATION

The source text instructs to grind the ingredients into a coarse powder and cook 15g in water with a pinch of salt. Take the warm, strained decoction before meals. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

Bi Xie Fen Qing Yin (Dioscorea Hypoglauca Decoction to Separate the Clear) treats urinary disorders caused by deficiency and cold of the lower *jiao* accompanied by accumulation of dampness and turbidity. The Kidney is responsible for recycling fluids. When Kidney yang is deficient, the Kidney is unable to lift pure fluids to regulate urination, and frequent urination occurs. Because of accumulation of dampness and turbidity, the urine becomes white, thick, turbid, and cloudy.

CHINESE THERAPEUTIC ACTIONS

1. Warms Kidney yang
2. Resolves dampness and dispels turbidity

CLINICAL MANIFESTATIONS

Deficiency and cold of the lower *jiao*: frequent urination with white, thick, turbid, and cloudy urine.

CLINICAL APPLICATIONS

Dysuria, galacturia, urethritis, cystitis, nephrotic syndrome, chronic pyelonephritis, chronic pelvic inflammatory disease, prostatitis, and impotence.

This formula contains *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) to resolve dampness and dispel turbidity. It is one of the most effective herbs to treat *gao lin* (cloudy dysuria) with white cloudy urine. *Yi Zhi* (Fructus Alpiniae Oxyphyllae) warms Kidney yang and binds the Kidney to stop frequent urination. *Wu Yao* (Radix Linderae) warms the Kidney and Urinary Bladder to relieve frequent urination. *Shi Chang Pu* (Rhizoma Acori Tatarinowii)

Bì Xiè Fēn Qīng Yīn

(Dioscorea Hypoglauca Decoction to Separate the Clear)

warms the Urinary Bladder and dispels deficiency and cold of the lower *jiao*. Finally, salt acts as an envoy to lead the herbs to the Kidney in the lower *jiao*.

MODIFICATIONS

- With more severe condition of white and turbid urine, add *Shan Yao* (Rhizoma Dioscoreae) and *Qian Shi* (Semen Euryales).
- With burning sensation during urination, add *Mu Tong* (Caulis Akebiae) and *Di Huang* (Radix Rehmanniae).
- With painful urination, add *Che Qian Zi* (Semen Plantaginis) and *Zhi Zi* (Fructus Gardeniae).
- With frequent urination, add *Yuan Zhi* (Radix Polygalae) and *Fu Shen* (Poria Paradicis).
- With abdominal pain caused by deficiency and cold, add *Rou Gui* (Cortex Cinnamomi) and *Xiao Hui Xiang* (Fructus Foeniculi).
- With lethargy and low back soreness, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Lu Jiao Jiao* (Colla Cornu Cervi).
- With qi deficiency due to the chronic nature of this condition, add *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- With profuse, white or clear vaginal discharge, add *Shan Yao* (Rhizoma Dioscoreae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Zi* (Radix Aconiti Lateralis Praeparata), and *Tu Si Zi* (Semen Cuscutae).

CAUTIONS / CONTRAINDICATIONS

Bi Xie Fen Qing Yin is contraindicated in patients with damp-heat in the Urinary Bladder characterized by frequent, painful urination, or burning sensation during urination.

CLINICAL STUDIES AND RESEARCH

1. **Lin zheng (dysuria syndrome):** One study of 62 males (between 21-50 years of age) with *lin zheng* (dysuria syndrome) reported 90.3% effectiveness when treated with 15 packs of *Bi Xie Fen Qing Yin*.¹
2. **Galacturia:** Thirty-two patients with galacturia were treated with 96.9% rate of recovery using *Bi Xie Fen Qing Yin* plus *Ku Shen* (Radix Sophorae Flavescentis), *Gou Ji* (Rhizoma Cibotii), and *Tu Fu Ling* (Rhizoma Smilacis Glabrae). The duration of treatment varied between 6-18 packs of herbs.²
3. **Urethritis:** One study reported satisfactory results in 45 of 53 patients using *Bi Xie Fen Qing Yin* to treat non-bacterial urethritis.³
4. **Impotence:** Use of *Bi Xie Fen Qing Yin* was effective in treating impotence associated with prostatitis. In addition

to this formula, modifications were made by adding *Zhi Zi* (Fructus Gardeniae) and *Bai Hua She She Cao* (Herba Hedyotis) for urinary frequency, urgency, and pain; *Du Zhong* (Cortex Eucommiae) and *Chuan Niu Xi* (Radix Cyathulae) for low back soreness and pain; *Qian Shi* (Semen Euryales), *Tu Si Zi* (Semen Cuscutae), and *Wu Wei Zi* (Fructus Schisandrae Chinensis) for premature ejaculation; and *Shi Xian Tao* (Pseudobulbus Pholidotae Chinensis) for spermatorrhea or seminal emission. Of 108 patients, the study reported complete recovery in 21 cases, significant improvement in 32 cases, moderate improvement in 20 cases, and no effect in 35 cases.⁴

5. **Prostatitis:** One study reported good results using modified *Bi Xie Fen Qing Yin* to treat 46 patients with prostatitis. Modifications to this formula included the addition of *Bai Jiang Cao* (Herba cum Radice Patriniae), *Chi Xiao Dou* (Semen Phaseoli), and *Bian Xu* (Herba Polygoni Avicularis) for damp-heat; *Yin Yang Huo* (Herba Epimedii), *Shan Yao* (Rhizoma Dioscoreae), and *Rou Gui* (Cortex Cinnamomi) for Spleen and Kidney deficiencies; and *Tao Ren* (Semen Persicae), *Mo Yao* (Myrrha), and *Chi Shao* (Radix Paeoniae Rubra) for qi and blood stagnation. Of the 46 patients, the study reported recovery in 30 cases, improvement in 14 cases, and no effect in 2 cases. The overall effectiveness was 95.6%.⁵

The source text instructs to prepare the ingredients as a decoction. Today, the decoction may be prepared using with the doses suggested in brackets.

This formula clears heat, resolves dampness, separates the clear, and dissolves turbidity. It is generally used to treat damp-heat attacking the Urinary Bladder with white, cloudy urine and a yellow, greasy tongue coating. It may also be used to treat *gao lin* (cloudy dysuria).

AUTHORS' COMMENTS

Historically, *Bi Xie Fen Qing Yin* was used for patients whose urine resembles rice water. When the urine cools, it hardens into a thick paste or rice-like glue. Today,

this formula may be used for patients with proteinuria manifesting in turbid urine.

These three formulas have identical Chinese characters and pinyin names. They all contain *Fen Bi Xie* (Rhizoma Dioscoreae Hypoglaucae) and *Shi Chang Pu* (Rhizoma Acori Tatarinowii) to treat white, cloudy urine characterized by dampness and turbidity. Each has a slightly different composition and function, however.

- *Bi Xie Fen Qing Yin* from *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) is a warmer formula, containing such herbs as *Wu Yao* (Radix Linderae) and *Yi Zhi* (Fructus Alpiniae Oxyphyllae). It is more effective for treating white, cloudy urine caused by deficiency and cold in the lower *jiao*.
- *Bi Xie Fen Qing Yin* from *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas) is also a warm formula. In addition to *Wu Yao* (Radix Linderae) and *Yi Zhi* (Fructus Alpiniae Oxyphyllae), it also contains *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Fu Ling* (Poria), to further enhance the effects to tonify qi and resolve dampness.
- *Bi Xie Fen Qing Yin* from *Yi Xue Xin Wu* (Medical Revelations) is a cooler formula, with *Huang Bo* (Cortex Phellodendri Chinensis) and *Che Qian Zi* (Semen Plantaginis). It is more appropriate for white, cloudy urine caused by damp-heat affecting the lower *jiao*.

SECTION 1: DAMP-DRYING AND STOMACH-HARMONIZING FORMULAS

Name	Similarities	Differences
<i>Ping Wei San</i> (Calm the Stomach Powder)		Base formula that dries dampness in the middle <i>jiao</i>
<i>Jia Wei Ping Wei San</i> (Modified Calm the Stomach Powder)	Dry dampness, strengthen the Spleen and Stomach	Stronger effect to promote digestion and activate qi and blood circulation
<i>Xiang Sha Ping Wei San</i> (Cyperus and Amomum Powder to Calm the Stomach)		Stronger effect to activate qi circulation and unblock qi stagnation
<i>Bu Huan Jin Zheng Qi San</i> (Rectify the Qi Powder Worth More than Gold)		Stronger effect to dispel dampness and regulate qi
<i>Fu Ling Yin</i> (Poria Decoction)		Dispers dampness and phlegm
<i>Huo Xiang Zheng Qi San</i> (Agastache Powder to Rectify the Qi)	Dispel interior dampness, relieve acute onset of nausea and vomiting	Releases exterior wind-cold
<i>Liu He Tang</i> (Harmonize the Six Decoction)		Strengthens the Spleen and Stomach, harmonizes the middle <i>jiao</i>
<i>Ge Hua Jie Cheng San</i> (Pueraria Flower Powder for Detoxification and Awakening)		Treats over-indulgence and intoxication of alcohol

Ping Wei San (Calm the Stomach Powder) dries dampness, strengthens the Spleen, activates qi circulation, and harmonizes the Stomach. This is the main formula for treating accumulation of dampness in the Spleen and Stomach. The main clinical manifestations include epigastric and abdominal fullness and distention, and a white, thick, greasy tongue coating.

Jia Wei Ping Wei San (Modified Calm the Stomach Powder), ***Xiang Sha Ping Wei San*** (Cyperus and Amomum Powder to Calm the Stomach), and ***Bu Huan Jin Zheng Qi San*** (Rectify the Qi Powder Worth More than Gold) are all modifications of *Ping Wei San* (Calm the Stomach Powder). These three formulas have similar functions to dry dampness, strengthen the Spleen and Stomach, activate qi and blood circulation, and promote digestion. All have excellent functions to treat damp accumulation in the Spleen and Stomach with symptoms such as indigestion, abdominal pain, nausea, vomiting, and diarrhea.

- *Jia Wei Ping Wei San* has a slightly better effect to promote digestion and activate qi and blood circulation.
- *Xiang Sha Ping Wei San* has a stronger function to activate qi circulation and unblock qi stagnation.
- *Bu Huan Jin Zheng Qi San* has a stronger effect to dispel dampness and regulate qi.

Fu Ling Yin (Poria Decoction) strengthens the Spleen and Stomach, harmonizes the middle *jiao*, and dispels phlegm and dampness. It treats stomach disorders with excessive gas and bloating, no appetite, inability to eat due to excessive gas in the stomach, belching, nausea, and mild resistance in the epigastric region upon palpation.

Huo Xiang Zheng Qi San (Agastache Powder to Rectify the Qi), ***Liu He Tang*** (Harmonize the Six Decoction) and ***Ge Hua Jie Cheng San*** (Pueraria Flower Powder for Detoxification and Awakening) have similar functions of treating acute cases of dampness affecting the interior, with acute onset of nausea and vomiting.

Chapter 16 — Summary

- *Huo Xiang Zheng Qi San* releases exterior wind-cold, dispels dampness, regulates qi, and harmonizes the middle *jiao*. It treats exterior wind-cold with interior dampness causing symptoms such as fever, chills, headache, fullness and oppression in the chest and diaphragm, vomiting, diarrhea, and epigastric or abdominal pain.
- *Liu He Tang* dissolves summer-dampness, strengthens the Spleen, and harmonizes the middle *jiao*. It mainly treats improper diet consumed during the summertime, leading to damp accumulation in the middle *jiao* affecting the normal transportation and transformation functions of the Spleen and Stomach. Clinical manifestations include chills, fever, headache, fullness and oppression in the chest and diaphragm, nausea, vomiting, borborygmus, and diarrhea.
- *Ge Hua Jie Cheng San* clears damp-heat and strengthens and harmonizes the Spleen and Stomach. It is most commonly used to prevent and treat alcohol intoxication.

SECTION 2: HEAT-CLEARING AND DAMP-DISPELLING FORMULAS

Name	Similarities	Differences
<i>Yin Chen Hao Tang</i> (Artemisia Scoparia Decoction)	Clear damp-heat, relieve jaundice	Principal formula for damp-heat jaundice
<i>Yin Chen Wu Ling San</i> (Artemisia Scoparia and Five-Ingredient Powder with Poria)		Relieves urinary difficulty
<i>San Ren Tang</i> (Three-Nut Decoction)	Clear damp-heat	Stronger effect to dispel dampness
<i>Gan Lu Xiao Du Dan</i> (Sweet Dew Special Pill to Eliminate Toxin)		Stronger effect to clear heat and eliminate toxins
<i>Lian Po Yin</i> (Coptis and Magnolia Bark Decoction)	Clear heat, dispel dampness, resolve turbidity	Harmonizes the Stomach and stops vomiting
<i>Can Shi Tang</i> (Silkworm Droppings Decoction)		Relieves spasms and cramps
<i>Ba Zheng San</i> (Eight-Herb Powder for Rectification)	Clear damp-heat in the lower <i>jiao</i>	Clears heat and sedates fire
<i>Wu Lin San</i> (Five-Ingredient Powder for Painful Urinary Dysfunction)		Clears heat and cools the blood

Yin Chen Hao Tang (Artemisia Scoparia Decoction) is the principal formula for treating jaundice caused by damp-heat. It clears heat, dissolves dampness, and relieves jaundice. Clinical manifestations include yellow discoloration of the skin and sclera, slight abdominal fullness, dysuria, thirst, yellow, greasy tongue coating, and a deep, rapid pulse.

Yin Chen Wu Ling San (Artemisia Scoparia and Five-Ingredient Powder with Poria) is formulated by adding *Yin Chen* (Herba Artemisiae Scopariae) to *Wu Ling San* (Five-Ingredient Powder with Poria). This formula treats damp-heat jaundice (more heat than dampness) with dysuria.

San Ren Tang (Three-Nut Decoction) and *Gan Lu Xiao Du Dan* (Sweet Dew Special Pill to Eliminate Toxin) have similar functions to treat warm-damp affecting the *qi* (energy) level.

- *San Ren Tang* has a stronger action to dispel dampness than to clear heat. It is mainly used in the beginning stage [*qi* (energy) level] of summer febrile syndrome with dampness being more predominant than heat. Clinical manifestations include headache, aversion to cold, heaviness and pain of the body, chest stuffiness, reduced appetite, and no thirst.
- *Gan Lu Xiao Du Dan* has more potent effects to dissolve dampness and turbidity, clear heat, and eliminate toxins. This formula treats damp-warmth febrile disorders or epidemic diseases in the beginning stage [*qi* (energy) level] with equal amounts of dampness and heat. Clinical manifestations include fever, lethargy, thirst, scanty, turbid urine, sore throat, yellow discoloration of the skin, chest stuffiness, vomiting, and diarrhea.

Chapter 16 — Summary

Lian Po Yin (Coptis and Magnolia Bark Decoction) and **Can Shi Tang** (Silkworm Droppings Decoction) both clear heat, dispel dampness, and resolve turbidity. Both can be used to treat sudden turmoil disorder with nausea and vomiting.

- **Lian Po Yin** is most effective in harmonizing the Stomach and stopping vomiting. It clears heat, dispels dampness, resolves turbidity, regulates qi, and harmonizes the middle *jiao*. It treats sudden turmoil disorder characterized by dampness and heat. Clinical manifestations include vomiting, diarrhea, fullness of the chest and hypochondrium, dark, scanty urine, and a yellow, greasy tongue coating.
- **Can Shi Tang** is best at relieving spasms and cramps. It clears heat, dispels dampness, and resolves turbidity. It has been used for sudden turmoil disorder characterized by dampness and heat. Clinical manifestations include abdominal pain, cramps, vomiting, diarrhea, thirst, irritability, and a thick, dry, yellow tongue coating.

Ba Zheng San (Eight-Herb Powder for Rectification) and **Wu Lin San** (Five-Ingredient Powder for Painful Urinary Dysfunction) are two formulas that clear damp-heat in the lower *jiao* to treat *lin zheng* (dysuria syndrome).

- **Ba Zheng San** clears heat, sedates fire, induces urination, and relieves *re lin* (heat dysuria). This is the main formula for *re lin* (heat dysuria) with damp-heat entangling in the lower *jiao*, causing symptoms of turbid and dark urine, painful urination, lower abdominal pain and distention, dry mouth and throat, scanty drips of urine, or anuria in severe cases.
- **Wu Lin San** clears heat, cools the blood, induces urination, and relieves *xue lin* (bloody dysuria). It is commonly used to treat heat in the Urinary Bladder leading to urinary difficulty, presence of blood in the urine, severe pain upon urination, and cloudy urine with a feeling of sandy particles in the urine.

SECTION 3: WATER-REGULATING AND DAMP-RESOLVING FORMULAS

Name	Similarities	Differences
Wu Ling San (Five-Ingredient Powder with Poria)	Regulate water circulation, dispel dampness	Warms yang, releases the exterior
Wei Ling Tang (Calm the Stomach and Poria Decoction)		Harmonizes the Stomach
Zhu Ling Tang (Polyporus Decoction)		Clears heat, nourishes yin
Fang Ji Huang Qi Tang (Stephania and Astragalus Decoction)	Regulates water circulation, releases exterior wind	Strengthens the Spleen, tonifies <i>wei</i> (defensive) <i>qi</i>
Wu Pi San (Five-Peel Powder)	Regulates water circulation, reduces edema	Strengthens the Spleen, regulates qi circulation
Jiu Wei Bing Lang Jia Wu Fu Tang (Areca Nine Decoction plus Evodia and Poria)	Regulate water circulation, eliminate water accumulation	Disperses qi and blood stagnation, treats water accumulation in the legs
Mu Fang Ji Tang (Cocculus Decoction)		Lowers abnormal rising of yin and fluids, treats water accumulation in the upper <i>jiao</i>
Fen Xiao Tang (Separate and Reduce Decoction)		Strengthens the Spleen, treats water accumulation in the abdomen and lower legs
Dao Shui Fu Ling Tang (Poria Decoction to Drain Water)		Strongly drains water accumulation, treats severe water accumulation throughout the body

Chapter 16 — Summary

Wu Ling San (Five-Ingredient Powder with Poria) dispels dampness through diuresis, warms yang, and disperses water fluids. It can be used for any of the following three diagnoses: exterior syndrome accompanied by accumulation of water and dampness in the interior (*taiyang fu* [hollow organ] syndrome), interior accumulation of water and dampness, and *tan yin* (phlegm retention).

Wei Ling Tang (Calm the Stomach and Poria Decoction) combines *Ping Wei San* (Calm the Stomach Powder) with *Wu Ling San* (Five-Ingredient Powder with Poria). It dispels dampness and harmonizes the Stomach to treat accumulation of water and dampness in the interior causing abdominal distention and edema.

Zhu Ling Tang (Polyporus Decoction) induces diuresis, clears heat, and nourishes yin. It is used for yin deficiency with interlocking of water and heat in the Urinary Bladder with symptoms such as dysuria, fever, thirst with a strong desire to drink, irritability, and insomnia. This formula can also be used for *xue lin* (bloody dysuria) with characteristics of extremely painful urination with blood, and fullness and pain in the lower abdomen.

Fang Ji Huang Qi Tang (Stephania and Astragalus Decoction) expels external wind pathogens, tonifies *wei* (defensive) *qi*, strengthens the Spleen, and dispels dampness through urination. It is used for *wei* (defensive) *qi* deficiency with accumulation of water and dampness. Clinical manifestations include perspiration, aversion to wind, heaviness of the body, and urinary difficulty.

Wu Pi San (Five-Peel Powder) is the principal formula used to treat edema of the whole body caused by Spleen deficiency and damp accumulation. This formula eliminates dampness and water, regulates *qi*, and strengthens the Spleen. Clinical manifestations include edema of the whole body, heaviness of the limbs, no aversion to wind, epigastric and abdominal fullness or distention, shortness of breath, rapid breathing, and dysuria.

Jiu Wei Bing Lang Jia Wu Fu Tang (Areca Nine Decoction plus Evodia and Poria) dispels water accumulation and disperses *qi* and blood stagnation. It primarily treats *qi* and blood stagnation accompanied by water accumulation in the legs (beriberi and pitting edema) and in the chest (congestive heart failure). Clinical manifestations include edema, numbness and weakness of the legs, fatigue, palpitations, and a feeling of distention beneath the heart.

Mu Fang Ji Tang (Cocculus Decoction) activates water circulation to eliminate stagnation, and guides abnormally rising *qi* downward. It may be used to treat accumulation of water in the upper *jiao* (e.g., congestive heart failure). Clinical manifestations include shortness of breath, increased dyspnea when lying down, abdominal pain, and fullness and distention in the epigastrium and chest.

Fen Xiao Tang (Separate and Reduce Decoction) strengthens the Spleen, activates *qi* circulation, and regulates water circulation. It is mainly used to treat Spleen deficiency accompanied by severe cases of water accumulation in the abdomen (ascites with drum-like distention in the abdomen) and lower legs (pitting edema with prolonged presence of pits produced by pressure).

Dao Shui Fu Ling Tang (Poria Decoction to Drain Water) dispels stagnant water, dries dampness, eliminates water from the Lung, and harmonizes the Spleen. It treats severe water accumulation, as seen in cases of nephritis, ascites, edema, congestive heart failure, and dysuria.

Chapter 16 — Summary

SECTION 4: WARM FORMULAS THAT DISSOLVE DAMPNESS

Name	Similarities	Differences
Ling Gui Zhu Gan Tang (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction)	Warm yang in the middle <i>jiao</i> , dispel dampness and phlegm	Warms yang, dispels dampness, resolves <i>tan yin</i> (phlegm retention)
Gan Cao Gan Jiang Fu Ling Bai Zhu Tang (Licorice, Ginger, Poria and Atractylodes Macrocephala Decoction)		Warms the middle <i>jiao</i> and dispels cold and dampness in the lower back
Zhen Wu Tang (True Warrior Decoction)	Invigorate the yang, regulate water circulation	Strongly tonifies Kidney yang
Shi Pi San (Bolster the Spleen Powder)		Strongly tonifies Spleen yang
Bi Xie Fen Qing Yin (Dioscorea Hypoglauca Decoction to Separate the Clear)	Dissolves dampness, clears turbidity	Warms and tonifies Kidney yang

Ling Gui Zhu Gan Tang (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction) is the main formula for treating *tan yin* (phlegm retention) syndrome. It invigorates yang to disperse phlegm retention, strengthens the Spleen, and dispels dampness. Main clinical manifestations include fullness of the chest and hypochondriac region, dizziness, shortness of breath, coughing, palpitations, and a white, slippery tongue coating.

Gan Cao Gan Jiang Fu Ling Bai Zhu Tang (Licorice, Ginger, Poria and Atractylodes Macrocephala Decoction) warms yang, strengthens the Spleen, and dispels cold and dampness. It mostly treats cold and dampness in the lower back (kidney area). Clinical manifestations include coldness and pain of the lower back and lower body, heavy sensations of the body, normal appetite and diet, absence of thirst, and normal urination.

Zhen Wu Tang (True Warrior Decoction) and **Shi Pi San** (Bolster the Spleen Powder) warm the Spleen and Kidney, invigorate yang qi, and regulate water circulation. Both formulas treat edema due to yang deficiency.

- **Zhen Wu Tang** is more effective at tonifying Kidney yang with water accumulation. It warms Spleen and Kidney yang to treat symptoms of heaviness and pain of the limbs, abdominal pain, diarrhea, edema of the limbs, urinary difficulty, no thirst, vertigo, white tongue coating, and a deep pulse.
- **Shi Pi San** is stronger at warming the Spleen and activating qi circulation. It is used for *yin shui* (yin edema), and chest and abdominal fullness and pain caused by Spleen yang deficiency.

Bi Xie Fen Qing Yin (Dioscorea Hypoglauca Decoction to Separate the Clear) warms Kidney yang, dissolves dampness, and clears turbidity. It is used for frequent urination, with white, thick, turbid and cloudy urine due to deficiency cold of the lower *jiao*.

Chapter 17

— Wind-Damp Dispelling Formulas

孙思邈 Sún Sí-Miǎo

孙思邈 Sún Sí-Miǎo, 581 – 682.

孙思邈 Sún Sí-Miǎo

Born into a family mired in poverty and growing up as a chronically ill child, Sun Si-Miao realized the importance of health. He spent over 80 years of his life studying and practicing Traditional Chinese Medicine. Because Sun grew up as a peasant, he treated every patient equally, without regard for or inquiry into their background (whether they were royalty or peasants). Due to his own childhood illness, Sun strongly emphasized the importance of prevention, stating that “superior medicine *prevents* disease, and inferior medicine *treats* disease.” Most importantly, Sun believed that every human life is worth more than a thousand pieces of gold, and expressed his dedication to this concept by incorporating it in naming all of his publications.

备急千金要方 *Bei Ji Qian Jin Yao Fang* (Thousands of Golden Prescriptions for Emergencies) is considered to be the first encyclopedia of Traditional Chinese Medicine. It addresses a wide variety of topics, such as internal and external medicine, gynecology, pediatrics, toxicology, diet, *tui-na*, pulse diagnosis, acupuncture, and more. Examples of his remedies include the use of oxen or sheep liver to treat night blindness, and sheep or deer thyroid glands and seaweed to treat goiter. **千金要方** *Qian Jin Yao Fang* (Thousand Ducat Prescriptions) and **千金翼方** *Qian Jin Yi Fang* (Supplement to the Thousand Ducat Formulas) elaborated upon and discussed in great detail all aspects of herbs and herbal formulas, including growing, harvesting, processing and storage of herbs and their uses in treatment. These two texts not only discussed herbal medicine in great detail, but offered great insights in acupuncture as well. Sun documented over 200 extraordinary points, including the discovery of *Shixuan* points and the naming of the *ah shi* point.¹ Sun strongly emphasized the importance of integrating acupuncture and herbs, and stated “[use of] acupuncture without herbs, or herbs without acupuncture, is not an act of a fine physician.”

备急千金要方
Bei Ji Qian Jin Yao Fang
(Thousands of Golden
Prescriptions for Emergencies)
in the middle of the 7th century.

Sun treated many patients in his lifetime, and was most famous for one incident, a story known as “opening the casket to revive the dead.” According to legend, Sun encountered a funeral when he was traveling one day. As the family prepared to bury the deceased, Sun looked on and suddenly shouted: “Stop! Stop! This person may still be alive!” The family answered: “She is dead. Do not speak nonsense.” Sun replied: “If she is really dead, her blood should clot. However, if you look carefully, there are drops of blood slowly seeping out from the casket. How can you be certain she is dead?” Upon inquiry with the husband, Sun found out that the presumed deceased was a middle-aged woman who was having a difficult labor trying to deliver her first child. Sun immediately lifted the casket lid to treat her with both acupuncture and herbs. After Sun inserted three needles, in *Renzhong* (GV 26), *Zhongwan* (CV 12) and *Zhongji* (CV 3), the woman promptly awakened. After taking an herbal decoction, she safely delivered a healthy baby.

Sun Si-Miao has made enormous contributions to all aspects of medicine and medicinal substances, and is remembered as **药王** the King of Medicine.

Exemplar formulas formulated Sun Si-Miao include:

- *Wei Rui Tang* (Polygonatum Odoratum Decoction)
- *Wen Pi Tang* (Warm the Spleen Decoction)
- *Dang Gui Jian Zhong Tang* (Tangkuei Decoction to Construct the Middle)
- *Ci Zhu Wan* (Magnetite and Cinnabar Pill)
- *Zhen Zhong Dan* (Pillow Special Pill)
- *Xiao Xu Ming Tang* (Minor Prolong Life Decoction)
- *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction)
- *Yan Tang Tan Tu Fang* (Salt Decoction to Induce Vomiting)
- *Wei Jing Tang* (Reed Decoction)

1. When the practitioner palpates a point and the patient exclaims ‘ah!’ in pain, the “*ah shi* point” has been located.

Chapter 17 — Overview

— Wind-Damp Dispelling Formulas

Definition: Wind-damp dispelling formulas target exterior factors (wind-dampness, damp-heat, damp-cold, or damp-phlegm) that attack the superficial parts of the body, block the channels and collaterals, and cause swelling, inflammation, and pain. In addition to dispelling exterior factors, these formulas open the channels and collaterals, relax the tendons and ligaments, and relieve pain. Wind-damp disorders are characterized by symptoms such as headache, body aches, pain and numbness in the back and knees, and edema of the legs.

Wind-damp dispelling formulas are frequently used to treat *bi zheng* (painful obstruction syndrome), a condition characterized by stagnation and obstruction that may affect any tissue or organ, causing pain in the muscles, joints, tendons, or bones. In addition to affecting any part of the body, exterior wind-damp disorders may be complicated by cold or heat, leading to damp-cold or damp-heat disorders at the exterior. Since exterior wind-damp disorders are frequently associated with stagnation in the channels and collaterals, this condition should be treated by adding blood-activating herbs to wind-damp dispelling formulas. Chronic exterior wind-damp disorders may cause patients to become deficient; so adding qi-tonifying herbs to these formulas may be necessary in these situations. Furthermore, different types of *bi zheng* (painful obstruction syndrome) do not necessarily occur independently; rather, several types may occur together. Because there are multiple causes and complications, accurate diagnosis of *bi zheng* (painful obstruction syndrome) is essential to successful treatment.

- *Xing bi* (mobile painful obstruction) is caused by wind attacking the body. Like wind, which is light and mobile, *xing bi* (mobile painful obstruction) is characterized by pain in the upper body, and specifically, pain that travels from one area to another.
- *Tong bi* (extremely painful obstruction) is characterized by cold. Like cold, which is stationary and constricting, *tong bi* (extremely painful obstruction) is distinguished by severe pain at a fixed location. This type of pain intensifies with exposure to cold, and is relieved by exposure to warmth.
- *Zhuo bi* (fixed painful obstruction) often occurs when dampness affects specific, fixed areas. Like dampness, which is heavy and sinking, *zhuo bi* (fixed painful obstruction) is characterized by pain and swelling in the lower extremities.
- *Re bi* (heat painful obstruction) is characterized by local redness, swelling, burning, and pain. The heat results often from prolonged obstruction of the channels and collaterals by wind, cold, or dampness.
- *Wan bi* (stubborn painful obstruction) generally occurs after chronic or repetitive injuries to the same area, leading to stiffness, numbness, and reduced mobility.
- *Wei bi* (atrophic painful obstruction) is caused by Liver and Kidney deficiencies, characterized by atrophy, and by weakness and pain of the muscles and bones.
- *Xue bi* (blood painful obstruction) involves blood disorders, characterized by dull or sharp pain. Dull pain may be caused by deficiency of the blood needed to nourish the tendons and bones. Sharp pain, on the other hand, is often related to blood stagnation blocking the channels and collaterals.
- *Zhou bi* (generalized painful obstruction) is characterized by generalized pain in the bones and joints.

~
Wind-damp dispelling formulas are mainly used to treat *bi zheng* (painful obstruction syndrome) caused by exterior factors attacking the superficial parts of the body.
~

Chapter 17 — Overview

SUBCATEGORIES OF ACTION

Wind-damp disorders have multiple causes and complications. Therefore, wind-damp dispelling formulas are divided into four subcategories to delineate the nature of the disorders, and the characteristics of the formulas.

1. Wind-Damp Dispelling Formulas

These formulas primarily dispel wind, cold, and dampness at the exterior causing symptoms such as headache, feelings of heaviness in the body, and pain in the extremities.

Commonly used herbs that dispel wind-dampness include *Qiang Huo* (Rhizoma et Radix Notopterygii), *Du Huo* (Radix Angelicae Pubescentis), and *Fang Feng* (Radix Saposhnikoviae). Exemplar formulas are *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness) and *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction).

2. Damp-Cold Dispelling Formulas

These formulas mainly warm yang and dispel cold and dampness from the exterior to treat *bi zheng* (painful obstruction syndrome) characterized by cold, dampness, and pain.

Commonly used herbs include *Zhi Chuan Wu* (Radix Aconiti Praeparata), *Zhi Cao Wu* (Radix Aconiti Kusnezoffii Praeparata), *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Gui Zhi* (Ramulus Cinnamomi), *Ma Huang* (Herba Ephedrae), *Cang Zhu* (Rhizoma Atractylodis), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae). Exemplar formulas include *Xiao Huo Luo Dan* (Minor Invigorate the Collaterals Special Pill) and *San Bi Tang* (Three-Painful Obstruction Decoction).

3. Damp-Heat Dispelling Formulas

These formulas treat *bi zheng* (painful obstruction syndrome) characterized by heat and dampness, by clearing heat and dispelling dampness at external parts of the body.

Commonly used herbs include *Cang Zhu* (Rhizoma Atractylodis), *Yi Yi Ren* (Semen Coicis), *Zhi Mu* (Rhizoma Anemarrhenae), and *Huang Bo* (Cortex Phellodendri Chinensis). Representative formulas include *Gui Zhi Shao Yao Zhi Mu Tang* (Cinnamon Twig, Peony, and Anemarrhena Decoction) and *Er Miao San* (Two-Marvel Powder).

4. Damp-Phlegm Dispelling Formula

This formula dries dampness and eliminates phlegm obstructing the channels and collaterals. Commonly used herbs include *Cang Zhu* (Rhizoma Atractylodis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Ban Xia* (Rhizoma Pinelliae), and *Tian Nan Xing* (Rhizoma Arisaematis). One exemplar formula is *Er Zhu Tang* (Two-Atractylodes Decoction).

CAUTIONS / CONTRAINDICATIONS

- Many wind-damp dispelling herbs and formulas are acrid, warm, and drying in nature, and may consume yin and blood. Therefore, they should be used with caution in patients with yin and/or blood deficiency.
- Wind-damp dispelling formulas are contraindicated in cases of Liver wind rising. Use of wind-damp dispelling formulas that are acrid, warm, and drying only exacerbates Liver wind conditions.
- Some herbs used in wind-damp dispelling formulas, such as *Zhi Chuan Wu* (Radix Aconiti Praeparata) and *Zhi Cao Wu* (Radix Aconiti Kusnezoffii Praeparata), are extremely hot and potentially toxic, and must be used with great caution to avoid unwanted or adverse effects.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Wind-damp dispelling formulas primarily treat musculoskeletal disorders. Pharmacologically, these formulas demonstrate remarkable analgesic and anti-inflammatory effects.^{1,2,3} Clinical applications include presentations of swelling, inflammation, and pain at various locations throughout the body.

Wind-damp dispelling formulas have remarkable analgesic and anti-inflammatory effects, and treat musculoskeletal disorders throughout the body.

Chapter 17 — Overview

- **Arthritis:** Wind-damp dispelling formulas have been used successfully to treat many different types of arthritis, including, but not limited to osteoarthritis,⁴ rheumatic arthritis,⁵ gout,^{6,7} periarthritis of the shoulders,⁸ and many others.^{9,10} Exemplar formulas include *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction), *Xiao Huo Luo Dan* (Minor Invigorate the Collaterals Special Pill), *Er Miao San* (Two-Marvel Powder), and *Juan Bi Tang* (Remove Painful Obstruction Decoction).
- **Neck pain:** According to clinical studies, neck pain can be treated effectively with *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness),¹¹ *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction),¹² and *Juan Bi Tang* (Remove Painful Obstruction Decoction).¹³
- **Sciatica:** *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction) and *Xiao Huo Luo Dan* (Minor Invigorate the Collaterals Special Pill) have been shown to successfully treat sciatica in several clinical studies.^{14,15,16}
- **Neurodermatitis:** *Er Miao San* (Two-Marvel Powder) and *Dang Gui Nian Tong Tang* (Tangkuei Decoction to Lift the Pain) have been shown to effectively treat neurodermatitis.^{17,18}
- **Musculoskeletal disorders:** Wind-damp dispelling formulas may also be used to treat other conditions characterized by swelling, inflammation, and pain. Clinical applications include hyperosteoarthritis,¹⁹ prolapse of lumbar intervertebral disks,²⁰ ankylosing spondylitis,^{21,22} and soft-tissue injuries.²³

祛风胜湿剂

— Wind-Damp Dispelling Formulas

Qīāng Huó Shèng Shī Tāng

(Notopterygium Decoction to Overcome Dampness)

羌活勝濕湯

羌活胜湿汤

Pinyin Name: *Qiang Huo Sheng Shi Tang***Literal Name:** Notopterygium Decoction to Overcome Dampness**Alternate Names:** *Chiang Huo Sheng Shih Tang*, Chiang-huo Dampness-Overcoming Decoction, Notopterygium Damp-Expelling Decoction, Notopterygium and Tuhuo Combination**Original Source:** *Nei Wai Shang Bian Huo Lun* (Clarifying Doubts about Injury from Internal and External Causes) by Li Gao in 1247**COMPOSITION**

<i>Qiang Huo</i> (Rhizoma et Radix Notopterygii)	3g [6g]
<i>Du Huo</i> (Radix Angelicae Pubescentis)	3g [6g]
<i>Fang Feng</i> (Radix Saposhnikoviae)	1.5g [3g]
<i>Gao Ben</i> (Rhizoma et Radix Ligustici)	1.5g [3g]
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	1.5g [3g]
<i>Man Jing Zi</i> (Fructus Viticis)	0.9g [2g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	1.5g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to grind the ingredients into a coarse powder, and cook it with 2 bowls of water until the liquid is reduced to 1 bowl. Take the hot strained decoction before meals on an empty stomach. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Dispels wind and eliminates dampness

CLINICAL MANIFESTATIONS

Wind-dampness at the exterior: pain, stiffness and immobility of the shoulder and back, low back pain with difficulty of movement, heaviness of the body, headache, a white tongue coating, and a superficial pulse.

CLINICAL APPLICATIONS

Common cold, influenza, rhinitis, headache, cervical disorders, rheumatoid arthritis, and edema.

EXPLANATION

Qiang Huo Sheng Shi Tang (Notopterygium Decoction to Overcome Dampness) treats wind-dampness at the exterior affecting the muscles. This syndrome may occur when a patient is attacked by wind pathogen while sweating, or if the patient has lived in a damp and humid environment for a long period of time. The wind-damp factor may attack the *taiyang* channels and cause immobility and pain of the shoulders and back. Wind-dampness blocks the circulation and causes qi and blood stagnation, which, in turn, leads to headache, heaviness of the body, and low back pain.

This formula has *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Du Huo* (Radix Angelicae Pubescentis) to dispel wind-dampness from both the upper and lower body, respectively. *Fang Feng* (Radix Saposhnikoviae) and *Gao Ben* (Rhizoma et Radix Ligustici) dispel wind-dampness from the *taiyang* channels and relieve the headache. *Chuan Xiong* (Rhizoma Chuanxiong) activates

Qīāng Huó Shèng Shī Tāng

(Notopterygium Decoction to Overcome Dampness)

Qiang Huo Sheng Shi Tang (Notopterygium Decoction to Overcome Dampness)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Wind-damp-ness at the exterior	<ul style="list-style-type: none">• Stiffness and pain in the shoulders and back: wind-damp factor attacking the <i>taiyang</i> channels• Headache, heaviness of the body, and low back pain: wind-dampness obstructing qi and blood circulation	Dispels wind and eliminates dampness	<ul style="list-style-type: none">• <i>Qiang Huo</i> (Rhizoma et Radix Notopterygii) and <i>Du Huo</i> (Radix Angelicae Pubescentis) dispel wind-dampness from both the upper and lower body.• <i>Fang Feng</i> (Radix Saposhnikoviae) and <i>Gao Ben</i> (Rhizoma et Radix Ligustici) dispel wind-dampness from the <i>taiyang</i> channels and relieve the headache.• <i>Chuan Xiong</i> (Rhizoma Chuanxiong) activates blood circulation and relieves pain.• <i>Man Jing Zi</i> (Fructus Viticis) dispels wind and relieves pain.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

blood circulation and relieves pain. *Man Jing Zi* (Fructus Viticis) dispels wind and relieves pain, especially headache. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs in the formula.

MODIFICATIONS

- For migraines, add *Chai Hu* (Radix Bupleuri) and *Huang Qin* (Radix Scutellariae).
- With stiffness and pain in the head and shoulders, add *Ge Gen* (Radix Puerariae Lobatae) and *Chi Shao* (Radix Paeoniae Rubra).
- With heavy sensations of the extremities and low back, add *Fang Ji* (Radix Stephaniae Tetrandrae) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With joint inflammation and pain, add *Cang Zhu* (Rhizoma Atractylodis), *Huang Bo* (Cortex Phellodendri Chinensis), and *Yi Yi Ren* (Semen Coicis).
- For arthritis, add *Chuan Xiong* (Rhizoma Chuanxiong), *Wei Ling Xian* (Radix et Rhizoma Clematidis), and *Wu Shao She* (Zaocys).

CAUTIONS / CONTRAINDICATIONS

- *Qiang Huo Sheng Shi Tang* contains exterior-releasing herbs to dispel wind-dampness from the exterior. While it is normal to experience mild sweating when taking this formula, profuse perspiration will damage both yin and yang and should be avoided.
- This formula is contraindicated for aches and pains due to *re bi* (heat painful obstruction), or in individuals with underlying yin deficiency.

PHARMACOLOGICAL EFFECTS

1. **Anti-inflammatory:** *Qiang Huo Sheng Shi Tang* given at doses

- of 2.5 g/kg had marked effect to reduce inflammation.¹
2. **Antipyretic:** Essential oils of *Qiang Huo Sheng Shi Tang* were shown to have antipyretic effects in mice.²

CLINICAL STUDIES AND RESEARCH

1. **Edema:** One study reported good results using *Qiang Huo Sheng Shi Tang* to treat edema, with modifications as follows: *Dang Shen* (Radix Codonopsis) and dry-fried *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for qi deficiency; *Fu Ling Pi* (Cortex Poria), *Ze Xie* (Rhizoma Alismatis), *Che Qian Zi* (Semen Plantaginis), and *Mu Tong* (Caulis Akebiae) for decreased volume and frequency of urination; *Gu Ya* (Fructus Setariae Germinatus), *Mai Ya* (Fructus Hordei Germinatus), dry-fried *Lai Fu Zi* (Semen Raphani), and *Shan Zha* (Fructus Crataegi) for food stagnation; and *Ba Ji Tian* (Radix Morindae Officinalis) and *Yin Yang Huo* (Herba Epimedii) for Kidney yang deficiency. Of 25 patients, urination was increased in all 25 cases within 2 packs of herbs. The edema was resolved in 4 cases within 6 packs of herbs, and in 6 cases within 10-15 packs.³
2. **Cervical disorders:** Use of *Qiang Huo Sheng Shi Tang* effectively treated 28 patients with cervical disorders with various clinical presentations. Modifications included the addition of *Gou Qi Zi* (Fructus Lycii) and *Sha Yuan Zi* (Semen Astragali Complanati) for blurred vision; *Qin Jiao* (Radix Gentianae Macrophyllae), *Quan Xie* (Scorpio), and *Wu Gong* (Scolopendra) for muscle stiffness in the face; *Hou Po* (Cortex Magnoliae Officinalis) and *Zi Su Geng* (Caulis Perillae) for difficulties with swallowing; *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Jiang Can* (Bombyx Batryticatus), and *Quan Xie* (Scorpio) for numbness of the tongue; *Ren*

Qīāng Huó Shèng Shī Tāng

(Notopterygium Decoction to Overcome Dampness)

Shen (Radix et Rhizoma Ginseng), *Huang Qi* (Radix Astragali), and *Sheng Ma* (Rhizoma Cimicifugae) for headache with hypotension; and *Fu Ling* (Poria), *Ze Xie* (Rhizoma Alismatis), *Che Qian Zi* (Semen Plantaginis), and *Niu Xi* (Radix Achyranthis Bidentatae) for headache with hypertension. Of 28 patients, the study reported complete recovery in 19 cases, marked effect in 5 cases, and no effect in 4 cases.⁴

AUTHORS’ COMMENTS

Qiang Huo Sheng Shi Tang and *Jiu Wei Qiang Huo Tang* (Nine-Herb Decoction with Notopterygium) both contain *Qiang Huo* (Rhizoma et Radix Notopterygii) as the main ingredient, and both treat the presence of wind-dampness at the exterior. Their differences are as follows:

- *Qiang Huo Sheng Shi Tang* dispels wind-dampness and primarily treats heaviness, immobility, and pain in the shoulder and back.
- *Jiu Wei Qiang Huo Tang* dispels wind, cold, and dampness from the exterior, and clears heat from the interior. It mainly treats individuals with both exterior and interior conditions, with such symptoms as fever, chills, mild aches and pains, a bitter taste in the mouth, and slight thirst.

COMPOSITION

<i>Qiang Huo</i> (Rhizoma et Radix Notopterygii)	45g [9g]
<i>Fang Feng</i> (Radix Saposhnikoviae)	45g [9g]
<i>Chi Shao</i> (Radix Paeoniae Rubra)	45g [9g]
<i>Jiang Huang</i> (Rhizoma Curcumae Longae)	45g [9g]
<i>Huang Qi</i> (Radix Astragali), <i>mi zhi</i> (fried with honey)	45g [9g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	45g [9g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	15g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into a coarse powder. Cook 15g of the powder with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 2 bowls of water until the liquid is reduced to 1 bowl. Take the strained decoction while warm. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi
2. Harmonizes the *ying* (nutritive) and *wei* (defensive) levels
3. Dispels wind and dampness

CLINICAL MANIFESTATIONS

Bi zheng (painful obstruction syndrome) caused by wind-dampness and accompanied by deficiencies of *ying*

Juān Bì Tāng (Remove Painful Obstruction Decoction)

Juan Bi Tang (Remove Painful Obstruction Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Bi zheng</i> (painful obstruction syndrome) with exterior excess and interior deficiency	<ul style="list-style-type: none"> • Pain in the neck, shoulder, and arm, and heaviness of the body and extremities: wind-dampness at the exterior • Numbness and weakness: deficiencies of <i>ying</i> (nutritive) and <i>wei</i> (defensive) <i>qi</i> in the interior 	<ul style="list-style-type: none"> • Tonifies <i>qi</i> and harmonizes the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels • Disperses wind and dampness 	<ul style="list-style-type: none"> • <i>Qiang Huo</i> (Rhizoma et Radix Notopterygii) and <i>Fang Feng</i> (Radix Saposhnikoviae) dispel wind-dampness and relieve pain. • <i>Chi Shao</i> (Radix Paeoniae Rubra) and <i>Jiang Huang</i> (Rhizoma Curcumae Longae) activate <i>qi</i> and blood circulation. • <i>Huang Qi</i> (Radix Astragali) and <i>Dang Gui</i> (Radix Angelicae Sinensis) tonify <i>qi</i> and blood, and harmonize the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels. • <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) harmonize the herbs in the formula.

(nutritive) and *wei* (defensive) *qi*: pain in the neck, shoulder, and arm, and numbness of the extremities.

CLINICAL APPLICATIONS

Osteoarthritis, rheumatoid arthritis, gouty arthritis, bursitis, frozen shoulder, peri arthritis of the shoulders, tennis elbow, lumbago, and neck pain.

EXPLANATION

Juan Bi Tang (Remove Painful Obstruction Decoction) treats *bi zheng* (painful obstruction syndrome) due to deficiencies of *ying* (nutritive) and *wei* (defensive) *qi* with concurrent attack by wind-dampness. It is most effective for pain located in the upper parts of the body, such as the neck, shoulders, arms, and elbows. As a result of the underlying deficiencies in *ying* (nutritive) and *wei* (defensive) *qi*, patients experience numbness in the extremities, and general weakness and heaviness of the body. Moreover, deficiency of *ying* (nutritive) and *wei* (defensive) *qi* leaves patients more vulnerable to attacks by wind-dampness, a condition characterized by muscle stiffness, aches and pains, muscle spasms and cramps, and difficulty in moving.

In this formula, *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Fang Feng* (Radix Saposhnikoviae) dispel wind-dampness and relieve pain. *Chi Shao* (Radix Paeoniae Rubra) and *Jiang Huang* (Rhizoma Curcumae Longae) activate *qi* and blood circulation. *Huang Qi* (Radix Astragali) and *Dang Gui* (Radix Angelicae Sinensis) tonify *qi* and blood, and harmonize the *ying* (nutritive) and *wei* (defensive) levels. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and *Sheng Jiang* (Rhizoma Zingiberis Recens) harmonize the herbs in the formula.

MODIFICATIONS

- With muscle aches and pains in the upper extremities due to wind-cold-dampness, add *Gui Zhi* (Ramulus Cinnamomi) and *Wei Ling Xian* (Radix et Rhizoma Clematidis).
- With muscle aches and pains in the lower extremities, add *Du Zhong* (Cortex Eucommiae), *Niu Xi* (Radix Achyranthis Bidentatae), and *Du Huo* (Radix Angelicae Pubescentis).
- With excessive dampness, add *Cang Zhu* (Rhizoma Atractylodis), *Fang Ji* (Radix Stephaniae Tetrandrae), and *Yi Yi Ren* (Semen Coicis).
- With severe pain due to cold, add *Fu Zi* (Radix Aconiti Lateralis Praeparata).

PHARMACOLOGICAL EFFECTS

Anti-inflammatory: One study reported marked effect using *Juan Bi Tang* at 4-8 g/kg to reduce swelling and inflammation. *Juan Bi Tang*, however, did not show analgesic effect at doses of 4, 8 and 16 g/kg.¹

CLINICAL STUDIES AND RESEARCH

1. **Peri arthritis of the shoulders:** In one study of 50 patients with peri arthritis of the shoulders, the use of herbs was associated with complete recovery in 34 cases, significant improvement in 10 cases, and moderate improvement in 6 cases. The base formula contained *Juan Bi Tang* plus *Gui Zhi* (Ramulus Cinnamomi) and *Tou Gu Cao* (Caulis Impatiens) as guiding herbs. Modifications were made by adding a larger dose of *Huang Qi* (Radix Astragali) or *Si Jun Zi Tang* (Four-Gentlemen Decoction) for pain affecting the right shoulder; *Dang Gui* (Radix Angelicae Sinensis) or *Si Wu Tang* (Four-Substance Decoction) for pain affecting the left shoulder; *Ge Gen Tang* (Kudzu

Juān Bì Tāng (Remove Painful Obstruction Decoction)

Decoction) for pain in both the neck and shoulders; *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) for concurrent neck pain and temporal headaches; *Huang Qi Gui Zhi Wu Wu Tang* (Astragalus and Cinnamon Twig Five-Substance Decoction) for numbness and weakness of the arms; *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction) for headaches; and others. The herbs were given in decoction, and most patients had complete recovery after approximately 10-20 packs of herbs.²

2. **Neck pain:** Forty-eight patients with neck pain were treated successfully using modified *Juan Bi Tang*. The herbal formula contained *Qiang Huo* (Rhizoma et Radix Notopterygii) 12g, *Fang Feng* (Radix Saposhnikoviae) 12g, *Jiang Huang* (Rhizoma Curcumae Longae) 12g, *Dang Gui* (Radix Angelicae Sinensis) 10g, *Chi Shao* (Radix Paeoniae Rubra) 15g, honey-processed *Huang Qi* (Radix Astragali), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) 8g. Additional modifications were made as needed. The treatment protocol was to cook the herbs in water, and administer the decoction in three equally-divided doses for 20 days per course of treatment. Of 48 patients, the study reported complete recovery in 36 cases, significant improvement in 11 cases, and no effect in 1 case.³

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into a coarse powder, and cook it in 10 cups of water until the liquid is reduced to 3 cups. Take the warm, strained decoction in three equally-divided doses. The source text also advises to keep the body warm and to avoid exposure to cold.

CHINESE THERAPEUTIC ACTIONS

1. Disperses wind-dampness
2. Relieves *bi zheng* (painful obstruction syndrome)
3. Nourishes the Liver and Kidney
4. Tonifies qi and blood

CLINICAL MANIFESTATIONS

Chronic *bi zheng* (painful obstruction syndrome) with Liver and Kidney insufficiencies and qi and blood deficiencies: soreness and pain in the lower back and knees, numbness with difficult and limited range of motion in the limbs and extremities, aversion to cold and preference for warmth, palpitations, shortness of breath, pale tongue, white tongue coating, and a fine, weak pulse.

CLINICAL APPLICATIONS

Neck pain, low back pain, sciatica, hyperosteo-geny,

osteoarthritis, rheumatic arthritis, ankylosing spondylitis, prolapse of lumbar intervertebral disk, and postpartum aches and pains.

EXPLANATION

Du Huo Ji Sheng Tang (Angelica Pubescens and Taxillus Decoction) treats *bi zheng* (painful obstruction syndrome) characterized by chronic accumulation of wind, cold, and dampness with Liver and Kidney insufficiencies and qi and blood deficiencies. This syndrome begins with accumulation of wind, cold, and dampness in the channels and collaterals. As they obstruct qi and blood circulation, malnourishment of the Liver and Kidney occur. If this condition becomes chronic, qi, blood, Liver, and Kidney all become deficient. Thus, besides having aches and pains, the patient may also experience weakness of the knees and lower back, as well as difficulty in moving the limbs and extremities.

Since this condition is complicated by both excess (accumulation of wind, cold, and dampness) and deficiency (of Liver, Kidney, qi, and blood), optimal treatment requires the use of herbs that concurrently dispel wind, cold, and dampness, as well as herbs that nourish the Liver and Kidney; tonify qi and blood; and relieve pain.

Dú Huó Jì Shēng Tāng (Angelica Pubescens and Taxillus Decoction)

Du Huo Ji Sheng Tang (Angelica Pubescens and Taxillus Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Chronic <i>bi zheng</i> (painful obstruction syndrome) with excess and deficiency	<ul style="list-style-type: none">• Soreness and pain in the lower back and knees: wind-dampness affecting the muscles• Numbness with difficult and limited range of motion in the limbs and extremities, aversion to cold and preference for warmth, palpitations and shortness of breath: qi, blood, and Liver and Kidney deficiencies	<ul style="list-style-type: none">• Disperses wind-dampness and stops pain• Nourishes the Liver and Kidney• Tonifies qi and blood	<ul style="list-style-type: none">• <i>Du Huo</i> (Radix Angelicae Pubescentis) and <i>Xi Xin</i> (Radix et Rhizoma Asari) dispel wind, cold, and dampness.• <i>Fang Feng</i> (Radix Saposhnikoviae) and <i>Qin Jiao</i> (Radix Gentianae Macrophyllae) dispel wind-dampness.• <i>Sang Ji Sheng</i> (Herba Taxilli), <i>Du Zhong</i> (Cortex Eucommiae), and <i>Chuan Niu Xi</i> (Radix Cyathulae) dispel wind and dampness and tonify the Liver and Kidney.• <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Chuan Xiong</i> (Rhizoma Chuanxiong), <i>Di Huang</i> (Radix Rehmanniae), and <i>Bai Shao</i> (Radix Paeoniae Alba) tonify and activate blood circulation.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Fu Ling</i> (Poria) strengthen the Spleen and tonify qi.• <i>Gui Xin</i> (Cortex Rarus Cinnamomi) warms the channels and opens the blood vessels.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

In this formula, a large dose of *Du Huo* (Radix Angelicae Pubescentis) is used to dispel wind, cold, and dampness in the lower parts of the body. *Xi Xin* (Radix et Rhizoma Asari) disperses wind, cold, and dampness and relieves pain. *Fang Feng* (Radix Saposhnikoviae) dispels wind and dampness. *Qin Jiao* (Radix Gentianae Macrophyllae) dispels wind and dampness and soothes the tendons. *Sang Ji Sheng* (Herba Taxilli), *Du Zhong* (Cortex Eucommiae), and *Chuan Niu Xi* (Radix Cyathulae) dispel wind and dampness and also tonify the Liver and Kidney. *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), *Di Huang* (Radix Rehmanniae), and *Bai Shao* (Radix Paeoniae Alba) tonify blood and activate blood circulation. *Ren Shen* (Radix et Rhizoma Ginseng) and *Fu Ling* (Poria) strengthen the Spleen and tonify qi. *Gui Xin* (Cortex Rarus Cinnamomi) warms the channels and opens the blood vessels. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs in the formula.

MODIFICATIONS

- For *tong bi* (extremely painful obstruction) with more cold, add *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis).
- For *zhuo bi* (fixed painful obstruction) with more dampness, remove *Shu Di Huang* (Radix Rehmanniae

Praeparata) and add *Fang Ji* (Radix Stephaniae Tetrandrae), *Yi Yi Ren* (Semen Coicis), and *Cang Zhu* (Rhizoma Atractylodis).

- For *xue bi* (blood painful obstruction) with blood stagnation, add *Hong Hua* (Flos Carthami) and *Tao Ren* (Semen Persicae).
- With sore back and painful knees, add *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Xu Duan* (Radix Dipsaci).
- With severe pain, add *Zhi Chuan Wu* (Radix Aconiti Praeparata), *Zhi Cao Wu* (Radix Aconiti Kusnezoffii Praeparata), *Jin Qian Bai Hua She* (Bungarus Parvus), *Di Long* (Pheretima), and *Hong Hua* (Flos Carthami).
- With muscle weakness, add *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- If there is no deficiency of *zheng* (upright) *qi*, remove *Ren Shen* (Radix et Rhizoma Ginseng) and *Shu Di Huang* (Radix Rehmanniae Praeparata).

CAUTIONS / CONTRAINDICATIONS

- *Du Huo Ji Sheng Tang* should be used with caution during pregnancy.
- This formula is contraindicated in *bi zheng* (painful obstruction syndrome) caused by excess heat or damp-heat.

Dú Huó Jì Shēng Tāng (Angelica Pubescens and Taxillus Decoction)

PHARMACOLOGICAL EFFECTS

1. **Analgesic and anti-inflammatory:** *Du Huo Ji Sheng Tang* has been shown to relieve pain and reduce inflammation in both rats and mice.^{1,2}
2. **Anti-inflammatory:** Administration of *Du Huo Ji Sheng Tang* or *Dang Gui Nian Tong Tang* (Tangkuei Decoction to Lift the Pain) was associated with marked anti-inflammatory effects in suppressing the development of chronic arthritis induced by carrageenan or complete Freund's adjuvant. The researchers suggested that these herbal formulas may be considered as alternatives for non-steroidal anti-inflammatory drugs (NSAID).³
3. **Circulatory:** One study reported decreased vascular resistance and increased blood perfusion to the brain using *Du Huo Ji Sheng Tang* administered orally or via injection.⁴
4. **Antiplatelet:** *Du Huo Ji Sheng Tang* was shown to have a significant antiplatelet effect in rabbits.⁵

CLINICAL STUDIES AND RESEARCH

1. **Neck pain:** Use of modified *Du Huo Ji Sheng Tang* in one study for 1-4 courses of treatment was associated with 97% effectiveness. Of 69 patients, the study reported complete recovery in 41 cases, significant improvement in 20 cases, moderate improvement in 6 cases, and no effect in 2 cases.⁶ In another neck pain study, modified *Du Huo Ji Sheng Tang* in 43 patients was associated with significant improvement in 31 cases, improvement in 8 cases, and slight improvement in 4 cases. The herbal treatment contained *Du Huo* (Radix Angelicae Pubescentis), *Dang Shen* (Radix Codonopsis), *Du Zhong* (Cortex Eucommiae), *Sang Ji Sheng* (Herba Taxilli), *Shu Di Huang* (Radix Rehmanniae Praeparata), *Fu Ling* (Poria), *Bai Shao* (Radix Paeoniae Alba), *Qin Jiao* (Radix Gentianae Macrophyllae), *Fang Feng* (Radix Saposhnikoviae), *Gui Zhi* (Ramulus Cinnamomi), *Chuan Niu Xi* (Radix Cyathulae), *Niu Xi* (Radix Achyranthis Bidentatae), *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), *Hong Hua* (Flos Carthami), *Tao Ren* (Semen Persicae), *Yan Hu Suo* (Rhizoma Corydalis), *Xi Xin* (Radix et Rhizoma Asari), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). In addition, 16 mL of a *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) preparation was given via injection one time daily.⁷
2. **Sciatica:** In one study, use of modified *Du Huo Ji Sheng Tang* in 100 patients with sciatica was associated with recovery in 87 cases, significant improvement in 7 cases, moderate improvement in 3 cases, and no effect in 3 cases.⁸ Another study reported significant relief of numbness and pain within 5 packs of modified *Du Huo Ji Sheng Tang* in 65 of 80 patients.⁹ Additionally, use of modified *Du Huo Ji Sheng Tang* was associated with complete recovery in 85 of 105 patients who suffered from sciatica due to various causes. The herbal treatment contained this formula plus *Fang Ji* (Radix Stephaniae Tetrandrae), *Hai Tong Pi* (Cortex Erythrinae), *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), and others as needed.¹⁰
3. **Hyperosteoegeny:** Thirty patients with hyperosteoegeny of the knees were treated with complete recovery in 14 cases, significant improvement in 9 cases, moderate improvement in 4 cases, and no effect in 3 cases. The herbal treatment used *Du Huo Ji Sheng Tang* as the base formula, with the addition of *Fu Zi* (Radix Aconiti Lateralis Praeparata) 10g for increased severity of pain with exposure to cold; and *Jin Qian Bai Hua She* (Bungarus Parvus) 15g and *Wu Shao She* (Zaocys) 15g for chronic illness with limited mobility and altered physical appearance of the joints. The duration of treatment ranged from 2 months to 10 years.¹¹
4. **Osteoarthritis:** Use of modified *Du Huo Ji Sheng Tang* in 24 patients with osteoarthritis for 1 week to 3 months was associated with complete recovery in 14 cases, significant improvement in 4 cases, moderate improvement in 3 cases, and no effect in 3 cases. The overall effectiveness was 87.5%.¹² Another study of 262 patients with osteoarthritis of the knees reported 94.7% effectiveness when treated with modified *Du Huo Ji Sheng Tang*. The clinical presentations included swelling, inflammation, and pain of the knees, with occasional deformation of the joint. The herbal treatment contained this formula plus *Wu Gong* (Scolopendra), *Mu Li* (Concha Ostreae), and others. In addition, an herbal paste was also applied topically to the affected areas. Of 262 patients, the study reported significant improvement in 77 cases, moderate improvement in 118 cases, moderate improvement in 55 cases, and no effect in 12 cases.¹³
5. **Rheumatic arthritis:** One study reported a marked effect using *Du Huo Ji Sheng Tang* plus *Si Miao San* (Four-Marrow Powder) to treat rheumatic arthritis of the knees characterized by pain, swelling, inflammation, numbness, decreased range of motion, and difficulty in walking. Of 104 patients, the study reported complete recovery in 84 cases, improvement in 11 cases, and no effect in 9 cases. The overall effectiveness was 91.3%.¹⁴
6. **Ankylosing spondylitis:** Use of modified *Du Huo Ji Sheng Tang* showed good results in treating 22 patients with a history of 3 months or more of ankylosing spondylitis characterized by stiffness and pain of the lower back. Modifications included the addition of *Gou Ji* (Rhizoma Cibotii) 10g, *Tu Si Zi* (Semen Cuscutae) 10g, and larger doses for *Sang Ji Sheng* (Herba Taxilli), *Du Zhong* (Cortex Eucommiae), and *Xu Duan* (Radix Dipsaci) for severe low back pain; *Bai Jie Zi* (Semen Sinapis) 6g, *San Leng* (Rhizoma Sparganii) 10g, and *E Zhu* (Rhizoma

Dú Huó Jì Shēng Tāng (Angelica Pubescens and Taxillus Decoction)

Curcumae) 10g were added for chronic illness with phlegm accumulation. The duration of treatment was 2 months per course of treatment. Of 22 patients, the study reported significant improvement in 6 cases, moderate improvement in 14 cases, and no effect in 2 cases. The overall effectiveness was 90.9%.¹⁵

7. **Bizheng (painful obstructions syndrome):** Administration of *Du Huo Ji Sheng Tang* three times daily for 60-90 days in 52 patients was associated with significant improvement in 35 cases, moderate improvement in 15 cases, and no effect in 2 cases.¹⁶ Another study reported marked effect using modified *Du Huo Ji Sheng Tang* to treat various types of *bi zheng* (painful obstruction syndrome). The herbal treatment used this formula as the base formula, with the following modifications: *Qiang Huo* (Rhizoma et Radix Notopterygii), *Sang Zhi* (Ramulus Mori), and *Ge Gen* (Radix Puerariae Lobatae) for wind; *Ma Huang* (Herba Ephedrae) and *Xi Xin* (Radix et Rhizoma Asari) for cold; *Yi Yi Ren* (Semen Coicis), *Cang Zhu* (Rhizoma Atractylodis), and *Mu Gua* (Fructus Chaenomelis) for dampness; *Quan Xie* (Scorpio), *Wu Gong* (Scolopendra), and *Jin Qian Bai Hua She* (Bungarus Parvus) for stubborn pain; *Chuan Shan Jia* (Squilla Manis), *Tao Ren* (Semen Persicae), and *Hong Hua* (Flos Carthami) for blood stagnation; and *Ren Shen* (Radix et Rhizoma Ginseng) for generalized deficiency due to chronic illness. Of 55 patients, the study reported recovery in 22 cases, improvement in 30 cases, and no effect in 3 cases.¹⁷

8. **Prolapse of lumbar intervertebral disk:** Use of modified *Du Huo Ji Sheng Tang* was associated with improvement in 46 of 50 patients with prolapse of lumbar intervertebral disk confirmed by physical exam and CT scan. The herbal treatment contained this formula with modifications based on clinical presentations. For dampness and cold, *Fu Zi* (Radix Aconiti Lateralis Praeparata) 20g was added. For damp-heat, *Huang Bo* (Cortex Phellodendri Chinensis) 15g, *Huang Qin* (Radix Scutellariae) 12g, and *Cang Zhu* (Rhizoma Atractylodis) 15g were added, while *Gui Zhi* (Ramulus Cinnamomi), *Xi Xin* (Radix et Rhizoma Asari), and *Di Huang* (Radix Rehmanniae) were removed. For chronic pain with blood stagnation, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 20g was added.¹⁸

9. **Postpartum aches and pains:** One study reported marked results using modified *Du Huo Ji Sheng Tang* to treat 80 women with aches and pains after labor. In addition to this formula, modifications were made by adding *Fu Zi* (Radix Aconiti Lateralis Praeparata), larger doses of *Gui Zhi* (Ramulus Cinnamomi) and *Fang Ji* (Radix Stephaniae Tetrandrae) for wind-cold; *Mu Gua* (Fructus Chaenomelis) and *Cang Zhu* (Rhizoma Atractylodis) for

dampness; *Sang Zhi* (Ramulus Mori) and *Jiang Huang* (Rhizoma Curcumae Longae) for pain in the arms and shoulders; and *Niu Xi* (Radix Achyranthis Bidentatae) for pain in the lower body. Of 80 patients, the study reported complete recovery in 58 cases, significant improvement in 14 cases, moderate improvement in 6 cases, and no effect in 2 cases.¹⁹ Note: Information is unavailable regarding whether these individuals were nursing while on the herbal treatment. Please consult additional information on the safety status of each individual herb prior to using them for nursing mothers.

Da Zao (Fructus Jujubae)

This formula treats chronic and degenerative disorders affecting the lower limbs, including the legs, knees and ankles. Historically, this formula has been used to treat *he xi feng* (crane's knee wind). Today, it is commonly used to treat chronic disorders of the leg, such as atrophy and degeneration of the soft tissues, weakness of the muscles and joints, and stiffness and decreased range of motion of the joints. This formula contains herbs that activate qi and blood circulation, remove qi and blood stagnation, tonify the Liver and Kidney, and strengthen the soft tissues.

Gan Cao (Radix et Rhizoma Glycyrrhizae)

Ji Tong Tang (Spine Pain Decoction) treats spine disorders characterized by localized or radiating pain. It contains herbs to activate qi and blood circulation, reduce swelling and inflammation, and relieve pain. It is most effective for acute injuries of mild to moderate severity affecting the spine. It is less effective for chronic injuries in which the soft tissues have already stiffened or calcified.

AUTHORS' COMMENTS

Du Huo Ji Sheng Tang is one of the most commonly used formulas to treat muscle aches and pains due to both excess and deficiency. This formula is indicated for chronic *bi zheng* (painful obstruction syndrome) with obstruction of wind, cold, and dampness, accompanied by Liver and Kidney insufficiencies and qi and blood deficiencies. Today, *Du Huo Ji Sheng Tang* is commonly used for degeneration of bones, tendons, and ligaments due to aging. It is also one of the most effective formulas for treating low back pain.

<i>Bai Shao</i> (Radix Paeoniae Alba)	30g [6g]
<i>Di Huang</i> (Radix Rehmanniae)	15g [3g]
<i>Huang Qi</i> (Radix Astragali)	30g [6g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	30g [6g]
<i>Fu Ling</i> (Poria)	30g [6g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	30g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into powder. Cook 15g of the powder with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae) in 2 bowls of water until it is reduced to 1 bowl. Take the strained decoction while warm on an empty stomach. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi and nourishes the blood
2. Dispels wind, cold, and dampness

CLINICAL MANIFESTATIONS

Joint pain due to stagnation of wind, cold, and dampness with underlying qi and blood deficiencies: numbness and pain of the muscles and joints, decreased range of motion, pain that worsens with exposure to cold and damp weather.

CLINICAL APPLICATIONS

Arthritis, rheumatism, and general aches and pains in the muscles and joints.

EXPLANATION

San Bi Tang (Three-Painful Obstruction Decoction) treats *bi zheng* (painful obstruction syndrome) characterized by accumulation of wind, cold, and dampness with qi and blood deficiencies. This condition begins with accumulation of wind, cold, and dampness in the channels and collaterals. As these pathogens block qi and blood circulation, they cause malnourishment to the muscles and tendons in the limbs, resulting in numbness and pain with decreased range of motion. The pain is intensified with exposure to cold and damp weather.

This formula contains *Du Huo* (Radix Angelicae Pubescentis) and *Xi Xin* (Radix et Rhizoma Asari) to dispel wind, eliminate dampness, relieve pain, and alleviate *bi zheng* (painful obstruction syndrome). *Qin Jiao* (Radix Gentianae Macrophyllae) and *Fang Feng* (Radix Saposhnikoviae) dispel wind and eliminate dampness. *Gui Xin* (Cortex Rasus Cinnamomi) warms the body and dispels cold. *Du Zhong* (Cortex Eucommiae), *Xu Duan* (Radix Dipsaci), and *Niu Xi* (Radix Achyranthis Bidentatae) tonify the Kidney and strengthen bones and tendons. *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), *Bai Shao* (Radix Paeoniae Alba) and

MODIFICATIONS

- For *bi zheng* (painful obstruction syndrome) with more wind, add *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Gui Zhi* (Ramulus Cinnamomi).
- For *bi zheng* (painful obstruction syndrome) with more cold, add *Ma Huang* (Herba Ephedrae) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- For *bi zheng* (painful obstruction syndrome) with more dampness, add *Cang Zhu* (Rhizoma Atractylodis) and *Yin Chen* (Herba Artemisiae Scopariae).

AUTHORS’ COMMENTS

San Bi Tang, literally “Three-Painful Obstruction Decoction,” is so named because it has an excellent

effect to dispel wind, cold, and dampness, the three most common factors leading to *bi zheng* (painful obstruction syndrome).

Du Huo Ji Sheng Tang (Angelica Pubescens and Taxillus Decoction) and *San Bi Tang* have similar effects to treat *bi zheng* (painful obstruction syndrome) with exterior excess and interior deficiency.

- *Du Huo Ji Sheng Tang* focuses on *bi zheng* (painful obstruction syndrome) with exterior excess (wind-cold-damp) and interior deficiency (Liver and Kidney). It is most effective for *bi zheng* (painful obstruction syndrome) affecting the lower body, including the lower back and knees.
- *San Bi Tang* emphasizes on *bi zheng* (painful obstruction syndrome) with exterior excess (wind-cold-damp) and interior deficiency (qi and blood). It is most suitable for *bi zheng* (painful obstruction syndrome) characterized by numbness, pain, and decreased range of motion in the arms and legs.

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook the ingredients with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in water. Take the warm, strained decoction on an empty stomach. The source text recommends avoiding foods that are raw, cold, or damp in nature.

CHINESE THERAPEUTIC ACTIONS

1. Dredges the channels and collaterals
2. Invigorates blood circulation
3. Dispels dampness

CLINICAL MANIFESTATIONS

Body aches caused by exterior pathogens attacking the body with underlying deficiency: severe muscle aches, painful joints, radiating pain and numbness in the legs, and pain in the trunk.

CLINICAL APPLICATIONS

Arthritis, arthralgia, neuralgia, gout, lumbago, sciatica, purpura, hemiplegia, numbness and pain of the legs, and postpartum pain due to thrombosis.

EXPLANATION

Shu Jing Huo Xue Tang (Relax the Channels and Invigorate the Blood Decoction) treats *bi zheng* (painful obstruction syndrome) characterized by deficiency in the interior and excess at the exterior. The deficiency arises as a result of excessive sexual activity or over-consumption of alcohol, leading to emptiness of the channels and collaterals. As a result, wind, cold, and dampness can more easily attack the exterior, cause qi and blood stagnation, and produce pain all over the body.

The first four herbs in this formula, *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Di Huang* (Radix Rehmanniae), and *Chuan Xiong* (Rhizoma Chuanxiong), tonify the blood and activate blood circulation. *Tao Ren* (Semen Persicae) breaks up blood stagnation. *Fu Ling* (Poria) dispels dampness through diuresis, while *Cang Zhu* (Rhizoma Atractylodis) dries dampness. *Chen Pi* (Pericarpium Citri Reticulatae) regulates qi flow and dries dampness. *Qiang Huo* (Rhizoma et Radix Notopterygii), *Bai Zhi* (Radix Angelicae Dahuricae), *Wei Ling Xian* (Radix et Rhizoma Clematidis), *Fang Ji* (Radix Stephaniae Tetrandrae), and *Fang Feng* (Radix

(Relax the Channels and Invigorate the Blood Decoction)

Shu Jing Huo Xue Tang (Relax the Channels and Invigorate the Blood Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Body aches due to exterior excess with interior deficiency	Numbness and pain of the muscles and joints: deficiency of the channels and collaterals leading to invasion of wind, cold and dampness	<ul style="list-style-type: none">• Dredges the channels and collaterals• Invigorates blood circulation• Dispers dampness	<ul style="list-style-type: none">• <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Bai Shao</i> (Radix Paeoniae Alba), <i>Di Huang</i> (Radix Rehmanniae), and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) tonify blood and activate blood circulation.• <i>Tao Ren</i> (Semen Persicae) breaks up blood stagnation.• <i>Fu Ling</i> (Poria) dispels dampness through diuresis.• <i>Cang Zhu</i> (Rhizoma Atractylodis) dries dampness.• <i>Chen Pi</i> (Pericarpium Citri Reticulatae) regulates qi flow and dries dampness.• <i>Qiang Huo</i> (Rhizoma et Radix Notopterygii), <i>Bai Zhi</i> (Radix Angelicae Dahuricae), <i>Wei Ling Xian</i> (Radix et Rhizoma Clematidis), <i>Fang Ji</i> (Radix Stephaniae Tetrandrae), and <i>Fang Feng</i> (Radix Saposhnikoviae) activate qi circulation, dispel wind and dampness, and relieve pain.• <i>Long Dan</i> (Radix et Rhizoma Gentianae) drains heat and dampness.• <i>Chuan Niu Xi</i> (Radix Cyathulae) activates blood circulation and tonifies the body.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

Saposhnikoviae) activate qi circulation, dispel wind and dampness, and relieve pain. *Long Dan* (Radix et Rhizoma Gentianae) drains heat and dampness. *Chuan Niu Xi* (Radix Cyathulae) activates blood circulation and tonifies the body. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

MODIFICATIONS

- With pain in the upper body, add *Bo He* (Herba Menthae) and *Gui Zhi* (Ramulus Cinnamomi).
- With pain in the lower body, add *Mu Gua* (Fructus Chaenomelis), *Mu Tong* (Caulis Akebiae), *Huang Bo* (Cortex Phellodendri Chinensis), and *Yi Yi Ren* (Semen Coicis).
- With qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- With blood deficiency, increase the doses of *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Shu Di Huang* (Radix Rehmanniae Praeparata), and *Chuan Xiong* (Rhizoma Chuanxiong).
- With phlegm, add *Tian Nan Xing* (Rhizoma Arisaematis) and *Ban Xia* (Rhizoma Pinelliae).

- With weakness and pain of the muscles and tendons, add *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- With soreness and pain of the lower back and legs, add *Xu Duan* (Radix Dipsaci) and *Hong Hua* (Flos Carthami).
- With severe pain or paralysis of the legs, add *Mu Gua* (Fructus Chaenomelis), *Mu Tong* (Caulis Akebiae), *Huang Bo* (Cortex Phellodendri Chinensis), and *Yi Yi Ren* (Semen Coicis).

CAUTIONS / CONTRAINDICATIONS

Avoid foods that are raw, cold or damp in nature while taking *Shu Jing Huo Xue Tang*.

PHARMACOLOGICAL EFFECTS

Analgesic and anti-inflammatory: Administration of *Shu Jing Huo Xue Tang* was associated with reduction of pain and inflammation in adjuvant arthritic rats. The mechanism of action was attributed primarily to increased blood circulation.¹

AUTHORS’ COMMENTS

According to Dr. Chang Wei-Yen, *Shu Jing Huo Xue Tang* can be combined with *Shen Jin Cao* (Herba Lycopodii)

Shū Jīng Huó Xuè Tāng

(Relax the Channels and Invigorate the Blood Decoction)

and *Tou Gu Cao* (Caulis *Impatiensis*) to treat *xing bi* (mobile painful obstruction). Moreover, adding *Si Ni Tang* (Frigid Extremities Decoction) to this combination can help treat *zhuo bi* (fixed painful obstruction).

Mu Gua (Fructus *Chaenomelis*)
Gan Cao (Radix et Rhizoma *Glycyrrhizae*)

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to cook the ingredients with juices from *Zhu Li* (Succus *Bambusae*) and *Sheng Jiang* (Rhizoma *Zingiberis Recens*). Take the strained decoction while warm. Note: The source text does not specify the doses for the ingredients.

CHINESE THERAPEUTIC ACTIONS

1. Disperses wind, cold, dampness, and heat
2. Activates blood circulation
3. Unblocks the channels and collaterals

CLINICAL MANIFESTATIONS

Bi zheng (painful obstruction syndrome): severe pain in the muscles and joints of the arms and legs.

Shū Jīn Lì Ān Sǎn (Relax the Tendons and Instill Peace Powder)

CLINICAL APPLICATIONS

Arthritis, arthralgia, neuralgia, hemiplegia, numbness and pain in the legs, and chronic vitamin B deficiency.

EXPLANATION

Shu Jin Li An San (Relax the Tendons and Instill Peace Powder) focuses on dispersing multiple pathogenic factors (wind, cold, dampness, and heat), activating blood circulation, and unblocking the channels and collaterals. The source text designated this relatively large formula for the treatment of joint pain with intensity and severity

similar to a “tiger’s bite.” This joint pain may occur in the arms or legs, or in various joints.

Fang Feng (Radix Saposhnikoviae) and *Qiang Huo* (Rhizoma et Radix Notopterygii) dispel wind to relieve numbness and stiffness of the joints. *Wei Ling Xian* (Radix et Rhizoma Clematidis), *Tian Nan Xing* (Rhizoma Arisaematis), *Cang Zhu* (Rhizoma Atractylodis), and *Du Huo* (Radix Angelicae Pubescentis) dispel wind and dampness, thereby relieving joint pain. *Fu Ling* (Poria) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) warm the middle

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to prepare the formula as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Disperses wind and dampness
2. Benefits qi
3. Activates blood circulation

CLINICAL MANIFESTATIONS

Bi zheng (painful obstruction syndrome) caused by wind-dampness: numbness and pain of the extremities, swelling, inflammation, decreased mobility and limited range of motion in the joints.

CLINICAL APPLICATIONS

Arthritis, arthralgia, rheumatoid arthritis, beriberi, nephritis, pulmonary edema, and pleurisy.

Yi Yi Rén Tāng (Coicis Decoction)

Yi Yi Ren Tang (Coicis Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Bi zheng</i> (painful obstruction syndrome) due to wind, cold, and dampness	Numbness and pain of the extremities, swelling, inflammation, decreased mobility, and limited range of motion in joints: wind, cold, and dampness attacking the muscles and joints	<ul style="list-style-type: none">• Dispels wind and dampness• Benefits qi• Activates blood circulation	<ul style="list-style-type: none">• <i>Ma Huang</i> (Herba Ephedrae) and <i>Gui Zhi</i> (Ramulus Cinnamomi) dispel wind-cold from the exterior, and drain dampness through urination.• <i>Gui Zhi</i> (Ramulus Cinnamomi) opens the channels and collaterals in the extremities to relieve pain.• <i>Dang Gui</i> (Radix Angelicae Sinensis) and <i>Bai Shao</i> (Radix Paeoniae Alba) activate blood circulation, harmonize the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels and relieve pain.• <i>Cang Zhu</i> (Rhizoma Atractylodis) and <i>Yi Yi Ren</i> (Semen Coicis) drain dampness.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

EXPLANATION

Yi Yi Ren Tang (Coicis Decoction) was originally designed to treat *bi zheng* (painful obstruction syndrome) caused by wind-dampness. This condition, however, often occurs with complications, as wind-dampness may combine with cold and attack the muscles and joints, leading to such symptoms as numbness, pain, swelling, and inflammation.

The primary goals of this formula are to dispel wind, cold, and dampness, activate qi and blood circulation, and relieve pain. *Ma Huang* (Herba Ephedrae) and *Gui Zhi* (Ramulus Cinnamomi) are two of the strongest herbs for dispelling wind-cold from the exterior. They both also have a diuretic effect to drain dampness through urination. *Gui Zhi* (Ramulus Cinnamomi) also opens the channels and collaterals in the extremities to relieve pain. *Dang Gui* (Radix Angelicae Sinensis) and *Bai Shao* (Radix Paeoniae Alba) activate blood circulation, harmonize the *ying* (nutritive) and *wei* (defensive) levels, and relieve pain. *Cang Zhu* (Rhizoma Atractylodis) and *Yi Yi Ren* (Semen Coicis) drain dampness through urination. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs in the formula.

MODIFICATIONS

- With sweating, add *Shi Gao* (Gypsum Fibrosum).
- With heat, add *Huang Bo* (Cortex Phellodendri Chinensis).
- With cold, add *Fu Zi* (Radix Aconiti Lateralis Praeparata).

AUTHORS’ COMMENTS

The two formulas with the same name that are discussed in this text are differentiated as follows. Though they have identical names, their compositions and clinical applications are different, and must not be confused with each others.

- *Yi Yi Ren Tang* (Coicis Decoction) from *Zhang Shi Yi Tong* (Comprehensive Medicine According to Master Zhang) by Zhang Lu-Xuan in 1695 dispels wind-dampness from the exterior to treat *bi zheng* (painful obstruction syndrome).
- *Yi Yi Ren Tang* (Coicis Decoction) from *Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments) by Wang Ken-Tang in 1602 dispels dampness from the Intestines to treat intestinal abscess. Note: Please refer to the discussion of this formula in *Yi Yi Fu Zi Bai Jiang San* (Coicis, Prepared Aconite, and Patrinia Powder), under the section titled Related Formula(s).

<i>Tian Nan Xing</i> (Rhizoma Arisaematis)	[21g]
<i>Shen Qu</i> (Massa Fermentata)	[9g]

DOSAGE / PREPARATION / ADMINISTRATION

This formula is prepared and administered as pills with warm water using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Dispels wind and dissolves dampness
2. Activates blood circulation and eliminates bruising

CLINICAL MANIFESTATIONS

Generalized *bi zheng* (painful obstruction syndrome): aches and pains in the arms, legs, and throughout the body.

CLINICAL APPLICATIONS

Arthritis, arthralgia, rheumatism, and gout.

EXPLANATION

Shang Zhong Xia Tong Yong Tong Feng Wan (Upper, Middle, and Lower General-Use Pill for Wind-Pain) is a generalized formula that treats aches and pains due to various causes in varied locations in the body. *Bi zheng* (painful obstruction syndrome) can be a complicated disorder because the causes include cold, heat, dampness,

phlegm, and stagnation. This formula simplifies the diagnostic procedure by focusing on relieving pain. Therefore, it can be used for aches and pains throughout the body (upper, middle, and lower) due to various causes.

This formula contains herbs with numerous functions: reduce swelling, relieve pain, disperse stagnation, and open the channels and collaterals. *Gui Zhi* (Ramulus Cinnamomi), *Qiang Huo* (Rhizoma et Radix Notopterygii), *Fang Ji* (Radix Stephaniae Tetrandrae), and *Wei Ling Xian* (Radix et Rhizoma Clematidis) reduce swelling and relieve pain. *Chuan Xiong* (Rhizoma Chuanxiong), *Tao Ren* (Semen Persicae), and *Hong Hua* (Flos Carthami) activate blood circulation and relieve pain. *Bai Zhi* (Radix Angelicae Dahuricae) dispels wind from the exterior and relieves pain in the head region. *Long Dan* (Radix et Rhizoma Gentianae) and *Huang Bo* (Cortex Phellodendri Chinensis) clear heat and reduce swelling and inflammation. *Cang Zhu* (Rhizoma Atractylodis) dries dampness and *Tian Nan Xing* (Rhizoma Arisaematis) eliminates phlegm. *Shen Qu* (Massa Fermentata) harmonizes and protects the middle *jiao*.

— Damp-Cold Dispelling Formulas

Xiǎo Huó Luò Dān (Minor Invigorate the Collaterals Special Pill)

小活絡丹

小活絡丹

Pinyin Name: *Xiao Huo Luo Dan***Literal Name:** Minor Invigorate the Collaterals Special Pill**Alternate Names:** *Huo Luo Dan* (Invigorate the Collaterals Special Pill), Myrrh and Aconite Formula**Original Source:** *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85**COMPOSITION**

<i>Zhi Chuan Wu</i> (Radix Aconiti Praeparata), <i>pao</i> (blast-fried)	180g [6g]
<i>Zhi Cao Wu</i> (Radix Aconiti Kusnezoffii Praeparata), <i>pao</i> (blast-fried)	180g [6g]
<i>Tian Nan Xing</i> (Rhizoma Arisaematis), <i>pao</i> (blast-fried)	180g [6g]
<i>Ru Xiang</i> (Gummi Olibanum), <i>yan</i> (ground) to small particles	66g [5g]
<i>Mo Yao</i> (Myrrha), <i>yan</i> (ground) to small particles	66g [5g]
<i>Di Long</i> (Pheretima)	180g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to first blast-fry *Zhi Cao Wu* (Radix Aconiti Kusnezoffii Praeparata), *Zhi Chuan Wu* (Radix Aconiti Praeparata), and *Tian Nan Xing* (Rhizoma Arisaematis) to eliminate toxicity. Then, grind the ingredients into a fine powder and mix with grain-based liquor to form into small pills. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 20 pills on an empty stomach at noon with cold, grain-based liquor or tea made from *Jing Jie* (Herba Schizonepetae).

Today, the ingredients are ground into a fine powder, sifted together, and formed into pills with honey. Take 1 pill [3g] twice daily, with aged, grain-based liquor or warm, boiled water. This formula may also be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Dispels wind and dampness
2. Resolves phlegm and dredges the channels
3. Activates blood circulation and stops pain

CLINICAL MANIFESTATIONS

1. Obstruction of wind, cold, and dampness in the channels and collaterals: muscle spasms and cramps, limited mobility and difficult movement of the joints, painful extremities, and migratory pain.
2. *Zhong feng* (wind stroke) with obstruction of dampness, phlegm, and blood stasis in the channels and collaterals: numbness and pain in the extremities, and heaviness and pain in the lower back and legs.

CLINICAL APPLICATIONS

Arthritis, peri-arthritis of the shoulders, soft tissue injuries, sciatica, post-stroke sequelae, hemiplegia, and paralysis.

EXPLANATION

Xiao Huo Luo Dan (Minor Invigorate the Collaterals Special Pill) treats blocked qi and blood circulation caused by obstruction of wind, cold, and dampness in the channels and collaterals. The formula may be used for muscle and joint disorders with such symptoms such as spasms and cramps, limited mobility, difficult movement, and painful extremities. It may also be used for *zhong feng* (wind stroke) caused by obstruction of dampness, phlegm,

Xiǎo Huó Luò Dān (Minor Invigorate the Collaterals Special Pill)

***Xiao Huo Luo Dan* (Minor Invigorate the Collaterals Special Pill)**

Diagnosis	Signs and Symptoms	Treatment	Herbs
Obstruction of wind, cold, and dampness in the channels and collaterals	<ul style="list-style-type: none">• Spasms and cramps, limited mobility, difficult movement and painful extremities: obstruction of wind, cold, and dampness in the channels and collaterals• Numbness and pain of the extremities: dampness and phlegm obstruction with blood stasis in the channels and collaterals	<ul style="list-style-type: none">• Dispers wind, cold, and dampness• Resolves phlegm and dredges the channels• Activates blood circulation and stops pain	<ul style="list-style-type: none">• <i>Zhi Chuan Wu</i> (Radix Aconiti Praeparata) and <i>Zhi Cao Wu</i> (Radix Aconiti Kusnezoffii Praeparata) dispel wind-cold, warm and dredge the collaterals, and relieve pain.• <i>Tian Nan Xing</i> (Rhizoma Arisaematis) dries dampness and resolves phlegm.• <i>Ru Xiang</i> (Gummi Olibanum) and <i>Mo Yao</i> (Myrrha) activate qi and blood circulation and remove blood stasis.• <i>Di Long</i> (Pheretima) opens the channels and collaterals.

and blood stasis in the channels and collaterals, leading to numbness and pain of the extremities.

In this formula, *Zhi Chuan Wu* (Radix Aconiti Praeparata) and *Zhi Cao Wu* (Radix Aconiti Kusnezoffii Praeparata) dispel wind and dampness, and also warm and dredge the channels and collaterals. These two herbs also have a strong effect to dispel cold and relieve pain. *Tian Nan Xing* (Rhizoma Arisaematis) dries dampness and resolves phlegm in the channels and collaterals to relieve pain. *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha) activate qi and blood circulation and remove blood stasis. *Di Long* (Pheretima) opens the channels and collaterals. When taken with grain-based liquor, the herbs have a more powerful effect to dispel wind and cold, resolve dampness and phlegm, eliminate qi and blood stagnation, and open the channels and collaterals.

MODIFICATIONS

- For neuralgia or sciatica, add *Chi Shao* (Radix Paeoniae Rubra), *Wei Ling Xian* (Radix et Rhizoma Clematidis), and *Chuan Xiong* (Rhizoma Chuanxiong).
- For post-stroke complications, add *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *San Qi* (Radix et Rhizoma Notoginseng).
- For arthritis, add *Qiang Huo* (Rhizoma et Radix Notopterygii) and *Yi Tiao Gen* (Radix Moghaniae).
- If there is more wind, add *Da Qin Jiao Tang* (Major Gentiana Macrophylla Decoction).
- With Liver and Kidney yin deficiencies manifesting in weakness of the joints, add *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction).
- With severe pain, add *Yan Hu Suo* (Rhizoma Corydalis) and increase the doses of *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).

CAUTIONS / CONTRAINDICATIONS

- *Xiao Huo Luo Dan* is a potent formula designed for individuals who have a strong constitution and who are generally healthy. It should be used with caution in individuals with blood deficiency or yin-deficient heat.
- The use of this formula is contraindicated during pregnancy.

PHARMACOLOGICAL EFFECTS

1. **Analgesic:** Administration of *Xiao Huo Luo Dan* at 20-100 mg/kg was associated with a marked analgesic effect in mice.¹
2. **Sedative:** One study reported a dose-dependant sedative effect in mice.²
3. **Pharmacokinetic:** One study reported *Xiao Huo Luo Dan* to have a two-compartment model of distribution, with an average half-life of 13.16 hours.³

CLINICAL STUDIES AND RESEARCH

1. **Soft-tissue injuries:** Topical application of *Xiao Huo Luo Dan* was associated with excellent results in treating 50 patients with soft-tissue injuries. The topical preparation was made by soaking the pills in 75% ethanol then crushing the pills into paste. The herbal paste was applied to the affected area every other day for intact skin. If the wound was open, it was thoroughly cleaned and disinfected prior to application of the herbal paste. The study reported complete recovery in 49 of 50 patients within 3-5 applications of the herbal paste.⁴
2. **Sciatica:** Concurrent use of modified *Xiao Huo Luo Dan* via oral ingestion and topical application was associated with marked relief of sciatica. The treatment protocol was to cook the herbs in water and drink the decoction in two equally-divided doses daily. The herb residue was applied topically to the affected area. Each course of treatment was 20 days. Out of 32 patients, 20 had complete recovery,

Xiǎo Huó Luò Dān (Minor Invigorate the Collaterals Special Pill)

7 had significant improvement, 3 had slight improvement, and 2 had no change. The overall effectiveness was 93.75%.⁵

3. **Arthritis:** Topical application of modified *Xiao Huo Luo Dan* was effective in relieving pain in all 50 patients. The herbal formula contained unprocessed *Chuan Wu* (Radix Aconiti), unprocessed *Cao Wu* (Radix Aconiti Kusnezoffii), *Di Long* (Pheretima), unprocessed *Tian Nan Xing* (Rhizoma Arisaematis), *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Ma Qian Zi* (Semen Strychni), *Hong Hua* (Flos Carthami), *Shui Zhi* (Hirudo), and *Mu Gua* (Fructus Chaenomelis), all in equal portions. The herbs were ground into a fine powder, mixed with water to make a paste, and applied topically to the affected area. Of 50 patients, the study reported complete relief in 8 cases, significant improvement in 27 cases, and moderate improvement in 5 cases.⁶ Note: The treatment protocol for this study was to apply the herbs topically since unprocessed forms of *Chuan Wu* (Radix Aconiti), *Cao Wu* (Radix Aconiti Kusnezoffii), and *Tian Nan Xing* (Rhizoma Arisaematis) can be extremely toxic if ingested orally.

TOXICOLOGY

Overdose of *Xiao Huo Luo Dan* (Minor Invigorate the Collaterals Special Pill) has been associated with occasional toxicity. Reported side effects include numbness in the hands and feet, stiff tongue, dizziness, pale face, cold extremities, perspiration, nausea, vomiting, diarrhea, palpitations, arrhythmia, and loss of consciousness. Allergy and acute gastrointestinal bleeding have been reported as well. The toxicity is attributed to *Zhi Chuan Wu* (Radix Aconiti Praeparata), *Zhi Cao Wu* (Radix Aconiti Kusnezoffii Praeparata), and *Tian Nan Xing* (Rhizoma Arisaematis).^{7,8,9}

Toxicity associated with the use of this formula may be treated initially with gastric lavage. Use of an herbal decoction with *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Lu Dou* (Semen Phaseoli Radiati) has also shown beneficial effects. Administration of intravenous fluids with dexamethasone (10mg twice daily) is also helpful.¹⁰

Note: *Xi Jiao* (Cornu Rhinoceri), *Hu Gu* (Os Tigris) and *She Xiang* (Moschus) are derived from endangered animals, and are rarely used as medicinal substances today. The discussion of this formula here is included primarily for academic purposes, and to reflect upon the historical use of these substances in its original formulation. In most herbal products today, these endangered substances have been removed completely, or have been replaced with substitutes having similar functions.

The source text states to grind all of the ingredients into powder, and form into pills with honey. The pills are coated with *Jin Bo* (gold foil), and should resemble *Long Yan He* (Semen Longan) in size. Take one pill with aged, grain-based liquor two times daily.

Da Huo Luo Dan (Major Invigorate the Collaterals Special Pill) dispels wind, tonifies qi and blood, opens the channels and collaterals, and relieves pain. Clinical applications include paralysis or hemiplegia in post-stroke patients, *wei bi* (atrophic painful obstruction), phlegm syncope, deep-rooted sores, and multiple abscesses.

<i>Wei Ling Xian</i> (Radix et Rhizoma Clematidis)

Jia Wei Huo Luo Dan (Augmented Invigorate the Collaterals Special Pill) treats *bi zheng* (painful obstruction syndrome) characterized by cold and dampness. Its main actions are to warm and open the channels and collaterals, dispel cold and dampness, activate qi and blood circulation, and relieve pain. Clinical applications include arthritis, arthralgia, lumbago, sciatica, and general aches and pains characterized by cold.

AUTHORS' COMMENTS

Xiao Huo Luo Dan contains many warm and acrid herbs, making it suitable for cold *bi zheng* (painful obstruction syndrome) with tightness and cramping of the tendons, sinews, and joints. Patients may also experience numbness of the limbs. The tongue will be slightly purple with a white coating. This formula can also be used for post-stroke hemiplegia exhibiting excess signs. Key diagnostic symptoms include numbness, pain, and limited mobility.

Although wind and dampness are the pathogens that initially invade the muscles and joints, they often create other complications, such as qi, blood and phlegm stagnation. Therefore, treatment of *bi zheng* (painful obstruction syndrome) requires use of herbs that treat these associated conditions and complications. In this formula, strong herbs such as *Zhi Chuan Wu* (Radix Aconiti Praeparata) and *Zhi Cao Wu* (Radix Aconiti Kusnezoffii Praeparata) warm and dredge the collaterals, dispel cold and relieve pain. *Tian Nan Xing* (Rhizoma Arisaematis) dries dampness and resolves phlegm. *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha) are aromatic substances that activate qi and blood circulation and remove blood stasis. Lastly, *Di Long* (Pheretima) is used as a guiding herb to open the channels and collaterals.

Xiao Huo Luo Dan and *Da Huo Luo Dan* both treat the blockages of wind, cold and damp pathogens in the channels and collaterals. Hence they are named Minor Invigorate the Collaterals Special Pill and Major Invigorate the Collaterals Special Pill, respectively.

As the names imply, *Xiao Huo Luo Dan* (Minor Invigorate the Collaterals Special Pill) and *Da Huo Luo Dan* (Major

Xiǎo Huó Luò Dǎn (Minor Invigorate the Collaterals Special Pill)

Invigorate the Collaterals Special Pill) both invigorate and unblock the collaterals.

- *Xiao Huo Luo Dan* is more suitable for obstruction of wind, cold, and dampness, accumulation of phlegm, and stagnation of blood in the channels and collaterals (an excess condition) in individuals who are otherwise healthy. All of the herbs are aimed at such excess conditions.
- *Da Huo Luo Dan* treats obstruction of the collaterals (an excess condition) in individuals with underlying qi and blood deficiencies (a deficient condition). This formula uses qi and blood-tonifying herbs to support the underlying deficiencies, along with herbs to dispel wind and open the channels and collaterals.

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into powder. Cook 15g of the powder with 7 slices of *Sheng Jia* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao*

(Fructus Jujubae) in 1.5 bowls of water until the liquid is reduced to 80% volume. Take the warm, strained decoction on an empty stomach before meals.

Dà Fāng Fēng Tāng (Major Saposhnikovia Decoction)

CHINESE THERAPEUTIC ACTIONS

- 1. Tonifies qi and blood
- 2. Strengthens the muscles and tendons
- 3. Dispels wind, cold, and dampness

CLINICAL MANIFESTATIONS

Weakness and paralysis of the lower extremities caused by deficiency of qi and blood: generalized pain and numbness in the legs, weak knees, atrophy of the leg muscles, difficult movement, hemiplegia, and neuralgia.

CLINICAL APPLICATIONS

Arthritis, rheumatoid arthritis, paralysis of the lower extremities, hemiplegia, muscle atrophy, and neuralgia.

EXPLANATION

Da Fang Feng Tang (Major Saposhnikovia Decoction) was designed originally to treat conditions called *li feng* (dysenteric wind) and *he xi feng* (crane's knee wind). Both conditions are characterized by severe qi and blood deficiencies with wind, cold, and dampness at the exterior. *Li feng* (dysenteric wind) is a condition that occurs after dysentery, in which patients have trouble walking due to severe pain and atrophy of the leg muscles. *He xi feng* (crane's knee wind) is a condition in which there is such severe atrophy of the leg muscles that the legs appear to be covered only by skin, resembling the knees of a crane.

Patients with *he xi feng* (crane's knee wind) suffer from severe pain and swelling of the knees, and have difficulty in knee flexion and extension.

This formula contains herbs that tonify qi and blood, nourish the muscles and tendons, and dispel wind, cold, and dampness. *Dang Gui* (Radix Angelicae Sinensis), *Shu Di Huang* (Radix Rehmanniae Praeparata), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Xiong* (Rhizoma Chuanxiong) tonify the blood and activate blood circulation. *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Huang Qi* (Radix Astragali) tonify qi and strengthen the Spleen. *Niu Xi* (Radix Achyranthis Bidentatae) and *Du Zhong* (Cortex Eucommiae) tonify the Kidney, nourish tendons and muscles, and relieve pain. *Fang Feng* (Radix Saposhnikoviae) and *Qiang Huo* (Rhizoma et Radix Notopterygii) dispel wind and relieve numbness and joint pain. *Fu Zi* (Radix Aconiti Lateralis Praeparata), a hot herb, dispels cold and dampness. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and *Sheng Jiang* (Rhizoma Zingiberis Recens) harmonize the herbs in this formula. Overall, this formula effectively treats *bi zheng* (painful obstruction syndrome) with a constitutional deficiency of qi and blood, wind attacking the muscles and joints, and atrophy and impairment of the skeletal muscles.

***Da Fang Feng Tang* (Major Saposhnikovia Decoction)**

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Li feng</i> (dysenteric wind) and <i>he xi feng</i> (crane's knee wind)	<ul style="list-style-type: none">• Trouble walking due to severe pain and atrophy of the leg muscles: <i>li feng</i> (dysenteric wind) characterized by severe deficiency of qi and blood• Severe atrophy of the leg muscles, severe pain and swelling of the knees with difficulty in knee flexion and extension: <i>he xi feng</i> (crane's knee wind) characterized by severe deficiency of qi and blood	<ul style="list-style-type: none">• Tonifies qi and blood• Strengthens muscles and tendons• Dispels wind, cold, and dampness	<ul style="list-style-type: none">• <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata), <i>Bai Shao</i> (Radix Paeoniae Alba), and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) tonify the blood and activate blood circulation.• <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), and <i>Huang Qi</i> (Radix Astragali) tonify qi and strengthen the Spleen.• <i>Niu Xi</i> (Radix Achyranthis Bidentatae) and <i>Du Zhong</i> (Cortex Eucommiae) tonify the Kidney, nourish tendons and muscles, and relieve pain.• <i>Fang Feng</i> (Radix Saposhnikoviae) and <i>Qiang Huo</i> (Rhizoma et Radix Notopterygii) dispel wind and relieve numbness and joint pain.• <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) dispels cold and dampness.• <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) and <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) harmonize the herbs.

Dà Fāng Fēng Tāng (Major Saposhnikovia Decoction)

MODIFICATIONS

For pain with blood stagnation, add *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami).

CAUTIONS / CONTRAINDICATIONS

Da Fang Feng Tang is designed for musculoskeletal disorders caused by severe qi and blood deficiencies. Arthritis or musculoskeletal disorders characterized by excess without deficiency should not be treated with this formula as the warm and hot herbs may worsen the excessive condition.

PHARMACOLOGICAL EFFECTS

Antirheumatic: According to studies in mice, administration of *Da Fang Feng Tang* was associated with inhibiting iNOS expression and decreasing anti-collagen IgG antibody. The researchers suggested that *Da Fang Feng Tang* may be effective in treating rheumatoid arthritis in humans.^{1,2}

Jī Míng Sǎn (Powder to Take at Cock's Crow)

雞鳴散
鸡鸣散

Pinyin Name: *Ji Ming San*

Literal Name: Powder to Take at Cock's Crow

Alternate Names: *Chi Ming San*, Cock's Crow Powder, Areca Seed and Chaenomeles Formula

Original Source: *Lei Bian Zhu Shi Ji Yan Yi Fang* (Effective Medical Formulas Arranged by Category by Doctor Zhu) by Zhu Zuo in 1266

COMPOSITION

<i>Bing Lang</i> (Semen Arecae)	7 pieces [35g]
<i>Mu Gua</i> (Fructus Chaenomeles)	30g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	30g
<i>Zi Su Ye</i> (Folium Perillae), including the twigs	9g
<i>Jie Geng</i> (Radix Platycodonis)	15g
<i>Wu Zhu Yu</i> (Fructus Evodiae)	6g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), including the peel	15g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into a coarse powder and cook it with 3 large bowls of water until it is reduced to 1.5 large bowls. Filter out the herbal residue and save the strained decoction. Cook the herbal residue again in 2 bowls of water until it is reduced to 1 bowl. Mix the two batches of strained decoction together, and take it at room temperature upon waking at 5 a.m. The decoction may be given warm during the winter. According to the source text, ingestion of this formula may induce black, watery stools, an indication of successful elimination of damp-cold from the Kidney.

Today, this formula is prepared as a decoction by cooking the ingredients twice, and mixing the two batches of decoction together. Take the decoction at room temperature on an empty stomach in the early morning.

CHINESE THERAPEUTIC ACTIONS

1. Activates qi circulation and causes turbidity to descend
2. Dispels cold and resolves dampness

CLINICAL MANIFESTATIONS

Leg *qi* characterized by dampness and cold: feeling of swelling, heaviness, weakness, numbness, coldness and

Ji Ming San (Powder to Take at Cock's Crow)

pain in the legs, fever, aversion to cold, spasms, chest stuffiness, and nausea.

CLINICAL APPLICATIONS

Beriberi, restless leg syndrome, filariasis, and edema.

EXPLANATION

Ji Ming San (Powder to Take at Cock's Crow) treats leg *qi* characterized by dampness and cold attacking the lower extremities. Leg *qi* usually originates from an invasion of exterior wind-cold, manifesting as irregularity in fluid metabolism and the formation of dampness and cold in the interior. The damp-cold factor then attacks the legs and obstructs the flow of *qi* and blood, causing swelling, heaviness, weakness, numbness, and pain in the lower legs. Fever and aversion to cold are symptoms deriving from exterior wind-cold attack. Chest stuffiness and nausea are the result of dampness obstructing the *qi* flow in the upper *jiao* and epigastrium.

Bing Lang (Semen Arecae), the chief herb of this formula, activates *qi* and dispels dampness. *Mu Gua* (Fructus Chaenomelis), the deputy herb, eliminates dampness and relaxes the muscles and tendons. *Chen Pi* (Pericarpium Citri Reticulatae), the other deputy herb, strengthens the Spleen, activates *qi*, and dispels dampness. *Zi Su Ye* (Folium Perillae) and *Jie Geng* (Radix Platycodonis) dispel exterior wind-cold and disperse interior *qi* stagnation. *Wu Zhu Yu* (Fructus Evodiae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) warm and dissolve damp-cold to relieve nausea and chest stuffiness.

MODIFICATIONS

- With more exterior signs and symptoms, add *Gui Zhi* (Ramulus Cinnamomi) and *Fang Feng* (Radix Saposhnikoviae).
- With more cold and dampness in the interior, add *Rou Gui* (Cortex Cinnamomi) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With stifling sensations in the chest, lack of appetite, heavy sensations in the body, and a greasy tongue coating due to more dampness, add *Cang Zhu* (Rhizoma Atractylodis), *Fu Ling* (Poria), and *Hou Po* (Cortex Magnoliae Officinalis).

CAUTIONS / CONTRAINDICATIONS

- *Ji Ming San* treats leg *qi* characterized by damp-cold. It should not be used if the leg *qi* is caused by damp-heat.
- Use of this formula is contraindicated during pregnancy.¹
- Use of this formula has been associated with such side effects as abdominal discomfort, nausea, vomiting, salivation, diarrhea, dizziness, and itching.²

CLINICAL STUDIES AND RESEARCH

1. **Edema:** According to one report, 27 patients with edema were treated with complete recovery in 22 cases and improvement in 5 cases. The herbal treatment contained *Ji Ming San* as the base formula, with the addition of *Fang Ji* (Radix Stephaniae Tetrandrae) and *Niu Xi* (Radix Achyranthis Bidentatae) for chronic illness; *Huang Qi* (Radix Astragali) for *qi* deficiency; and *Fu Zi* (Radix Aconiti Lateralis Praeparata) for yang deficiency.³
2. **Restless leg syndrome:** Use of *Ji Ming San* plus *Ji Xue Teng* (Caulis Spatholobi) was effective in treating all 27 patients with restless leg syndrome. The duration of treatment ranged from 3 to 12 days. Clinical improvements

Ji Míng Sǎn (Powder to Take at Cock's Crow)

included resolution of all symptoms for at least 3 months on later follow-up.⁴

AUTHORS' COMMENTS

Ji Míng Sǎn, literally translated as “Powder to Take at Cock's Crow” is so named because this formula is most effective if taken early in the morning when the cock crows. When taken in early morning on an empty stomach, there is optimal absorption and fast onset of action. Furthermore, since yang qi begins to rise in the early

morning, the effect of the herbs will follow yang qi and together dispel cold and dampness from the body.

<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata), <i>pao</i> (blast-fried)	6g
<i>Bai Shao</i> (Radix Paeoniae Alba)	9g
<i>Zhi Mu</i> (Rhizoma Anemarrhenae)	12g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	15g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	15g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to cook the ingredients in 7 cups [1,400 mL] of water until the liquid is reduced to 2 cups [400 mL]. Take 0.7 cup [210 mL] of the warm, strained decoction three times daily.

CHINESE THERAPEUTIC ACTIONS

1. Dispels wind-dampness
2. Clears heat
3. Unblocks the channels and collaterals

CLINICAL MANIFESTATIONS

Bi zheng (painful obstruction syndrome) caused by obstruction of wind-dampness and formation of heat: swollen and painful joints, emaciation, swollen feet, dizziness, shortness of breath, atrophy of the muscle, numbness of the extremities, and difficulty in walking and moving.

CLINICAL APPLICATIONS

Arthritis, rheumatoid arthritis, gouty arthritis, periarthritides of the shoulders, sciatica, and connective tissue disorders.

EXPLANATION

Gui Zhi Shao Yao Zhi Mu Tang (Cinnamon Twig, Peony, and Anemarrhena Decoction) treats *bi zheng* (painful obstruction syndrome) caused by accumulation of wind-dampness. Obstruction of wind-dampness in the joints leads to the formation of heat, manifesting as joint swelling and pain. The obstruction also blocks the supply of blood and nutrients to the area, thus contributing to the gradual atrophy of the muscles and numbness of the extremities. The muscle atrophy is sometimes so severe that *he xi feng* (crane's knee wind) is used to describe the condition in which the joint appears to be covered by nothing but the skin. Swelling, pain, and muscle atrophy all contribute to difficulty in walking and moving. In patients with chronic *bi zheng* (painful obstruction syndrome), dampness may

Gui Zhi Shao Yao Zhi Mu Tang (Cinnamon Twig, Peony, and Anemarrhena Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Bi zheng</i> (painful obstruction syndrome) caused by wind-dampness and heat	<ul style="list-style-type: none"> Joint swelling and pain: obstruction of wind-dampness with formation of heat Atrophy of the muscles and numbness of the extremities with difficulty in walking and moving; lack of nourishment due to obstructions Edema, decreased appetite, weight loss, emaciation, shortness of breath, and dizziness: accumulation of dampness in various parts of the body 	<ul style="list-style-type: none"> Dispels wind-dampness Clears heat Unblocks the channels and collaterals 	<ul style="list-style-type: none"> <i>Gui Zhi</i> (Ramulus Cinnamomi), <i>Ma Huang</i> (Herba Ephedrae) and <i>Fang Feng</i> (Radix Saposhnikoviae) dispel wind from the exterior. <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) warms the body and joints and relieves pain. <i>Zhi Mu</i> (Rhizoma Anemarrhenae) clears heat and reduces swelling. <i>Bai Shao</i> (Radix Paeoniae Alba) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) relieve muscle spasms and cramps. <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen, dries dampness, and relieves edema. <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) warms the middle <i>jiao</i> to improve appetite and increase food intake.

affect other parts of the body. Damp accumulation in the lower extremities leads to edema; damp stagnation in the middle *jiao* leads to decreased appetite, weight loss and emaciation; and dampness obstructs the normal flow of qi, leading to shortness of breath and dizziness.

In this formula, *Gui Zhi* (Ramulus Cinnamomi) and *Ma Huang* (Herba Ephedrae) warm and unblock the channels and collaterals. These two herbs, along with *Fang Feng* (Radix Saposhnikoviae), also dispel wind from the exterior parts of the body. *Fu Zi* (Radix Aconiti Lateralis Praeparata) warms the body and joints and relieves pain. Because *Fu Zi* (Radix Aconiti Lateralis Praeparata) is an extremely hot herb, cold herbs such as *Bai Shao* (Radix Paeoniae Alba) and *Zhi Mu* (Rhizoma Anemarrhenae) are used to balance the temperature of the formula and reduce any side effects that might be caused by *Fu Zi* (Radix Aconiti Lateralis Praeparata). Additionally, *Zhi Mu* (Rhizoma Anemarrhenae) clears heat and reduces swelling. *Bai Shao* (Radix Paeoniae Alba) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) synergistically relieve pain and treat muscle spasms and cramps. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen, dries dampness, and relieves edema. *Sheng Jiang* (Rhizoma Zingiberis Recens) warms the middle *jiao* to improve appetite and increase food intake.

MODIFICATIONS

- With stiffness and pain of the joints that lessen with heat, increase the dose of *Gui Zhi* (Ramulus Cinnamomi), *Ma Huang* (Herba Ephedrae), and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With body aches, numbness, and joint swelling that worsen in rainy, cold weather, add more *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With burning joint pain that lessens during the day and worsens at night, add more *Zhi Mu* (Rhizoma Anemarrhenae), *Bai Shao* (Radix Paeoniae Alba), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- For *bi zheng* (painful obstruction syndrome) with more damp accumulation, add *Fu Ling* (Poria), *Yi Yi Ren* (Semen Coicis), and *Cang Zhu* (Rhizoma Atractylodis).
- With frequent recurrence of pain due to qi deficiency, add *Huang Qi* (Radix Astragali).

Clinical applications include rheumatic heat disorders, arthritis, arthralgia, gout, fibromyalgia, and other joint disorders with heat manifestations of swelling, burning sensations, and inflammation.

Èr Miào Sǎn (Two-Marvel Powder)

二妙散

Pinyin Name: *Er Miao San*

Literal Name: Two-Marvel Powder

Original Source: *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) by Zhu Zhen-Heng in 1481

COMPOSITION

Huang Bo (Cortex Phellodendri Chinensis), *chao* (dry-fried) 15g
Cang Zhu (Rhizoma Atractylodis), *jin* (soaked) in rice water and *chao* (dry-fried) 15g

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructions are to soak *Cang Zhu* (Rhizoma Atractylodis) in rice water first. Dry-fry equal amounts of both herbs, and then grind them into powder. Take the powder with boiled water and fresh juice of *Sheng Jiang* (Rhizoma Zingiberis Recens). Today, this formula is prepared by grinding equal amounts of the ingredients into powder. Take 6g per dose two to three times daily. It may also be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Clears heat and dries dampness

CLINICAL MANIFESTATIONS

Damp-heat attacking the lower half of the body: aches and pains in the bones and tendons; leg weakness and atrophy; redness, swelling, and pain of the knees with burning sensations; leukorrhea characterized by damp-heat; sores in the lower body characterized by damp-heat; scanty, yellow urine; and a yellow, greasy tongue coating.

CLINICAL APPLICATIONS

Arthritis, gouty arthritis, ankylosing spondylitis, neurodermatitis, eczema, erythromelalgia, and fungal infection.

EXPLANATION

Er Miao San (Two-Marvel Powder) treats *bi zheng* (painful obstruction syndrome) in the lower half of the body due to damp-heat. Damp-heat may attack the bones and tendons, causing aches and pains with redness, swelling, and burning sensations. Chronic cases of damp-heat may contribute to weakness and atrophy of the leg muscles. Damp-heat may also affect the *dai* (girdle) channel and genital region, causing leukorrhea and sores. Lastly, damp-heat may also interfere with the urinary system, causing scanty, yellow urine. A yellow, greasy tongue coating is a sign of damp-heat in the body.

Huang Bo (Cortex Phellodendri Chinensis), with its tendency to travel to the lower body, clears heat and dries dampness. *Cang Zhu* (Rhizoma Atractylodis), bitter and

Diagnosis	Signs and Symptoms	Treatment	Herbs
Damp-heat attacking the lower body	<ul style="list-style-type: none"> Aches and pains with redness, swelling, and burning sensations: damp-heat attacking the bones and tendons Weakness and atrophy of the leg muscles: damp-heat accumulation blocking nourishment to the muscles Leukorrhea and scanty, yellow urine: damp-heat affecting the lower body Yellow, greasy tongue coating: damp-heat in the body 	Clears heat and dries dampness	<ul style="list-style-type: none"> <i>Huang Bo</i> (Cortex <i>Phellodendri Chinensis</i>) clears heat and dries dampness in the lower <i>jiao</i>. <i>Cang Zhu</i> (Rhizoma <i>Atractylodis</i>) strengthens the Spleen and dries dampness.

warm, also dries dampness. *Er Miao San* contains only two herbs, yet it achieves marvelous results, which is why it is named “Two-Marvel Powder.”

MODIFICATIONS

- For *bi zheng* (painful obstruction syndrome) with more heat than dampness, add *Huang Lian* (Rhizoma *Coptidis*), *Long Dan* (Radix et Rhizoma *Gentianae*), and *Ku Shen* (Radix *Sophorae Flavescentis*).
- For *bi zheng* (painful obstruction syndrome) with more dampness than heat, add *Hua Shi* (Talcum), *Fang Ji* (Radix *Stephaniae Tetrandrae*), and *Tong Cao* (Medulla *Tetrapanacis*).
- For *wei zheng* (atrophy syndrome) caused by damp-heat, add *Xi Xian Cao* (Herba *Siegesbeckiae*), *Wu Jia Pi* (Cortex *Acanthopanax*), and *Lu Xian Cao* (Herba *Pyrolae*).
- For leg *qi* caused by damp-heat, add *Yi Yi Ren* (Semen *Coicis*), *Mu Gua* (Fructus *Chaenomelis*), and *Bing Lang* (Semen *Arecae*).
- With redness and swelling of the joints, add *Ren Dong Teng* (Caulis *Lonicerae Japonicae*), *Mu Gua* (Fructus *Chaenomelis*), and *Qin Jiao* (Radix *Gentianae Macrophyllae*).

CAUTIONS / CONTRAINDICATIONS

- Er Miao San* is indicated for *bi zheng* (painful obstruction syndrome) with equal amounts of heat and dampness. Modification is needed if the amount of heat and dampness are not the same.
- This formula is contraindicated in patients with Liver and Kidney yin deficiencies, or with body fluids consumed by Lung heat.
- Avoid foods that are sweet, fatty, or greasy.¹

CLINICAL STUDIES AND RESEARCH

- Arthritis:** Modified *Er Miao San* was used to treat 278 patients with various types of arthritis. Modifications

included: *Jin Yin Hua* (Flos *Lonicerae Japonicae*), *Pu Gong Ying* (Herba *Taraxaci*), *Zi Hua Di Ding* (Herba *Viola*), and *Tu Fu Ling* (Rhizoma *Smilacis Glabrae*) were added for arthritis with heat characterized by redness, inflammation, swelling, and pain; *Yi Yi Ren* (Semen *Coicis*), *Bai Hua She She Cao* (Herba *Hedyotis*), and larger doses of *Tu Fu Ling* (Rhizoma *Smilacis Glabrae*) and *Huang Bo* (Cortex *Phellodendri Chinensis*) were added for arthritis with damp-heat and toxins characterized by red spots; *Di Huang* (Radix *Rehmanniae*) and *Mu Dan Pi* (Cortex *Moutan*) were added for arthritis with yin-deficient heat characterized by a red tongue and a fine, rapid pulse; *Che Qian Cao* (Herba *Plantaginis*), *Fang Ji* (Radix *Stephaniae Tetrandrae*), and *Yi Yi Ren* (Semen *Coicis*) were added for accumulation of fluids in the joints. Out of 278 patients, the study reported complete recovery in 160 cases, significant improvement in 62 cases, moderate improvement in 44 cases, and no effect in 12 cases.²

- Gouty arthritis:** Use of modified *Er Miao San* topically and *San Miao Wan* (Three-Marvel Pill) orally was effective in treating acute gouty arthritis. The treatment protocol was to apply *Er Miao San* plus *Du Huo* (Radix *Angelicae Pubescentis*) and *Fu Rong Ye* (Folium *Hibisci*) topically to the affected area, and ingest *San Miao Wan* (Three-Marvel Pill) orally. The study reported that most people experienced a reduction of the symptoms (redness, swelling, and pain of the joints) within 1-2 days, and complete recovery within 5 days.³
- Ankylosing spondylitis:** Sixteen patients with ankylosing spondylitis characterized by damp-heat were effectively treated with an integrative approach using non-steroidal anti-inflammatory drugs, acupuncture, massage, and modified *Er Miao San*. The herbal formula contained *Cang Zhu* (Rhizoma *Atractylodis*), *Huang Bo* (Cortex *Phellodendri Chinensis*), *Sang Ji Sheng* (Herba *Taxilli*), *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*), *Qin Jiao* (Radix

Èr Miào Sǎn (Two-Marvel Powder)

Gentianae Macrophyllae), *Fang Ji* (Radix Stephaniae Tetrandrae), *Gou Ji* (Rhizoma Cibotii), *Shi Nan Teng* (Ramulus Piper), and *Xu Chang Qing* (Radix et Rhizoma Cynanchi Paniculati). The researchers noted that the integrative treatment was better than any one treatment alone.⁴ Note: Details of the integrative treatment were not available at the time of publication.

4. **Neurodermatitis:** An integrative treatment effectively treated 65 patients with neurodermatitis within an average of 7 days. The treatment protocol used modified *Er Miao San* as a topical herbal wash, followed by topical application of a mixture of dexamethasone, chloramphenicol, and rubbing alcohol. This treatment was repeated every other day.⁵
5. **Eczema:** In one study of 68 eczema patients, the use of *Er Miao San* was associated with a 47.06% rate of complete recovery and a 33.8% rate of improvement. The overall effectiveness was 80.86%.⁶
6. **Erythromelalgia:** Use of modified *Er Miao San* for 6 days was associated with 92.67% effectiveness in treating 176 patients with paroxysmal vasodilation with burning pain, increased skin temperature, and redness of the feet and hands. The herbal formula contained *Huang Bo* (Cortex Phellodendri Chinensis), *Cang Zhu* (Rhizoma Atractylodis), *Chuan Niu Xi* (Radix Cyathulae), *Fang Ji* (Radix Stephaniae Tetrandrae), and *Bai Zhi* (Radix Angelicae Dahuricae).⁷
7. **Fungal infection:** One study reported satisfactory results using modified *Er Miao San* topically to treat fungal infection on the feet. The herbal formula contained *Ku Shen* (Radix Sophorae Flavescens), *Bai Fan* (Alumen), *Zi Cao* (Radix Arnebiae), and *Xu Chang Qing* (Radix et Rhizoma Cynanchi Paniculati). The herbs were cooked in water, and the resultant solution was used as an herbal soak. The patients were instructed to soak the affected area in the herbal solution for 20-30 minutes twice daily in the morning and at night.⁸

RELATED FORMULAS

Sān Miào Wán (Three-Marvel Pill)

三妙丸

Pinyin Name: *San Miao Wan*

Cang Zhu (Rhizoma Atractylodis), *jin* (soaked)

in rice water for 1-2 nights and

bei (stone-baked) to dry 180g [18g]

Chuan Niu Xi (Radix Cyathulae) 60g [6g]

The source text instructs to grind the ingredients into powder and form into small pills with flour. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 50-70 pills on an empty stomach with a decoction made from salt and *Sheng Jiang* (Rhizoma Zingiberis Recens). Today, this formula may be prepared as a decoction with the doses suggested in brackets.

San Miao Wan (Three-Marvel Pill) clears heat and dries dampness, and is indicated for damp-heat affecting the lower half of the body. Patients may have joint pain, leg numbness, and burning sensations. Clinical applications include rheumatism, arthritis, beriberi, rashes, and eczema.

Sì Miào Wán (Four-Marvel Pill)

四妙丸

Pinyin Name: *Si Miao Wan*

Literal Name: Four-Marvel Pill

Alternate Name: *Si Miao San* (Four-Marvel Powder)

Original Source: *Cheng Fang Bian Du* (Convenient Reader of Established Formulas) by Zhang Bing-Cheng in 1904

Huang Bo (Cortex Phellodendri Chinensis) [12g]

Yi Yi Ren (Semen Coicis) [12g]

Cang Zhu (Rhizoma Atractylodis) [12g]

Niu Xi (Radix Achyranthis Bidentatae) [12g]

The source text instructs to grind the ingredients into powder and form into small pills with water. Take 6-9g of pills per dose with warm water. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

Si Miao Wan (Four-Marvel Pill) clears heat and dissolves dampness, and is good for treating damp-heat affecting the lower half of the body. Patients may show pain and swelling of the joints, muscle atrophy, and leg numbness.

AUTHORS' COMMENTS

Er Miao San (Two-Marvel Powder), *San Miao Wan* (Three-Marvel Pill), and *Si Miao Wan* (Four-Marvel Pill) all treat musculoskeletal disorders characterized by damp-heat attacking the lower half of the body.

Èr Miào Sǎn (Two-Marvel Powder)

- *Er Miao San* is the original formula that contains two herbs with equal emphasis on eliminating both dampness and heat.
- *San Miao Wan* is formulated with the addition of *Chuan Niu Xi* (Radix Cyathulae), which guides the formula to the lower parts of the body and tonifies the Liver and Kidney.
- *Si Miao Wan* is formulated with the addition of *Niu Xi* (Radix Achyranthis Bidentatae) and *Yi Yi Ren* (Semen Coicis), to tonify the Liver and Kidney and dry dampness. Of the three, this formula is most suitable for chronic cases of damp-heat affecting the lower half of the body, causing numbness and atrophy.

DOSAGE / PREPARATION / ADMINISTRATION

The source text instructs to grind the ingredients into a coarse powder. Cook 30g of the powder in 2.5 bowls of water until the liquid is reduced to 1 bowl. Take the strained decoction while warm.

CHINESE THERAPEUTIC ACTIONS

1. Dispels wind and dampness
2. Clears heat and relieves pain

Dāng Guī Niǎn Tòng Tāng (Tangkuei Decoction to Lift the Pain)

CLINICAL MANIFESTATIONS

Dampness and heat affecting the joints and extremities: joint or musculoskeletal pain with redness, swelling, and inflammation; heavy sensation in the shoulders and back; fullness in the chest and epigastrium; dermatological disorders in the lower extremities with itching and pain; skin ulceration and abscess; and a deep, tight pulse.

CLINICAL APPLICATIONS

Arthritis and arthralgia with inflammation and swelling, gout, generalized joint and musculoskeletal pain, neuro-dermatitis, dermatitis in the lower extremities, genital itching, gonorrhea, dysuria, hematuria, sciatica, trigeminal nerve pain, neuritis, polyneuritis, neuralgia, and impetigo herpetiformis.

EXPLANATION

Dang Gui Nian Tong Tang (Tangkuei Decoction to Lift the Pain) is one of the most effective formulas for treating damp-heat joint and musculoskeletal disorders with pain, redness, swelling, and inflammation. Due to the damp nature of the illness, patients may experience heavy sensations in the shoulders and back and fullness in the chest and epigastrium. Due to the nature of heat, patients may experience redness, swelling, and inflammation in the joints and muscles. Moreover, as dampness and heat travel downward, patients may feel itching and pain in the lower extremities. In severe cases, there may also be ulceration and abscess of the skin.

In this formula, *Qiang Huo* (Rhizoma et Radix Notopterygii), *Ge Gen* (Radix Puerariae Lobatae), *Fang Feng* (Radix Saposhnikoviae), and *Sheng Ma* (Rhizoma Cimicifugae) dispel wind and dampness to relieve pain. *Huang Qin* (Radix Scutellariae), *Ku Shen* (Radix Sophorae Flavescentis), *Zhi Mu* (Rhizoma Anemarrhenae), and *Yin Chen* (Herba Artemisiae Scopariae) eliminate damp-heat from the body. *Ze Xie* (Rhizoma Alismatis) and *Zhu Ling* (Polyporus) resolve dampness and promote diuresis. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Cang Zhu* (Rhizoma Atractylodis) strengthen the Spleen and dry dampness. *Ren Shen* (Radix et Rhizoma Ginseng) and *Dang Gui* (Radix Angelicae Sinensis) tonify qi and blood to facilitate recovery. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs in this formula.

MODIFICATIONS

- With redness, swelling, and inflammation, add *Huang Lian* (Rhizoma Coptidis) and *Shi Gao* (Gypsum Fibrosum).
- With severe pain in the joints and extremities, add *Gui Zhi* (Ramulus Cinnamomi) and *Bai Shao* (Radix Paeoniae Alba).
- With itching and pain of the skin, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae).
- With severe swelling of the knees and legs, add *Fang Ji* (Radix Stephaniae Tetrandrae) and *Mu Gua* (Fructus Chaenomelis).

Dang Gui Nian Tong Tang (Tangkuei Decoction to Lift the Pain)

Diagnosis	Signs and Symptoms	Treatment	Herbs

Dāng Guī Niǎn Tòng Tāng (Tangkuei Decoction to Lift the Pain)

- With body aches, add *Jiang Huang* (Rhizoma Curcumae Longae) and *Hai Tong Pi* (Cortex Erythrinae).
- With severe swelling and pain due to damp-heat, combine with *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity).
- With skin ulceration and abscess, combine with *Tuo Li Xiao Du Yin* (Drain the Interior and Detoxify Decoction).

CAUTIONS / CONTRAINDICATIONS

Avoid foods that are spicy, pungent, oily, or greasy.¹

PHARMACOLOGICAL EFFECTS

Anti-inflammatory: Administration of *Dang Gui Nian Tong Tang* or *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction) was associated with a marked anti-inflammatory effect to suppress the development of chronic arthritis induced by carrageenan or complete Freund's adjuvant. The researchers suggested that these herbal formulas may be considered as alternatives for non-steroid anti-inflammatory drugs (NSAIDS).²

CLINICAL STUDIES AND RESEARCH

1. **Neurodermatitis:** Use of modified *Dang Gui Nian Tong Tang* in 30 patients was associated with complete recovery in 22 cases, improvement in 7 cases, and no effect in 1 case.³
2. **Impetigo herpetiformis:** One study of 86 patients with impetigo herpetiformis reported good results using modified *Dang Gui Nian Tong Tang* both internally and topically. The herbal treatment had the following modifications: for early-stage, during the eruption of lesions, *Bai Zhi* (Radix Angelicae Dahuricae) and *Dang Shen* (Radix Codonopsis) were removed, and *Tu Fu Ling* (Rhizoma Smilacis Glabrae), *Zi Hua Di Ding* (Herba Violae), *Ye Ju Hua* (Flos Chrysanthemi Indici), and *Jin Yin Hua* (Flos Lonicerae Japonicae) were added; during healing, *Di Fu Zi* (Fructus Kochiae) and *Chan Tui* (Periostracum Cicadae) were added to relieve itching. The treatment protocol was to cook the herbs in water two separate times and drink the decoction orally. The herb residue was cooked in water a third time and the resultant solution used as an herbal wash to the affected area. The study reported complete recovery in all 86 patients within 12 packs of herbs.⁴
3. **Rash:** Use of modified *Dang Gui Nian Tong Tang* in 47 patients with rash was associated with complete recovery in 38 cases, significant improvement in 5 cases, moderate improvement in 2 cases, and no effect in 2 cases. The duration of treatment ranged from 5 to 32 packs of herbs.⁵
4. **Gout:** One study reported 90% effectiveness using modified *Dang Gui Nian Tong Tang* to treat gout in 40 patients. The herbal formula contained *Dang Gui Nian Tong Tang* plus *Hu Zhang* (Rhizoma et Radix Polygoni Cuspidati), *Song Jie* (Lignum Pini Nodi), *Mu Gua* (Fructus Chaenomeles), and *Ren Dong Teng* (Caulis Lonicerae Japonicae). The duration of treatment ranged from 20-98 days, with most showing symptomatic improvements after 33-40 days and normalization of plasma uric acid levels after 90 days. Of 40 patients, the study reported complete recovery in 7 cases, improvement in 29 cases, and no response in 4 cases.⁶
5. **Bi zheng (painful obstruction syndrome):** *Dang Gui Nian Tong Tang* has been shown to effectively treat musculoskeletal pain affecting various parts of the body, including shoulders, arms, and legs.^{7,8,9,10}

The source text instructs to grind the herbs into powder. Cook 30g of the powder in water, and take the strained decoction while warm. *Nian Tong Tang* (Lift the Pain Decoction) is designed to treat damp-heat affecting the limbs and joints, with clinical manifestations such as swelling and pain in the limbs, heavy sensations in the shoulders and back, and discomfort in the chest and diaphragm.

Dāng Guī Niǎn Tòng Tāng (Tangkuei Decoction to Lift the Pain)

These two formulas have similar names and ingredients, and essentially have the same clinical applications. They are listed here to reflect both source texts that cited these two formulas.

AUTHORS' COMMENTS

According to Dr. Chang Wei-Yen, *re bi* (heat painful obstruction) can be effectively treated with *Dang Gui Nian Tong Tang*, and the addition of *Da Ding Huang* (Caulis Euonymi), *Shen Jin Cao* (Herba Lycopodii), and *Tou Gu Cao* (Caulis Impatiensis).

<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	3g

DOSAGE / PREPARATION / ADMINISTRATION EXPLANATION

The source text instructs to cook the ingredients with *Sheng Jiang* (Rhizoma Zingiberis Recens). Take the strained decoction while warm.

Er Zhu Tang (Two-Atractylodes Decoction) treats musculoskeletal aches and pains due to damp and phlegm accumulation in the upper body. Dampness initially arises as a result of the inability of the Spleen to transport and transform water and food. Thus, patients may experience gastrointestinal weakness as a result of Spleen deficiency. Over time, dampness turns into phlegm and the phlegm accumulates in the muscles, causing aches and pains and other musculoskeletal disorders.

CHINESE THERAPEUTIC ACTIONS

1. Dispels dampness and eliminates phlegm
2. Opens the channels and collaterals to relieve pain

CLINICAL MANIFESTATIONS

Musculoskeletal disorders of the arms and shoulders due to phlegm stagnation: aches and pains in the wrist, forearm, elbow, and shoulder; bursitis; tendonitis; and frozen shoulder.

CLINICAL APPLICATIONS

Frozen shoulder, bursitis, tendonitis, and neuralgia of the forearm.

In this formula, *Ban Xia* (Rhizoma Pinelliae) and *Tian Nan Xing* (Rhizoma Arisaematis) dry dampness and eliminate phlegm. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Cang Zhu* (Rhizoma Atractylodis), and *Fu Ling* (Poria) strengthen the Spleen and Stomach and dry dampness. *Qiang Huo* (Rhizoma et Radix Notopterygii) dispels wind and dries dampness; and together with *Xiang Fu* (Rhizoma

Cyperi) and *Wei Ling Xian* (Radix et Rhizoma Clematidis), these three herbs regulate qi circulation, open up the peripheral channels and collaterals, benefit the joints, and relieve muscle aches and pains. *Chen Pi* (Pericarpium Citri Reticulatae) activates and regulates the qi flow to remove the residual phlegm and dampness. *Huang Qin* (Radix Scutellariae) clears damp-heat and reduces swelling and inflammation. *Sheng Jiang* (Rhizoma Zingiberis Recens) relieves nausea and vomiting by redirecting Stomach qi downward; it also reduces the toxicity of *Ban Xia* (Rhizoma Pinelliae). *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs in this formula.

MODIFICATIONS

- With neck stiffness, add *Ge Gen* (Radix Puerariae Lobatae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae).
- With headache and edema, add *Wu Ling San* (Five-Ingredient Powder with Poria).
- With soreness and pain of the joints, add *Niu Xi* (Radix Achyranthis Bidentatae), *Xu Duan* (Radix Dipsaci), and *Mu Fang Ji* (Radix Cocculi Trilobi).
- With phlegm in the Lung, add *Jie Geng* (Radix Platycodonis) and *Chai Hu* (Radix Bupleuri).
- For sciatica, add *Shu Jing Huo Xue Tang* (Relax the Channels and Invigorate the Blood Decoction).

Chapter 17 — Summary

— Wind-Damp Dispelling Formulas

SECTION 1: WIND-DAMP DISPELLING FORMULAS

Name	Similarities	Differences
Qiang Huo Sheng Shi Tang (Notopterygium Decoction to Overcome Dampness)		Treats soreness and pain of the neck, shoulders, and back
Juan Bi Tang (Remove Painful Obstruction Decoction)		Treats soreness and pain of the upper body with underlying <i>ying</i> (nutritive) and <i>wei</i> (defensive) <i>qi</i> deficiencies
Du Huo Ji Sheng Tang (Angelica Pubescens and Taxillus Decoction)		Treats soreness and pain of the lower back and knees with <i>qi</i> , blood, and yin deficiencies
San Bi Tang (Three-Painful Obstruction Decoction)	Dispel wind and dampness, treat <i>bi zheng</i> (painful obstruction syndrome)	Treats soreness and pain with <i>qi</i> and blood deficiencies
Shu Jing Huo Xue Tang (Relax the Channels and Invigorate the Blood Decoction)		Treats aches and pains due to damp accumulation and blood stagnation with underlying deficiencies
Shu Jin Li An San (Relax the Tendons and Instill Peace Powder)		Treats severe aches and pains with wind-cold from the exterior and clears damp-heat from the interior
Yi Yi Ren Tang (Coicis Decoction)		Treats numbness, swelling, and pain of the extremities due to wind-dampness
Shang Zhong Xia Tong Yong Tong Feng Wan (Upper, Middle, and Lower General Use Pill for Wind-Pain)		Treats aches and pains throughout the entire body

Qiang Huo Sheng Shi Tang (Notopterygium Decoction to Overcome Dampness) dispels wind and eliminates dampness. It is most effective for wind-dampness at the exterior affecting the neck, shoulder and back. Clinical manifestations include symptoms such as stiffness and immobility of the neck and shoulders, headache, heaviness of the body, low back pain with difficulty of movement, white tongue coating, and a superficial pulse.

Juan Bi Tang (Remove Painful Obstruction Decoction) dispels wind-dampness, tonifies *qi*, and harmonizes *ying* (nutritive) and *wei* (defensive) levels. This formula is most effective for *bi zheng* (painful obstruction syndrome) due to wind-dampness with underlying *ying* (nutritive) and *wei* (defensive) *qi* deficiencies. Clinical manifestations include neck pain, shoulder pain, and numbness of the extremities.

Du Huo Ji Sheng Tang (Angelica Pubescens and Taxillus Decoction) dispels wind-dampness, nourishes the Liver and Kidney, and tonifies *qi* and blood. It is generally used to treat chronic *bi zheng* (painful obstruction syndrome) with *qi* and blood, and Liver and Kidney deficiencies. Clinical manifestations include painful joints, lumbago, difficult movement of the extremities, aversion to cold and preference for warmth, palpitations, and shortness of breath.

San Bi Tang (Three-Painful Obstruction Decoction) dispels wind-cold-dampness, tonifies *qi*, and nourishes blood. It treats *bi zheng* (painful obstruction syndrome) due to stagnation of wind-cold-dampness with underlying *qi* and blood deficiencies. Clinical manifestations include numbness and pain of the muscles and joints, decreased range of motion, and pain exaggerated with exposure to cold and damp weather.

Chapter 17 — Summary

Shu Jing Huo Xue Tang (Relax the Channels and Invigorate the Blood Decoction) dispels dampness, activates blood circulation, and opens the channels and collaterals. It is an excellent formula to treat *bi zheng* (painful obstruction syndrome) characterized by damp accumulation and blood stagnation blocking the channels and collaterals. Clinical signs and symptoms include severe muscle ache, painful joints, radiating pain in the leg, numbness in the lower extremities, and pain in the trunk and extremities.

Shu Jin Li An San (Relax the Tendons and Instill Peace Powder) activates blood circulation, eliminates wind-cold from the exterior, and clears damp-heat from the interior. It opens the channels and collaterals to relieve severe muscle and joint pain in the arms and legs.

Yi Yi Ren Tang (Coicis Decoction) dispels wind-dampness, activates blood circulation, and tonifies qi. It treats *bi zheng* (painful obstruction syndrome) characterized by wind-dampness with numbness and pain of the extremities, decreased mobility and range of motion of the joints with swelling and inflammation, and a lingering sensation of warmth or mild fever.

Shang Zhong Xia Tong Yong Tong Feng Wan (Upper, Middle, and Lower General Use Pill for Wind-Pain) dispels wind, dissolves dampness, activates blood circulation, and eliminates blood stasis. It is designed to treat generalized *bi zheng* (painful obstruction syndrome) that affects the entire body (upper, middle, and lower).

SECTION 2: DAMP-COLD DISPELLING FORMULAS

Name	Similarities	Differences
Xiao Huo Luo Dan (Minor Invigorate the Collaterals Special Pill)	Dispels damp-cold, treat <i>bi zheng</i> (painful obstruction syndrome)	Opens the channels and collaterals, dispels dampness and phlegm
Da Fang Feng Tang (Major Saposhnikovia Decoction)		Tonifies qi and blood, strengthens the muscles and tendons
Ji Ming San (Powder to Take at Cock's Crow)	Eliminates damp-cold, treats leg <i>qi</i>	Activates qi circulation, drains turbidity

Xiao Huo Luo Dan (Minor Invigorate the Collaterals Special Pill) dispels wind-cold-dampness, dissolves phlegm and dredges the channels, activates blood circulation, and stops pain. Stagnation of wind, cold, dampness, phlegm, and blood may produce clinical manifestations of difficult movement of the joints, pain and numbness in the extremities, migratory pain, and heaviness of the lower back and legs.

Da Fang Feng Tang (Major Saposhnikovia Decoction) dispels wind, cold and dampness, tonifies qi and blood, and strengthens muscles and tendons. It is used to treat weakness and paralysis of the lower extremities due to deficiencies of qi and blood. Clinical manifestations include generalized pain and numbness in the legs, weak knees, atrophy of the leg muscles, difficulty of movement, hemiplegia, and neuralgia.

Ji Ming San (Powder to Take at Cock's Crow) eliminates cold and dampness, drains turbidity, and activates qi circulation. It is mainly used for leg *qi* characterized by dampness and cold, with signs and symptoms such as aversion to cold, chest stuffiness, and feelings of swelling, heaviness, weakness, numbness, and pain of the legs.

Chapter 17 — Summary

SECTION 3: DAMP-HEAT DISPELLING FORMULAS

Name	Similarities	Differences
<i>Gui Zhi Shao Yao Zhi Mu Tang</i> (Cinnamon Twig, Peony, and Anemarrhena Decoction)	Dispels wind-dampness, clears heat	Reduces swelling, inflammation, and pain in the joints
<i>Er Miao San</i> (Two-Marvel Powder)	Dispel damp-heat, treat <i>bi zheng</i> (painful obstruction syndrome)	Clears damp-heat affecting the lower body
<i>Dang Gui Nian Tong Tang</i> (Tangkuei Decoction to Lift the Pain)		Treats damp-heat affecting the joints and extremities

Gui Zhi Shao Yao Zhi Mu Tang (Cinnamon Twig, Peony, and Anemarrhena Decoction) dispels wind-dampness, clears heat, and unblocks the channels and collaterals. It is primarily used to treat *bi zheng* (painful obstruction syndrome) characterized by invasion of wind-dampness and accumulation of heat, with symptoms and signs such as swollen and painful joints, emaciation, swollen feet, dizziness, shortness of breath, atrophy of the muscle, numbness of the extremities, and difficulty with walking and movement.

Er Miao San (Two-Marvel Powder) clears heat and dries dampness. It is used for mild damp-heat attacking the lower half of the body. Clinical manifestations include pain in the lower body, weak legs, redness, swelling, weakness, pain, and heat sensation in the knees, scanty, yellow urine, and leukorrhea.

Dang Gui Nian Tong Tang (Tangkuei Decoction to Lift the Pain) dispels wind, resolves dampness, clears heat, and relieves pain. It is one of the most effective formulas for treating damp-heat type of joint and musculoskeletal disorders with pain, redness, swelling and inflammation. Clinical manifestations include joint or musculoskeletal pain with redness, swelling and inflammation, heavy sensations in the shoulders and back, fullness in the chest and epigastric region, dermatological disorders in the lower extremities with itching and pain, ulceration and abscess of the skin, and a deep, tight pulse.

SECTION 4: DAMP-PHLEGM DISPELLING FORMULA

Name	Similarities	Differences
<i>Er Zhu Tang</i> (Two-Atractylodes Decoction)	Dispels dampness, eliminates phlegm	Opens up the channels and collaterals

Er Zhu Tang (Two-Atractylodes Decoction) dispels dampness, eliminates phlegm, opens up the channels and collaterals, and relieves pain. It treats musculoskeletal disorders of the arms and shoulders due to damp and phlegm stagnation. Clinical manifestations include aches and pains in the wrist, forearm, elbow, and shoulder, bursitis, tendinitis, and frozen shoulder.

Chapter 18

— Phlegm-Dispelling Formulas

朱震亨 Zhú Zhèn-Héng

朱震亨 Zhú Zhèn-Héng, also known as
朱丹溪 Zhú Dán-Xí, 1281 1358.

朱震亨 Zhú Zhèn-Héng

Known as a wonder child, Zhu Zhen-Heng excelled in academia, rapidly passing his peers. He was able to recite thousands of verses by the time he was six years old. Because of his outstanding achievements at such a young age, Zhu's family had great hopes for him. Unfortunately, Zhu's father died when the boy was 15, and his mother was forced to raise three children on her own. With three young children and no man in the family, Zhu's family was repeatedly harassed and robbed by local bandits. Nevertheless, Zhu's mother maintained high spirits, and successfully raised all three children.

丹溪心法 *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi), published in 1481.

When Zhu was 30 years old, his mother became chronically ill and did not respond to treatment by any of the local physicians. Having been heavily influenced by her throughout his life, Zhu decided to undertake her treatment himself. He began to study medicine on his own, and five years later, successfully cured his mother's condition. This success ignited his interest, and he continued his pursuit of medicine. However, he improved little in the next ten years of studying on his own. Finally, at age 44, he bid farewell to his family, to go in search of a teacher. After a cross-country journey, he learned of 罗知梯 Luo Zhi-Ti, one of the best physicians of the time. However, Luo refused to accept any apprentices. To show his dedication, Zhu waited outside Luo's residence every day, without exception, for three months. Finally, touched by Zhu's dedication and sincerity, Luo accepted him as an apprentice. In the next three years, Zhu studied diligently and tirelessly. According to his biography, one of the most important lessons Zhu learned was to not rigidly follow only one school of thought, but to master and integrate all of them.

Zhu is most famous for one of his adages: “阳常有余，阴常不足. Yang is often in excess, yin is often insufficient.” He observed this problem because many physicians during this era prescribed formulas from *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era). These formulas were warm and drying and often damaged yin and created fire. To correct this problem, he proposed many theories and formulas to nourish yin and purge fire. Today, he is credited as the founder of 滋阴派 the Yin-Nourishing Style.

Though Zhu did not begin his formal training in medicine until 44 years of age, he excelled in his later years as he did in his youth, and became known as one of the best physicians of his time. When he died at 77, he left volumes of drafts of his clinical experiences. His writings were later organized and published by his apprentices. Among the most famous of his works was the *丹溪心法 Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) 1481.

Zhu Zhen-Heng is remembered by many as “one-dose Zhu,” for his outstanding ability to cure disease with just one dose of herbs.

Some of the formulas written by Zhu Zhen-Heng are:

- *Dang Gui Long Hui Wan* (Tangkuei, Gentiana, and Aloe Pill)
- *Zuo Jin Wan* (Left Metal Pill)
- *Da Bu Yin Wan* (Great Tonify the Yin Pill)
- *Hu Qian Wan* (Hidden Tiger Pill)
- *Yu Ping Feng San* (Jade Windscreen Powder)
- *Yue Ju Wan* (Escape Restraint Pill)
- *Wei Ling Tang* (Calm the Stomach and Poria Decoction)
- *Bi Xie Fen Qing Yin* (Dioscorea Hypoglauca Decoction to Separate the Clear)
- *Er Miao San* (Two-Marvel Powder)
- *Gun Tan Wan* (Vaporize Phlegm Pill)
- *Bao He Wan* (Preserve Harmony Pill)

Chapter 18 — Overview

— Phlegm-Dispelling Formulas

Definition: Phlegm-dispelling formulas dissolve and dispel phlegm. According to traditional Chinese medical theory, there are two types of phlegm: *tan* (visible phlegm) and *yin* (invisible phlegm). *Tan* (visible phlegm) is the thick phlegm that travels in the channel and collateral pathways and affects different parts of the body. *Yin* (invisible phlegm) is the thin, watery phlegm that generally remains in the area where it was formed. Both *tan* (visible phlegm) and *yin* (invisible phlegm) are formed primarily by accumulation of water and dampness.

Phlegm [*tan* (visible phlegm) and *yin* (invisible phlegm)] disorders are closely related to the functions of the organs that control water: the Spleen, Lung, and Kidney. The Spleen transforms water, the Lung distributes water, and the Kidney eliminates water. Disorders in any of these three organs will lead to the accumulation of water and dampness, and eventually, the formation of phlegm. Once phlegm is formed, it may affect virtually any part of the body, including but not limited to the chest, diaphragm, stomach, intestines, all four extremities, and every channel and collateral. Presentations of phlegm disorders include symptoms and signs such as cough, wheezing, hurried respiration, dizziness, vertigo, nausea, vomiting, seizures, epilepsy, *dian kuang* (mania and withdrawal), and various types of hardness and nodule formation.

Successful treatment of phlegm disorders requires accurate determination of the cause. Generally speaking, for phlegm caused by deficiency of the Spleen, the treatment approach is to strengthen the Spleen, dry dampness, and dissolve phlegm. For phlegm caused by internal fire drying the body fluids and turning them into phlegm, it is best to clear heat and dispel phlegm. For phlegm caused by deficiency heat in the Lung consuming the body fluids and turning them into phlegm, the treatment approach is to moisten the Lung and dissolve phlegm. If the phlegm is produced by coldness in the Lung or by deficiency and cold of the Spleen and Kidney, the strategy involves warming yang and dissolving phlegm. For phlegm due to invasion of exterior factors affecting the qi flow of the Lung, it is necessary to ventilate the Lung and dissolve phlegm. In short, because phlegm disorders are complex in nature, optimal treatment requires the use of herbs to treat both the cause and the symptoms.

Additionally, phlegm disorders may be associated with various complications. Because the Lung is the organ that stores phlegm, it is often affected by phlegm disorders. Thus, treatment of phlegm disorders often requires the addition of herbs to dispel phlegm from the Lung. In patients with Liver wind, phlegm travels to the upper parts of the body, so it is necessary to use herbs to calm wind and dissolve phlegm. Moreover, phlegm stagnation affects qi circulation, while obstructed qi circulation contributes to phlegm stagnation. Because of this close relationship, phlegm-dispelling formulas often contain qi-regulating herbs to activate and regulate qi circulation. Lastly, if stagnant phlegm in the channels and collaterals causes the formation of hardness and nodules, one needs to use appropriate herbs to open the channels and collaterals, soften hardness, and disperse stagnation.

~
 “Phlegm is the mother of hundreds of disorders,” causing disorders in the *zang fu* as well as obstructions of the channels and collaterals.
 ~

Chapter 18 — Overview

SUBCATEGORIES OF ACTION

Phlegm-dispelling formulas are divided into five subcategories to accurately differentiate the nature of the disorders and characteristics of the corresponding formulas.

1. Damp-Drying and Phlegm-Dissolving Formulas

These formulas are designed to treat damp-phlegm. The main signs and symptoms of damp-phlegm are coughing with profuse sputum that can be easily expectorated, feelings of distention with a stifling sensation in the chest and epigastrium, nausea, vomiting, and lassitude. The tongue coating is usually white and greasy, or slippery. The pulse is either moderate, or wiry and slippery.

Herbs commonly used to dry dampness and dissolve phlegm include *Ban Xia* (Rhizoma Pinelliae) and *Tian Nan Xing* (Rhizoma Arisaematis). Furthermore, to prevent accumulation of dampness and phlegm, herbs are commonly used to strengthen the Spleen and regulate qi, such as *Chen Pi* (Pericarpium Citri Reticulatae) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae). Exemplar formulas that dry dampness and dissolve phlegm include *Er Chen Tang* (Two-Cured Decoction) and *Wen Dan Tang* (Warm the Gallbladder Decoction).

2. Heat-Clearing and Phlegm-Dissolving Formulas

These formulas treat heat-phlegm syndromes, with common manifestations of coughing, chest pain, dizziness, thick, yellow sputum that is difficult to expectorate, a red tongue body with a greasy, yellow coating, and a slippery, rapid pulse.

Herbs that clear heat and dissolve phlegm include *Gua Lou* (Fructus Trichosanthis) and *Dan Nan Xing* (Arisaema cum Bile). Representative formulas include *Qing Qi Hua Tan Wan* (Clear the Qi and Transform Phlegm Pill) and *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction).

In severe cases of heat-phlegm syndromes, the sensory orifices may be blocked, leading to unconsciousness, seizures, epilepsy and convulsions. Such critical conditions must be treated with strong formulas that clear heat and open the sensory orifices, such as *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone) and *Zi Xue* (Purple Snow) [see Chapter 10: Orifice-Opening Formulas].

3. Dryness-Moistening and Phlegm-Dissolving Formula

This formula treats dry phlegm that manifests as thick, sticky sputum that cannot be easily expectorated, a feeling of residual phlegm in the chest after expectoration, dryness and soreness of the throat, and a hoarse and raspy voice.

Herbs and formulas commonly used to moisten dryness and dissolve phlegm are *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) and *Gua Lou* (Fructus Trichosanthis). One exemplar formula is *Bei Mu Gua Lou San* (Fritillaria and Trichosanthes Fruit Powder).

4. Warm Formulas that Dissolve Cold Phlegm

These formulas treat cold-phlegm syndromes with common clinical manifestations of coughing with white, watery sputum, and a greasy, white tongue coating.

Herbs that warm and dissolve phlegm include *Xi Xin* (Radix et Rhizoma Asari) and *Gan Jiang* (Rhizoma Zingiberis). Exemplar formulas include *San Zi Yang Qin Tang* (Three-Seed Decoction to Nourish One's Parents) and *Ling Gan Wu Wei Jiang Xin Tang* (Poria, Licorice, Schisandra, Ginger, and Asarum Decoction).

5. Wind-Expelling and Phlegm-Dissolving Formulas

These formulas treat wind-phlegm in the interior, which arises when internal phlegm is accompanied by Liver wind rising, causing symptoms of headache, dizziness, vertigo, seizures, epilepsy, and loss of consciousness. In this case, herbs that dispel phlegm should be combined with herbs that

Phlegm stagnation affects qi circulation, while obstructed qi circulation contributes to phlegm stagnation.

Chapter 18 — Overview

extinguish Liver wind. Representative formulas include *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction) and *Ding Xian Wan* (Arrest Seizures Pill).

Note: External wind-phlegm is a condition in which the pathogenic wind attacks the Lung and impairs its descending and dispersing functions. Consequently, turbid phlegm is created. Clinically, the signs and symptoms of this condition include aversion to wind, fever, and cough with profuse sputum. This condition is treated with herbs that release wind from the exterior and dispel phlegm from the interior. *Zhi Sou San* (Stop Coughing Powder) is one exemplar formula. For additional information, please refer to Chapter 1: Exterior-Releasing Formulas.

CAUTIONS / CONTRAINDICATIONS

- Phlegm-dispelling formulas should be used with caution in patients with hemoptysis, as many of these formulas are very drying in nature and may promote more coughing and bleeding.
- Phlegm-dispelling formulas generally have strong moving and dispersing effects. They should be used as needed, and discontinued when the desired effects are achieved.

Many of these formulas that are very drying in nature may promote more coughing and bleeding in patients with hemoptysis.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

It is commonly stated in traditional Chinese medicine texts that “phlegm is the mother of hundreds of disorders.”¹ As such, phlegm-dispelling formulas can treat a wide variety of diseases. From an allopathic medical perspective, phlegm-dispelling formulas have an extremely wide range of pharmacological effects and clinical applications. The most common applications include respiratory disorders, gastrointestinal disorders, seizures, epilepsy, stroke, and others.

- **Respiratory disorders:** Phlegm-dispelling formulas have a marked influence on the respiratory tract, and have been used to treat a wide variety of respiratory tract disorders. Pharmacologically, these formulas have demonstrated expectorant,² antitussive,³ and antiasthmatic effects.⁴ Clinically, these formulas have been used successfully to treat diseases such as acute bronchitis,^{5,6} chronic bronchitis,⁷ aspiration pneumonia,⁸ interstitial pneumonia,⁹ tuberculous pleurisy,¹⁰ exudative pleurisy,¹¹ bronchial asthma,¹² cough,¹³ and silicosis.¹⁴ Exemplar formulas that treat bronchitis include *Er Chen Tang* (Two-Cured Decoction), *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction), and *San Zi Yang Qin Tang* (Three-Seed Decoction to Nourish One's Parents). Exemplar formulas that treat pneumonia include *Qing Fei Tang* (Clear the Lung Decoction) and *Qing Qi Hua Tan Wan* (Clear the Qi and Transform Phlegm Pill). *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction) may be used to treat pleurisy and silicosis. *Zhi Sou San* (Stop Coughing Powder) may be used for cough.
- **Gastrointestinal disorders:** Phlegm-dispelling formulas have a marked effect on the gastrointestinal tract, and may be used to treat many gastrointestinal disorders, such as gastritis,¹⁵ epigastric pain,¹⁶ erosive gastritis,¹⁷ and reflux esophagitis.¹⁸ The pharmacological effects are attributed in part to the inhibition of gastric acid production.^{19,20} Exemplar formulas include *Er Chen Tang* (Two-Cured Decoction), *Wen Dan Tang* (Warm the Gallbladder Decoction), and *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction).
- **Seizures and epilepsy:** *Er Chen Tang* (Two-Cured Decoction) and *Gun Tan Wan* (Vaporize Phlegm Pill) are two phlegm-dispelling formulas that have demonstrated effectiveness in treating seizures and epilepsy.^{21,22}
- **Stroke:** *Wen Dan Tang* (Warm the Gallbladder Decoction) and *Gun Tan Wan* (Vaporize Phlegm Pill) are two formulas that have been used effectively to treat stroke.^{23,24} *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction) may be used to treat facial paralysis that follows as a post-stroke sequelae.²⁵
- **Meniere's syndrome:** *Wen Dan Tang* (Warm the Gallbladder Decoction) and *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction) are two formulas that have shown marked success in treating Meniere's syndrome.^{26,27}

Phlegm-dispelling formulas have an extremely wide range of clinical applications, including respiratory disorders, gastrointestinal disorders, seizures, epilepsy, stroke, and others.

Section 1

燥湿化痰剂

— Damp-Drying and Phlegm-Dissolving Formulas

Èr Chén Tāng (Two-Cured Decoction)

二陳湯

二陈汤

Pinyin Name: *Er Chen Tang*

Literal Name: Two-Cured Decoction

Alternate Names: *Er Chen Wan*, *Erh Chen Tang (Wan)*, Two-Chen Decoction (Pill), Two Vintage Herbs Decoction, Citrus and Pinellia Combination

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Ban Xia</i> (Rhizoma Pinelliae), <i>xi</i> (washed) with liquid 7 times	15g
<i>Ju Hong</i> (Exocarpium Citri Reticulatae)	15g
<i>Fu Ling</i> (Poria)	9g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	4.5g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind all of the ingredients into a coarse powder. Cook 12g of the powder with 7 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Wu Mei* (Fructus Mume) in one large bowl of water until the liquid is reduced to 60%. Take the hot, strained decoction any time during the day. Today, this formula may be prepared as a decoction with 3g of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Wu Mei* (Fructus Mume).

CHINESE THERAPEUTIC ACTIONS

1. Dries dampness and dissolves phlegm
2. Regulates qi and harmonizes the middle *jiao*

CLINICAL MANIFESTATIONS

Damp-phlegm accumulation: profuse, white sputum that can be easily expectorated, a feeling of distention and a stifling sensation in the chest and epigastrium, nausea, vomiting, lassitude, weak extremities, possible vertigo, palpitations, white, moist tongue coating, and a slippery pulse.

CLINICAL APPLICATIONS

Upper respiratory tract infection, bronchitis, tracheitis,

emphysema, gastritis, peptic ulcer disease, gastrointestinal neurosis, nausea, vomiting, goiter, Meniere's disease, seizures, and hangovers.

EXPLANATION

Er Chen Tang (Two-Cured Decoction) is the basic formula for treating damp-phlegm. According to traditional Chinese medicine theory, the Spleen sends up clear fluids to the upper *jiao*. If this function is impaired, dampness may accumulate in the Spleen and create phlegm. Thus, damp-phlegm syndromes usually result from Spleen deficiency or dysfunction. If the Spleen is deficient and full of dampness, its functions of transportation and transformation will be impaired, which will lead to insufficient supply of nutrients to the body and the extremities. The result will be lassitude and weak extremities.

The Lung, on the other hand, stores phlegm. Phlegm accumulation in the Lung manifests as coughing with profuse sputum. A feeling of distention and oppression in the chest and epigastrium arises as a result of damp-phlegm obstructing the chest. Nausea and vomiting are due to damp-phlegm obstructing Stomach qi and causing

Èr Chén Tāng (Two-Cured Decoction)

Er Chen Tang (Two-Cured Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Damp-phlegm accumulation	<ul style="list-style-type: none"> • Coughing with profuse sputum, distention and a stifling sensation in the chest and epigastrium: damp-phlegm affecting the Lung • Nausea and vomiting: reversed flow of Stomach qi due to damp-phlegm accumulation • Lassitude and weak extremities: damp-phlegm affecting the Spleen • Palpitations and vertigo: yang qi unable to ascend due to damp-phlegm accumulation • White, moist tongue coating, and a slippery pulse: damp-phlegm condition 	<ul style="list-style-type: none"> • Dries dampness and dissolves phlegm • Regulates qi and harmonizes the middle <i>jiao</i> 	<ul style="list-style-type: none"> • <i>Ban Xia</i> (Rhizoma Pinelliae) breaks up and dissolves phlegm and dries dampness. • <i>Ju Hong</i> (Exocarpium Citri Reticulatae) activates and regulates qi. • <i>Fu Ling</i> (Poria) strengthens the Spleen and dispels dampness. • <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) relieves nausea and vomiting by guiding Stomach qi downward. • <i>Wu Mei</i> (Fructus Mume) astringes the Lung to prevent qi loss. • <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes all of the herbs.

it to rise abnormally. If damp-phlegm affects the ascent of yang qi, then palpitations and vertigo can occur.

Ban Xia (Rhizoma Pinelliae) acts as the chief herb in this formula because it is the best herb to break up and dissolve phlegm stagnation. Its acrid and warm properties can dissolve phlegm, dry dampness, and open pathways for the qi to flow. In addition, it corrects the reversed flow of Stomach qi to relieve nausea and vomiting. *Ju Hong* (Exocarpium Citri Reticulatae) activates and regulates qi to remove residual phlegm and dampness. *Fu Ling* (Poria) strengthens the Spleen and dispels dampness. *Sheng Jiang* (Rhizoma Zingiberis Recens) relieves nausea and vomiting by guiding Stomach qi downward, and helps to detoxify *Ban Xia* (Rhizoma Pinelliae). Since patients with this syndrome already have qi deficiency, a very small amount of *Wu Mei* (Fructus Mume) is used to astringe the Lung to prevent qi loss. The restraining effect of *Wu Mei* (Fructus Mume) also balances the dispersing nature of *Ban Xia* (Rhizoma Pinelliae), thereby minimizing the potential side effects of both herbs. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes all of the herbs and regulates the Lung and Spleen.

MODIFICATIONS

- For wind-phlegm characterized by bluish-green and shiny sputum, add *Dan Nan Xing* (Arisaema cum Bile), *Bai Fu Zi* (Rhizoma Typhonii), *Zao Jiao* (Fructus Gleditsiae), and *Zhu Li* (Succus Bambusae).
- For cold-phlegm characterized by clear sputum, add the juice of *Sheng Jiang* (Rhizoma Zingiberis Recens) and increase the dose of *Ban Xia* (Rhizoma Pinelliae).

- For heat-phlegm characterized by yellow sputum, add *Huang Qin* (Radix Scutellariae), *Gua Lou* (Fructus Trichosanthis), *Huang Lian* (Rhizoma Coptidis), *Zhu Ru* (Caulis Bambusae in Taenia), and *Dan Nan Xing* (Arisaema cum Bile).
- For damp-phlegm characterized by white sputum, add *Cang Zhu* (Rhizoma Atractylodis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Hou Po* (Cortex Magnoliae Officinalis).
- For dry-phlegm characterized by sputum that is yellow, thick and difficult to expectorate, add *Gua Lou* (Fructus Trichosanthis), *Ku Xing Ren* (Semen Armeniacae Amarum), and *Bei Mu* (Bulbus Fritillariae).
- For qi stagnation and phlegm accumulation, add *Hou Po* (Cortex Magnoliae Officinalis) and *Zhi Shi* (Fructus Aurantii Immaturus).
- For phlegm produced by food stagnation, add *Shan Zha* (Fructus Crataegi), *Mai Ya* (Fructus Hordei Germinatus), and *Shen Qu* (Massa Fermentata).
- For stubborn phlegm (chronic), add *Zhi Shi* (Fructus Aurantii Immaturus), *Dan Nan Xing* (Arisaema cum Bile), *Fu Hai Shi* (Pumice), and *Mang Xiao* (Natrii Sulfas).
- With nausea and vomiting due to alcohol consumption or hangover, add *Ge Hua Jie Cheng San* (Pueraria Flower Powder for Detoxification and Awakening).
- With nausea and vomiting due to cold in the Stomach and a deficient body constitution, add *Mu Xiang* (Radix Aucklandiae) and *Sha Ren* (Fructus Amomi).
- With vomiting with abdominal pain due to heat, combine with *Huang Lian Tang* (Coptis Decoction).

Èr Chén Tāng (Two-Cured Decoction)

- With morning sickness, add *Sha Ren* (Fructus Amomi), *Lian Qiao* (Fructus Forsythiae), and *Huang Qin* (Radix Scutellariae).
- If there is drooling of saliva in children, add *Yi Zhi* (Fructus Alpiniae Oxyphyllae) and brown sugar.
- If accompanied by depression, add *Yue Ju Wan* (Escape Restraint Pill).
- For pulmonary emphysema in the elderly, add *Kuan Dong Hua* (Flos Farfarae), *Zi Wan* (Radix et Rhizoma Asteris), and *Sha Ren* (Fructus Amomi).
- For asthma in children caused by heat, add *Ma Huang* (Herba Ephedrae), *Ku Xing Ren* (Semen Armeniacae Amarum), *Shi Gao* (Gypsum Fibrosum), and *Sang Bai Pi* (Cortex Mori).
- For nodules caused by phlegm obstructing the channels, add *Mu Li* (Concha Ostreae), *Xuan Shen* (Radix Scrophulariae), *Ge Qiao* (Concha Meretricis seu Cyclinae), *Mang Xiao* (Natrii Sulfas), *Hai Zao* (Sargassum), and *Kun Bu* (Thallus Eckloniae).

CAUTIONS / CONTRAINDICATIONS

- *Er Chen Tang* is acrid and drying and is not suitable for cough caused by Lung yin deficiency or Lung dryness. Similarly, this formula should not be used if the patient has scanty sputum, blood-streaked sputum, or coughing with blood.
- This formula is acrid, warm, and drying. Short-term use of this formula may be associated with dry mouth and thirst. Long-term use may cause consumption of yin and body fluids.¹

PHARMACOLOGICAL EFFECTS

1. **Respiratory:** Ingredients of *Er Chen Tang* have been shown to have antitussive, expectorant, and antiasthmatic effects.²
2. **Gastrointestinal:** Ingredients of *Er Chen Tang* may inhibit the production of gastric acid.³

CLINICAL STUDIES AND RESEARCH

1. **Bronchitis:** Use of modified *Er Chen Tang* showed marked effectiveness in treating bronchitis. Out of 109 patients who had uncomplicated bronchitis, marked improvement was reported in 105 cases; and out of 66 who had bronchitis with wheezing and dyspnea, marked improvement was reported in 59 cases.⁴
2. **Bronchiolitis:** According to one study, 80 patients with bronchiolitis were treated with marked improvement in 48 cases, moderate improvement in 31 cases, and no effect in 1 case. The herbal treatment contained *Er Chen Tang* plus *Zi Su Zi* (Fructus Perillae), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Jie Geng* (Radix Platycodonis).⁵

3. **Atrophic gastritis:** Use of modified *Er Chen Tang* was associated with 71% effectiveness in treating 128 patients with chronic atrophic gastritis. The herbal treatment included *Er Chen Tang* with *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Sha Ren* (Fructus Amomi), and others as deemed necessary.⁶
4. **Diabetes mellitus:** Use of modified *Er Chen Tang* was effective in treating diabetes mellitus characterized by damp-heat. The herbal treatment included *Er Chen Tang* with *Cang Zhu* (Rhizoma Atractylodis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Jue Ming Zi* (Semen Cassiae), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), and *Ge Gen* (Radix Puerariae Lobatae) as the base formula. Out of 32 patients, the study reported complete recovery in 4 cases, marked effectiveness in 16 cases, slight improvement in 10 cases, and no effect in 2 cases. The overall effectiveness was 93.8%.⁷
5. **Seizures:** Use of modified *Er Chen Tang* was associated with 76.92% effectiveness in treating seizures. Out of 52 patients, the study reported marked effect in 12 cases, moderate effect in 28 cases, and no effect in 12 cases. Modifications were made on an individual basis.⁸
6. **Goiter:** In one report, use of *Er Chen Tang* effectively reduced the size of thyroid enlargement in 5 out of 7 patients. All patients received the classic formula without modifications or any other treatments.⁹

RELATED FORMULAS

Dǎo Tán Tāng (Guide Out Phlegm Decoction)

導痰湯
导痰汤

Pinyin Name: Dao Tan Tang

Literal Name: Guide Out Phlegm Decoction

Original Source: *Ji Sheng Fang* (Formulas to Aid the Living) by Yan Yong-He in 1253

<i>Ban Xia</i> (Rhizoma Pinelliae),	
xi (washed) with liquid 7 times	120g [12g]
<i>Tian Nan Xing</i> (Rhizoma Arisaematis),	
pao (blast-fried)	30g [6g]
<i>Ju Hong</i> (Exocarpium Citri Reticulatae)	30g [6g]
<i>Zhi Shi</i> (Fructus Aurantii Immaturus),	
chao (dry-fried) with bran	30g [6g]
<i>Chi Fu Ling</i> (Poria Rubra)	30g [6g]
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae	
Praeparata cum Melle)	15g [3g]

The source text states to grind the herbs into powder. Cook 12g of the powder with 10 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 2 bowls of water until it is reduced to 80%. Take the warm, strained decoction after meals.

Èr Chén Tāng (Two-Cured Decoction)

Today, this formula may be prepared as a decoction with the doses suggested in brackets.

Dao Tan Tang (Guide Out Phlegm Decoction) dries dampness, dispels phlegm, activates qi circulation, and unblocks stagnation. Clinically, it treats phlegm stagnation in the chest and diaphragm with symptoms such as a feeling of fullness and distention in the chest and hypochondrium, coughing, nausea, and poor appetite. This formula also can be used for Liver wind rising with phlegm, with symptoms such as inability to eat due to nausea and vomiting, headache, and vertigo.

Dí Tán Tāng (Scour Phlegm Decoction)

滌痰湯
涤痰汤

Pinyin Name: *Di Tan Tang*

Literal Name: Scour Phlegm Decoction

Original Source: *Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments) by Wang Ken-Tang in 1602

<i>Dan Nan Xing</i> (Arisaema cum Bile),	
<i>zhi</i> (prepared) with ginger	7.5g [12g]
<i>Ban Xia</i> (Rhizoma Pinelliae),	
<i>xi</i> (washed) with liquid 7 times	7.5g [12g]
<i>Zhi Shi</i> (Fructus Aurantii Immaturus),	
<i>chao</i> (dry-fried) with bran	6g [10g]
<i>Fu Ling</i> (Poria)	6g [10g]
<i>Ju Hong</i> (Exocarpium Citri Reticulatae)	4.5g [7.5g]
<i>Shi Chang Pu</i> (Rhizoma Acori Tatarinowii)	3g [5g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	3g [5g]
<i>Zhu Ru</i> (Caulis Bambusae in Taenia)	2.1g [3.5g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	1.5g [2.5g]

The source text states to prepare the ingredients as a decoction by cooking the herbs with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in 2 bowls of water until it is reduced to 1 bowl. Take the warm, strained decoction after meals.

Di Tan Tang (Scour Phlegm Decoction) eliminates phlegm and opens the sensory orifices. Clinically, this formula is indicated for patients with *zhong feng* (wind stroke) caused by phlegm obstruction, marked by a stiff tongue and speech difficulty.

Zhī Suǒ Èr Chén Tāng

(Two-Cured Decoction with Aurantium and Cardamon)

枳縮二陳湯
枳缩二陈汤

Pinyin Name: *Zhi Suo Er Chen Tang*

Literal Name: Two-Cured Decoction with Aurantium and Cardamon

Alternate Name: Chih-shih and Cardamon Combination

Original Source: *Wan Bing Hui Chun* (Restoration of Health from the Myriad Diseases) by Gong Ting-Xian in 1587

<i>Zhi Shi</i> (Fructus Aurantii Immaturus),	
<i>chao</i> (dry-fried) with bran	6g
<i>Sha Ren</i> [Suo Sha] (Fructus Amomi)	6g
<i>Ban Xia</i> (Rhizoma Pinelliae),	
<i>zhi</i> (prepared) with ginger juice	6g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	6g
<i>Fu Ling</i> (Poria)	6g
<i>Xiang Fu</i> (Rhizoma Cyperi)	6g
<i>Mu Xiang</i> (Radix Aucklandiae)	1.5g
<i>Cao Dou Kou</i> (Semen Alpiniae Katsumadai)	1.5g
<i>Gan Jiang</i> (Rhizoma Zingiberis), <i>chao</i> (dry-fried)	1.5g
<i>Hou Po</i> (Cortex Magnoliae Officinalis),	
<i>chao</i> (dry-fried) with ginger juice	2.4g
<i>Xiao Hui Xiang</i> (Fructus Foeniculi),	
<i>chao</i> (dry-fried) with liquor	2.4g
<i>Yan Hu Suo</i> (Rhizoma Corydalis)	2.4g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	0.9g

The source text states to cook the herbs with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens), and take the warm, strained decoction with *Zhu Li* (Succus Bambusae).

Zhi Suo Er Chen Tang (Two-Cured Decoction with Aurantium and Cardamon) treats phlegm stagnation above the diaphragm and beneath the heart area, which can cause violent nausea and vomiting accompanied by severe pain. Phlegm stagnation also leads to qi and blood stagnation, causing migrating and shooting pain throughout the upper and lower back.

To treat this condition, this formula has *Er Chen Tang* as the base formula to eliminate phlegm accumulation, while *Xiao Hui Xiang* (Fructus Foeniculi), *Yan Hu Suo* (Rhizoma Corydalis), *Xiang Fu* (Rhizoma Cyperi), and *Gan Jiang* (Rhizoma Zingiberis) are added to activate qi and blood circulation to relieve pain. *Zhi Shi* (Fructus Aurantii Immaturus), *Sha Ren* (Fructus Amomi), *Hou Po* (Cortex Magnoliae Officinalis), *Mu Xiang* (Radix Aucklandiae), and *Cao Dou Kou* (Semen Alpiniae Katsumadai) resolve dampness and eliminate phlegm. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonize the herbs in the formula and protect the middle *jiao*.

Èr Chén Tāng (Two-Cured Decoction)

Clinically, this formula has been used to treat gastritis, acid reflux, gastro-esophageal reflux disease, gastric ulcer, duodenal ulcer, gastroparesis, chest pain, and angina pectoris.

AUTHORS' COMMENTS

Er Chen Tang is the fundamental formula for treating damp and phlegm accumulation. Depending on the other pathogenic factors involved, additional herbs should be added for maximum effect. Please refer to the Modifications section for details.

Er Chen Tang, literally 'Two-Cured Decoction,' is so named because its two main ingredients [*Ban Xia* (Rhizoma Pinelliae) and *Ju Hong* (Exocarpium Citri Reticulatae)] are more effective when cured and aged.

Er Chen Tang, *Dao Tan Tang* (Guide Out Phlegm Decoction), *Di Tan Tang* (Scour Phlegm Decoction), and *Zhi Suo Er Chen Tang* (Two-Cured Decoction with Aurantium and Cardamon) all dry dampness and dissolve phlegm.

- *Er Chen Tang* is the standard formula and first choice for treating damp and phlegm accumulation. It treats a wide variety of disorders characterized by dampness and phlegm.

- *Dao Tan Tang* is a much stronger formula for eliminating phlegm. Not only can it eliminate phlegm from the chest, but also resolve phlegm that is accompanied by Liver wind.
- *Di Tan Tang* eliminates phlegm and opens the sensory orifices. It is used mostly for post-stroke patients with a stiff tongue and speech difficulties.
- *Zhi Suo Er Chen Tang* eliminates phlegm, regulates qi circulation, and relieves pain. It treats severe radiating pain in the chest with violent nausea and vomiting.

Wēn Dǎn Tāng (Warm the Gallbladder Decoction)

溫膽湯
温胆汤

Pinyin Name: *Wen Dan Tang*

Literal Name: Warm the Gallbladder Decoction

Alternate Names: *Wen Tan Tang*, Gallbladder Warming Decoction, Gallbladder-Warming Decoction, Hoelen and Bamboo Combination

Original Source: *San Yin Ji Yi Bing Zheng Fang Lun* (Discussion of Illnesses, Patterns, and Formulas Related to the Unification of the Three Etiologies) by Chen Yan in 1174

COMPOSITION

<i>Ban Xia</i> (Rhizoma Pinelliae), <i>xi</i> (washed) with liquid 7 times	6g
<i>Zhu Ru</i> (Caulis Bambusae in Taenia)	6g
<i>Zhi Shi</i> (Fructus Aurantii Immaturus), <i>chao</i> (dry-fried) with bran	6g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	9g
<i>Fu Ling</i> (Poria)	4.5g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	3g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder.

Cook 12g of the powder with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao*

Wēn Dǎn Tāng (Warm the Gallbladder Decoction)

(Fructus Jujubae) in 1.5 large bowls of water until the liquid is reduced to 70%. Take the strained decoction before meals.

CHINESE THERAPEUTIC ACTIONS

- 1. Regulates qi and dissolves phlegm
- 2. Clears heat in the Gallbladder
- 3. Harmonizes the Gallbladder and Stomach

CLINICAL MANIFESTATIONS

Gallbladder and Stomach disharmony accompanied by heat-phlegm: irritability, insomnia, palpitations, seizures, epilepsy, nausea, vomiting, thirst, and a bitter taste in the mouth.

CLINICAL APPLICATIONS

Meniere’s syndrome, vertigo, psychiatric disorders (schizophrenia, bipolar disorders, and reactive psychosis), melancholia, nephropathy, diabetes mellitus, diabetic microvascular complications (diabetic retinopathy, diabetic nephropathy, and diabetic foot), cardiovascular disorders, stroke, pneumonia, asthma, and organophosphorus poisoning.

EXPLANATION

Wen Dan Tang (Warm the Gallbladder Decoction) treats disharmony of the Gallbladder and Stomach, accompanied by heat-phlegm in the interior. The Gallbladder, which belongs to the wood element, has a dispersing and discharging characteristic. Stagnation inhibits the dispersing and discharging nature of the Gallbladder, which in turn may cause it to overact on the Stomach and produce disharmony between the two organs. This

disharmony eventually creates heat-phlegm, which manifests in symptoms such as irritability, insomnia, and palpitations. Nausea and vomiting arise when heat-phlegm blocks the normal descension of Stomach qi, forcing it to move adversely upward. In severe cases, heat-phlegm may obstruct the sensory orifices and cause seizures and epilepsy. The bitter taste in the mouth signifies heat in the Liver or Gallbladder, and slight thirst may occur as a result of interior heat consuming body fluids.

This formula has *Ban Xia* (Rhizoma Pinelliae) to dry dampness, dissolve phlegm, harmonize the Stomach, and redirect reversed flow of Stomach qi downward. *Zhu Ru* (Caulis Bambusae in Taenia) clears heat, dissolves phlegm, and relieves irritability. *Zhi Shi* (Fructus Aurantii Immaturus) breaks up qi stagnation and dispels phlegm. *Chen Pi* (Pericarpium Citri Reticulatae) regulates qi flow and dries dampness. *Fu Ling* (Poria) strengthens the Spleen to eliminate dampness and phlegm. *Sheng Jiang* (Rhizoma Zingiberis Recens), *Da Zao* (Fructus Jujubae), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) strengthen the Spleen and harmonize the Stomach.

MODIFICATIONS

- With dry mouth and throat, add *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Mai Dong* (Radix Ophiopogonis), and *Tian Hua Fen* (Radix Trichosanthis); and remove *Ban Xia* (Rhizoma Pinelliae).
- With dark, yellow urine and dysuria, add *Yin Chen* (Herba Artemisiae Scopariae) and *Tong Cao* (Medulla Tetrapanacis).

Wen Dan Tang (Warm the Gallbladder Decoction)

Wēn Dǎn Tāng (Warm the Gallbladder Decoction)

- With vomiting, add *Zi Su Ye* (Folium Perillae) and *Huang Lian* (Rhizoma Coptidis).
- With nausea, vomiting, and chest oppression, add *Huo Xiang* (Herba Agastaches) and *Shi Chang Pu* (Rhizoma Acori Tatarinowii).
- With irritability due to interior heat, add *Zhi Zi* (Fructus Gardeniae).
- With irritability and a bitter taste in the mouth, add *Huang Lian* (Rhizoma Coptidis).
- With insomnia due to excess worries, add *Xiao Yao San* (Rambling Powder).
- With insomnia due to depression, add *Yue Ju Wan* (Escape Restraint Pill).
- With insomnia and palpitations due to fear and fright, add *Suan Zao Ren* (Semen Ziziphi Spinosa).
- With palpitations, add *Yuan Zhi* (Radix Polygalae) and *Shi Chang Pu* (Rhizoma Acori Tatarinowii).
- For epilepsy, add *Yu Jin* (Radix Curcumae) and *Shi Chang Pu* (Rhizoma Acori Tatarinowii).
- For epilepsy and convulsions, add *Dan Nan Xing* (Arisaema cum Bile), *Gou Teng* (Ramulus Uncariae cum Uncis), and *Quan Xie* (Scorpio).
- For hearing difficulty caused by damp-heat attacking the Gallbladder channel, add *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae), *Shi Chang Pu* (Rhizoma Acori Tatarinowii), and *Tong Cao* (Medulla Tetrapanacis).
- With dizziness and vertigo, add *Ju Hua* (Flos Chrysanthemi) and *Huang Qin* (Radix Scutellariae).

CAUTIONS / CONTRAINDICATIONS

Wen Dan Tang is contraindicated in the following cases: insomnia caused by Heart deficiency, palpitations caused by blood deficiency, dizziness and vertigo caused by yin deficiency, and vomiting or nausea caused by Stomach cold.

CLINICAL STUDIES AND RESEARCH

1. **Meniere's syndrome:** *Wen Dan Tang* has been shown in two studies to effectively treat Meniere's syndrome. According to one study, use of modified *Wen Dan Tang* was associated with complete recovery in 41 of 48 patients. Modifications to the original formula included addition of *Zhi Zi* (Fructus Gardeniae) and *Huang Qin* (Radix Scutellariae) for headache, irritability, and tinnitus; *Yuan Zhi* (Radix Polygalae) and *Da Zao* (Fructus Jujubae) for insomnia with excessive dreaming; *Chai Hu* (Radix Bupleuri) and *Yu Jin* (Radix Curcumae) for belching and acid reflux; *Shen Qu* (Massa Fermentata) and charred *Shan Zha* (Fructus Crataegi) for indigestion; *Huo Xiang* (Herba Agastaches) and *Jing Jie* (Herba Schizonepetae) for exterior conditions; *Tian Ma* (Rhizoma Gastrodiae) and *Zhe Shi* (Haematitum) for severe dizziness and

vertigo; *Tian Nan Xing* (Rhizoma Arisaematis) and *Shi Chang Pu* (Rhizoma Acori Tatarinowii) for abundant damp and phlegm; and substitution of *Sheng Jiang* (Rhizoma Zingiberis Recens) with *Gan Jiang* (Rhizoma Zingiberis) for Stomach cold.¹

According to another study, use of modified *Wen Dan Tang* was associated with 92% effectiveness for treating Meniere's syndrome. The herbal treatment consisted of *Wen Dan Tang* plus *Tian Ma* (Rhizoma Gastrodiae) for dizziness; *Zhe Shi* (Haematitum) and *Zhu Ru* (Caulis Bambusae in Taenia) for nausea and vomiting; and *Cong Bai* (Bulbus Allii Fistulosi) for severe tinnitus. The herbs were cooked together with *Du Huo* (Radix Angelicae Pubescentis) and eggs, and administered in decoction. Of 42 patients, the study reported complete recovery in 17 cases, improvement in 22 cases, and no response in 3 cases.²

2. **Vertigo:** Administration of *Wen Dan Tang* was reported in one study to effectively treat vertigo. Of 53 patients, 35 had complete recovery, 13 had improvement, and 5 had no effect. Modifications to the original formula included the addition of *Xuan Fu Hua* (Flos Inulae) and *Zhe Shi* (Haematitum) for nausea and vomiting; *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and *Ju Hua* (Flos Chrysanthemi) for tinnitus; *Chuan Xiong* (Rhizoma Chuanxiong) and *Man Jing Zi* (Fructus Viticis) for headache; *Long Dan* (Radix et Rhizoma Gentianae) and *Huang Qin* (Radix Scutellariae) for a bitter taste in the mouth; *Suan Zao Ren* (Semen Ziziphi Spinosa) and *He Huan Pi* (Cortex Albiziae) for insomnia; *Gui Ban* (Plastrum Testudinis) and *Du Zhong* (Cortex Eucommiae) for soreness and weakness of the lower back and knees; and *Gou Teng* (Ramulus Uncariae cum Uncis), *Shi Jue Ming* (Concha Haliotidis), and *Niu Xi* (Radix Achyranthis Bidentatae) for hypertension.³
3. **Psychiatric disorders:** *Wen Dan Tang* has been shown in several clinical studies to have a beneficial effect in treating various psychiatric disorders. According to one study, it has a 96% effectiveness in treating 149 patients with severe psychiatric disorders such as schizophrenia, bipolar disorders, reactive psychosis, and others. The duration of treatment ranged from 3 to 12 packs of herbs in most cases.⁴
4. **Melancholia:** Use of *Wen Dan Tang* was associated with 87.5% effectiveness in treating melancholia, a syndrome caused by emotional stress and Liver qi stagnation, affecting the Heart and Spleen, and leading to disharmony of qi of the *zangfu* organs. Of 40 patients, 19 cases were cured, 16 improved, and 5 showed no improvement.⁵
5. **Dian kuang (mania and withdrawal):** Thirty patients with *dian kuang* (mania and withdrawal) were treated with 87% effectiveness using *Wen Dan Tang* plus *Mu Li*

Wēn Dǎn Tāng (Warm the Gallbladder Decoction)

(Concha Ostreae), *Zhen Zhu Mu* (Concha Margaritiferae), and *Mai Dong* (Radix Ophiopogonis). Of 30 patients, the study reported recovery in 13 cases, significant improvement in 5 cases, moderate improvement in 8 cases, and no effect in 4 cases. The average duration of treatment was 78.7 days, with a range of 16–224 days.⁶

6. Impotence: Use of modified *Wen Dan Tang* was associated with 97% effectiveness in treating impotence in 35 men. The herbal treatment contained this formula plus *Tu Fu Ling* (Rhizoma Smilacis Glabrae), *Wu Gong* (Scolopendra), and *She Chuang Zi* (Fructus Cnidii). Patients were instructed to avoid sexual activity, smoking, alcohol, and spicy, greasy, oily and pungent foods during herbal treatment. Of 35 patients, the study reported complete recovery in 21 cases, improvement in 13 cases, and no effect in 1 case.⁷

7. Epigastric pain: One study reported good results using modified *Wen Dan Tang* to treat epigastric pain characterized by damp-heat. Modifications to this formula included the addition of *Cang Zhu* (Rhizoma Atractylodis) and *Pei Lan* (Herba Eupatorii) for more damp than heat; and *Lian Qiao* (Fructus Forsythiae), *Pu Gong Ying* (Herba Taraxaci), and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) for more heat than damp; *Huang Lian* (Rhizoma Coptidis) and *Wu Zhu Yu* (Fructus Evodiae) for acid reflux; *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and charred *Shan Zha* (Fructus Crataegi) for blood stagnation; and *Tai Zi Shen* (Radix Pseudostellariae) and *Sha Shen* (Radix Glehniae seu Adenophorae) for qi and yin deficiencies due to damp-heat. Of 42 patients, the study reported complete recovery in 33 cases, improvement in 7 cases, and no effect in 2 cases.⁸

8. Stroke: *Wen Dan Tang* has been used successfully to treat both acute episodes and sequelae of stroke. According to one study on treatment of acute stroke in 35 patients, use of herbs was associated with complete recovery in 15 cases, improvement in 17 cases, and no effect in 3 cases. The herbal formula contained *Chen Pi* (Pericarpium Citri Reticulatae), *Fu Ling* (Poria), *Ban Xia* (Rhizoma Pinelliae), *Zhi Shi* (Fructus Aurantii Immaturus), *Zhu Ru* (Caulis Bambusae in Taenia), *Shi Chang Pu* (Rhizoma Acori Tatarinowii), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). Additional modifications were made as needed.⁹ According to another study, 34 patients with sequelae of stroke were treated with significant improvement in 10 cases, improvement in 22 cases, and no effect in 2 cases. The herbal formula contained *Wen Dan Tang* plus *San Qi* (Radix et Rhizoma Notoginseng), *Huang Qi* (Radix Astragali), and *Di Long* (Pheretima).¹⁰

9. Diabetic microvascular complications: Administration of modified *Wen Dan Tang* was effective in treating diabetic retinopathy, diabetic nephropathy, and “diabetic

foot,” which are three diabetic microvascular complications characterized by qi and phlegm stagnation.¹¹

10. Organophosphorus poisoning: Use of modified *Wen Dan Tang* was associated with marked success in treating organophosphorus poisoning with symptoms such as headache, irritability, insomnia, excessive dreaming, chest oppression, fatigue, nausea, vomiting, depression, inability to concentrate, memory impairment, and others. Of 42 patients, the study reported complete recovery in 34 cases and improvement in 8 cases. The duration of treatment ranged from 3 to 32 days, with an average of 14.5 days.¹²

The source text states to prepare the ingredients as a decoction with 5 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae).

Shi Wei Wen Dan Tang (Ten-Ingredient Decoction to Warm the Gallbladder) dissolves phlegm and tranquilizes the Heart. Clinically, the patient may have Heart and Gallbladder deficiencies, with symptoms such as palpitations, restlessness, irritability, fidgeting, mild swelling of the extremities, and decreased appetite. Historically, this formula has been used to treat individuals who always exhibit fear when faced with challenging circumstances

Wēn Dǎn Tāng (Warm the Gallbladder Decoction)

(Gallbladder deficiency). These individuals usually experience palpitations when they try to solve these issues, and they become easily discouraged by any difficulties (Heart deficiency).

Wen Dan Tang and *Shi Wei Wen Dan Tang* (Ten-Ingredient Decoction to Warm the Gallbladder) both dissolve phlegm.

- *Wen Dan Tang* treats Gallbladder and Stomach disharmony with obstruction of heat-phlegm.
- *Shi Wei Wen Dan Tang* treats Heart and Gallbladder deficiencies with phlegm disturbing the mind and *shen* (spirit).

<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	0.9g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a coarse powder, and decoct it in water with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae).

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and dissolves phlegm

2. Regulates qi and calms the *shen* (spirit)

Zhú Rú Wēn Dǎn Tāng (Bamboo Decoction to Warm the Gallbladder)

CLINICAL MANIFESTATIONS

Accumulation of heat and phlegm in the Heart and Gallbladder: tendency to get easily frightened and scared, palpitations, insomnia, mild and persistent fever, and copious phlegm in the chest.

CLINICAL APPLICATIONS

Insomnia, neurotic palpitations, alcohol poisoning, and neurasthenia.

EXPLANATION

Zhu Ru Wen Dan Tang (Bamboo Decoction to Warm the Gallbladder) is designed for patients with chronic febrile disorders, in which the heat consumes yin and fluids and gives rise to heat and phlegm accumulation. Patients often complain of mild and persistent fever, as well as copious phlegm and discomfort in the chest. Moreover, the heat and phlegm usually disturb the *shen* (spirit); thus, patients are easily frightened and scared, and experience palpitations and insomnia.

This formula contains herbs with many different functions, with the overall goals of clearing heat and phlegm from the Liver and Gallbladder, calming the *shen* (spirit), and regulating qi. *Chai Hu* (Radix Bupleuri) enters the *shaoyang* level, and is an excellent herb for treating patients with long-term illnesses such as chronic febrile

disorders. *Zhu Ru* (Caulis Bambusae in Taenia) dissolves phlegm and clears heat in the Gallbladder. *Jie Geng* (Radix Platycodonis) eliminates phlegm and relieves chest congestion. *Zhi Shi* (Fructus Aurantii Immaturus) breaks up qi stagnation and dispels phlegm. *Huang Lian* (Rhizoma Coptidis) clears damp-heat.

Because patients with chronic febrile disorders often have qi deficiency and excessive consumption of body fluids, *Ren Shen* (Radix et Rhizoma Ginseng) is added to tonify qi and generate body fluids. It also has the additional benefit of calming the *shen* (spirit). *Chen Pi* (Pericarpium Citri Reticulatae) regulates qi circulation and dries dampness. *Ban Xia* (Rhizoma Pinelliae) dissolves phlegm and guides reversed flow of Stomach qi downward. *Fu Ling* (Poria) strengthens the Spleen and eliminates dampness. *Xiang Fu* (Rhizoma Cyperi) regulates Liver qi. *Sheng Jiang* (Rhizoma Zingiberis Recens), *Da Zao* (Fructus Jujubae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) strengthen the Spleen and harmonize the Stomach.

MODIFICATIONS

- With insomnia, add *Shou Wu Teng* (Caulis Polygoni Multiflori) and *Yuan Zhi* (Radix Polygalae).
- With delirium and confusion, add *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae).

Zhu Ru Wen Dan Tang (Bamboo Decoction to Warm the Gallbladder)

Fú Líng Wán (Poria Pill)

茯苓丸 茯苓丸

Pinyin Name: *Fu Ling Wan*

Literal Name: Poria Pill

Original Source: *Fu Ren Da Quan Liang Fang* (Complete Fine Formulas for Women) by Chen Zi-Ming in 1237

COMPOSITION

<i>Ban Xia</i> (Rhizoma Pinelliae)	60g [9g]
<i>Fu Ling</i> (Poria)	30g [6g]
<i>Zhi Qiao</i> (Fructus Citri Aurantii), <i>chao</i> (dry-fried) with bran	15g [3g]
<i>Po Xiao</i> (Sal Glauberis)	0.3g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder, and form into small pills using the juice of *Sheng Jiang* (Rhizoma Zingiberis Recens). The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 20 pills (6g) after meals with a decoction made from *Sheng Jiang* (Rhizoma Zingiberis Recens). Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Dries dampness and activates qi
2. Softens nodules and dissolves phlegm

CLINICAL MANIFESTATIONS

Phlegm stagnation in the epigastrium: pain in both arms, edema of the extremities, a white, greasy tongue coating, and a wiry, slippery pulse.

CLINICAL APPLICATIONS

Muscle aches and pains, edema, and cough.

EXPLANATION

Fu Ling Wan (Poria Pill) treats damp and phlegm stagnation in the epigastrium, which arises from an underlying Spleen deficiency. Spleen deficiency leads to damp accumulation and, ultimately, to phlegm stagnation in the chest and epigastrium. Dampness and phlegm may travel via the channels and collaterals, causing pain in the arms or edema of the extremities. A white, greasy tongue coating and a wiry, slippery pulse indicate damp and phlegm accumulation.

This formula has *Ban Xia* (Rhizoma Pinelliae) to dry dampness and dispel phlegm. *Fu Ling* (Poria) strengthens

the Spleen and dispels dampness. *Zhi Qiao* (Fructus Aurantii) activates qi to dispel phlegm. *Po Xiao* (Sal Glauberis) softens nodules and facilitates the elimination of phlegm. The juice of *Sheng Jiang* (Rhizoma Zingiberis Recens) dissolves phlegm and detoxifies *Ban Xia* (Rhizoma Pinelliae).

MODIFICATIONS

- With swelling and pain of the limbs, add *Sang Zhi* (Ramulus Mori) and *Di Long* (Pheretima).
- For cough with thick sputum, add *Ge Qiao* (Concha Meretricis seu Cyclinae) and *Gua Lou* (Fructus Trichosanthis).

CAUTIONS / CONTRAINDICATIONS

- *Fu Ling Wan* should be used with caution in patients with generalized deficiencies.
- This formula is contraindicated for prolonged use. It should be discontinued as soon as the desired effect is achieved.

AUTHORS' COMMENTS

It is important to note that the arm pain in this syndrome is caused by damp and phlegm stagnation in the epigastrium. From the epigastrium, dampness and phlegm travel via the channels and collaterals to the extremities to cause pain and edema. Optimal treatment requires the use of herbs to dry dampness and dispel phlegm. Since wind-damp-cold factors are **not** the cause of this syndrome, herbs that dispel wind-damp-cold should not be used, as they will only consume qi and complicate the illness.

Fu Ling Wan also treats cough with profuse sputum, accompanied by a feeling of fullness and distention in the chest and epigastrium.

Xiǎo Bàn Xià Jiā Fú Líng Tāng (Minor Pinellia and Poria Decoction)

小半夏加茯苓湯
小半夏加茯苓汤

Pinyin Name: Xiao Ban Xia Jia Fu Ling Tang
Literal Name: Minor Pinellia and Poria Decoction
Alternate Names: Hsiao Pan Hsia Chia Fu Ling Tang, Minor Pinellia plus Hoelen Decoction, Minor Pinellia and Hoelen Combination
Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Ban Xia</i> (Rhizoma Pinelliae)	1 cup [12g]
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens)	24g
<i>Fu Ling</i> (Poria)	9g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 7 cups [1,400 mL] of water until the liquid is reduced to 1.5 cups [300 mL]. Take the warm, strained decoction in two equally-divided doses.

CHINESE THERAPEUTIC ACTIONS

- 1. Dispels phlegm
- 2. Regulates water circulation
- 3. Disperses qi stagnation

CLINICAL MANIFESTATIONS

Nausea and vomiting caused by phlegm stagnation and water accumulation: nausea, vomiting, a feeling of oppression in the epigastrium, dizziness, and dysuria.

CLINICAL APPLICATIONS

Nausea, vomiting, morning sickness during pregnancy, acute enteritis, gastric prolapse, and viral myocarditis.

EXPLANATION

Xiao Ban Xia Jia Fu Ling Tang (Minor Pinellia and Poria Decoction) treats nausea and vomiting caused by phlegm stagnation and water accumulation in the epigastrium. In this syndrome, the normal functions of the Spleen and Stomach are compromised due to phlegm stagnation and water accumulation, thus nausea and vomiting occur. In addition, phlegm and water stagnation creates a feeling of oppression in the epigastrium, affects urination, and causes dysuria. Other symptoms may include dizziness, absence of thirst, and palpitations.

Xiǎo Bàn Xià Jiā Fú Líng Tāng (Minor Pinellia and Poria Decoction)

Xiao Ban Xia Jia Fu Ling Tang (Minor Pinellia and Poria Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Phlegm stagnation and water accumulation	<ul style="list-style-type: none">• Nausea and vomiting: phlegm stagnation and water accumulation affecting the Spleen and Stomach• Feeling of oppression in the epigastrium: phlegm stagnation and water accumulation	<ul style="list-style-type: none">• Dispels phlegm• Regulates water circulation• Disperses qi stagnation	<ul style="list-style-type: none">• <i>Ban Xia</i> (Rhizoma Pinelliae) dries dampness, dispels phlegm, and alleviates nausea and vomiting.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) warms the middle <i>jiao</i> and reduces the toxicity of <i>Ban Xia</i> (Rhizoma Pinelliae).• <i>Fu Ling</i> (Poria) drains water accumulation and promotes normal urination.

Ban Xia (Rhizoma Pinelliae) acts as the chief herb to dry dampness, dispel phlegm, and redirect the reversed flow of Stomach qi downwards to alleviate nausea and vomiting. *Sheng Jiang* (Rhizoma Zingiberis Recens) serves two purposes in this formula. First, it warms the middle *jiao* and helps *Ban Xia* (Rhizoma Pinelliae) disperse stagnation. Second, it reduces the toxicity of *Ban Xia* (Rhizoma Pinelliae). The third herb, *Fu Ling* (Poria), drains water accumulation and promotes normal urination.

MODIFICATIONS

- For nausea and vomiting caused by Stomach deficiency, add *Dang Shen* (Radix Codonopsis) and *Chen Pi* (Pericarpium Citri Reticulatae).
- For nausea and vomiting caused by food stagnation, add *Zhi Qiao* (Fructus Aurantii), *Shen Qu* (Massa Fermentata), and *Mai Ya* (Fructus Hordei Germinatus).
- For nausea and vomiting caused by phlegm stagnation, add *Er Chen Tang* (Two-Cured Decoction).
- For nausea and vomiting caused by water accumulation, add *Wei Ling Tang* (Calm the Stomach and Poria Decoction).

- For morning sickness during pregnancy, add *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong).

CLINICAL STUDIES AND RESEARCH

1. **Morning sickness:** Administration of *Xiao Ban Xia Jia Fu Ling Tang* was associated with relief of nausea and vomiting in pregnant women. Out of 66 patients, 42 had complete recovery within 5 to 8 doses, 12 had marked improvement after 5 doses, 7 had slight improvement after 9 doses, and 5 had no improvement. The overall effectiveness was 92.4%.¹
2. **Viral myocarditis:** Use of modified *Xiao Ban Xia Jia Fu Ling Tang* showed marked effectiveness in treating 11 patients with viral myocarditis. The duration of treatment ranged from 15 to 150 doses of herbs. Out of 11 patients, symptomatic improvement was reported in all cases, and EKG readings improved in 10 cases.²

清热化痰剂

— Heat-Clearing and Phlegm-Dissolving Formulas

Qīng Qì Huà Tán Wán (Clear the Qi and Transform Phlegm Pill)

清氣化痰丸

清气化痰丸

Pinyin Name: *Qing Qi Hua Tan Wan*

Literal Name: Clear the Qi and Transform Phlegm Pill

Alternate Name: Pinellia and Scute Formula

Original Source: *Yi Fang Kao* (Investigation of Medical Formulas) by Wu Kun in 1584

COMPOSITION

<i>Dan Nan Xing</i> (Arisaema cum Bile)	45g [9g]
<i>Huang Qin</i> (Radix Scutellariae), <i>chao</i> (dry-fried) with liquor	30g [6g]
<i>Gua Lou Zi</i> (Semen Trichosanthis), oil removed	30g [6g]
<i>Zhi Shi</i> (Fructus Aurantii Immaturus), <i>chao</i> (dry-fried) with bran	30g [6g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	30g [6g]
<i>Fu Ling</i> (Poria)	30g [6g]
<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	30g [6g]
<i>Ban Xia</i> (Rhizoma Pinelliae), <i>zhi</i> (prepared)	45g [9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder and form into pills with fresh juice from *Sheng Jiang* (Rhizoma Zingiberis Recens). Take 6g of pills per dose with warm, boiled water. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and dissolves phlegm
2. Regulates qi and stops coughing

CLINICAL MANIFESTATIONS

Phlegm-heat stagnation in the Lung: cough with thick, yellow sputum that cannot be completely expectorated; a feeling of fullness and distention in the chest and diaphragm; scanty, dark urine; a red tongue body with yellow, greasy tongue coating; and a slippery, rapid pulse.

CLINICAL APPLICATIONS

Hemoptysis, coughing, pneumonia, bronchitis, and respiratory tract infections.

EXPLANATION

Qing Qi Hua Tan Wan (Clear the Qi and Transform Phlegm Pill) treats phlegm-heat syndromes accompanied by thick, yellow sputum and a slippery, rapid pulse. The origin of these syndromes can be traced to the presence of internal fire, which dries and thickens the body fluids, turning them into phlegm. When phlegm accumulates in the Lung, it produces Lung qi stagnation and cough. The sputum is thick and yellowish as a result of internal fire. The feeling of fullness and distention in the chest is caused by qi stagnation in the chest area; and scanty, dark urine is the result of the internal fire affecting the lower *jiao*. A red tongue body with a yellow, greasy tongue coating and a slippery, rapid pulse suggest phlegm and heat accumulation in the interior.

This formula has *Dan Nan Xing* (Arisaema cum Bile) to clear heat and dissolve phlegm. *Huang Qin* (Radix Scutellariae) and *Gua Lou Zi* (Semen Trichosanthis) clear Lung heat and eliminate phlegm. Since phlegm obstructs the flow of qi, *Zhi Shi* (Fructus Aurantii Immaturus) and *Chen Pi* (Pericarpium Citri Reticulatae) remove qi

Qīng Qì Huà Tán Wán (Clear the Qì and Transform Phlegm Pill)

Qing Qi Hua Tan Wan (Clear the Qi and Transform Phlegm Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Phlegm-heat in the Lung	<ul style="list-style-type: none"> Cough, thick, yellow sputum that cannot be completely expectorated, and a feeling of fullness and distention in the chest and diaphragm: phlegm-heat stagnation in the Lung Scanty, dark urine: internal fire affecting the lower <i>jiao</i> Red tongue body with yellow, greasy tongue coating, and slippery, rapid pulse: phlegm-heat accumulation in the interior 	<ul style="list-style-type: none"> Clears heat and dissolves phlegm Regulates qi and stops cough 	<ul style="list-style-type: none"> <i>Dan Nan Xing</i> (Arisaema cum Bile) clears heat and dissolves phlegm. <i>Huang Qin</i> (Radix Scutellariae) and <i>Gua Lou Zi</i> (Semen Trichosanthis) clear Lung heat and eliminate phlegm. <i>Zhi Shi</i> (Fructus Aurantii Immaturus) and <i>Chen Pi</i> (Pericarpium Citri Reticulatae) remove qi stagnation and dissolve phlegm. <i>Fu Ling</i> (Poria) strengthens the Spleen and drains dampness to prevent the formation of more phlegm. <i>Ku Xing Ren</i> (Semen Armeniacae Amarum) causes the Lung qi to descend and relieves cough. <i>Ban Xia</i> (Rhizoma Pinelliae) breaks up phlegm stagnation and dries dampness.

stagnation and dissolve phlegm. Because the Spleen is the organ that produces dampness and phlegm, *Fu Ling* (Poria) is used to strengthen the Spleen and drain dampness, preventing the formation of more phlegm. *Ku Xing Ren* (Semen Armeniacae Amarum) causes the Lung qi to descend and relieves cough, and *Ban Xia* (Rhizoma Pinelliae) breaks up phlegm stagnation and dries dampness.

MODIFICATIONS

- With cough and thirst due to severe Lung heat, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae), or combine with *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction).
- With profuse sputum and hurried respiration, add *Yu Xing Cao* (Herba Houttuyniae) and *Sang Bai Pi* (Cortex Mori).
- If there is constipation, add *Mang Xiao* (Natrii Sulfas).

CAUTIONS / CONTRAINDICATIONS

- Qing Qi Hua Tan Wan* is contraindicated in patients with yin deficiency, dryness, or wind-cold conditions.
- Use of this formula is contraindicated during pregnancy.¹

Qīng Fèi Yīn (Clear the Lung Drink)

清肺飲

清肺饮

Pinyin Name: *Qing Fei Yin*

Literal Name: Clear the Lung Drink

Alternate Names: *Ching Fai Yin*, *Qing Fai Yin*, Lung-Clearing Drink, Platycodon and Apricot Seed Formula

Original Source: *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas) by Wang Ang in 1682

COMPOSITION

<i>Ku Xing Ren</i> (Semen Armeniacae Amarum)	3g
<i>Bei Mu</i> (Bulbus Fritillariae)	3g
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	1.5g
<i>Fu Ling</i> (Poria)	3g
<i>Ju Hong</i> (Exocarpium Citri Reticulatae)	1.5g
<i>Jie Geng</i> (Radix Platycodonis)	1.5g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	1.5g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the herbs with *Sheng Jiang* (Rhizoma Zingiberis Recens). Take the warm, strained decoction between meals.

CHINESE THERAPEUTIC ACTIONS

Clears the Lung and dissolves phlegm

CLINICAL MANIFESTATIONS

Cough caused by phlegm and damp accumulation: cough with sputum, chest discomfort, and fatigue.

CLINICAL APPLICATIONS

Cough due to common cold and influenza, bronchial asthma, cough due to tuberculosis, and cough with sore throat.

EXPLANATION

Qing Fei Yin (Clear the Lung Drink) treats cough caused by phlegm and damp accumulation. As a result of the accumulation, the Lung qi cannot descend, causing qi reversal and cough. The presence of sputum indicates dampness and phlegm.

This formula contains herbs to clear the Lung, dissolve phlegm, and moisten the Lung. *Ku Xing Ren* (Semen Armeniacae Amarum) causes Lung qi to descend, and is commonly used to treat cough and dyspnea. *Bei Mu* (Bulbus Fritillariae) clears fire, dissolves phlegm, and moistens the Lung. *Wu Wei Zi* (Fructus Schisandrae Chinensis) stabilizes and binds to preserve the Lung

from further loss of qi. *Fu Ling* (Poria) strengthens the Spleen and dissolves dampness. *Ju Hong* (Exocarpium Citri Reticulatae) activates qi and relieves stagnation. *Jie Geng* (Radix Platycodonis) clears the Lung and eliminates phlegm. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) harmonize the formula. In short, this formula treats mild to moderate cases of cough caused by damp and phlegm accumulation.

MODIFICATIONS

- If there is clear nasal discharge due to wind, add *Bo He* (Herba Menthae), *Fang Feng* (Radix Saposhnikoviae), and *Zi Su Ye* (Folium Perillae).
- With thirst and sore throat due to heat, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).
- For chronic cough caused by Lung deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).
- For cough and hoarseness, add *Di Gu Pi* (Cortex Lycii).
- For cough and dyspnea accompanied by profuse phlegm, add *Sang Bai Pi* (Cortex Mori) and *Di Gu Pi* (Cortex Lycii).
- With phlegm due to food stagnation, add *Shan Zha* (Fructus Crataegi), *Xiang Fu* (Rhizoma Cyperi), and *Zhi Shi* (Fructus Aurantii Immaturus).
- With phlegm and dryness, add *Zhi Mu* (Rhizoma Anemarrhenae), *Tian Dong* (Radix Asparagi), and *Gua Lou* (Fructus Trichosanthis).
- With Stomach fire, add *Shi Gao* (Gypsum Fibrosum) and *Huang Lian* (Rhizoma Coptidis).

Qīng Fèi Tāng (Clear the Lung Decoction)

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grate and cook the herbs with *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae). Take the warm, strained decoction after meals.

CHINESE THERAPEUTIC ACTIONS

- 1. Dispels heat and phlegm from the chest
- 2. Moistens the Lung and relieves cough

CLINICAL MANIFESTATIONS

Chronic cough caused by heat and phlegm in the Lung: severe cough, thick and sticky phlegm, sore and itchy throat, and hoarseness.

CLINICAL APPLICATIONS

Chronic bronchitis, pneumonia, aspiration pneumonia, bronchiectasis, laryngitis, tuberculosis, and cardiac asthma.

EXPLANATION

Qing Fei Tang (Clear the Lung Decoction) addresses chronic cases of heat and phlegm attacking the Lung, leading to phlegm accumulation with underlying deficiency.

When heat and phlegm obstruct the Lung, the flow of qi is reversed, resulting in severe cough. In addition, phlegm accumulation can cause thick, sticky sputum, with color varying from white to yellow to green. The chronic nature of this illness also contributes to yin and fluid deficiencies, leading to sore, itchy throat, and hoarseness.

This formula contains herbs to dispel heat and phlegm, moisten the Lung, and relieve cough. *Huang Qin* (Radix Scutellariae) and *Zhi Zi* (Fructus Gardeniae) clear damp-heat from the upper *jiao*, thereby addressing the heat and phlegm condition in the Lung. *Ku Xing Ren* (Semen Armeniacae Amarum), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Zhu Ru* (Caulis Bambusae in Taenia), and *Sang Bai Pi* (Cortex Mori) clear the Lung and cause qi to descend. *Jie Geng* (Radix Platycodonis) eliminates the accumulation of sputum and phlegm. *Mai Dong* (Radix Ophiopogonis) and *Tian Dong* (Radix Asparagi) have a synergistic effect to moisten the Lung and nourish yin. *Dang Gui* (Radix Angelicae Sinensis) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) nourish the blood, and balance the bitter and cold nature of *Huang Qin* (Radix Scutellariae) and *Zhi Zi* (Fructus Gardeniae). *Chen Pi* (Pericarpium Citri Reticulatae) regulates the proper flow

Qing Fei Tang (Clear the Lung Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs

Qīng Fèi Tāng (Clear the Lung Decoction)

of qi. *Fu Ling* (Poria) strengthens the Spleen to dry dampness and reduce phlegm production. *Wu Wei Zi* (Fructus Schisandrae Chinensis) stabilizes and binds the Lung to prevent further loss of Lung qi. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) harmonize the formula.

MODIFICATIONS

- With sore, dry throat due to heat, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).
- With irritability, swelling, and pain, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae).
- With stubborn phlegm that is difficult to expectorate, add *Gua Lou* (Fructus Trichosanthis), *Zhi Shi* (Fructus Aurantii Immaturus), and *Zhu Li* (Succus Bambusae). Remove *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- With cough, asthma, and increased respiration, add *Zi Su Zi* (Fructus Perillae) and *Zhu Li* (Succus Bambusae). Remove *Jie Geng* (Radix Platycodonis).
- With chronic cough with spontaneous perspiration, add *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Bai Shao* (Radix Paeoniae Alba), and *Di Huang* (Radix Rehmanniae). Remove *Jie Geng* (Radix Platycodonis), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), and *Ku Xing Ren* (Semen Armeniacae Amarum).
- With high fever, flushed face, and blood in the sputum, add *Bai Shao* (Radix Paeoniae Alba), *Di Huang* (Radix Rehmanniae), *Zi Wan* (Radix et Rhizoma Asteris), *E Jiao* (Colla Corii Asini), and *Zhu Li* (Succus Bambusae). Remove *Wu Wei Zi* (Fructus Schisandrae Chinensis), *Ku Xing Ren* (Semen Armeniacae Amarum), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), and *Jie Geng* (Radix Platycodonis).

PHARMACOLOGICAL EFFECTS

1. **Expectorant:** According to one study, administration of 500 mg/kg of *Qing Fei Tang* in powder extract via oral ingestion was associated with a marked expectorant effect, with the onset of action beginning after 3 hours. No expectorant effect was observed when the formula was given at lower doses, such as 50 and 100 mg/kg.^{1,2}
2. **Antiallergic:** This formula has an inhibitory effect on leukotriene (LT) B₄ synthesis of human alveolar macrophages. In one study, two-week cultured basophil levels identified by alcian blue-safranin staining and those histamine contents assayed fluorometrically were inhibited by this formula in a dose-dependent manner. Since *Qing Fei Tang* modulates basophil growth and differentiation *in vitro* and/or *in vivo*, the study suggested that the formula has an antiallergic effect and may be useful for controlling allergic diseases including bronchial asthma.³

3. **Respiratory:** Administration of *Qing Fei Tang* was associated with various effects on the respiratory system, including but not limited to inhibited release of slow reacting substance of anaphylaxis from the lung, suppressed chemiluminescence of oxygen radicals, increased output volume and fatty acid contents in respiratory tract fluid, and facilitated tracheal mucociliary transport.⁴ According to one study in mice, use of *Qing Fei Tang* was associated with reduced mortality for aspiration pneumonia artificially-induced with *Streptococcus pneumoniae* and gastric juice. The mechanism of this effect was attributed to the decreased activity of xanthine oxidase and reduction of oxygen radical production in inflamed lungs.⁵
4. **Anti-inflammatory:** *Qing Fei Tang* can be used to treat inflammatory lung diseases through its anti-inflammatory action to inhibit the oxidative and arachidonate metabolism of local inflammatory lung cells.⁶

CLINICAL STUDIES AND RESEARCH

Aspiration pneumonia: According to a randomized, controlled clinical trial, 15 patients with relapsing aspiration pneumonia were divided into two groups. Eight patients were treated with conventional Western medicine, and 7 were treated with *Qing Fei Tang*. After a study period of 16 weeks, the study reported a significant reduction of relapse of aspiration pneumonia and reduction in antibiotic use in patients treated with *Qing Fei Tang*, in comparison with drug therapy group. Swallowing reflex, however, did not change in patients treated with *Qing Fei Tang*. No adverse reactions were reported in either group. The study concluded that *Qing Fei Tang* is an effective therapy for treatment of aspiration pneumonia. It improved the defense mechanism or excessive inflammation caused by pneumonia in the lower airway, but did not improve the swallowing reflex.⁷

Mai Dong (Radix Ophiopogonis)

Wu Wei Zi (Fructus Schisandrae Chinensis)

Gan Cao (Radix et Rhizoma Glycyrrhizae)

Zhu Ru (Caulis Bambusae in Taenia)

These two formulas have essentially the same ingredients and functions. *Qing Fei Tang* (Clear the Lung Decoction), which appeared in *Wan Bing Hui Chun* (Restoration of Health from the Myriad Diseases), is the original formulation. *Qing Fei Tang* (Clear the Lung Decoction), from *Han Fang Yi Xue* (Kampo Medicine), is the revised formulation, with the addition of *Zhu Ru* (Caulis Bambusae in Taenia), which clears heat and dissolves thick, yellow phlegm.

AUTHORS' COMMENTS

According to Dr. Chang Wei-Yen, *Qing Fei Tang* can be combined with *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction), *Hu Yao Huang* (Herba Leucas Mollissimae), *Pao Zai Cao* (Herba Physalis Angulatae), and *Zhu Zi Cao* (Herba Euphorbiae Thymifoliae) to treat cough and dyspnea associated with wind-heat invasion.

Qing Fei Tang (Clear the Lung Decoction) and *Qing Fei Yin* (Clear the Lung Drink) are two formulas with similar names, but have different functions and indications.

- *Qing Fei Tang* is a potent formula that treats chronic cough with both excess (heat and phlegm) and deficiency (underlying yin and fluid deficiencies). It clears heat, dispels phlegm, moistens the Lung, and relieves cough.
- *Qing Fei Yin* is a mild to moderate formula that treats cough characterized by only excess (phlegm and dampness). It dissolves dampness, dispels phlegm, and relieves coughing.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind all of the ingredients into a coarse powder, and cook it with *Sheng Jiang* (Rhizoma Zingiberis Recens) in water to make a decoction, which then should be strained and taken while warm. Note: The source text did not specify the doses for the ingredients.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and dissolves phlegm
2. Relieves cough
3. Protects the Lung

CLINICAL MANIFESTATIONS

Chronic cough caused by Lung heat and yin deficiency: chronic cough, excess phlegm, fever due to overexertion, lung abscesses, and blood in the sputum.

CLINICAL APPLICATIONS

Pulmonary tuberculosis, asthma, emphysema, cough in chronic smokers, and cough due to chronic pulmonary disorders.

EXPLANATION

Zi Wan Tang (Aster Decoction) treats chronic Lung disorders characterized by heat and underlying yin deficiency. When chronic heat attacks the Lung, it causes cough, profuse phlegm and sputum, dyspnea, and fever. Furthermore, as heat consumes yin and body fluids, patients may experience chest tightness, discomfort, abscess, and blood in the sputum.

This formula has herbs that treat both the cause and the symptoms. *Zhi Mu* (Rhizoma Anemarrhenae) clears heat while preserving the integrity of yin and body fluids. *Zi Wan* (Radix et Rhizoma Asteris) regulates Lung qi and relieves cough. *Bei Mu* (Bulbus Fritillariae) and *Jie Geng* (Radix Platycodonis) dissolve phlegm, relieve cough, and drain pus. *Ren Shen* (Radix et Rhizoma Ginseng) tonifies Lung qi, while *Fu Ling* (Poria) tonifies Spleen qi. *Wu Wei Zi* (Fructus Schisandrae Chinensis) stabilizes and binds the Lung to prevent further loss of qi through coughing. *E Jiao* (Colla Corii Asini) tonifies the blood and stops bleeding. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the formula.

MODIFICATIONS

- With more pus and sputum, add *Ting Li Zi* (Semen Descurainiae seu Lepidii) and *Da Zao* (Fructus Jujubae).
- With more sputum and blood, add *Zhu Ru* (Caulis Bambusae in Taenia) and *Di Huang* (Radix Rehmanniae).
- For chronic non-productive cough, add *Mai Dong* (Radix Ophiopogonis) and *Zhi Shi* (Fructus Aurantii Immaturus).
- For cough and dyspnea caused by qi deficiency, add *Chen Pi* (Pericarpium Citri Reticulatae) and *Ku Xing Ren* (Semen Armeniacae Amarum).
- With hemoptysis due to lung abscess, add *San Huang Xie Xin Tang* (Three-Yellow Decoction to Sedate the Epigastrium).

Jié Gěng Tāng (Platycodon Decoction)

桔梗湯
桔梗汤

Pinyin Name: *Jie Geng Tang*
Literal Name: Platycodon Decoction
Alternate Names: *Chieh Keng Tang*, Platycodon Combination
Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Jie Geng</i> (Radix Platycodonis)	3g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	6g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the herbs in 3 cups of water until the liquid is reduced to 1 cup. Strain and take the decoction while warm.

CHINESE THERAPEUTIC ACTIONS

1. Eliminates phlegm and pus
2. Clears deficiency fire and toxins

CLINICAL MANIFESTATIONS

Phlegm stagnation: coughing, swelling and pain of the throat, and thick, sticky sputum with mucus and blood.

Patients may also experience chills and aversion to cold, fullness and congestion in the chest, a dry mouth without thirst, and thick, sticky sputum with a foul odor.

CLINICAL APPLICATIONS

Pulmonary gangrene, pulmonary abscess, bronchitis, and tonsillitis.

EXPLANATION

Jie Geng Tang (Platycodon Decoction) treats phlegm stagnation in the chest with deficiency fire rising. Phlegm stagnation will produce a sensation of fullness and

Jié Gěng Tāng (Platycodon Decoction)

Jie Geng Tang (Platycodon Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Phlegm stagnation in the chest with deficiency fire rising	<ul style="list-style-type: none">• Chest fullness and congestion: phlegm stagnation in the chest• Thick, sticky sputum with blood and mucus: deficiency fire consuming body fluids and damaging the internal organs• Cough and sore throat with swelling and pain: deficiency fire traveling upward	<ul style="list-style-type: none">• Eliminates phlegm and pus• Clears deficiency fire and toxins	<ul style="list-style-type: none">• <i>Jie Geng</i> (Radix Platycodonis) disperses phlegm stagnation and regulates Lung qi circulation.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) resolves phlegm stagnation and tonifies Lung qi.

congestion in the chest. When phlegm stagnation is complicated by fire that dries body fluids, the sputum becomes thick and sticky. In addition, if deficiency fire dries the fluids and damages the internal organs, there may be blood and mucus in the sputum. As deficiency fire travels upward, it may cause cough and sore throat with swelling and pain.

Jie Geng Tang is a simple formula with only two ingredients: *Jie Geng* (Radix Platycodonis), a bitter and acrid herb that opens and disperses phlegm stagnation; and *Gan Cao* (Radix et Rhizoma Glycyrrhizae), a sweet

and neutral herb that resolves phlegm stagnation. The combination of these two herbs has a synergistic effect to eliminate phlegm stagnation in the chest. Furthermore, *Jie Geng* (Radix Platycodonis) regulates qi and relieves cough, while *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonifies Lung qi and enhances overall recovery.

MODIFICATION

For severe conditions, heat-clearing and toxin-eliminating herbs should be added, since *Jie Geng Tang* simply treats phlegm stagnation.

Rén Shēn Xiè Fèi Tāng (Ginseng Decoction to Sedate the Lung)

人參瀉肺湯
人參泻肺汤

Pinyin Name: Ren Shen Xie Fei Tang

Literal Name: Ginseng Decoction to Sedate the Lung

Alternate Name: Ginseng and Scute Combination

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

- Huang Qin* (Radix Scutellariae)
- Zhi Zi* (Fructus Gardeniae)
- Bo He* (Herba Menthae)
- Zhi Qiao* (Fructus Citri Aurantii)
- Ku Xing Ren* (Semen Armeniacae Amarum)
- Lian Qiao* (Fructus Forsythiae)
- Sang Bai Pi* (Cortex Mori)
- Jie Geng* (Radix Platycodonis)
- Da Huang* (Radix et Rhizoma Rhei)
- Ren Shen* (Radix et Rhizoma Ginseng)
- Gan Cao* (Radix et Rhizoma Glycyrrhizae)

Rén Shēn Xiè Fèi Tāng (Ginseng Decoction to Sedate the Lung)

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind equal amounts of all of the ingredients into a coarse powder. Cook 30g of the powder in 2 cups of water until the liquid is reduced to 1 cup. Take the warm, strained decoction after meals.

CHINESE THERAPEUTIC ACTIONS

- 1. Clears heat and sedates the Lung
- 2. Eliminates phlegm and regulates qi

CLINICAL MANIFESTATIONS

Lung heat with phlegm accumulation: wheezing, dyspnea, fullness and distention in the chest and epigastrium, cough with profuse sputum, and constipation.

CLINICAL APPLICATIONS

Upper respiratory tract infection, bronchitis, pneumonia, bronchial asthma, and pulmonary abscess.

EXPLANATION

Ren Shen Xie Fei Tang (Ginseng Decoction to Sedate the Lung) treats Lung heat accompanied by phlegm accumulation and qi flow obstruction. The presence of phlegm is evident in the yellow sputum discharge. Heat and phlegm create the feeling of fullness and distention in the chest; they also obstruct the normal qi flow to cause wheezing, dyspnea, and cough.

In this formula, *Huang Qin* (Radix Scutellariae), *Zhi Zi* (Fructus Gardeniae), and *Bo He* (Herba Menthae) clear heat in the Lung and address the excess condition. *Zhi*

Qiao (Fructus Aurantii) regulates qi, while *Ku Xing Ren* (Semen Armeniacae Amarum) guides Lung qi downward. Together, these two herbs restore the normal flow of Lung qi to relieve wheezing, dyspnea, and cough. *Lian Qiao* (Fructus Forsythiae), *Sang Bai Pi* (Cortex Mori), and *Jie Geng* (Radix Platycodonis) clear heat and phlegm to dispel sputum and relieve congestion and fullness. *Da Huang* (Radix et Rhizoma Rhei) purges downward, and enables the elimination of heat via defecation. *Ren Shen* (Radix et Rhizoma Ginseng) strengthens the Lung and Spleen and prevents the bitter and cold herbs in the formula from damaging these two organs. Lastly, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) reduces inflammation in the Lung and harmonizes the herbs within the formula.

MODIFICATIONS

- For cough with profuse sputum, add *Fu Ling* (Poria) and *Chen Pi* (Pericarpium Citri Reticulatae).
- For cough due to wind-cold, add *Hua Gai San* (Canopy Powder).
- For cough due to tuberculosis, add *Qing Fei Tang* (Clear the Lung Decoction).
- For cough with phlegm and fluid retention, add *Er Chen Tang* (Two-Cured Decoction).
- With fullness and distention in the chest and epigastrium, add *Huang Lian* (Rhizoma Coptidis) and *Hou Po* (Cortex Magnoliae Officinalis).
- With feeling of both cold and heat in the chest, add *Chai Hu* (Radix Bupleuri) and *Di Gu Pi* (Cortex Lycii).
- For recurrent bronchitis, add *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae).

<i>Huang Qin</i> (Radix Scutellariae)	3g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	1.8g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	0.9g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients with 1 slice of *Sheng Jiang* (Rhizoma Zingiberis Recens) and the juices of *Zhu Li* (Succus Bambusae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) in water. Take the strained decoction while warm.

CHINESE THERAPEUTIC ACTIONS

1. Breaks up stagnation and dissolves phlegm
2. Clears heat and moistens dryness
3. Relieves chest congestion

CLINICAL MANIFESTATIONS

Phlegm-heat stagnation in the chest: accumulation of phlegm in the chest that is difficult to expectorate, pain in the chest, difficulty rotating the trunk due to pain in the chest, a feeling of fullness and stifling sensation in the chest and hypochondriac region, fever, aversion to cold, labored breathing, and delirious speech.

CLINICAL APPLICATIONS

Acute and chronic bronchitis, pneumonia, asthma, pulmonary emphysema, pulmonary tuberculosis, cough, chest pain, profuse sputum in chronic smokers, and intercostal neuralgia.

EXPLANATION

Phlegm-heat stagnation is often described as stubborn or viscous in nature, such that the phlegm cannot be coughed or expectorated out. Phlegm stagnation in the chest immediately affects the local area, causing chest pain and a feeling of fullness and a stifling sensation in the chest and hypochondriac region. The chest pain is sometimes so severe that the patient usually exhibits labored breathing and difficulty in rotating the trunk. If phlegm attacks the Heart and blocks the *shen* (spirit), the patient will exhibit delirious speech.

The two main actions of *Gua Lou Zhi Shi Tang* (Trichosanthes Fruit and Immature Bitter Orange Decoction) are to clear heat and dissolve phlegm. *Gua Lou* (Fructus Trichosanthis), *Bei Mu* (Bulbus Fritillariae), and *Zhu Li* (Succus Bambusae) soften phlegm, relieve chest congestion, and benefit the diaphragm. *Chen Pi* (Pericarpium Citri Reticulatae), *Zhi Shi* (Fructus Aurantii Immaturus), *Jie Geng* (Radix Platycodonis), and *Mu Xiang* (Radix Aucklandiae) regulate qi, dissolve phlegm, and eliminate stagnation. *Sha Ren* (Fructus Amomi) and *Fu Ling* (Poria) strengthen the Spleen, dry dampness, and stop the production of phlegm. *Zhi Zi* (Fructus Gardeniae)

Xiǎo Xiàn Xiōng Tāng (Minor Sinking into the Chest Decoction)

小陷胸湯

小陷胸汤

Pinyin Name: *Xiao Xian Xiong Tang*

Literal Name: Minor Sinking into the Chest Decoction

Alternate Names: *Hsiao Hsien Hsiung Tang*, Minor Chest-Congestion Decoction, Minor Trichosanthes Decoction, Minor Trichosanthes Combination

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

Gua Lou (Fructus Trichosanthis)

1 big fruit [20-30g]

Huang Lian (Rhizoma Coptidis)

3g [6g]

Ban Xia (Rhizoma Pinelliae), *xi* (washed)

0.5 cup [12g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to first cook *Gua Lou* (Fructus Trichosanthis) with 6 cups [1,200 mL] of water until the liquid is reduced to 3 cups [600 mL]. Filter and discard the residue, add the other herbs, and cook until the strained decoction is further reduced to 2 cups [400 mL]. Take the warm, strained decoction in three equally-divided doses. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

silicosis, pulmonary heart disease, tuberculous pleurisy, pleurisy with effusion, exudative pleurisy, chronic hepatitis, and cholelithiasis.

EXPLANATION

Xiao Xian Xiong Tang (Minor Sinking into the Chest Decoction), first cited in *Shang Han Lun* (Discussion of Cold-Induced Disorders), is designed to treat patients who have exterior syndrome and who have been incorrectly treated with downward draining herbs, which cause heat and phlegm to sink into the interior of the chest. As a result, heat and phlegm become stagnated in the chest and cause qi stagnation. Consequently, chest and epigastric distention, fullness, and pain occur. The Lung qi, after being stagnant for a period of time, may rise adversely and cause coughing. Since the heat and phlegm factors are predominant, the sputum appears yellow and sticky. Yellow, greasy tongue coating and slippery, rapid pulse are typical signs of interior heat and phlegm.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and dissolves phlegm
2. Opens the chest and disperses stagnation

CLINICAL MANIFESTATIONS

Phlegm-heat stagnation in the chest: distention and fullness in the chest and epigastric regions with pain upon palpation; cough with yellow, sticky sputum; a yellow, greasy tongue coating; and a slippery, rapid pulse.

CLINICAL APPLICATIONS

Gastritis, erosive gastritis, acid reflux, epigastric pain, reflux esophagitis, acute bronchitis, bronchitis, pneumonia,

Gua Lou (Fructus Trichosanthis), the chief herb, clears heat, dissolves phlegm, and relieves pain in the chest and epigastrium. *Huang Lian* (Rhizoma Coptidis) sedates heat

Xiǎo Xiàn Xiōng Tāng (Minor Sinking into the Chest Decoction)

and relieves epigastric distention. *Ban Xia* (Rhizoma Pinelliae) eliminates phlegm and breaks up qi stagnation to relieve chest distention.

MODIFICATIONS

- With intercostal or hypochondriac pain, add *Yu Jin* (Radix Curcumae) and *Chai Hu* (Radix Bupleuri).
- With thick sputum that is difficult to expectorate, add *Dan Nan Xing* (Arisaema cum Bile) and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae).
- With vomiting and nausea, add *Zhu Ru* (Caulis Bambusae in Taenia) and *Sheng Jiang* (Rhizoma Zingiberis Recens).
- For disorders characterized by phlegm-fire, add *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Sheng Jiang* (Rhizoma Zingiberis Recens).

CAUTIONS / CONTRAINDICATIONS

- Use of *Xiao Xian Xiong Tang* may be associated with loose stools and diarrhea, as the formula is cold and lubricating in nature.¹
- This formula is not recommended for individuals with deficiency and cold of the Spleen and Stomach.²

PHARMACOLOGICAL EFFECTS

1. **Expectorant and antitussive:** Ingredients of *Xiao Xian Xiong Tang* have been shown to have marked expectorant and antitussive effects.³
2. **Gastrointestinal:** Administration of *Xiao Xian Xiong Tang* has a marked inhibitory effect on the production of gastric acid in mice.⁴

CLINICAL STUDIES AND RESEARCH

1. **Bronchitis:** In one study, 100 pediatric patients with acute bronchitis were divided into two groups and treated with herbs. Group one of 50 patients received both *Xiao Xian Xiong Tang* plus *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction). The study reported complete recovery in 37 cases, improvement in 7 cases, and no effect in 6 cases. Group two of 50 patients received only *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction). The study reported complete recovery in 26 cases, improvement in 5 cases, and no effect in 19 cases. The study concluded that the combination of these two formulas was more effective for treating acute bronchitis in pediatric patients.⁵
2. **Silicosis:** According to one study, concurrent use of *Xiao Xian Xiong Tang* and *Gua Lou Xie Bai Ban Xia Tang* (Trichosanthes Fruit, Chinese Chive, and Pinellia Decoction) was associated with a marked effect in treating coal miners with silicosis. The treatment protocol was to administer the herbs daily in decoction, for 20 days

per course of treatment, for 2-3 courses total. Out of 33 patients, the study reported marked effect in 28 cases, improvement in 3 cases, and no effect in 2 cases. The overall effectiveness was 93.93%.⁶

3. **Pulmonary heart disease:** According to one study, 112 patients with pulmonary heart disease were treated with modified *Xiao Xian Xiong Tang*. The study used this formula with *Zhi Shi* (Fructus Aurantii Immaturus), *Ze Xie* (Rhizoma Alismatis), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) as the base formula. In addition, *Da Huang* (Radix et Rhizoma Rhei) was added for constipation, and *Hua Shi* (Talcum) was added for burning urination with yellow urine. Out of 112 patients, the study reported complete recovery in 12 cases, marked improvement in 52 cases, improvement in 40 cases, and no effect in 8 cases. The overall effectiveness was 92.9%.⁷
4. **Tuberculous pleurisy:** According to one study, 24 patients with tuberculous pleurisy were treated with good results using *Xiao Xian Xiong Tang* plus *Xie Bai* (Bulbus Allii Macrostemonis) and others. Improvements included reduction of fever and resolution of other symptoms.⁸
5. **Exudative pleurisy:** Modified *Xiao Xian Xiong Tang* was used with good results for treatment of 22 patients with exudative pleurisy. The treatment was to administer the herbs daily in decoction, for 30 days per course of treatment. Drug treatment was incorporated when necessary. Out of 22 patients, the study reported significant improvement in 13 cases, moderate improvement in 17 cases, and no effect in 2 cases. The overall effectiveness was 90.9%.⁹
6. **Erosive gastritis:** According to one study, 101 patients with acute erosive gastritis were divided into two groups: group one received modified *Xiao Xian Xiong Tang* and group two received pharmaceutical drug treatment. Herbal treatment used *Xiao Xian Xiong Tang* with *Hai Piao Xiao* (Endoconcha Sepiae) and *Xian He Cao* (Herba Agrimoniae) as the base formula, plus *Di Yu* (Radix Sanguisorbae) for hematochezia; *Zhe Shi* (Haematitum) for hematemesis; calcined *Mu Li* (Concha Ostreae) for acid reflux; *Qing Mu Xiang* (Radix Aristolochiae), *Bai Shao* (Radix Paeoniae Alba) and *Yan Hu Suo* (Rhizoma Corydalis) for severe pain; and *Pu Gong Ying* (Herba Taraxaci) and *Yu Xing Cao* (Herba Houttuyniae) for superficial ulceration. Patients in group two were treated with drugs (the names of drugs were not available at the time of publication). The study reported 90.8% effectiveness for the herb group (65 cases: 48 with complete recovery, 11 with improvement, and 6 with no effect) and 86.1% effectiveness for the drug group (36 cases: 9 with complete recovery, 22 with improvement, and 5 with no effect).¹⁰

Xiǎo Xiàn Xiōng Tāng (Minor Sinking into the Chest Decoction)

7. **Epigastric pain:** *Xiao Xian Xiong Tang* has been shown to effectively relieve epigastric pain in several studies. According to one report, use of this formula in 83 patients with epigastric pain was associated with complete recovery in 52 cases, improvement in 29 cases, and no effect in 2 cases. The causes of epigastric pain included gastritis, peptic ulcers, and others.¹¹
8. **Reflux esophagitis:** According to one study, 54 patients with reflux esophagitis were treated with good results using *Xiao Xian Xiong Tang* and *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) together. In addition to these two formulas, the treatment added *Zhi Qiao* (Fructus Aurantii), *Tan Xiang* (Lignum Santali Albi), and *Hou Po* (Cortex Magnoliae Officinalis) for chest and epigastric fullness and distention; *Hai Piao Xiao* (Endoconcha Sepiae) and calcined *Wa Leng Zi* (Concha Arcae) for acid reflux; dry-fried *Bai Shao* (Radix Paeoniae Alba) and *Sha Ren* (Fructus Amomi) for nausea and vomiting; *Jie Geng* (Radix Platycodonis) and *Zhe Shi* (Haematitum) for difficulties in swallowing; and *Mai Dong* (Radix Ophiopogonis), *Sha Shen* (Radix Glehniae seu Adenophorae), and *Shi Hu* (Caulis Dendrobii) for dry mouth, dry throat, and constipation. The treatment protocol was to administer the herbs daily in decoction, for 15 days per course of treatment. All other herbs/drugs/supplements were discontinued through the duration of the study. Out of 54 patients, the study reported complete recovery in 26 cases, marked improvement in 18 cases, moderate improvement in 8 cases, and no effect in 2 cases.¹²
9. **Chronic hepatitis:** In one study, modified *Xiao Xian Xiong Tang* was used to treat patients with chronic hepatitis progressing into liver cirrhosis. The treatment protocol was to administer one dose of the herbs daily in decoction, for 30 days per course of treatment. Out of 72 patients, 41 had resolution of symptoms and restoration of normal liver functions, 29 had varying degrees of improvement, and 2 required modification of treatment. Furthermore, 53 cases showed improvement within 1 course, and 17 cases within 2 courses of treatment.¹³

Original Source: *Chong Ding Tong Su Shang Han Lun* (Revised Popular Guide to the Discussion of Cold-Induced Disorders) by Yu Gen-Chu in the Qing Dynasty

<i>Chai Hu</i> (Radix Bupleuri)	3g
<i>Ban Xia</i> (Rhizoma Pinelliae), <i>zhu</i> (boiled) with ginger	9g
<i>Huang Lian</i> (Rhizoma Coptidis)	2.4g
<i>Jie Geng</i> (Radix Platycodonis)	3g
<i>Huang Qin</i> (Radix Scutellariae)	4.5g
<i>Gua Lou Zi</i> (Semen Trichosanthis)	15g
<i>Zhi Shi</i> (Fructus Aurantii Immaturus)	4.5g
<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens), <i>chong fu</i> (take drenched)	4 drops of juice

The source text states to prepare the ingredients as a decoction. This formula clears heat, dissolves phlegm, opens the chest and diaphragm, and harmonizes the *shaoyang*. Clinically, this formula may be used for *shaoyang* syndrome with alternating chills and fever, distention and fullness in the chest and diaphragm regions with pain upon palpation, cough with sticky sputum, a bitter taste in the mouth, a yellow tongue coating, and a wiry, rapid pulse.

Chai Hu Xian Xiong Tang (Bupleurum Decoction for Sinking into the Chest) is formulated by combining *Xiao Chai Hu Tang* (Minor Bupleurum Decoction) and *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction), and removing tonic herbs such as *Ren Shen* (Radix et Rhizoma Ginseng), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Da Zao* (Fructus Jujubae). *Chai Hu Xian Xiong Tang* is designed to concurrently harmonize *shaoyang* syndrome and treat phlegm-heat stagnation in the chest.

AUTHORS' COMMENTS

Xiao Xian Xiong Tang is the representative formula for treating chest pain and discomfort due to stagnation of phlegm-heat in the chest. The three diagnostic criteria include phlegm, heat, and stagnation, with key signs and symptoms such as distention and fullness in the chest and epigastrium, pain that intensifies with pressure, a yellow, greasy tongue coating, and a slippery, rapid pulse.

Xiao Xian Xiong Tang and *Da Xian Xiong Tang* (Major Sinking into the Chest Decoction) both treat stagnation in the chest.

- *Xiao Xian Xiong Tang* treats less serious conditions characterized by stagnation of heat and phlegm in the chest. Clinical manifestations include a feeling of fullness in the chest and epigastrium, and pain upon palpation.
- *Da Xian Xiong Tang* treats more serious conditions characterized by stagnation of heat and water in the chest. Clinical manifestations include a hardened epigastrium with a sensation of fullness, and severe pain upon palpation.

Xiǎo Xiàn Xīōng Tāng (Minor Sinking into the Chest Decoction)

Gǔn Tán Wán (Vaporize Phlegm Pill)

滾痰丸

滾痰丸

Pinyin Name: *Gun Tan Wan*

Literal Name: Vaporize Phlegm Pill

Alternate Name: *Meng Shi Gun Tan Wan* (Lapis Micae and Chloriti Pill to Vaporize Phlegm)

Original Source: *Dan Xi Xin Fa Fu Yu* (Additions to the Teachings for [Zhu] Dan-Xi) by Fang Guang-Lei in 1536

COMPOSITION

Meng Shi (Lapis Micae seu Chloriti), *duan* (calcined) at high temperature and *fen sui* (pulverized) 30g [3g]
Da Huang (Radix et Rhizoma Rhei), *zheng* (steamed) with liquor 240g [15g]
Huang Qin (Radix Scutellariae), *xi* (washed) with liquor 240g [15g]
Chen Xiang (Lignum Aquilariae Resinatum) 15g [2g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder and form into small pills with water. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 40-50 pills with tea or warm, boiled water after meals and at bedtime. Adjust the dose depending on the severity of the condition.

Today, this formula may be taken as pills or decoction. For pills, grind the herbs into powder and form into small pills with water, and take 5-9g of pills with warm water one to two times daily. For decoction, use the suggested doses in brackets.

CHINESE THERAPEUTIC ACTIONS

Purges fire and eliminates phlegm

CLINICAL MANIFESTATIONS

Old (chronic and stubborn) phlegm with excess heat: *dian kuang* (mania and withdrawal), or manic-depressive psychosis; severe palpitations with unconsciousness; coughing and wheezing with thick sputum; chest and epigastric fullness and oppression; dizziness, vertigo, and tinnitus; nodules around the neck; peristalsis-like movements of the eyes and mouth; insomnia or disturbed sleep with bizarre dreams; severe stabbing pain in the joints; dysphagia with irritability and a feeling of oppression in the chest and epigastrium; constipation; yellow, thick tongue coating, and a slippery, rapid and forceful pulse.

CLINICAL APPLICATIONS

Stroke, epilepsy, schizophrenia, and migraines.

EXPLANATION

Gun Tan Wan (Vaporize Phlegm Pill) treats old (chronic and stubborn) phlegm with excess heat. Old phlegm and

Gǔn Tán Wán (Vaporize Phlegm Pill)

Gun Tan Wan (Vaporize Phlegm Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Old (chronic and stubborn) phlegm with excess heat	<ul style="list-style-type: none">• <i>Dian kuang</i> (mania and withdrawal), manic-depressive psychosis, insomnia and disturbed sleep with bizarre dreams: old phlegm and excess heat surround the Heart and inhibit <i>shen</i> (spirit)• Coughing with thick phlegm, wheezing, or chest fullness: old phlegm and excess heat obstructing Lung qi flow• Dizziness and tinnitus: old phlegm and excess heat traveling upward to the head• Joint pain, nodules, and peristalsis-like movements of the eyes: old phlegm and excess heat affecting the muscles• Irritability and constipation: old phlegm and excess heat consuming body fluids• Thick, yellow tongue coating and a slippery, rapid and forceful pulse: phlegm and excess heat in the interior	Purges fire and eliminates phlegm	<ul style="list-style-type: none">• <i>Meng Shi</i> (Lapis Micae seu Chloriti) removes chronic, stubborn phlegm.• <i>Da Huang</i> (Radix et Rhizoma Rhei) drains excess heat.• <i>Huang Qin</i> (Radix Scutellariae) sedates phlegm-heat in the upper <i>jiao</i>.• <i>Chen Xiang</i> (Lignum Aquilariae Resinatum) guides Lung qi downward to stop coughing and eliminate phlegm.

excess heat may cause a number of different clinical manifestations. They may surround the Heart and inhibit the *shen* (spirit), causing insomnia, disturbed sleep with bizarre dreams, *dian kuang* (mania and withdrawal), manic-depressive psychosis, or severe palpitations with unconsciousness. The phlegm and excess heat also can obstruct the flow of Lung qi, causing coughing with thick phlegm, wheezing, or chest fullness. If the phlegm and heat travel to the head, dizziness, tinnitus, or peristalsis-like movements of the eyes and mouth may occur. Phlegm and heat may also obstruct the qi flow in the joints, causing severe stabbing pain. It may become lodged in the muscles to form nodules around the neck. Irritability and constipation are due to consumption of body fluids by excess heat. Thick, yellow tongue coating and a slippery, rapid and forceful pulse are signs of phlegm and excess heat in the interior.

Meng Shi (Lapis Micae seu Chloriti), the chief herb of this formula, removes chronic, stubborn phlegm. *Da Huang* (Radix et Rhizoma Rhei), a bitter and cold herb, drains excess heat. *Huang Qin* (Radix Scutellariae) sedates phlegm-heat in the upper *jiao*. *Chen Xiang* (Lignum Aquilariae Resinatum) guides Lung qi downward to stop coughing and eliminate phlegm.

CAUTIONS / CONTRAINDICATIONS

- *Gun Tan Wan* is very strong, and should be reserved only for strong robust patients who have excess conditions.

- Because this formula is designed for old (chronic and stubborn) phlegm caused by excess heat, it is contraindicated during pregnancy and in patients with generalized deficiency.

PHARMACOLOGICAL EFFECTS

Antitussive and expectorant: Administration of *Gun Tan Wan* at 4.2 g/kg was associated with a marked effect to suppress cough and eliminate sputum.¹

CLINICAL STUDIES AND RESEARCH

1. **Stroke:** One study reported an 87.5% effectiveness using modified *Gun Tan Wan* to treat 24 patients with stroke. Herbal treatment varied depending on the traditional Chinese medical diagnosis. In addition to *Gun Tan Wan*, *Da Cheng Qi Tang* (Major Order the Qi Decoction) was added for wind, yang, phlegm, and fire; *Tiao Wei Cheng Qi Tang* (Regulate the Stomach and Order the Qi Decoction) for wind, yang, and phlegm; and *Zeng Ye Cheng Qi Tang* (Increase the Fluids and Order the Qi Decoction) for rising wind and yang.²
2. **Seizures and epilepsy:** One study reported stabilization in 27 of 32 patients using modified *Gun Tan Wan* to treat seizures and epilepsy caused by inflammation, fever, physical trauma, and other causes.³

貝母瓜蒌散

贝母瓜蒌散

Pinyin Name: *Bei Mu Gua Lou San*

Literal Name: Fritillaria and Trichosanthes Fruit Powder

Alternate Name: Fritillaria and Trichosanthes Fruit Formula

Original Source: *Yi Xue Xin Wu* (Medical Revelations) by Cheng Guo-Peng in 1732**COMPOSITION**

<i>Bei Mu</i> (Bulbus Fritillariae)	4.5g
<i>Gua Lou</i> (Fructus Trichosanthis)	3g
<i>Tian Hua Fen</i> (Radix Trichosanthis)	2.4g
<i>Fu Ling</i> (Poria)	2.4g
<i>Ju Hong</i> (Exocarpium Citri Reticulatae)	2.4g
<i>Jie Geng</i> (Radix Platycodonis)	2.4g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Moistens the Lung and clears heat
2. Regulates qi and dissolves phlegm

CLINICAL MANIFESTATIONS

Lung dryness with phlegm accumulation: coughing, thick, sticky sputum that is difficult to expectorate, and dry throat.

CLINICAL APPLICATIONS

Bronchitis, sore throat, and dry cough.

EXPLANATION

Bei Mu Gua Lou San (Fritillaria and Trichosanthes Fruit Powder) treats Lung dryness with phlegm accumulation. Lung dryness may consume fluids and create phlegm. Because the pathogenic factor in this syndrome is dryness, the phlegm is thick, sticky, and not easily expectorated. Dryness of the throat is due to injury of the body fluids.

This formula has *Bei Mu* (Bulbus Fritillariae) to clear heat, moisten the Lung, dispel phlegm, and stop coughing. *Gua Lou* (Fructus Trichosanthis) clears heat, moistens dryness, regulates qi, and breaks up phlegm stagnation. *Tian Hua Fen* (Radix Trichosanthis) clears heat, dissolves phlegm, promotes the generation of body fluids, and moistens dryness. *Fu Ling* (Poria) strengthens the Spleen and removes dampness. *Ju Hong* (Exocarpium Citri Reticulatae) activates qi circulation and dissolves phlegm. *Jie Geng* (Radix Platycodonis) ventilates the Lung to stop cough and eliminate phlegm.

MODIFICATIONS

- With exterior wind invasion, add *Sang Ye* (Folium Mori), *Ku Xing Ren* (Semen Armeniacae Amarum), *Qian Hu* (Radix Peucedani), and *Niu Bang Zi* (Fructus Arctii).
- With voice hoarseness or blood-streaked sputum due to yin deficiency, add *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Dong* (Radix Ophiopogonis), *Lu Gen* (Rhizoma Phragmitis), *Xian He Cao* (Herba Agrimoniae), *Mu Hu Die* (Semen Oroxylis), and *Qian Cao* (Radix et Rhizoma Rubiae). Remove *Ju Hong* (Exocarpium Citri Reticulatae).

Lung dryness with phlegm accumulation	<ul style="list-style-type: none"> Coughing with thick, sticky sputum that is difficult to expectorate: dryness consuming and turning fluids into phlegm Dry throat: dryness injuring body fluids 	<ul style="list-style-type: none"> Moistens the Lung and clears heat Regulates qi and dissolves phlegm 	<ul style="list-style-type: none"> <i>Bei Mu</i> (Bulbus Fritillariae) clears heat, moistens the Lung, dispels phlegm, and stops coughing. <i>Gua Lou</i> (Fructus Trichosanthis) clears heat, moistens dryness, regulates qi, and breaks up phlegm stagnation. <i>Tian Hua Fen</i> (Radix Trichosanthis) clears heat, dissolves phlegm, promotes the generation of body fluids, and moistens dryness. <i>Fu Ling</i> (Poria) strengthens the Spleen and removes dampness. <i>Ju Hong</i> (Exocarpium Citri Reticulatae) activates qi to dissolve phlegm. <i>Jie Geng</i> (Radix Platycodonis) ventilates the Lung to stop cough and eliminate phlegm.

- For cough with thick, yellow sputum, add *Huang Lian* (Rhizoma Coptidis), *Zhi Zi* (Fructus Gardeniae), *Dan Nan Xing* (Arisaema cum Bile), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). Remove *Tian Hua Fen* (Radix Trichosanthis), *Fu Ling* (Poria), and *Jie Geng* (Radix Platycodonis).
- With tidal fever, *wu xin re* (five-center heat), and other signs of yin deficiency, add *Mai Men Dong Tang* (Ophiopogonis Decoction) or *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal).

- With dry, itchy throat, add *Qian Hu* (Radix Peucedani) and *Niu Bang Zi* (Fructus Arctii).
- With dry mouth and sore throat, add *Xuan Shen* (Radix Scrophulariae), *Di Huang* (Radix Rehmanniae), *Mai Dong* (Radix Ophiopogonis), and *Lu Gen* (Rhizoma Phragmitis).

CAUTIONS / CONTRAINDICATIONS

Bei Mu Gua Lou San is contraindicated for cough due to Kidney yin deficiency, or deficiency-heat rising.

Section 4

温化寒痰剂

— Warm Formulas that Dissolve Cold Phlegm

Líng Gān Wǔ Wèi Jiāng Xīn Tāng

(Poria, Licorice, Schisandra, Ginger, and Asarum Decoction)

苓甘五味姜辛湯

苓甘五味姜辛汤

Pinyin Name: *Ling Gan Wu Wei Jiang Xin Tang***Literal Name:** Poria, Licorice, Schisandra, Ginger, and Asarum Decoction**Original Source:** *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty**COMPOSITION**

<i>Gan Jiang</i> (Rhizoma Zingiberis)	9g
<i>Xi Xin</i> (Radix et Rhizoma Asari)	9g [3g]
<i>Fu Ling</i> (Poria)	12g
<i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis)	0.5 cup [3-6g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	9g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients with 8 cups [1,600 mL] of water until the liquid is reduced to 3 cups [600 mL]. Take 0.5 cup [100 mL] of the warm, strained decoction three times daily. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

Warms the Lung and resolves *yin* (invisible phlegm)

CLINICAL MANIFESTATIONS

Retention of cold-type *yin* (invisible phlegm): coughing with profuse, white, watery sputum, discomfort in the chest and diaphragm regions, white, slippery tongue coating, and a wiry, slippery pulse.

CLINICAL APPLICATIONS

Bronchitis and cough.

EXPLANATION

Ling Gan Wu Wei Jiang Xin Tang (Poria, Licorice, Schisandra, Ginger, and Asarum Decoction) treats retention of cold-type *yin* (invisible phlegm) due to yang deficiency

and *yin* excess, with accumulation of water and dampness. Spleen yang deficiency compromises the Spleen's normal functioning, and may lead to interior cold formation and damp accumulation, which precipitate retention of cold-type *yin* (invisible phlegm). This phlegm may be stored in the Lung and affect the Lung's qi flow. Consequently, coughing with profuse, white, watery sputum occurs. A white, slippery tongue coating and a wiry, slippery pulse are signs of interior cold and phlegm.

Gan Jiang (Rhizoma Zingiberis), the chief herb in this formula, warms the Lung, dispels cold, dissolves dampness, and resolves *yin* (invisible phlegm). *Xi Xin* (Radix et Rhizoma Asari), an acrid and warm herb, warms the Lung, disperses cold, and assists *Gan Jiang* (Rhizoma Zingiberis) in resolving *yin* (invisible phlegm). *Fu Ling* (Poria) strengthens the Spleen and resolves dampness. *Wu Wei Zi* (Fructus Schisandrae Chinensis) astringes Lung qi to stop coughing. Moreover, the astringent effect of *Wu Wei Zi* (Fructus Schisandrae Chinensis) moderates the dispersing function of *Xi Xin* (Radix et Rhizoma Asari) to effectively relieve cough. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs in the formula.

<i>Zi Wan</i> (Radix et Rhizoma Asteris)	60g
<i>Kuan Dong Hua</i> (Flos Farfarae)	60g

The source text states to grind the ingredients into a fine powder and form into pills with powdered *Shen Qu* (Massa Fermentata) and fresh juice of *Sheng Jiang* (Rhizoma Zingiberis Recens). At the onset of this syndrome, take 6g (3g for weak patients) of pills at bedtime with tea made from 6g of *Sheng Jiang* (Rhizoma Zingiberis Recens). Furthermore, apply *San Jian Gao* (Three Constructive Paste) topically to *Feishu* (BL 13).

Today, this formula is prepared by grinding the ingredients into powder and mixing it with fresh juice from *Sheng Jiang* (Rhizoma Zingiberis Recens) to form pills. Take 6g of pills twice daily with warm, boiled water or a decoction of *Sheng Jiang* (Rhizoma Zingiberis Recens). In addition, apply *San Jian Gao* (Three Constructive Paste) topically to *Feishu* (BL 13) for optimal results.

According to the source text, ingestion of *Leng Xiao Wan* (Cold Wheezing Pill) will help to expectorate stubborn phlegm and unblock the stagnation in the chest and diaphragm. After the resolution of the acute condition, herbs that tonify the Spleen and Stomach should be prescribed.

Líng Gān Wǔ Wèi Jiāng Xīn Tāng

(Poría, Licorice, Schisandra, Ginger, and Asarum Decoction)

Leng Xiao Wan (Cold Wheezing Pill) dispels cold and expels phlegm, and can be used to treat individuals with cold invasion to the upper back, with symptoms such as coughing and wheezing after exposure to cold, feeling of distention and fullness in the chest and diaphragm, and inability to lie down flat because of dyspnea. For best results, apply *San Jian Gao* (Three Constructive Paste) topically to the following acupuncture points: *Feishu* (BL 13), *Huagai* (CV 20), and *Shanzhong* (CV 17).

Sān Jiàn Gāo (Three Constructive Paste)

三建膏

Pinyin Name: *San Jian Gao*

Literal Name: Three Constructive Paste

Original Source: *Zhang Shi Yi Tong* (Comprehensive Medicine According to Master Zhang) by Zhang Lu-Xuan in 1695

<i>Zhi Cao Wu</i> (Radix Aconiti Kusnezoffii Praeparata)	60g
<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata)	60g

<i>Rou Gui</i> (Cortex Cinnamomi)	60g
<i>Gui Zhi</i> (Ramulus Cinnamomi)	60g
<i>Xi Xin</i> (Radix et Rhizoma Asari)	60g
<i>Gan Jiang</i> (Rhizoma Zingiberis)	60g
<i>Hua Jiao</i> (Pericarpium Zanthoxyli)	60g

This herbal paste is prepared by cooking the herbs with 1,000 grams of sesame oil. After the initial cooking

and extraction process, the herb residue is filtered and discarded. The dense herbal extract is cooked again at low temperature for a prolonged period of time until it turns into a thick herbal paste. Lastly, add a small amount of *She Xiang* (Moschus) before applying the herbal paste to acupuncture points or the affected areas.

Note: *She Xiang* (Moschus) is derived from an endangered animal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions.

San Jian Gao (Three Constructive Paste) contains only warm and hot herbs to treat disorders characterized by cold. Clinical applications are as follows:

- For cough, wheezing, and dyspnea, apply this formula to *Feishu* (BL 13), *Huagai* (CV 20), and *Shanzhong* (CV 17).
- For yin-type deep-rooted sores and lesions, apply this formula to the affected area.
- For abdominal pain with poor appetite and diarrhea due to cold, apply topically to the umbilicus and *Zhongwan* (CV 12).
- For sexual and reproductive disorders due to yang deficiency, apply this formula to the umbilicus and *Dantian* (an area 3 *cun* below the umbilicus).
- For masses in the abdomen due to cold accumulation, apply this formula to the affected area.

Sān Zǐ Yǎng Qīn Tāng

(Three-Seed Decoction to Nourish One's Parents)

三子養親湯

三子养亲汤

Pinyin Name: *San Zi Yang Qin Tang*
Literat Name: Three-Seed Decoction to Nourish One's Parents
Alternate Name: Three-Seed Combination
Original Source: *Han Shi Yi Tong* (Comprehensive Medicine According to Master Han) by Han Mao in 1522

COMPOSITION

<i>Bai Jie Zi</i> (Semen Sinapis)	[6g]
<i>Zi Su Zi</i> (Fructus Perillae)	[9g]
<i>Lai Fu Zi</i> (Semen Raphani)	[9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to dry-fry the ingredients and crush open the seeds. Place a maximum of 9g of the herbs into a silk sack, and cook it with a large amount of water. Do not overcook.* Take the decoction in small sips frequently throughout the day. The source text recommends adding honey for patients with constipation, and to include 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) in the winter. Today, this formula is prepared by crushing the seeds (using the suggested doses in brackets), placing them all in a cheesecloth bag, and cooking them in water. Take the decoction frequently in small amounts throughout the day. [*Please see Authors' Comments for explanation.]

CHINESE THERAPEUTIC ACTIONS

- 1. Redirects Lung qi and soothes the diaphragm
- 2. Dissolves phlegm and promotes food digestion

CLINICAL MANIFESTATIONS

Phlegm retention with qi stagnation: coughing with profuse sputum, wheezing, dyspnea, a feeling of distention in the chest, indigestion even with decreased intake of food, white, greasy tongue coating, and a slippery pulse.

CLINICAL APPLICATIONS

Chronic bronchitis, pulmonary emphysema, asthma, bronchial asthma, cardiopulmonary disease, and cough.

EXPLANATION

San Zi Yang Qin Tang (Three-Seed Decoction to Nourish One's Parents) was originally designed to treat geriatric patients with phlegm retention and qi stagnation. Because geriatric patients often have qi deficiency, overeating or consumption of cold or raw food easily leads to stagnation of food and qi. If the qi becomes stagnated, the fluids will not be distributed properly, and dampness and phlegm may accumulate as a result. Phlegm retention may cause reversed flow of Lung qi, resulting in coughing, dyspnea, and chest oppression. Stagnation of food and Stomach qi may lead to lack of appetite and indigestion. The white, greasy tongue coating and slippery pulse suggest qi deficiency and phlegm retention.

This formula has *Bai Jie Zi* (Semen Sinapis) to warm the Lung, dissolve phlegm, and soothe the diaphragm. *Zi Su Zi* (Fructus Perillae) disperses phlegm and guides reversed flow of Lung qi downward to relieve coughing and wheezing. *Lai Fu Zi* (Semen Raphani) activates Stomach qi, resolves food stagnation, and eliminates phlegm.

San Zi Yang Qin Tang (Three-Seed Decoction to Nourish One's Parents)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Phlegm retention with qi stagnation	<ul style="list-style-type: none">• Coughing, dyspnea and chest oppression: phlegm retention in the Lung causing reversed qi flow and qi stagnation• Lack of appetite and indigestion: phlegm retention in the Stomach affecting digestive functions• White, greasy tongue coating and slippery pulse: qi deficiency and phlegm retention	<ul style="list-style-type: none">• Descends Lung qi and soothes the diaphragm• Dissolves phlegm and promotes digestion of food	<ul style="list-style-type: none">• <i>Bai Jie Zi</i> (Semen Sinapis) dissolves phlegm.• <i>Zi Su Zi</i> (Fructus Perillae) redirects qi downward to relieve coughing and wheezing.• <i>Lai Fu Zi</i> (Semen Raphani) resolves food stagnation and eliminates phlegm.

Sān Zǐ Yǎng Qīn Tāng

(Three-Seed Decoction to Nourish One's Parents)

PHARMACOLOGICAL EFFECTS

1. **Antiasthmatic:** *San Zi Yang Qin Tang* has been shown in many studies to effectively reverse airway obstruction. The mechanism of this action is attributed to its ability to relax the smooth muscles and reverse bronchial constriction.¹
2. **Antitussive:** According to one study, administration of *San Zi Yang Qin Tang* was associated with a marked antitussive effect in mice with artificially-induced cough. The antitussive effect began approximately 1 hour after oral ingestion.²
3. **Expectorant:** One study reported marked expectorant and antitussive effects using *San Zi Yang Qin Tang* at 20 g/kg given in decoction via oral ingestion.³

CLINICAL STUDIES AND RESEARCH

1. **Cough:** One study used *San Zi Yang Qin Tang* to treat 40 patients with chronic and stubborn cough. Out of 40 patients, 14 had cough for more than 10 years, and 15 were geriatric persons 60 years of age and older. The study reported successful treatment of cough in 25 cases within 3-5 days, and 15 cases within 14 days.⁴
2. **Pediatric cough:** Daily usage of modified *San Zi Yang Qin Tang* successfully treated 25 children with chronic cough. The herbal treatment included *Lai Fu Zi* (Semen Raphani), *Zi Su Zi* (Fructus Perillae), *Ting Li Zi* (Semen Descurainiae seu Lepidii), *Zi Wan* (Radix et Rhizoma Asteris), *Jing Jie* (Herba Schizonepetae), *Qian Hu* (Radix Peucedani), *Ku Xing Ren* (Semen Armeniacae Amarum), *Wu Wei Zi* (Fructus Schisandrae Chinensis), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) as the base formula. Modifications were made by adding *Dang Shen* (Radix Codonopsis), *Fu Ling* (Poria), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for Spleen and Lung qi deficiencies; *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Dong* (Radix Ophiopogonis), and *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae) for qi and yin deficiencies; *Mao Dong Qing* (Radix Ilicis Pubescentis), *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae), *Chi Shao* (Radix Paeoniae Rubra), and *Jiang Can* (Bombyx Batryticatus) for phlegm and blood stagnation. The herbs were given in decoction daily. The study reported successful treatment in all 25 patients.⁵
3. **Bronchial asthma:** Administration of modified *San Zi Yang Qin Tang* via oral inhalation was successful in treating 53 patients with bronchial asthma. Improvements included relief of wheezing, dyspnea, lowered heartbeat, and resolution of 3 concave signs. Out of 53 patients, 39 had complete recovery within 1-2 days and 14 within 3-4 days. The average time required to achieve complete recovery was 2.08 days.⁶

4. **Bronchitis:** Eighty-eight children with acute bronchitis were treated successfully using *San Zi Yang Qin Tang* plus *San Ao Tang* (Three-Unbinding Decoction). Improvement was noted in most cases within 3 packs of herbs. The study reported a 65.9% rate of recovery, 86.4% rate of significant improvement, and 96.6% effectiveness. Those who did not respond to the treatment also had Spleen and Lung qi deficiencies with a suppressed immune system.⁷
5. **Mei he qi (plum-pit qi):** Modified *San Zi Yang Qin Tang* was used to treat 32 patients with plum-pit qi with complete recovery in 15 cases, marked improvement in 13 cases, and no effect in 4 cases. The overall effectiveness was 87.5%.^{8,9}

TOXICOLOGY

San Zi Yang Qin Tang has very little toxicity. According to one study, the LD₅₀ for oral administration of this formula in mice cannot be measured. Oral administration of up to 120 g/kg (maximum capacity of the stomach) of this formula did not cause any fatality.¹⁰

AUTHORS' COMMENTS

San Zi Yang Qin Tang treats the symptoms (phlegm retention with qi stagnation), not the cause (qi deficiency) of the illness. Thus, once the acute clinical manifestations are relieved, some qi-tonic herbs should be added to strengthen the qi. Moreover, the doses of the three herbs in the formula are frequently adjusted depending on the symptoms presented by the patient. Because this formula is relatively strong and is aimed at treating the symptoms, it is cooked with a large amount of water for only a short period of time to ensure that the potency of the decoction is not too strong. Furthermore, the decoction is not to be taken all at once, but in small amounts throughout the day for sustained symptomatic relief.

Bàn Xià Bái Zhú Tiān Má Tāng

(Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction)

半夏白朮天麻湯

半夏白朮天麻汤

Pinyin Name: *Ban Xia Bai Zhu Tian Ma Tang***Literal Name:** Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction**Alternate Names:** *Pan Hsia Tien Ma Pai Shu Tang*, *Ban Xia Tian Ma Bai Shu Tang*, Pinellia, Gastrodia, and Atractylodes Decoction; Pinellia, Gastrodia and Bighead Atractylodes Decoction; Pinellia and Gastrodia Combination**Original Source:** *Yi Xue Xin Wu* (Medical Revelations) by Cheng Guo-Peng in 1732**COMPOSITION**

<i>Ban Xia</i> (Rhizoma Pinelliae)	4.5g [9g]
<i>Tian Ma</i> (Rhizoma Gastrodiae)	3g [6g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	9g [15g]
<i>Fu Ling</i> (Poria)	3g [6g]
<i>Ju Hong</i> (Exocarpium Citri Reticulatae)	3g [6g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	1.5g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction with 1 slice of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 2 pieces of *Da Zao* (Fructus Jujubae). Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Dries dampness and dissolves phlegm
2. Soothes the Liver and subdues Liver wind

CLINICAL MANIFESTATIONS

Wind and phlegm rising upward: dizziness, vertigo, heaviness of the head, headache, a stifling sensation in the chest, nausea, vomiting, a white, greasy tongue coating, and a wiry, slippery pulse.

CLINICAL APPLICATIONS

Habitual headache, migraine headache, tension headache, Meniere's syndrome, cerebellitis, dizziness, vertigo, gastrotonia, gastroparesis, facial paralysis, and nasosinusitis.

EXPLANATION

Ban Xia Bai Zhu Tian Ma Tang (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction) treats rising of wind and phlegm with key symptoms such as dizziness and vertigo, heaviness of the head, nausea and vomiting, and a white, greasy tongue coating. Wind and phlegm syndrome occurs as a result of a combination of Spleen and Liver disorders. Spleen deficiency results in the formation of dampness and phlegm. The phlegm can be accompanied by Liver wind rising. Together, these factors rise and disturb many parts of the upper body. Dizziness, vertigo, and heaviness of the head are due to the turbid dampness, phlegm, and Liver wind traveling to the head. A stifling sensation in the chest is due to damp-phlegm obstruction in the chest. Nausea and vomiting are caused by damp-phlegm obstruction in the middle *jiao*.

The treatment plan is to dissolve phlegm, subdue Liver wind, strengthen the Spleen, and dispel dampness. *Ban Xia* (Rhizoma Pinelliae) dries dampness, dissolves phlegm, and redirects the reversed flow of Stomach qi

Bàn Xià Bái Zhú Tiān Má Tāng

(Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Wind and phlegm rising	<ul style="list-style-type: none">• Dizziness, vertigo and heaviness of the head: phlegm and Liver wind rising to the head• A stifling sensation in the chest: damp-phlegm obstruction in the chest• Nausea and vomiting: damp-phlegm obstruction in the middle <i>jiao</i>• White, greasy tongue coating, and a wiry, slippery pulse: damp-phlegm in the interior	<ul style="list-style-type: none">• Dries dampness and dissolves phlegm• Soothes the Liver and subdues Liver wind	<ul style="list-style-type: none">• <i>Ban Xia</i> (Rhizoma Pinelliae) dries dampness and dissolves phlegm.• <i>Tian Ma</i> (Rhizoma Gastrodiae) subdues Liver wind.• <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) and <i>Fu Ling</i> (Poria) strengthen the Spleen and dispel dampness.• <i>Ju Hong</i> (Exocarpium Citri Reticulatae) regulates qi and dissolves phlegm.• <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Da Zao</i> (Fructus Jujubae) harmonize the Spleen and Stomach.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs.

downward to stop nausea and vomiting. *Tian Ma* (Rhizoma Gastrodiae) subdues Liver wind and alleviates dizziness and vertigo. These two chief herbs are essential in treating dizziness, vertigo, headache, and other symptoms caused by wind and phlegm. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen and dries dampness, while *Fu Ling* (Poria) strengthens the Spleen and dispels dampness. *Ju Hong* (Exocarpium Citri Reticulatae) regulates qi and dissolves phlegm. *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Da Zao* (Fructus Jujubae) harmonize the Spleen and Stomach, while *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs.

MODIFICATIONS

- With headache, add *Man Jing Zi* (Fructus Viticis) and *Ji Li* (Fructus Tribuli).
- With headache caused by wind-cold, add *Fang Feng* (Radix Saposhnikoviae) and *Qiang Huo* (Rhizoma et Radix Notopterygii).
- With headache caused by blood deficiency, add *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong).
- With headache and dizziness caused by cold and phlegm, add *Zhen Wu Tang* (True Warrior Decoction).
- With migraine headache, add *Chuan Xiong* (Rhizoma Chuanxiong) and *Man Jing Zi* (Fructus Viticis).
- With dizziness and vertigo due to qi deficiency, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali).
- If there is severe dizziness or vertigo due to Liver excess, add *Jiang Can* (Bombyx Batryticatus), *Gou Teng* (Ramulus

- Uncariae cum Uncis), and *Dan Nan Xing* (Arisaema cum Bile).
- With profuse phlegm and damp accumulation, add *Ze Xie* (Rhizoma Alismatis) and *Gui Zhi* (Ramulus Cinnamomi).
 - With sinusitis or rhinitis, add *Xin Yi Hua* (Flos Magnoliae).
 - For arteriostenosis in the brain, add *Gou Teng* (Ramulus Uncariae cum Uncis).

CAUTIONS / CONTRAINDICATIONS

Ban Xia Bai Zhu Tian Ma Tang should not be used for dizziness caused by Liver and Kidney yin deficiencies, or dizziness or vertigo caused by Liver yang rising.

CLINICAL STUDIES AND RESEARCH

1. **Meniere’s syndrome:** One study evaluated the efficacy of *Ban Xia Bai Zhu Tian Ma Tang* in treating Meniere’s syndrome in 32 patients (18 males and 14 females) with 1 to 5 years history of illness. The base formula contained *Ban Xia Bai Zhu Tian Ma Tang* plus *Ze Xie* (Rhizoma Alismatis), *Zhu Ru* (Caulis Bambusae in Taenia), and *Jiang Can* (Bombyx Batryticatus). Modifications were made by adding *Zhe Shi* (Haematitum) and *Xuan Fu Hua* (Flos Inulae) for frequent nausea and vomiting; *Ci Shi* (Magnetitum), *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and *Hu Tao Ren* (Semen Juglandis) for severe tinnitus; and *Long Gu* (Os Draconis) and *Mu Li* (Concha Ostreae) for severe dizziness. Of 32 patients, the study reported complete recovery in 6 cases, improvement in 21 cases, and no effect in 5 cases. The overall effectiveness was 84.4%.¹

Bàn Xià Bái Zhú Tiān Má Tāng

(Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction)

Another study also reported marked results using a modification of this formula to treat 70 patients with Meniere's syndrome with severe dizziness, vertigo, nausea, vomiting, and tinnitus. The formula used contained *Ban Xia* (Rhizoma Pinelliae), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Tian Ma* (Rhizoma Gastrodiae), *Ze Xie* (Rhizoma Alismatis), *Fu Ling* (Poria), *Xuan Fu Hua* (Flos Inulae), *Shi Chang Pu* (Rhizoma Acori Tatarinowii), *Sha Ren* (Fructus Amomi), *Zhe Shi* (Haematitum), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) as the base formula. Modifications included the addition of *Dang Gui* (Radix Angelicae Sinensis) and *Huang Qi* (Radix Astragali) for blood deficiency; and *Long Chi* (Dens Draconis) and *Shou Wu Teng* (Caulis Polygoni Multiflori) for insomnia. The duration of treatment ranged from 3-35 packs of herbs.²

2. **Dizziness and vertigo:** *Ban Xia Bai Zhu Tian Ma Tang* has been shown in many studies to effectively treat dizziness and vertigo due to various causes. According to one study, use of the formula plus *Zi Su Ye* (Folium Perillae) and *Ze Xie* (Rhizoma Alismatis) in decoction daily was very effective in treating acute onset of dizziness and vertigo accompanied by nausea, vomiting, and tinnitus.³

Another study reported 98% effectiveness using modified *Ban Xia Bai Zhu Tian Ma Tang* to treat dizziness and vertigo due to inner ear imbalance. Of 50 patients, 28 had complete recovery (resolution of all symptoms without recurrence within 1 year of follow-ups), significant improvement in 21 cases (resolution of all symptoms with recurrence associated with stress, fatigue, and other causes) and no effect in 1 case.⁴

Lastly, one study combined *Ban Xia Bai Zhu Tian Ma Tang* and *Wen Dan Tang* (Warm the Gallbladder Decoction) to treat dizziness in 80 patients with complete recovery in 51 cases, improvement in 20 cases, and no effect in 9 cases. The composition of the herbal treatment included these two formulas without *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and with the addition of *Gou Teng* (Ramulus Uncariae cum Uncis), *Zhu Ru* (Caulis Bambusae in Taenia), *Ci Shi* (Magnetitum), and others as deemed necessary.⁵

3. **Tension headache:** Use of modified *Ban Xia Bai Zhu Tian Ma Tang* to treat tension headache in 68 patients was associated with complete recovery in 49 cases, improvement in 18 cases, and no effect in 1 case. Modifications to the base formula included *Shi Chang Pu* (Rhizoma Acori Tatarinowii) and *Gou Teng* (Ramulus Uncariae cum Uncis) for numbness in the head; *Gua Lou Pi* (Pericarpium Trichosanthis) and *Zhu Ru* (Caulis Bambusae in Taenia) for fullness and distention in the

chest and epigastrium with sensations of nausea and vomiting; *Gou Teng* (Ramulus Uncariae cum Uncis), *Huang Qin* (Radix Scutellariae), and *Chai Hu* (Radix Bupleuri) for headache accompanied by dizziness, tinnitus, and vertigo; and removal of *Ban Xia* (Rhizoma Pinelliae) and the addition of *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), *Shou Wu Teng* (Caulis Polygoni Multiflori), and *Ji Xue Teng* (Caulis Spatholobi) for headache with poor facial complexion, palpitations, and a fine, weak pulse.⁶

4. **Cerebellitis:** One study reported 94% effectiveness using modified *Ban Xia Bai Zhu Tian Ma Tang* to treat acute cerebellitis. Of 17 patients, the study reported significant improvement in 9 cases, moderate improvement in 7 cases, and no effect in 1 case. The herbal formula contained *Ban Xia Bai Zhu Tian Ma Tang* without *Gan Cao* (Radix et Rhizoma Glycyrrhizae) and *Da Zao* (Fructus Jujubae), and with the addition of *Gou Teng* (Ramulus Uncariae cum Uncis) and *Shi Chang Pu* (Rhizoma Acori Tatarinowii). Furthermore, *Di Long* (Pheretima) and *Quan Xie* (Scorpio) were added for difficulty in walking; and *Dan Nan Xing* (Arisaema cum Bile) and *Yuan Zhi* (Radix Polygalae) were added for profuse phlegm.⁷
5. **Facial paralysis:** According to one study, 17 patients with facial paralysis characterized by deviation of the eyes and mouth were treated with modified *Ban Xia Bai Zhu Tian Ma Tang* with complete recovery in 10 cases, significant results in 4 cases, moderate results in 2 cases, and no effect in 1 case. The overall effectiveness was 94%. The herbal treatment contained this formula plus *Qiang Huo* (Rhizoma et Radix Notopterygii), *Bai Jie Zi* (Semen Sinapis), *Hong Hua* (Flos Carthami), *Quan Xie* (Scorpio), and *Wu Gong* (Scolopendra). The treatment protocol was to grind all herbs into a fine powder, and administer with a small amount of warm grain-based alcohol.⁸
6. **Nasosinusitis:** Administration of modified *Ban Xia Bai Zhu Tian Ma Tang* was associated with marked success in treating 50 patients with nasosinusitis. The herbal formula contained *Ban Xia* (Rhizoma Pinelliae) 10g, *Tian Ma* (Rhizoma Gastrodiae) 10g, *Cang Er Zi* (Fructus Xanthii) 10g, *Bai Zhi* (Radix Angelicae Dahuricae) 10g, *Yan Hu Suo* (Rhizoma Corydalis) 10g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 10g, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) 15-30g, *Huang Qi* (Radix Astragali) 15-30g, *Xi Xin* (Radix et Rhizoma Asari) 4g, *Huang Qin* (Radix Scutellariae) 12g, *Yu Xing Cao* (Herba Houttuyniae) 30g, *Chuan Xiong* (Rhizoma Chuanxiong) 15g, *Lian Qiao* (Fructus Forsythiae) 15g, *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) 15g, *Niu Xi* (Radix Achyranthis Bidentatae) 15g, *Bai Shao* (Radix Paeoniae Alba) 15g, and *Huo Xiang* (Herba Agastaches)

Bàn Xià Bái Zhú Tiān Má Tāng

(Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction)

6g. The herbal formula was given in decoction daily. Of 50 patients, the study reported complete recovery in 35 cases and improvement in 15 cases. The duration of treatment ranged from 10-30 days.⁹

<i>Mai Ya</i> (Fructus Hordei Germinatus)	4.5g [7.5g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	4.5g [7.5g]

The source text states to cook the herbs in 2 bowls of water until it is reduced down to 1 bowl. Take the warm,

strained decoction after meals. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

This formula has functions to dry dampness, dissolve phlegm, benefit qi, and harmonize the Stomach. It is designed to treat headache due to phlegm retention with signs and symptoms such as nausea, vomiting, thick and sticky saliva and sputum, dizziness and vertigo, irritability, a stifling sensation in the chest, shortness of breath, severe headache, heavy sensations in the body, cold extremities, and restless sleep.

AUTHORS' COMMENTS

Ban Xia Bai Zhu Tian Ma Tang is one of the most essential formulas for treating dizziness and vertigo caused by Liver wind and phlegm rising. The key signs and symptoms include dizziness, vertigo, headache, a white, greasy tongue coating, and a wiry, slippery pulse.

<i>Quan Xie</i> (Scorpio), remove the tails and <i>xi</i> (washed) with licorice water	15g [3g]
<i>Jiang Can</i> (Bombyx Batryticatus), <i>xi</i> (washed) with licorice water and <i>chao</i> (dry-fried)	15g [3g]
<i>Tian Ma</i> (Rhizoma Gastrodiae)	30g [6g]
<i>Zhu Sha</i> (Cinnabaris), <i>shui fei</i> (refined with water) and <i>yan</i> (ground) into thin particles	9g [2g]
<i>Hu Po</i> (Succinum), <i>zhu</i> (boiled) till soft and <i>yan</i> (ground) with <i>Deng Xin Cao</i> (Medulla Junci)	15g [3g]
<i>Yuan Zhi</i> (Radix Polygalae), <i>pao</i> (blast-fried) with licorice water	21g [4.5g]
<i>Fu Shen</i> (Poria Paradicis), <i>zheng</i> (steamed)	30g [6g]

Note: *Zhu Sha* (Cinnabaris) is a potentially toxic heavy metal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder and form into pills using the resultant mixture of the following liquids: a small bowl [100 mL] of *Zhu Li* (Succus Bambusae), a small cup [50 mL] of fresh juice of *Sheng Jiang* (Rhizoma Zingiberis Recens), and a thick herbal paste made from condensing 120g of *Gan Cao* (Radix et Rhizoma Glycyrrhizae). The pills are coated with *Zhu Sha* (Cinnabaris), and should resemble a large bullet in size [approximately 6g]. Take one pill per dose with warm, boiled water in the morning and at night.

CHINESE THERAPEUTIC ACTIONS

Eliminates phlegm and subdues Liver wind

CLINICAL MANIFESTATIONS

Phlegm and heat rising: sudden onset of seizures and epilepsy in young children, loss of balance, semi-unconsciousness or complete loss of consciousness, falling down, tonic-clonic seizures, upward-rolling of the eyes, deviation of the mouth, involuntary salivation or dripping saliva, and sudden shrieking. It is also used for *dian kuang* (mania and withdrawal) conditions.

CLINICAL APPLICATIONS

Seizures, epilepsy, and convulsions.

EXPLANATION

Ding Xian Wan (Arrest Seizures Pill) treats seizures and epilepsy caused by Liver wind rising and hot phlegm obstructing the sensory orifices. According to traditional Chinese medicine, seizures and epilepsy can be caused by many factors, such as phlegm stagnation, emotional imbalance, irregular diet, and overexertion or overwork. Seen more commonly in children, seizures and epilepsy occur when Liver wind and hot phlegm rise together to the head. As phlegm rises, it blocks the sensory orifices, causing sudden loss of consciousness, loss of balance, upward-rolling of the eyes, deviation of the mouth, and involuntary salivation or dripping saliva. If Liver wind and phlegm block the channels and collaterals, patients will have tonic-clonic type of convulsions.

Dìng Xiān Wán (Arrest Seizures Pill)

Ding Xian Wan (Arrest Seizures Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Rising of phlegm and heat	<ul style="list-style-type: none">Seizures and epilepsy: Liver wind and hot phlegm rise together to the headSudden loss of consciousness and loss of balance: hot phlegm blocking the sensory orificesConvulsions: hot phlegm obstructing the channels and collaterals	Eliminates phlegm and subdues Liver wind	<ul style="list-style-type: none"><i>Zhu Li</i> (Succus Bambusae) clears heat, dissolves phlegm, and opens the sensory orifices.<i>Dan Nan Xing</i> (Arisaema cum Bile) clears heat and dissolves phlegm.<i>Ban Xia</i> (Rhizoma Pinelliae), <i>Chen Pi</i> (Pericarpium Citri Reticulatae), <i>Chuan Bei Mu</i> (Bulbus Fritillariae Cirrhosae), <i>Fu Ling</i> (Poria) and <i>Mai Dong</i> (Radix Ophiopogonis) dispel phlegm, direct qi downwards, and prevent yin damage.<i>Dan Shen</i> (Radix et Rhizoma Salviae Miltiorrhizae) eliminates blood stagnation.<i>Shi Chang Pu</i> (Rhizoma Acori Tatarinowii) warms and opens the sensory orifices.<i>Quan Xie</i> (Scorpio), <i>Jiang Can</i> (Bombyx Batryticatus) and <i>Tian Ma</i> (Rhizoma Gastrodiae) subdue Liver wind and stop muscle convulsions.<i>Zhu Sha</i> (Cinnabaris), <i>Hu Po</i> (Succinum), <i>Yuan Zhi</i> (Radix Polygalae), <i>Deng Xin Cao</i> (Medulla Junci) and <i>Fu Shen</i> (Poria Paradicis) calm the <i>shen</i> (spirit) and enhance the treatment of seizures and epilepsy.<i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonize all of the herbs.

Zhu Li (Succus Bambusae) clears heat, dissolves phlegm, and opens the sensory orifices. *Dan Nan Xing* (Arisaema cum Bile) clears heat and dissolves phlegm. Together, these two herbs treat all types of seizures, convulsions, and stroke disorders. *Ban Xia* (Rhizoma Pinelliae), *Chen Pi* (Pericarpium Citri Reticulatae), *Chuan Bei Mu* (Bulbus Fritillariae Cirrhosae), *Fu Ling* (Poria), and *Mai Dong* (Radix Ophiopogonis) dispel phlegm and direct qi downward. They also prevent the warm and drying herbs from damaging yin. *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) eliminates blood stagnation. *Shi Chang Pu* (Rhizoma Acori Tatarinowii) warms and opens the sensory orifices. *Quan Xie* (Scorpio) and *Jiang Can* (Bombyx Batryticatus) subdue Liver wind and stop muscle convulsions. *Tian Ma* (Rhizoma Gastrodiae) subdues Liver wind and dissolves phlegm. *Zhu Sha* (Cinnabaris), *Hu Po* (Succinum), *Deng Xin Cao* (Medulla Junci), *Yuan Zhi* (Radix Polygalae), and *Fu Shen* (Poria Paradicis) calm the *shen* (spirit) and enhance the overall function of treating seizures and epilepsy. Lastly, *Sheng Jiang*

(Rhizoma Zingiberis Recens) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonize all of the herbs.

MODIFICATIONS

- With chronic and frequent seizure attacks due to deficiency of *zheng* (upright) *qi*, add *Ren Shen* (Radix et Rhizoma Ginseng).
- With constipation, add *Da Huang* (Radix et Rhizoma Rhei) and *Mang Xiao* (Natrii Sulfas).
- With continuous twitching and spasms, add *Gou Teng* (Ramulus Uncariae cum Uncis).

CAUTIONS / CONTRAINDICATIONS

- Ding Xian Wan* treats seizures and epilepsy caused by Liver wind rising and hot phlegm. It should not be used indiscriminately to treat seizures and epilepsy caused by other factors, such as Liver fire, Liver and Kidney yin deficiencies, and Spleen and Stomach deficiencies.
- This formula treats acute cases of seizures and epilepsy. Once the condition is stabilized, this formula should be discontinued, and additional supportive therapy started.

Dìng Xiān Wán (Arrest Seizures Pill)

RELATED FORMULA

Hé Chē Wán Fāng

河車丸方

河車丸方

Pinyin Name: *He Che Wan Fang*

Literal Name: Placenta Pill Formula

Original Source: *Yi Xue Xin Wu* (Medical Revelations) by Cheng Guo-Peng in 1732

<i>Zi He Che</i> (Placenta Hominis)	1 piece
<i>Fu Ling</i> (Poria)	30g
<i>Fu Shen</i> (Poria Paradicis)	30g
<i>Yuan Zhi</i> (Radix Polygalae)	30g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	15g
<i>Dan Shen</i> (Radix et Rhizoma Salviae Miltiorrhizae)	21g

The source text states to prepare the herbs with honey to make pills. Take 9g of pills with water every morning.

He Che Wan Fang (Placenta Pill Formula) is to be used after the seizures and epilepsy have been treated with *Dìng Xiān Wán*. According to the source text, *He Che Wan Fang* tonifies the Kidney, nourishes the Heart, and

strengthens the Spleen to terminate the recurrence of seizures and epilepsy.

Note: Human placenta is generally not used, for many reasons. Instead, placentae from pigs and cattle are used as substitutes.

AUTHORS' COMMENTS

Dìng Xiān Wán is designed to treat acute onsets of seizures and epilepsy, characterized by rising of phlegm, heat, and Liver wind. Although effective, the use of this formula alone is insufficient for the overall management of seizures and epilepsy. Optimal treatment of seizures and epilepsy must focus on treating both the symptoms and the cause. During seizures and epilepsy attacks, the emphasis is on treating the symptoms, which entails eliminating phlegm and Liver wind. During remission, the emphasis is on treating the cause, which could mean strengthening the Spleen, nourishing the Heart, benefiting the Liver and/or Kidney, or regulating qi and blood circulation. Furthermore, long-term care of patients with seizures and epilepsy must also include dietary and lifestyle adjustments.

Chapter 18 — Summary

— Phlegm-Dispelling Formulas

SECTION 1: DAMP-DRYING AND PHLEGM-DISSOLVING FORMULAS

Name	Similarities	Differences
<i>Er Chen Tang</i> (Two-Cured Decoction)		Regulates qi, harmonizes the middle <i>jiao</i>
<i>Wen Dan Tang</i> (Warm the Gallbladder Decoction)		Clears Gallbladder heat, harmonizes the Stomach
<i>Zhu Ru Wen Dan Tang</i> (Bamboo Decoction to Warm the Gallbladder)	Dry dampness, dissolve phlegm	Clears heat, calms the <i>shen</i> (spirit)
<i>Fu Ling Wan</i> (Poria Pill)		Activates qi, softens nodules
<i>Xiao Ban Xia Jia Fu Ling Tang</i> (Minor Pinellia and Poria Decoction)		Regulates water circulation, disperses qi stagnation

Er Chen Tang (Two-Cured Decoction) is the most basic formula to dry dampness and dissolve phlegm. Internal dampness and phlegm stagnation due to Spleen deficiency produce coughing with profuse sputum, chest congestion, nausea, and vomiting.

Wen Dan Tang (Warm the Gallbladder Decoction) treats Gallbladder and Stomach disharmony with phlegm heat. The main clinical manifestations include irritability, palpitations, insomnia, nausea and vomiting, dizziness and vertigo, and seizures and epilepsy.

Zhu Ru Wen Dan Tang (Bamboo Decoction to Warm the Gallbladder) clears heat, dissolves phlegm, regulates qi, and calms the *shen* (spirit). It is used for accumulation of heat and phlegm in the Heart and Gallbladder, with signs and symptoms such as tendency to get easily frightened, palpitations, insomnia, mild and persistent fever, and copious phlegm in the chest.

Fu Ling Wan (Poria Pill) dispels phlegm, regulates qi, and softens nodules. Due to phlegm stagnation in the middle *jiao* that travels via the channels and collaterals, manifestations of painful arms and edema of the extremities can be seen.

Xiao Ban Xia Jia Fu Ling Tang (Minor Pinellia and Poria Decoction) dispels phlegm, regulates water circulation, and disperses qi stagnation. It mostly treats nausea and vomiting caused by phlegm stagnation and water accumulation in the epigastrium. Clinical manifestations include nausea, vomiting, stifling sensations in the epigastrium, dizziness, and dysuria.

Chapter 18 — Summary

SECTION 2: HEAT-CLEARING AND PHLEGM-DISSOLVING FORMULAS

Name	Similarities	Differences
Qing Qi Hua Tan Wan (Clear the Qi and Transform Phlegm Pill)	Clear heat, dissolve phlegm in the Lung	Regulates qi circulation, relieves cough
Qing Fei Yin (Clear the Lung Drink)		Resolves dampness and phlegm
Qing Fei Tang (Clear the Lung Decoction)	Clear heat, dissolve phlegm in the Lung, treat deficiencies	Nourishes yin and body fluids
Zi Wan Tang (Aster Decoction)		Nourishes yin and body fluids, stops bleeding
Jie Geng Tang (Platycodon Decoction)		Tonifies Lung qi
Ren Shen Xie Fei Tang (Ginseng Decoction to Sedate the Lung)		Tonifies qi, regulates qi circulation
Gua Lou Zhi Shi Tang (Trichosanthes Fruit and Immature Bitter Orange Decoction)	Clear heat, dissolve phlegm, relieve the feeling of fullness and the stifling sensation	Breaks up stagnation
Xiao Xian Xiong Tang (Minor Sinking into the Chest Decoction)		Opens the chest
Gun Tan Wan (Vaporize Phlegm Pill)	Purges fire, eliminates phlegm	Eliminates old (chronic and stubborn) phlegm with excess heat

Qing Qi Hua Tan Wan (Clear the Qi and Transform Phlegm Pill) and **Qing Fei Yin** (Clear the Lung Drink) both clear heat and dissolve phlegm in the Lung.

- **Qing Qi Hua Tan Wan** clears heat, eliminates phlegm, regulates qi and arrests cough. It treats phlegm-heat congestion in the chest, accompanied by coughing with copious, yellow sputum that cannot be easily expectorated.
- **Qing Fei Yin** dissolves dampness and phlegm, and clears the Lung. It treats cough caused by accumulation of phlegm and dampness, with symptoms such as coughing with sputum, chest discomfort, and fatigue.

Qing Fei Tang (Clear the Lung Decoction), **Zi Wan Tang** (Aster Decoction), **Jie Geng Tang** (Platycodon Decoction), and **Ren Shen Xie Fei Tang** (Ginseng Decoction to Sedate the Lung) have similar functions to clear heat, dissolve phlegm, and support underlying deficiencies. They are used frequently to address Lung phlegm-heat, accompanied by qi, yin and/or body fluid deficiencies.

- **Qing Fei Tang** dispels phlegm-heat from the chest, moistens the Lung, and relieves cough. It treats chronic cough due to phlegm-heat in the Lung with yin and body fluid deficiencies. Clinical manifestations include severe cough, thick and sticky phlegm, sore and itchy throat, and voice hoarseness.
- **Zi Wan Tang** clears heat, dissolves phlegm, and nourishes yin and body fluids. It treats chronic cough due to Lung heat and yin deficiency, with symptoms such as chronic cough, excess phlegm, fever due to over-exertion, and the presence of lung abscesses and blood in the sputum.
- **Jie Geng Tang** eliminates pus and phlegm, dispels toxins, and clears deficiency fire. It is commonly used to treat Lung phlegm stagnation, with symptoms such as cough, and swelling and pain of the throat. Because the phlegm consumes yin and body fluids, deficiency fire arises and leads to symptoms such as thick, sticky sputum with mucous and blood or with foul odor, and a dry mouth without thirst.
- **Ren Shen Xie Fei Tang** clears heat, sedates the Lung, eliminates phlegm, and regulates qi circulation. It treats Lung heat with wheezing, dyspnea, fullness and distention in the chest and epigastrium, cough with profuse sputum, and constipation. This formula contains *Ren Shen* (Radix et Rhizoma Ginseng) to tonify qi, strengthen the Lung and Spleen, and prevent the draining herbs from consuming body fluids.

Chapter 18 — Summary

Gua Lou Zhi Shi Tang (Trichosanthes Fruit and Immature Bitter Orange Decoction) and **Xiao Xian Xiong Tang** (Minor Sinking into the Chest Decoction) both have strong effects to clear heat and dissolve phlegm. These formulas commonly treat excess cases of phlegm-heat in the Lung with a feeling of fullness and a stifling sensation in the chest.

- **Gua Lou Zhi Shi Tang** treats severe phlegm-heat stagnation in the chest with chest congestion, difficult breathing and expectoration, and occasional severe chest and epigastric pain.
- **Xiao Xian Xiong Tang** is used for phlegm-heat stagnation with chest pain upon application of pressure. It clears heat, eliminates phlegm, expands the chest, and disperses stagnation. In addition to chest pain, other important clinical manifestations include coughing with yellow and thick, sticky sputum.

Gun Tan Wan (Vaporize Phlegm Pill) purges fire and eliminates phlegm. This formula is used for more severe cases in which the stubborn, chronic phlegm-fire surrounds the Heart and causes *shen* (spirit) disturbance conditions, such as manic-depressive psychosis and severe palpitations with unconsciousness.

SECTION 3: DRYNESS-MOISTENING AND PHLEGM-DISSOLVING FORMULA

Name	Similarities	Differences
Bei Mu Gua Lou San (Fritillaria and Trichosanthes Fruit Powder)	Moistens the Lung, dissolves phlegm	Clears Lung heat, regulates Lung qi

Bei Mu Gua Lou San (Fritillaria and Trichosanthes Fruit Powder) moistens the Lung, dissolves phlegm, clears heat, and regulates qi circulation. It is indicated for dry, sore throat, hoarse voice, and coughing with thick, sticky sputum that cannot be expectorated easily.

SECTION 4: WARM FORMULAS THAT DISSOLVE COLD PHLEGM

Name	Similarities	Differences
Ling Gan Wu Wei Jiang Xin Tang (Poria, Licorice, Schisandra, Ginger, and Asarum Decoction)	Dissolve cold phlegm	Warms and tonifies the Lung and Spleen
San Zi Yang Qin Tang (Three-Seed Decoction to Nourish One's Parents)		Guides Lung qi downward, resolves food stagnation

Ling Gan Wu Wei Jiang Xin Tang (Poria, Licorice, Schisandra, Ginger, and Asarum Decoction) warms the Lung and dispels cold-phlegm accumulation. Key clinical manifestations include coughing with profuse, white, watery sputum, a white, greasy tongue coating, and a wiry, slippery pulse.

San Zi Yang Qin Tang (Three-Seed Decoction to Nourish One's Parents) dispels phlegm retention, unblocks qi stagnation, and resolves food stagnation. Clinical manifestations include coughing with profuse sputum, chest distention, lack of appetite with indigestion, a white, greasy tongue coating, and a slippery pulse.

Chapter 18 — Summary

SECTION 5: WIND-EXPELLING AND PHLEGM-DISSOLVING FORMULAS

Name	Similarities	Differences
<i>Ban Xia Bai Zhu Tian Ma Tang</i> (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction)	Calm Liver wind, dissolve phlegm	Treats headache, dizziness, and vertigo
<i>Ding Xian Wan</i> (Arrest Seizures Pill)		Treats seizures and epilepsy

Ban Xia Bai Zhu Tian Ma Tang (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction) dries dampness, dissolves phlegm, smoothes the Liver, and subdues Liver wind. In addition to the usual phlegm manifestations, headache, dizziness, and vertigo caused by Liver wind rising can also be seen.

Ding Xian Wan (Arrest Seizures Pill) eliminates phlegm and subdues Liver wind. It primarily treats rising of Liver wind and phlegm-heat. Clinical manifestations include sudden onset of seizures and epilepsy, semi-unconsciousness or complete loss of consciousness, tonic-clonic seizures, upward-rolling of the eyes, deviation of the mouth, involuntary salivation or dripping saliva, and *dian kuang* (mania and withdrawal).

Chapter 19

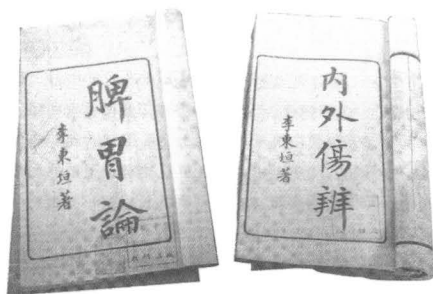

— Reducing, Guiding, and Dissolving Formulas

李杲 Lǐ Gǎo

李杲 Lǐ Gǎo, also known as
李东垣 Lǐ Dōng-Héng, 1180 – 1251.

李杲 Lǐ Gǎo

脾胃論 *Pi Wei Lun* (Discussion of the Spleen and Stomach) and
內外傷辨惑論 *Nei Wai Shang Bian Huo Lun* (Clarifying Doubts
about Injury from Internal and External Causes).

Li Gao, also known as Li Dong-Heng, was born into a very wealthy family. Yet, unlike many of the very rich, he never hesitated to share his wealth to help those who were less fortunate during times of famine from drought or flood. However, no amount of money helped his mother when she was seriously ill. She was seen by numerous physicians, all of whom made conflicting diagnoses, and prescribed differing treatments. Li blamed himself for not knowing medicine, and watched helplessly as his mother's health continued to deteriorate and she eventually died. Li vowed to study and practice medicine, so no others would ever have to die from inadequate care.

Li Gao is best known for treating disorders of the Spleen and Stomach. He believed that the Spleen and Stomach are the source of *yuan* (source) *qi*, and adequate *yuan* (source) *qi* is the key to health. Conversely, when the Spleen and Stomach are deficient, *yuan* (source) *qi* is weakened and diseases begin to surface. He proposed that three main factors damage the Spleen and Stomach: 1) inappropriate diet, 2) excessive physical labor, and 3) unbalanced emotions. From this base of understanding, Li demonstrated that damage to the Spleen and Stomach contributed to the rise of hundreds of different disorders. Li specialized in using tonic herbs to selectively supplement the Spleen and Stomach, and developed the famous formula *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction).

Li Gao wrote many books throughout his life. The three most well-known are 脾胃論 *Pi Wei Lun* (Discussion of the Spleen and Stomach), 蘭室秘藏 *Lan Shi Mi Cang* (Secrets from the Orchid Chamber) and 內外傷辨惑論 *Nei Wai Shang Bian Huo Lun* (Clarifying Doubts about Injury from Internal and External Causes). Many formulas from these references are still used today, such as:

- *Run Chang Wan* (Moisten the Intestines Pill)
- *Qing Wei San* (Clear the Stomach Powder)
- *Sheng Mai San* (Generate the Pulse Powder)
- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction)
- *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood)
- *Hou Po Wen Zhong Tang* (Magnolia Bark Decoction for Warming the Middle)
- *Tian Tai Wu Yao San* (Top-Quality Lindera Powder)
- *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness)
- *Dang Gui Nian Tong Tang* (Tangkuei Decoction to Lift the Pain)
- *Zhi Shi Dao Zhi Wan* (Immature Bitter Orange Pill to Guide Out Stagnation)
- *Zhi Shi Xiao Pi Wan* (Immature Bitter Orange Pill to Reduce Focal Distention)
- *Zhi Zhu Wan* (Immature Bitter Orange and Atractylodes Macrocephala Pill)

Chapter 19 — Overview

— Reducing, Guiding, and Dissolving Formulas

Definition: Reducing, guiding, and dissolving formulas consist of herbs that reduce (digest) foods, guide out stagnation, and dissolve accumulations. These formulas generally treat food stagnation, abdominal rigidity, and various types of stagnation, accumulation, and masses. This method of treatment is known as *xiao fa* (reducing), one of the *ba fa* (eight treatment methods) described in the *Huang Di Nei Jing* (Yellow Emperor's Inner Classic) in the first or second century, A.D.

Distention may occur due to prolonged accumulation and stagnation of qi, blood, cold, heat, food, or phlegm.

Reducing, guiding, and dissolving formulas treat two main types of disorders: food stagnation due to indigestion and distention due to accumulation.

- Food stagnation usually occurs as a result of inappropriate diet with overindulgence in foods that damage the Spleen and Stomach, or constitutional Spleen and Stomach deficiencies with inability to digest foods. Under either circumstance, two types of herbs are generally prescribed at the same time: herbs that promote digestion of foods and herbs that strengthen the Spleen and Stomach.
- Distention may occur due to prolonged accumulation and stagnation of qi, blood, cold, heat, food, or phlegm. Because the feeling of distention may be caused by many different types of accumulation and stagnation, it is often necessary to add herbs to activate the qi and blood circulation, dispel dampness and phlegm, soften masses, and relieve distention and fullness.

Note: Reducing, guiding, and dissolving formulas and downward draining formulas are both used to dispel abnormal accumulation in the interior. However, reducing, guiding, and dissolving formulas are mild in nature, and are suitable for treating chronic syndromes with mild symptoms. In addition, these formulas are most effective for hardness and nodules that cannot be quickly eliminated, but require long-term use of herbs to gradually soften and dissolve the mass. Downward draining formulas, on the other hand, are drastic in nature, and should be reserved only for acute syndromes with severe symptoms. These formulas are most useful in treating accumulations that can and must be purged immediately and quickly, such as acute constipation or intestinal obstruction.

SUBCATEGORIES OF ACTION

Reducing, guiding, and dissolving formulas are divided into two subcategories to accurately differentiate the nature of the disorders and the characteristics of the corresponding formulas.

1. Reducing, Guiding, and Dissolving Formula that Treats Food Stagnation

These formulas commonly treat food stagnation with clinical manifestations of chest and epigastric fullness and distention, belching, acid regurgitation with a foul smell, abdominal pain, nausea, vomiting, and diarrhea. Herbs commonly used to treat food stagnation include *Shan Zha* (Fructus Crataegi), *Shen Qu* (Massa Fermentata), and *Lai Fu Zi* (Semen Raphani). Exemplar formulas include *Bao He Wan* (Preserve Harmony Pill) and *Zhi Shi Dao Zhi Wan* (Immature Bitter Orange Pill to Guide Out Stagnation).

Spleen and Stomach deficiencies and food stagnation often occur together, because either pre-existing deficiencies of the Spleen and Stomach contribute to food stagnation, or prolonged food stagnation damages the Spleen and Stomach. In these cases, it is necessary to use

Food stagnation, abdominal rigidity, accumulation and masses cannot be quickly purged outward or drained downwards. They must be slowly reduced and dissolved in size, and gently guided out.

Chapter 19 — Overview

qi-tonifying herbs to strengthen the Spleen and Stomach and reducing herbs to treat food stagnation at the same time. The emphasis on tonifying or reducing may be adjusted according to the constitution of the patient and the severity of the food stagnation. Commonly used herbs that strengthen the Spleen and Stomach include *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodes Macrocephalae) and *Fu Ling* (Poria). Exemplar formulas include *Jian Pi Wan* (Strengthen the Spleen Pill) and *Zhi Zhu Wan* (Immature Bitter Orange and Atractylodes Macrocephala Pill).

Use of decoction is not appropriate. Stagnation and accumulation in these cases can only be slowly moved, not quickly purged by immediate and potent decoctions.

2. Reducing, Guiding, and Dissolving Formula that Relieves Distention

This type of formula is used mainly for distention, accompanied by signs and symptoms of general accumulation and stagnation, such as epigastric and abdominal fullness, immobile masses in the abdomen and hypochondrium, poor appetite, decreased intake of food, and wasting of muscles. Optimal treatment for this condition includes use of herbs that activate qi circulation, invigorate blood circulation, resolve dampness, dissolve phlegm and soften hardness. A representative formula is *Zhi Shi Xiao Pi Wan* (Immature Bitter Orange Pill to Reduce Focal Distention).

CAUTIONS / CONTRAINDICATIONS

- Reducing, guiding, and dissolving formulas are generally given in pill form to gradually treat food stagnation and relieve distention. The use of decoction in these cases is not appropriate because the stagnation and accumulation can only be slowly reduced, guided out, or dissolved, not quickly purged out by the immediate, potent actions of a decoction.
- Reducing, guiding, and dissolving formulas are relatively mild, but they nonetheless consume qi and may cause weakness and deficiency with long-term use. Therefore, these formulas should be used with caution in individuals who have underlying weakness and deficiency.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Reducing, guiding, and dissolving formulas are commonly used to treat gastrolithiasis, cholelithiasis and various gastrointestinal disorders.

While reducing, guiding, and dissolving formulas commonly treat gastrointestinal disorders, they also effectively treat gastrolithiasis and cholelithiasis.

- **Gastrolithiasis and cholelithiasis:** Pharmacological effects demonstrated by these herbs and formulas include increased production of gastric acid,¹ increased production of bile acid,² and increased intestinal peristalsis.³ Clinically, these formulas have been used successfully to treat digestive disorders such as indigestion,^{4,5} anorexia,⁶ intestinal obstruction,⁷ stenosis of the colon and rectum,⁸ chronic gastritis,⁹ atrophic gastritis,¹⁰ constipation,¹¹ and acute abdomen.¹² Exemplar formulas that treat gastrointestinal disorders include *Bao He Wan* (Preserve Harmony Pill), *Zhi Shi Dao Zhi Wan* (Immature Bitter Orange Pill to Guide Out Stagnation), and *Zhi Zhu Wan* (Immature Bitter Orange and Atractylodes Macrocephala Pill).
- **Gastrolithiasis and cholelithiasis:** Reducing, guiding, and dissolving formulas can also be used to treat stomach and gallbladder stones.^{13,14} The exact mechanisms of action are unclear, but can probably be attributed to the ability of these herbs and formulas to stimulate the production and release of gastric and bile acids, increase gastric emptying time, and increase intestinal peristalsis.^{15,16} Exemplar formulas that treat stomach and gallbladder stones include *Bao He Wan* (Preserve Harmony Pill) and *Zhi Shi Xiao Pi Wan* (Immature Bitter Orange Pill to Reduce Focal Distention).

Section 1

消食化积剂

— Reducing, Guiding, and Dissolving Formulas
that Treat Food Stagnation

Bǎo Hé Wán (Preserve Harmony Pill)

保和丸

Pinyin Name: *Bao He Wan*

Literal Name: Preserve Harmony Pill

Alternate Names: Harmony-Preserving Pill, Citrus and Crataegus Formula

Original Source: *Dan Xi Xin Fa* (Teachings of [Zhu] Dan-Xi) by Zhu Zhen-Heng in 1481

COMPOSITION

<i>Shan Zha</i> (Fructus Crataegi)	180g [18g]
<i>Shen Qu</i> (Massa Fermentata)	60g [6g]
<i>Lai Fu Zi</i> (Semen Raphani)	30g [6g]
<i>Ban Xia</i> (Rhizoma Pinelliae)	90g [9g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	30g [6g]
<i>Fu Ling</i> (Poria)	90g [9g]
<i>Lian Qiao</i> (Fructus Forsythiae)	30g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder, and form into small pills. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 70-80 pills between meals with warm, boiled water. Today, this formula may be taken in pills or decoction. For pills, grind the herbs into powder and form into pills with water. Take 6-9g of pills per dose with warm, boiled water. For decoction, use the suggested doses in brackets.

CHINESE THERAPEUTIC ACTIONS

Reduces food stagnation and harmonizes the Stomach

CLINICAL MANIFESTATIONS

Food stagnation and indigestion: epigastric and abdominal fullness, distention and pain; acid regurgitation, belching with a rotten smell, nausea, vomiting, possible diarrhea, aversion to food, thick, greasy tongue coating, and a slippery pulse.

CLINICAL APPLICATIONS

General gastrointestinal disorders, such as atrophic gastritis, gastrolithiasis, indigestion, acid regurgitation,

nausea, vomiting, belching, diarrhea, abdominal pain, and poor appetite.

EXPLANATION

Bao He Wan (Preserve Harmony Pill) is one of the most commonly used formulas to treat all types of food stagnation. This condition is usually caused by inappropriate diet, overeating, or excessive drinking. Excessive intake of food that remains undigested will stagnate in the stomach and impair the digestive function. Food stagnation causes qi stagnation, which may result in fullness, distention, and pain in the epigastrium and abdomen. When Stomach qi stagnates and cannot descend, acid regurgitation, nausea, and vomiting occur. When Spleen qi stagnates and cannot ascend, diarrhea results.

Shan Zha (Fructus Crataegi) functions as the chief herb to digest any kind of food stagnation; it is especially effective in dissolving meat (protein) and fatty, greasy foods. *Shen Qu* (Massa Fermentata) dissolves food stagnation and strengthens the Spleen; it is effective for the digestion of alcohol and spoiled or rotten food that arise from chronic food stagnation. *Lai Fu Zi* (Semen Raphani) guides qi downward; it is best for digesting starch and

Bǎo Hé Wán (Preserve Harmony Pill)

Bao He Wan (Preserve Harmony Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Food stagnation	<ul style="list-style-type: none">• Indigestion with epigastric and abdominal fullness, distention, and pain: food stagnation• Acid regurgitation, belching, aversion to food, nausea, vomiting: reversed flow of Stomach qi• Thick, greasy tongue coating and slippery pulse: food stagnation	<ul style="list-style-type: none">• Reduces food stagnation• Harmonizes the Stomach	<ul style="list-style-type: none">• <i>Shan Zha</i> (Fructus Crataegi) promotes digestion of foods (meat and fatty, greasy foods).• <i>Shen Qu</i> (Massa Fermentata) strengthens the Spleen and dissolves foods (alcohol and spoiled or rotten foods).• <i>Lai Fu Zi</i> (Semen Raphani) guides qi downward and dissolves foods (starch and carbohydrates).• <i>Ban Xia</i> (Rhizoma Pinelliae) and <i>Chen Pi</i> (Pericarpium Citri Reticulatae) activate qi circulation and harmonize the Stomach.• <i>Fu Ling</i> (Poria) strengthens the Spleen and dispels dampness.• <i>Lian Qiao</i> (Fructus Forsythiae) clears heat associated with food stagnation.

carbohydrates. Combined together, these three herbs can treat any type of food stagnation. *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae) activate qi circulation and harmonize the Stomach to relieve nausea and vomiting. *Fu Ling* (Poria) dispels dampness, strengthens the Spleen, and stops diarrhea. Food stagnation is often accompanied by heat, which is cleared by *Lian Qiao* (Fructus Forsythiae).

MODIFICATIONS

- For severe food stagnation and constipation, add *Bing Lang* (Semen Arecae), *Zhi Shi* (Fructus Aurantii Immaturus), *Da Fu Pi* (Pericarpium Arecae) and *Da Huang* (Radix et Rhizoma Rhei).
- For food stagnation turning into heat, evident by a red tongue body and a yellow tongue coating, and a rapid pulse, add *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae).
- For indigestion accompanied by an exterior condition (e.g., a superficial, rapid pulse and a white, greasy tongue coating), add *Huo Xiang* (Herba Agastaches), *Zi Su Ye* (Folium Perillae), and *Jin Yin Hua* (Flos Lonicerae Japonicae).
- With severe nausea and vomiting, add *Sha Ren* (Fructus Amomi) and *Huo Xiang* (Herba Agastaches).
- With vomiting and diarrhea, add *Huo Xiang* (Herba Agastaches) and *Pei Lan* (Herba Eupatorii).
- To enhance the overall digestive function, add *Mai Ya* (Fructus Hordei Germinatus), *Gu Ya* (Fructus Setariae Germinatus), and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).

CAUTIONS / CONTRAINDICATIONS

- *Bao He Wan* is not suitable for food stagnation due to Spleen deficiency.
- Avoid oily, greasy, or fatty foods while taking this formula.
- This formula should be used with caution during pregnancy.¹

CLINICAL STUDIES AND RESEARCH

1. **Indigestion:** According to one study, *Bao He Wan* effectively treated indigestion in 69 children. Those with indigestion characterized by food stagnation were treated with only *Bao He Wan*. Additions to this base formula included *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for chronic diarrhea with deficiency; and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and *He Ye* (Folium Nelumbinis) for poor appetite associated with diarrhea and/or nausea. Of 69 patients, the study reported complete recovery in 61 cases, improvement in 5 cases, and no effect in 3 cases. The overall effectiveness was 95.65%.²
2. **Atrophic gastritis:** One study reported a marked effect using modified *Bao He Wan* to treat 34 patients with chronic atrophic gastritis. In addition to this formula, modifications were made by adding *Huang Qi* (Radix Astragali) and *Tai Zi Shen* (Radix Pseudostellariae) for qi deficiency; *Gui Zhi* (Ramulus Cinnamomi) and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) for presence of cold; *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Tan Xiang* (Lignum Santali Albi) for blood stagnation; and *Zhe Shi* (Haematitum) for belching. The herbs were cooked in water, and the decoction given in two equally-divided doses, for 3 months per course of treatment. The study reported significant improvement in 25 of 34 cases.³

Bǎo Hé Wán (Preserve Harmony Pill)

3. **Gastrolithiasis:** One study reported that the combination of *Bao He Wan* and *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction) was effective in treating stomach stones in 29 of 33 patients (18 males and 15 females). The herbal formula contained charred *Shan Zha* (Fructus Crataegi), charred *Shen Qu* (Massa Fermentata), charred *Mai Ya* (Fructus Hordei Germinatus), *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli), *Ban Xia* (Rhizoma Pinelliae), *Chen Pi* (Pericarpium Citri Reticulatae), *Hou Po* (Cortex Magnoliae Officinalis), *Zhi Shi* (Fructus Aurantii Immaturus), and *Da Huang* (Radix et Rhizoma Rhei). In addition, *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), and *Bing Lang* (Semen Arecae) were added for individuals who were otherwise healthy, as they are too strong for individuals with deficiencies. The duration of treatment ranged from 20–30 days. The largest stone identified was 12 x 20 cm.⁴

HERB-DRUG INTERACTION

Chemotherapy-induced gastrointestinal side-effects:

Use of modified *Bao He Wan* relieved gastrointestinal side effects associated with chemotherapy in cancer patients in one study. In addition to *Bao He Wan*, modifications were made by adding *Huang Qi* (Radix Astragali) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for fatigue and poor appetite; *Da Huang* (Radix et Rhizoma Rhei) [processed with grain-based liquor] for yellow tongue coating with constipation; *Sha Shen* (Radix Glehniae seu Adenophorae), *Mai Dong* (Radix Ophiopogonis), and *Shi Hu* (Caulis Dendrobii) for thirst and red tongue body with dry tongue coating. The treatment protocol was to administer the herbs in decoction for 10 days. Of 110 patients, 105 had complete recovery and 5 had improvement.⁵

TOXICOLOGY

According to one study on acute toxicology, administration of *Bao He Wan* at 120 g/kg via oral ingestion twice daily for 7 days did not contribute to any abnormal reactions in mice. Similarly, administration of this formula in adults at 650 times the normal dose did not contribute to any abnormal reactions. Furthermore, in one study on chronic toxicology, daily administration of this formula at 8, 16 and 32 g/kg one time daily for 4 weeks caused no abnormalities in blood tests or internal organs such as liver, kidneys, heart, stomach, and intestines.⁶

RELATED FORMULAS

Dà Ān Wán (Great Tranquility Pill)

大安丸

Pinyin Name: *Da An Wan*

Literat Name: Great Tranquility Pill

Original Source: *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas) by Wang Ang in 1682

<i>Shan Zha</i> (Fructus Crataegi)	180g [18g]
<i>Shen Qu</i> (Massa Fermentata)	60g [6g]
<i>Ban Xia</i> (Rhizoma Pinelliae)	90g [9g]

Da Huang (Radix et Rhizoma Rhei)

Shan Zha Hua Tan Tang (Crataegus Decoction to Transform Phlegm) has been used to treat accumulation of dampness, turbidity, and phlegm in the body. It dissolves dampness, eliminates phlegm, and invigorates blood circulation. Clinical manifestations include fatigue, lack of energy, a feeling of heaviness in the body and extremities, and obesity. Today, it is commonly used to treat individuals with a generalized condition of obesity with high cholesterol and triglycerides.

AUTHORS' COMMENTS

Bao He Wan is designed for mild and moderate cases of food stagnation and indigestion with *zheng* (upright) *qi* not yet damaged. Key signs and symptoms include epigastric and abdominal fullness, distention and pain, acid regurgitation, belching with a rotten smell, nausea, vomiting, aversion to food, and a slippery pulse.

Classic texts use the term “dissolve” to describe herbs that treat indigestion and food stagnation. However, these herbs do not literally “dissolve” foods; rather, they stimulate the gastrointestinal tract and facilitate food digestion, thereby reducing accumulation and stagnation.

(Immature Bitter Orange Pill to Guide Out Stagnation)

枳實導滯丸 枳实导滞丸

Pinyin Name: *Zhi Shi Dao Zhi Wan*

Literal Name: Immature Bitter Orange Pill to Guide Out Stagnation

Original Source: *Nei Wai Shang Bian Huo Lun* (Clarifying Doubts about Injury from Internal and External Causes) by Li Gao in 1247

COMPOSITION

<i>Da Huang</i> (Radix et Rhizoma Rhei)	30g [9g]
<i>Zhi Shi</i> (Fructus Aurantii Immaturus), <i>chao</i> (dry-fried) with bran	15g [9g]
<i>Huang Lian</i> (Rhizoma Coptidis)	9g [6g]
<i>Huang Qin</i> (Radix Scutellariae)	9g [6g]
<i>Fu Ling</i> (Poria)	9g [6g]
<i>Ze Xie</i> (Rhizoma Alismatis)	6g [6g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	9g [6g]
<i>Shen Qu</i> (Massa Fermentata), <i>chao</i> (dry-fried)	15g [9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder, and form into small pills with water. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 50-70 pills per dose between meals with warm water. Adjust the dose depending on the severity of the condition. Today, this formula may be taken in pills or decoction. For pills, grind the herbs into powder and form into small pills with water. Take 6-9g of pills per dose with warm, boiled water twice daily. For decoction, use the suggested doses in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Reduces, guides out, and dissolves stagnation
2. Clears heat and dispels dampness

CLINICAL MANIFESTATIONS

Food stagnation and damp-heat accumulation in the Stomach and Intestines: fullness and pain in the epigastric and abdominal regions, diarrhea or constipation, scanty, dark urine, a yellow, greasy tongue coating, and a deep, forceful pulse.

CLINICAL APPLICATIONS

Acute or chronic gastroenteritis, diarrhea, dysentery, hepatitis, liver cirrhosis, urinary tract infection, chronic constipation, and trigeminal pain.

EXPLANATION

Zhi Shi Dao Zhi Wan (Immature Bitter Orange Pill to Guide Out Stagnation) treats food stagnation and

damp-heat accumulation in the Stomach and Intestines. Stagnation of food and damp-heat may lead to qi stagnation, which may result in fullness and pain in the epigastric and abdominal regions. Diarrhea may occur as a result of indigestion and formation of damp-heat in the Intestines, while constipation may occur as a result of interior heat drying body fluids. Scanty, dark urine may result from consumption of body fluids by interior heat. Yellow, greasy tongue coating and a deep, forceful pulse indicate stagnation of food and damp-heat.

This formula has *Da Huang* (Radix et Rhizoma Rhei) to purge stagnant food and damp-heat, and to remove any harmful retention through defecation. *Zhi Shi* (Fructus Aurantii Immaturus) breaks down qi and food stagnation to reduce epigastric and abdominal fullness and pain. *Huang Lian* (Rhizoma Coptidis) and *Huang Qin* (Radix Scutellariae) clear heat, dry dampness, and relieve diarrhea. *Fu Ling* (Poria) and *Ze Xie* (Rhizoma Alismatis) regulate water circulation and dispel dampness. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen and dries dampness. In addition, *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) prevents the bitter and cold herbs from damaging the body. *Shen Qu* (Massa Fermentata) helps to digest stagnant food and harmonizes the middle *jiao*.

MODIFICATIONS

- For more severe fullness, distention, and rectal tenesmus due to qi stagnation, add *Mu Xiang* (Radix Aucklandiae) and *Bing Lang* (Semen Arecae).

Zhǐ Shí Dǎo Zhì Wán

(Immature Bitter Orange Pill to Guide Out Stagnation)

Zhi Shi Dao Zhi Wan (Immature Bitter Orange Pill to Guide Out Stagnation)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Food stagnation and damp-heat accumulation in the Stomach and Intestines	<ul style="list-style-type: none"> • Fullness and pain in the epigastric and abdominal regions: food and qi stagnation • Diarrhea: damp-heat in the Intestines • Constipation: interior heat drying body fluids • Scanty, dark urine: interior heat consuming body fluids • Yellow, greasy tongue coating with a deep, forceful pulse: damp-heat in the interior 	<ul style="list-style-type: none"> • Reduces, guides out, and dissolves stagnation • Clears heat and dispels dampness 	<ul style="list-style-type: none"> • <i>Da Huang</i> (Radix et Rhizoma Rhei) purges the stagnant food and clears excess heat. • <i>Zhi Shi</i> (Fructus Aurantii Immaturus) breaks up qi and food stagnation. • <i>Huang Lian</i> (Rhizoma Coptidis) and <i>Huang Qin</i> (Radix Scutellariae) clear heat and dry dampness. • <i>Fu Ling</i> (Poria) and <i>Ze Xie</i> (Rhizoma Alismatis) regulate water circulation and dispel dampness. • <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) strengthens the Spleen and dries dampness. • <i>Shen Qu</i> (Massa Fermentata) helps to digest stagnant food and harmonizes the middle <i>jiao</i>.

- With diarrhea and dysentery due to toxic heat, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Bai Tou Weng* (Radix Pulsatillae).
- With nausea and vomiting, add *Zhu Ru* (Caulis Bambusae in Taenia).

CAUTIONS / CONTRAINDICATIONS

- *Zhi Shi Dao Zhi Wan* is contraindicated in patients with loose stools or diarrhea who do not have food stagnation. Such patients have deficient conditions without excess, and the use of formulas that contain *Da Huang* (Radix et Rhizoma Rhei) is not appropriate as it may cause damages to the body.
- This formula should be used with caution in patients with food stagnation and indigestion due to Spleen deficiency, as many herbs in this formula are bitter and cold to clear heat, and may further injure the Spleen.
- Use of this formula is contraindicated during pregnancy.
- Avoid consumption of raw and cold foods while taking this formula.¹

CLINICAL STUDIES AND RESEARCH

1. Chronic constipation: One study evaluated the effectiveness of treating chronic constipation in 60 patients (mostly women, with history of chronic constipation for up to 20 years) via herbs and control group. The herb group had 31 patients, and the control group had 29 patients. The patients in the herb group were given *Zhi Shi Dao Zhi Wan* for 5 days. Of 31 patients in the herb

group, 25 had significant improvement, 3 had moderate improvement, and 3 had no effect (90% effectiveness). Of 29 patients in the control group, 12 had significant improvement, 8 had moderate improvement, and 9 had no effect (70% effectiveness). The difference between the two groups was statistically significant ($p < 0.05$).² The treatment protocol for the control group was unavailable at the time of publication.

2. Trigeminal pain: Administration of modified *Zhi Shi Dao Zhi Wan* was associated with good results in treating trigeminal pain in 11 patients (4 males and 7 females, between 5-60 years of age, 1 month to 21 years history of illness). In addition to the base formula, modifications included increasing the dose of *Da Huang* (Radix et Rhizoma Rhei) for constipation; adding *Di Huang* (Radix Rehmanniae) for yin deficiency; and *Tao Ren* (Semen Persicae) and *Hong Hua* (Flos Carthami) for chronic illness with blood stagnation. Of 11 patients, the study reported recovery (complete relief of pain) in 6 cases, improvement (partial relief of pain) in 4 cases, and no effect in 1 case.³

Pinyin Name: *Mu Xiang Bing Lang Wan*

Literal Name: Aucklandia and Betel Nut Pill

Alternate Name: Saussurea and Areca Seed Formula, Aucklandia and Areca Seed Formula

Original Source: *Ru Men Shi Qin* (Confucians' Duties to their Parents) by Zhang Cong-Zheng in 1228

COMPOSITION

<i>Mu Xiang</i> (Radix Aucklandiae)	30g [3g]
<i>Bing Lang</i> (Semen Arecae)	30g [3g]
<i>Qian Niu Zi</i> (Semen Pharbitidis)	120g [10g]
<i>Da Huang</i> (Radix et Rhizoma Rhei)	90g [5g]
<i>Qing Pi</i> (Pericarpium Citri Reticulatae Viride)	30g [3g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	30g [3g]
<i>Xiang Fu</i> (Rhizoma Cyperi), <i>chao</i> (dry-fried)	120g [10g]
<i>E Zhu</i> (Rhizoma Curcumae), <i>shao</i> (burned)	30g [3g]
<i>Huang Lian</i> (Rhizoma Coptidis), <i>chao</i> (dry-fried) with bran	30g [3g]
<i>Huang Bo</i> (Cortex Phellodendri Chinensis)	90g [5g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder, and form into small pills with water. The pills should resemble small beans in size. Take 30 pills [6g] after meals with a decoction made from *Sheng Jiang* (Rhizoma Zingiberis Recens). Today, this formula may be taken as pills or decoction. For pills, grind the herbs into powder and form into small pills with water, and take 3-6g of pills per dose with warm, boiled water twice daily. For decoction, use the suggested doses in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Activates qi circulation and guides out stagnation
2. Attacks accumulation and purges heat

CLINICAL MANIFESTATIONS

Food stagnation and damp-heat accumulation: fullness, distention, and pain in the epigastric and abdominal regions, dysentery with red (blood) or white (mucus) stools, rectal tenesmus, constipation, a yellow, greasy tongue coating, and a deep, excess pulse.

CLINICAL APPLICATIONS

Dysentery, gastroenteritis, stenosis of colon and rectum, acute abdomen, liver cirrhosis with ascites, chronic nephritis, and tuberculous peritonitis.

EXPLANATION

Mu Xiang Bing Lang Wan (Aucklandia and Betel Nut Pill) treats qi stagnation and damp-heat accumulation due to food stagnation. Food stagnation can cause qi stagnation,

which may lead to fullness, distention, and pain in the epigastric and abdominal regions, as well as constipation. Food stagnation may also lead to damp-heat accumulation, which often descends to the lower *jiao* to cause dysentery and tenesmus. A yellow, greasy tongue coating suggests damp-heat in the interior, and the deep, excess pulse is a sign of constipation and food stagnation.

In this formula, *Mu Xiang* (Radix Aucklandiae) and *Bing Lang* (Semen Arecae) activate qi circulation and break up stagnation to relieve epigastric and abdominal fullness, distention, and pain. *Qian Niu Zi* (Semen Pharbitidis) and *Da Huang* (Radix et Rhizoma Rhei) purge damp-heat and reduce stagnation and accumulation. *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Chen Pi* (Pericarpium Citri Reticulatae) activate qi circulation to relieve qi stagnation. *Xiang Fu* (Rhizoma Cyperi) and *E Zhu* (Rhizoma Curcumae) smooth the qi flow to relieve pain. *Huang Lian* (Rhizoma Coptidis) and *Huang Bo* (Cortex Phellodendri Chinensis) clear heat and dry dampness to stop dysentery.

MODIFICATIONS

- With qi stagnation in the chest and food retention in the abdomen, add *Zhi Qiao* (Fructus Aurantii).
- For severe constipation, add *Mang Xiao* (Natrii Sulfas) and *Zhi Qiao* (Fructus Aurantii).
- For damp-heat dysentery, remove *Chen Pi* (Pericarpium Citri Reticulatae), *E Zhu* (Rhizoma Curcumae), *Qian Niu Zi* (Semen Pharbitidis), and add *Qin Pi* (Cortex Fraxini) and *Bai Tou Weng* (Radix Pulsatillae).

Mù Xiāng Bīng Láng Wán (Aucklandia and Betel Nut Pill)

Mu Xiang Bing Lang Wan (Aucklandia and Betel Nut Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Food stagnation and damp-heat accumulation	<ul style="list-style-type: none">• Fullness, distention, and pain in the epigastric and abdominal regions: food and qi stagnation• Dysentery and tenesmus with red [blood] or white [mucus] stools: damp-heat accumulation in the lower <i>jiao</i>• Constipation: food stagnation• Yellow greasy tongue coating: damp-heat in the interior• Deep, excess pulse: excess heat condition in the interior	<ul style="list-style-type: none">• Activates qi circulation and guides out stagnation• Attacks accumulation• Sedates heat	<ul style="list-style-type: none">• <i>Mu Xiang</i> (Radix Aucklandiae) and <i>Bing Lang</i> (Semen Arecae) activate qi circulation and break up stagnation.• <i>Qian Niu Zi</i> (Semen Pharbitidis) and <i>Da Huang</i> (Radix et Rhizoma Rhei) purge damp-heat and reduce stagnation and accumulation.• <i>Qing Pi</i> (Pericarpium Citri Reticulatae Viride) and <i>Chen Pi</i> (Pericarpium Citri Reticulatae) activate qi circulation to relieve qi stagnation.• <i>Xiang Fu</i> (Rhizoma Cyperi) and <i>E Zhu</i> (Rhizoma Curcumae) smooth the qi flow to relieve pain.• <i>Huang Lian</i> (Rhizoma Coptidis) and <i>Huang Bo</i> (Cortex Phellodendri Chinensis) clear heat and dry dampness.

- With phlegm accumulation, add *Ban Xia* (Rhizoma Pinelliae) and *Fu Ling* (Poria).
 - With damp-heat accumulation, add *Yin Chen* (Herba Artemisiae Scopariae) and *Zhi Zi* (Fructus Gardeniae).
2. **Acute abdomen:** Administration of *Mu Xiang Bing Lang Wan* was reported to be effective for treatment of acute abdomen.³

CAUTIONS / CONTRAINDICATIONS

- *Mu Xiang Bing Lang Wan* contains potent herbs to activate qi circulation, clear heat, and eliminate stagnation and accumulation. It should be reserved for patients with excess conditions without underlying deficiencies. The use of this formula is contraindicated in deficient patients (especially those with Spleen and Stomach deficiencies), as this formula will injure *zheng* (upright) *qi* and complicate the illness.
- This formula is contraindicated during pregnancy. It should be used with caution in geriatric individuals with generalized weakness and deficiencies.¹

CLINICAL STUDIES AND RESEARCH

1. **Stenosis of colon and rectum:** Administration of 10g of *Mu Xiang Bing Lang Wan* twice daily in 23 patients with stenosis of colon and rectum was associated with good results. Depending on the severity of the condition, the duration of treatment ranged from 3 months to 1 year. Of 23 patients, 13 had complete recovery, 7 had improvement, and 3 had no response. The overall effectiveness was 87%.²

AUTHORS' COMMENTS

Mu Xiang Bing Lang Wan is one of the stronger formulas for dispelling stagnation; it treats cases involving epigastric and abdominal distention and pain.

Zhi Shi Dao Zhi Wan (Immature Bitter Orange Pill to Guide Out Stagnation) and *Mu Xiang Bing Lang Wan* both treat food stagnation with damp-heat accumulation.

- *Zhi Shi Dao Zhi Wan* has a stronger action to dispel dampness. It is used for mild to moderate cases of stagnation and accumulation, with abdominal distention but not fullness.
- *Mu Xiang Bing Lang Wan* has a stronger action to activate qi and treat qi stagnation. It is used for more serious cases of stagnation and accumulation, with severe abdominal fullness, distention, and pain.

(Immature Bitter Orange and Atractylodes Macrocephala Pill)

枳朮丸
枳朮丸

Pinyin Name: *Zhi Zhu Wan*

Literal Name: Immature Bitter Orange and Atractylodes Macrocephala Pill

Original Source: *Nei Wai Shang Bian Huo Lun* (Clarifying Doubts about Injury from Internal and External Causes) by Li Gao in 1247

COMPOSITION

Bai Zhu (Rhizoma Atractylodis Macrocephalae)

60g [10g]

Zhi Shi (Fructus Aurantii Immaturus), *chao* (dry-fried) with bran

30g [5g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder, and form into small pills with cooked rice wrapped in *He Ye* (Folium Nelumbinis). The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 50 pills per dose with warm, boiled water any time during the day. Today, this formula may be taken in pills or decoction. For pills, grind the herbs into powder and form into small pills with water, and take 6-9g of pills per dose twice daily with warm, boiled water or with a decoction made from *He Ye* (Folium Nelumbinis). For decoction, use the suggested doses in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Strengthens the Spleen
2. Reduces distention

CLINICAL MANIFESTATIONS

Spleen qi deficiency with qi stagnation and food retention: distention and fullness in the chest and epigastric regions, and decreased appetite.

CLINICAL APPLICATIONS

Gastric prolapse, rectal prolapse, chronic gastritis, anorexia, indigestion, and hepatitis.

EXPLANATION

Zhi Zhu Wan (Immature Bitter Orange and Atractylodes Macrocephala Pill) treats qi stagnation and food retention due to Spleen qi deficiency. If the Spleen qi is deficient, then food will not be digested properly, causing qi stagnation and food retention. The resulting symptoms would be distention and fullness of the chest and epigastrium and lack of appetite.

This formula contains *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) to strengthen the Spleen and dry dampness, and *Zhi Shi* (Fructus Aurantii Immaturus) to break up qi stagnation and remove food stagnation. Because the main purpose of this formula is to strengthen the Spleen to prevent further indigestion, the dose of *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) is twice that of *Zhi Shi* (Fructus Aurantii Immaturus). Finally, *He Ye* (Folium Nelumbinis) nourishes the Stomach and helps the Spleen ascend nutrients and clear yang.

MODIFICATIONS

- With Spleen deficiency or generalized weakness, add *Dang Shen* (Radix Codonopsis) and *Fu Ling* (Poria).
- With more food stagnation, add *Shan Zha* (Fructus Crataegi), *Shen Qu* (Massa Fermentata), and *Mai Ya* (Fructus Hordei Germinatus).

Zhi Zhu Wan (Immature Bitter Orange and Atractylodes Macrocephala Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs

Zhǐ Zhú Wán

(Immature Bitter Orange and Atractylodes Macrocephala Pill)

CAUTIONS / CONTRAINDICATIONS

While taking *Zhi Zhu Wan*, patients should avoid food that is raw, cold, and stimulating (not bland) in nature.

PHARMACOLOGICAL EFFECTS

1. **Gastrointestinal:** According to one study, *Zhi Zhu Wan* administered in decoction to dogs stimulated the smooth muscles of the gastrointestinal tract and increased its peristalsis.¹
2. **Cholagogic:** *Zhi Zhu Wan* has been shown to stimulate the production and release of bile acids in rats.²

CLINICAL STUDIES AND RESEARCH

1. **Anorexia:** Administration of *Zhi Zhu Wan* was associated with successful treatment of anorexia in 70 patients. The dose was 1g per dose for children between 1-3 years of age, 1.5g per dose for children between 4-5 years of age, and 2g per dose for children between 6-9 years of age. The herbs were given twice daily for 2 weeks per course of treatment.³
2. **Indigestion:** Administration of *Zhi Zhu Wan* was associated with good results for treating food retention and indigestion in children. The treatment protocol was to administer this formula in pills along with an herbal decoction made from *Chen Pi* (Pericarpium Citri Reticulatae), *Gu Ya* (Fructus Setariae Germinatus), and *Mai Ya* (Fructus Hordei Germinatus).⁴

RELATED FORMULAS

Zhi Shi (Fructus Aurantii Immaturus),
chao (dry-fried) with bran 7 pieces [12g]
Bai Zhu (Rhizoma Atractylodis Macrocephalae) 60g [6g]

The source text states to cook the herbs in 5 cups [1,000 mL] of water until it is reduced down to 3 cups [600 mL]. Take the warm, strained decoction in three equally-divided doses. *Zhi Zhu Tang* (Immature Bitter Orange and Atractylodes Macrocephala Decoction) has functions to activate qi circulation and reduce distention. Clinically, it is used for qi stagnation and water accumulation with a feeling of hardness and distention beneath the heart area.

Zhi Zhu Wan (Immature Bitter Orange and Atractylodes Macrocephala Pill) and *Zhi Zhu Tang* (Immature Bitter Orange and Atractylodes Macrocephala Decoction) are both designed to treat distention, and both formulas contain *Zhi Shi* (Fructus Aurantii Immaturus) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).

- *Zhi Zhu Wan* has a larger dose of *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) to strengthen the Spleen, and a smaller dose of *Zhi Shi* (Fructus Aurantii Immaturus) to reduce distention. Furthermore, it is given in pill form for sustained and moderate effect.
- *Zhi Zhu Tang* contains a higher dose of *Zhi Shi* (Fructus Aurantii Immaturus) to reduce distention, and a smaller dose of *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) to strengthen the Spleen. In addition, it is given in decoction for more potent and immediate effect.

Zhi Shi (Fructus Aurantii Immaturus),
chao (dry-fried) with bran 30g [5g]
Bai Zhu (Rhizoma Atractylodis Macrocephalae) 60g [10g]
Shen Qu (Massa Fermentata), *chao* (dry-fried) 30g [5g]
Mai Ya (Fructus Hordei Germinatus),
chao (dry-fried) 30g [5g]

The source text states to grind the ingredients into a fine powder, and form into small pills with cooked rice wrapped in *He Ye* (Folium Nelumbinis). The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 50 pills per dose with warm, boiled water on an empty stomach.

Qu Mai Zhi Zhu Wan (Medicated Leaven, Barley Sprout, Immature Bitter Orange, and Atractylodes Macrocephala Pill) is composed of *Zhi Zhu Wan* plus *Shen Qu* (Massa Fermentata) and *Mai Ya* (Fructus Hordei Germinatus). The main functions of this formula are to strengthen the Spleen and promote digestion. Clinically, it is often used for patients with inappropriate diet (overeating) that damages the Spleen and Stomach, which, in turn, causes

Zhǐ Zhú Wán

(Immature Bitter Orange and Atractylodes Macrocephala Pill)

food retention, phlegm stagnation, and epigastric and abdominal fullness and stifling sensations.

Jú Bàn Zhǐ Zhú Wán (Tangerine Peel, Pinellia, Immature Bitter Orange, and Atractylodes Macrocephala Pill)

橘半枳朮丸

橘半枳朮丸

Pinyin Name: Ju Ban Zhi Zhu Wan

Literal Name: Tangerine Peel, Pinellia, Immature Bitter Orange, and Atractylodes Macrocephala Pill

Original Source: *Yi Xue Ru Men* (Introduction to Medicine) by Li Ting in 1575

Zhi Shi (Fructus Aurantii Immaturus),

chao (dry-fried) with bran 30g [5g]

Bai Zhu (Rhizoma Atractylodis Macrocephalae) 60g [10g]

Chen Pi (Pericarpium Citri Reticulatae) 30g [5g]

Ban Xia (Rhizoma Pinelliae) 30g [5g]

The source text states to grind the ingredients into a fine powder, and form into small pills with cooked rice wrapped in *He Ye* (Folium Nelumbinis). The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 50-60 pills per dose with warm, boiled water on an empty stomach.

Ju Ban Zhi Zhu Wan (Tangerine Peel, Pinellia, Immature Bitter Orange and Atractylodes Macrocephala Pill) is composed of *Zhi Zhu Wan* plus *Chen Pi* (Pericarpium Citri Reticulatae) and *Ban Xia* (Rhizoma Pinelliae). This formula strengthens the Spleen to dissolve phlegm and regulate qi to relieve distention in the chest and epigastrium. Clinically, it may be used for patients who have Spleen qi deficiency due to an inappropriate diet, with phlegm accumulation, and a feeling of distention and a stifling sensation in the heart and chest regions.

Xiāng Shā Zhǐ Zhú Wán (Aucklandia, Amomum, Immature Bitter Orange, and Atractylodes Macrocephala Pill)

香砂枳朮丸

香砂枳朮丸

Pinyin Name: Xiang Sha Zhi Zhu Wan

Literal Name: Aucklandia, Amomum, Immature Bitter Orange, and Atractylodes Macrocephala Pill

Original Source: *She Sheng Mi Pou* (Secrets Investigations into Obtaining Health) by Hong Ji in 1638

Bai Zhu (Rhizoma Atractylodis Macrocephalae),

chao (dry-fried) with soil 480g

Zhi Shi (Fructus Aurantii Immaturus) 240g

Mu Xiang (Radix Aucklandiae) 30g

Sha Ren (Fructus Amomi) 30g

The source text states to grind the ingredients into a fine powder, and form into small pills with cooked rice wrapped in *He Ye* (Folium Nelumbinis). The pills should resemble *Jiao Mu* (Semen Zanthoxyli Bungeani) in size. Take 9g of pills per dose with warm, boiled water.

Xiang Sha Zhi Zhu Wan (Aucklandia, Amomum, Immature Bitter Orange, and Atractylodes Macrocephala Pill) is composed of *Zhi Zhu Wan* plus *Mu Xiang* (Radix Aucklandiae) and *Sha Ren* (Fructus Amomi). This formula strengthens the Spleen and activates qi. Clinically, it may be used for Spleen deficiency and qi stagnation characterized by symptoms such as decreased food intake, food stagnation, chronic indigestion, and a feeling of distention and oppression in the chest and epigastrium.

AUTHORS' COMMENTS

All five formulas listed above contain *Zhi Shi* (Fructus Aurantii Immaturus) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) to strengthen the Spleen and reduce distention. Their differences are as follows:

- *Zhi Zhu Wan* (Immature Bitter Orange and Atractylodes Macrocephala Pill) has a stronger function to strengthen the Spleen, and weaker effect to reduce distention. It is given in pill form for sustained effect and moderate potency.
- *Zhi Zhu Tang* (Immature Bitter Orange and Atractylodes Macrocephala Decoction) has a stronger effect to reduce distention, and a weaker effect to strengthen the Spleen. It is given in decoction form for more potent effect and faster onset of action.
- *Qu Mai Zhi Zhu Wan* (Medicated Leaven, Barley Sprout, Immature Bitter Orange, and Atractylodes Macrocephala Pill) contains *Shen Qu* (Massa Fermentata) and *Mai Ya* (Fructus Hordei Germinatus) to promote digestion of foods.
- *Ju Ban Zhi Zhu Wan* (Tangerine Peel, Pinellia, Immature Bitter Orange and Atractylodes Macrocephala Pill) contains *Chen Pi* (Pericarpium Citri Reticulatae) and *Ban Xia* (Rhizoma Pinelliae), and has extra functions to move qi and dissolve phlegm.
- *Xiang Sha Zhi Zhu Wan* (Aucklandia, Amomum, Immature Bitter Orange, and Atractylodes Macrocephala Pill) contains *Mu Xiang* (Radix Aucklandiae) and *Sha Ren* (Fructus Amomi), and has additional effect to regulate qi circulation and dry dampness.

COMPOSITION

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	45g [9g]
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>chao</i> (dry-fried)	75g [15g]
<i>Fu Ling</i> (Poria)	60g [10g]
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	22.5g [6g]
<i>Shan Yao</i> (Rhizoma Dioscoreae)	30g [6g]
<i>Rou Dou Kou</i> (Semen Myristicae), oil removed	30g [6g]
<i>Shan Zha</i> (Fructus Crataegi)	30g [6g]
<i>Shen Qu</i> (Massa Fermentata), <i>chao</i> (dry-fried)	30g [6g]
<i>Mai Ya</i> (Fructus Hordei Germinatus), <i>chao</i> (dry-fried)	30g [6g]
<i>Mu Xiang</i> (Radix Aucklandiae), <i>yan</i> (ground) to small particles	22.5g [6g]
<i>Sha Ren</i> (Fructus Amomi)	30g [6g]
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	30g [6g]
<i>Huang Lian</i> (Rhizoma Coptidis), <i>chao</i> (dry-fried) with liquor	22.5g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder. Steam the powder and form it into pills, which should resemble *Lu Dou* (Semen Phaseoli Radiati) in size. Take 50 pills per dose twice daily with rice soup on an empty stomach. Today this formula may be taken as pills or decoction. For pills, grind the herbs into powder and form into pills with water, and take 6-9g of pills per dose with warm, boiled water twice daily. For decoction, use the suggested doses in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Strengthens the Spleen and harmonizes the Stomach
2. Reduces food stagnation and stops diarrhea

CLINICAL MANIFESTATIONS

Food stagnation and interior heat accumulation due to Spleen and Stomach deficiencies: decreased food intake,

chronic indigestion and food stagnation, abdominal and epigastric distention and fullness, loose stools and diarrhea, a greasy and slightly yellow tongue coating, and a deficient, weak pulse.

CLINICAL APPLICATIONS

Indigestion and chronic enteritis.

EXPLANATION

When the Spleen and Stomach are deficient, food cannot be digested properly. The undigested food may accumulate and stagnate in the middle *jiao*. As a result of food stagnation, there will be poor appetite and abdominal and epigastric distention and fullness. Food stagnation creates damp accumulation, which may travel downward and cause loose stools and diarrhea with undigested food. Food stagnation may also create interior heat, which may cause the tongue coating to appear slightly yellow. A

Jiàn Pí Wán (Strengthen the Spleen Pill)

Jian Pi Wan (Strengthen the Spleen Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Food stagnation and interior heat accumulation due to Spleen and Stomach deficiencies	<ul style="list-style-type: none">• Abdominal and epigastric distention and fullness: food stagnation• Poor appetite, decreased food intake and undigested food in the stools: Spleen and Stomach deficiencies• Loose stools and diarrhea: dampness traveling downward• Greasy and slightly yellow tongue coating: presence of dampness and heat• Deficient, weak pulse: deficiency condition	<ul style="list-style-type: none">• Strengthens the Spleen and harmonizes the Stomach• Reduces food stagnation and stops diarrhea	<ul style="list-style-type: none">• <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>Fu Ling</i> (Poria) and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonify qi, strengthen the Spleen and Stomach, dispel dampness, and relieve diarrhea.• <i>Shan Yao</i> (Rhizoma Dioscoreae) and <i>Rou Dou Kou</i> (Semen Myristicae) strengthen the Spleen and stop diarrhea.• <i>Shan Zha</i> (Fructus Crataegi), <i>Shen Qu</i> (Massa Fermentata) and <i>Mai Ya</i> (Fructus Hordei Germinatus) promote digestion and reduce food stagnation.• <i>Mu Xiang</i> (Radix Aucklandiae), <i>Sha Ren</i> (Fructus Amomi) and <i>Chen Pi</i> (Pericarpium Citri Reticulatae) activate qi and harmonize the Stomach.• <i>Huang Lian</i> (Rhizoma Coptidis) clears interior heat and dries dampness.

greasy tongue coating suggests dampness and food accumulation, and a deficient, weak pulse reflects Spleen and Stomach deficiencies.

Jian Pi Wan (Strengthen the Spleen Pill) is formulated following the principles of *Si Jun Zi Tang* (Four-Gentlemen Decoction): *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonify qi, strengthen the Spleen and Stomach, dispel dampness, and relieve diarrhea. *Shan Yao* (Rhizoma Dioscoreae) and *Rou Dou Kou* (Semen Myristicae) strengthen the Spleen and stop diarrhea. *Shan Zha* (Fructus Crataegi), *Shen Qu* (Massa Fermentata), and *Mai Ya* (Fructus Hordei Germinatus) promote digestion and reduce food stagnation. *Mu Xiang* (Radix Aucklandiae), *Sha Ren* (Fructus Amomi), and *Chen Pi* (Pericarpium Citri Reticulatae) activate qi circulation and harmonize the Stomach. *Huang Lian* (Rhizoma Coptidis) clears interior heat and dries dampness.

MODIFICATIONS

- With Spleen qi deficiency accompanied by coldness and food stagnation, remove *Huang Lian* (Rhizoma Coptidis) and add *Gan Jiang* (Rhizoma Zingiberis).
- With severe damp accumulation, add *Che Qian Zi* (Semen Plantaginis) and *Ze Xie* (Rhizoma Alismatis).

- With nausea and vomiting, add *Ban Xia* (Rhizoma Pinelliae) and *Ding Xiang* (Flos Caryophylli).

CAUTIONS / CONTRAINDICATIONS

Jian Pi Wan is designed to treat food stagnation due to Spleen and Stomach deficiencies. It should not be used to treat food stagnation due to overindulgence in foods, which is an excess condition.

The source text states to grind the ingredients into a fine powder and form into pills with honey. Chew and swallow 1 pill [6g] with boiled water, rice soup, or decoction made from *Chen Pi* (Pericarpium Citri Reticulatae) or dry-fried *Sha Ren* (Fructus Amomi). The source text recommends avoiding peaches, plums, clams, and food that is raw or cold in nature while taking the formula.

Zi Sheng Wan (Nourish Life Pill) strengthens the Spleen, reduces food stagnation, increases appetite, and stops diarrhea. Clinically, it may be used for patients with Spleen deficiency characterized by symptoms such as lack of appetite, nausea, vomiting, and diarrhea. This formula may also be used for pregnant women in their first trimester with deficiency of the *yangming* channel and instability of the fetus. Lastly, it can be used in pediatric patients to treat lack of energy, fatigue, loose stools, lack of appetite and decreased food intake.

AUTHORS' COMMENTS

Jian Pi Wan literally means “Strengthen the Spleen Pill,” because the primary function of this formula is to strengthen the Spleen, which in turn carries out the functions of transportation and transformation.

Zhi Zhu Wan (Immature Bitter Orange and Atractylodes Macrocephala Pill) and *Jian Pi Wan* both tonify the Spleen and treat food stagnation.

- *Zhi Zhu Wan* has moderate potency to tonify the Spleen and eliminate food stagnation.
- *Jian Pi Wan*, in addition to having a stronger effect of tonifying the Spleen and eliminating food stagnation, also dispels damp-heat and stops diarrhea.

Jian Pi Wan and *Si Jun Zi Tang* (Four-Gentlemen Decoction) both contain *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) to tonify qi and strengthen the Spleen. The differences are as follows:

- *Jian Pi Wan* contains large doses of *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) and *Fu Ling* (Poria) to strengthen the Spleen, resolve dampness, and stop diarrhea.
- *Si Jun Zi Tang* contains larger doses of *Ren Shen* (Radix et Rhizoma Ginseng) to greatly tonify *yuan* (source) *qi*, strengthen the Spleen, and nourish the Stomach.

Section 2

消痞化积剂

— Reducing, Guiding, and Dissolving Formula
that Relieves Distention

Zhǐ Shí Xiǎo Pǐ Wán

(Immature Bitter Orange Pill to Reduce Focal Distention)

枳實消痞丸

枳实消痞丸

Pinyin Name: *Zhi Shi Xiao Pi Wan***Literat Name:** Immature Bitter Orange Pill to Reduce Focal Distention**Original Source:** *Lan Shi Mi Cang* (Secrets from the Orchid Chamber) by Li Gao in 1336**COMPOSITION**

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder and form into small pills with water. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 50-70 pills with warm, boiled water between meals. Today, the ingredients are grind into powder and form into small pills with water. Take 6-9g of pills per dose with warm, boiled water twice daily.

CHINESE THERAPEUTIC ACTIONS

1. Activates qi circulation and reduces fullness and distention
2. Strengthens the Spleen and harmonizes the Stomach

CLINICAL MANIFESTATIONS

Spleen deficiency complicated by qi stagnation and interlocking of interior heat and cold: epigastric fullness and distention, lack of appetite, lethargy, and irregular bowel movements with mild constipation.

CLINICAL APPLICATIONS

Chronic gastritis, chronic atrophic gastritis, indigestion, intestinal obstruction, cholelithiasis, and cholecystitis.

EXPLANATION

Zhi Shi Xiao Pi Wan (Immature Bitter Orange Pill to Reduce Focal Distention) treats epigastric fullness and distention complicated with both deficiency and excess conditions. This condition begins with Spleen deficiency and compromised digestive functioning. As the food stagnates, it slowly causes phlegm accumulation, qi stagnation, and interlocking of heat and cold (more heat). Clinical manifestations include epigastric fullness and distention, lethargy, lack of appetite, and constipation.

The treatment plan for this syndrome is to activate qi, strengthen the Spleen, and regulate the cold and heat. This formula contains *Zhi Shi* (Fructus Aurantii Immaturus) to break up qi stagnation and reduce epigastric distention.

Zhǐ Shí Xiāo Pǐ Wán

(Immature Bitter Orange Pill to Reduce Focal Distention)

Zhi Shi Xiao Pi Wan (Immature Bitter Orange Pill to Reduce Focal Distention)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Spleen deficiency complicated by qi stagnation and interlocking of interior heat and cold	<ul style="list-style-type: none"> • Lack of appetite and lethargy: Spleen deficiency • Epigastric fullness and distention: qi stagnation and phlegm accumulation • Irregular bowel movements: interlocking of heat and cold • Mild constipation: interior heat drying fluids 	<ul style="list-style-type: none"> • Strengthens the Spleen and harmonizes the Stomach • Reduces fullness and distention 	<ul style="list-style-type: none"> • <i>Zhi Shi</i> (Fructus Aurantii Immaturus) and <i>Hou Po</i> (Cortex Magnoliae Officinalis) activate qi circulation and relieve epigastric fullness and distention. • <i>Huang Lian</i> (Rhizoma Coptidis) clears heat and dries dampness. • <i>Ban Xia Qu</i> (Rhizoma Pinelliae Massa Fermentata) disperses interior damp and cold, breaks up clumps, and harmonizes the Stomach. • <i>Gan Jiang</i> (Rhizoma Zingiberis) warms the Spleen and dispels cold. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae) and <i>Fu Ling</i> (Poria) strengthen the Spleen and dry dampness. • <i>Mai Ya Qu</i> (Fructus Hordei Germinatus Massa Fermentata) improves digestion and harmonizes the Stomach. • <i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes the herbs.

Hou Po (Cortex Magnoliae Officinalis) activates qi circulation to relieve epigastric fullness. As a pair, *Zhi Shi* (Fructus Aurantii Immaturus) and *Hou Po* (Cortex Magnoliae Officinalis) have a synergistic effect to regulate qi and relieve both fullness and distention. *Huang Lian* (Rhizoma Coptidis) clears heat and dries dampness. *Ban Xia Qu* (Rhizoma Pinelliae Massa Fermentata) disperses interior damp and cold, breaks up clumps, and harmonizes the Stomach. A small amount of *Gan Jiang* (Rhizoma Zingiberis) warms the Spleen and dispels cold. *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Fu Ling* (Poria) strengthen the Spleen and dry dampness. *Mai Ya Qu* (Fructus Hordei Germinatus Massa Fermentata) improves digestion and harmonizes the Stomach. *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) harmonizes all of the herbs in the formula.

MODIFICATIONS

- With epigastric and abdominal pain due to cold, reduce the dose of *Huang Lian* (Rhizoma Coptidis), increase the dose of *Gan Jiang* (Rhizoma Zingiberis), and add *Rou Gui* (Cortex Cinnamomi) and *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum).
- With feelings of distention and a stifling sensation in the chest and diaphragm, add *Sha Ren* (Fructus Amomi),

Chen Pi (Pericarpium Citri Reticulatae), and *Jie Geng* (Radix Platycodonis).

- With intestinal parasitic infestation, add *Shi Jun Zi* (Fructus Quisqualis), *He Zi* (Fructus Chebulae), and *Bing Lang* (Semen Arecae).

CAUTIONS / CONTRAINDICATIONS

Although *Zhi Shi Xiao Pi Wan* has dual effects to purge excess (food stagnation) and tonify deficiency (Spleen deficiency), the main emphasis is to purge excess and clear heat. Therefore, it should be used with caution in patients with severe Spleen deficiency.

PHARMACOLOGICAL EFFECTS

Gastrointestinal: Use of *Zhi Shi Xiao Pi Wan* was associated with stimulating the gastrointestinal tract to increase peristalsis of the intestines and gastric emptying time.¹

CLINICAL STUDIES AND RESEARCH

1. **Chronic gastritis:** One study reported good results using modified *Zhi Shi Xiao Pi Wan* to treat chronic gastritis in 30 patients (22 males and 8 females, between 25-70 years of age, with 1-30 years history of illness). Modifications to the base herbal formula were made as needed. For Liver qi overacting on the Stomach, *Chai Hu* (Radix Bupleuri), *Chen Pi* (Pericarpium Citri Reticulatae), and *Dan Shen*

Zhǐ Shí Xiǎo Pǐ Wán

(Immature Bitter Orange Pill to Reduce Focal Distention)

(Radix et Rhizoma Salviae Miltiorrhizae) were added, and *Gan Jiang* (Rhizoma Zingiberis) was removed. For deficiency and cold of the Spleen and Stomach, *Pao Jiang* (Rhizoma Zingiberis Praeparatum) and *Gui Zhi* (Ramulus Cinnamomi) were added, and *Huang Lian* (Rhizoma Coptidis) and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) were removed. For damp-heat affecting the Spleen and Stomach, *Mu Dan Pi* (Cortex Moutan) and *Zhi Zi* (Fructus Gardeniae) were added. Of 30 patients, the study reported a marked effect in 26 cases, improvement in 3 cases, and no effect in 1 case.²

2. Chronic atrophic gastritis: One study reported good results using modified *Zhi Shi Xiao Pi Wan* to treat chronic atrophic gastritis in 45 patients. The herbal treatment contained this formula, with modifications based on the condition of the individual patients. For excess heat, the dose of *Huang Lian* (Rhizoma Coptidis) was increased and the dose of *Gan Jiang* (Rhizoma Zingiberis) was reduced. For excess cold, the dose of *Huang Lian* (Rhizoma Coptidis) was decreased and the dose of *Gan Jiang* (Rhizoma Zingiberis) was increased. For frequent belching, *Xuan Fu Hua* (Flos Inulae) was added. The herbs were given three times daily for 1 month per course of treatment, and the patients were monitored for 1 year. Of 45 patients, the study reported significant improvement in 23 cases, improvement in 20 cases, and no effect in 2 cases. The overall effectiveness was 95.6%.³

3. Indigestion: Use of *Zhi Shi Xiao Pi Wan* was associated with 94.74% effectiveness in treating non-ulcerative indigestion. In addition to the base formula, modifications were made as needed. For Stomach yin deficiency, *Yu Zhu* (Rhizoma Polygonati Odorati) and *Shi Hu* (Caulis Dendrobii) were added, and *Ban Xia* (Rhizoma Pinelliae) and *Sheng Jiang* (Rhizoma Zingiberis Recens) were removed. For constipation, *Da Huang* (Radix et Rhizoma Rhei) and *Gua Lou* (Fructus Trichosanthis) were added. For pain in the upper abdominal area, *Mu Xiang* (Radix Aucklandiae) and *Yan Hu Suo* (Rhizoma Corydalis) were added. For burning sensations in the stomach with acid reflux, *Zuo Jin Wan* (Left Metal Pill) was added. For thick, greasy, white tongue coating, *Dou Kou* (Fructus Amomi Rotundus) was added, and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) was replaced with *Cang Zhu* (Rhizoma Atractylodis). The herbs were given for 4 weeks per course of treatment. Of 76 patients, the study reported complete recovery in 20 cases, significant improvement in 24 cases, moderate improvement in 28 cases, and no effect in 4 cases.⁴

4. Intestinal obstruction: *Zhi Shi Xiao Pi Wan* was used to treat 12 hospitalized patients (between 18–65 years of

age) with intestinal obstruction for 1–3 days, associated with inappropriate diet. Modifications to the original formula included substitution of *Ren Shen* (Radix et Rhizoma Ginseng) with *Xi Yang Shen* (Radix Panacis Quinquifolii). Furthermore, *Chuan Lian Zi* (Fructus Toosendan) and *Yan Hu Suo* (Rhizoma Corydalis) were added for severe abdominal pain; *Shen Qu* (Massa Fermentata) and *Shan Zha* (Fructus Crataegi) for severe food stagnation; and *Shi Hu* (Caulis Dendrobii) and *Tian Hua Fen* (Radix Trichosanthis) for severe damage to body fluids. The treatment protocol was to cook the herbs and administer the formula in decoction twice daily. Of 12 patients, 11 had complete recovery, and 1 who did not respond was treated with surgery.⁵

5. Cholelithiasis and cholecystitis: Administration of modified *Zhi Shi Xiao Pi Wan* was associated with complete recovery in all 19 patients with cholelithiasis and cholecystitis. Modifications to the base formula included the addition of a larger dose of *Da Huang* (Radix et Rhizoma Rhei) for excess heat; *Chai Hu* (Radix Bupleuri) and *Yu Jin* (Radix Curcumae) for stabbing pain in the hypochondrium; *Zhu Ru* (Caulis Bambusae in Taenia) for nausea and vomiting; *Da Huang* (Radix et Rhizoma Rhei) and *Gua Lou* (Fructus Trichosanthis) for constipation with dry stools; and *Yin Chen* (Herba Artemisiae Scopariae) and *Zhi Zi* (Fructus Gardeniae) for jaundice. Each course of treatment was 5 days.⁶

AUTHORS' COMMENTS

Zhi Zhu Wan (Immature Bitter Orange and Atractylodes Macrocephala Pill), *Jian Pi Wan* (Strengthen the Spleen Pill) and *Zhi Shi Xiao Pi Wan* all treat indigestion using both tonifying and reducing methods.

- *Zhi Zhu Wan* and *Jian Pi Wan* primarily tonify the Spleen and secondarily remove stagnation.
- *Zhi Shi Xiao Pi Wan* removes stagnation and relieves fullness and distention, more so than strengthens the Spleen and Stomach.

Chapter 19 — Summary

— Reducing, Guiding, and Dissolving Formulas

SECTION 1: REDUCING, GUIDING, AND DISSOLVING FORMULAS THAT TREAT FOOD STAGNATION

Name	Similarities	Differences
Bao He Wan (Preserve Harmony Pill)	Promotes digestion, harmonizes the Stomach	Treats food stagnation, indigestion and other digestive disorders
Zhi Shi Dao Zhi Wan (Immature Bitter Orange Pill to Guide Out Stagnation)	Reduce and dissolve stagnation, clear damp-heat	Moderate potency, stronger to dispel dampness
Mu Xiang Bing Lang Wan (Aucklandia and Betel Nut Pill)		Strong potency, stronger to activate qi circulation
Zhi Zhu Wan (Immature Bitter Orange and Atractylodes Macrocephala Pill)	Strengthen the Spleen, reduce food stagnation	Moderate potency, activates qi circulation
Jian Pi Wan (Strengthen the Spleen Pill)		Strong potency, harmonizes the Stomach, stops diarrhea

Bao He Wan (Preserve Harmony Pill) is the principal formula used for any kind of food stagnation with symptoms of epigastric and abdominal fullness and distention, aversion to food, and belching with a foul smell. It activates digestion and harmonizes the Stomach.

Zhi Shi Dao Zhi Wan (Immature Bitter Orange Pill to Guide Out Stagnation) and **Mu Xiang Bing Lang Wan** (Aucklandia and Betel Nut Pill) have similar functions of activating qi circulation, and reducing and dissolving stagnation.

- **Zhi Shi Dao Zhi Wan** has a stronger damp-eliminating action. This formula is indicated for patients with stagnation of food and damp-heat in the Stomach and Intestines causing abdominal pain and diarrhea.
- **Mu Xiang Bing Lang Wan** has a stronger action in breaking up stagnation. It is reserved for a more severe form of stagnation with both abdominal fullness and pain.

Zhi Zhu Wan (Immature Bitter Orange and Atractylodes Macrocephala Pill) and **Jian Pi Wan** (Strengthen the Spleen Pill) have similar effects to treat indigestion via tonifying and reducing methods. Both formulas tonify the Spleen to improve its digestive functioning. They also utilize reducing and dissolving methods to treat stagnation and accumulation.

- **Zhi Zhu Wan** strengthens the Spleen and activates qi circulation. It is used for qi and food stagnation with underlying Spleen qi deficiency. Clinical manifestations include lack of appetite, and fullness and distention in the chest and epigastric regions.
- **Jian Pi Wan** strengthens the Spleen, harmonizes the Stomach, promotes digestion, and stops diarrhea. It resolves heat and food stagnation with underlying Spleen deficiency. Clinical manifestations include poor appetite, epigastric and abdominal fullness, diarrhea, and a greasy and slightly yellow tongue coating.

Chapter 19 — Summary

SECTION 2: REDUCING, GUIDING, AND DISSOLVING FORMULA THAT RELIEVES DISTENTION

Name	Similarities	Differences
<i>Zhi Shi Xiao Pi Wan</i> (Immature Bitter Orange Pill to Reduce Focal Distention)	Reduces, guides, and dissolves accumulation	Relieves epigastric and abdominal fullness and distention

Zhi Shi Xiao Pi Wan (Immature Bitter Orange Pill to Reduce Focal Distention) relieves epigastric and abdominal fullness and distention, strengthens the Spleen, and harmonizes the Stomach. This formula treats Spleen deficiency with interior heat, cold, damp, and phlegm stagnation. Clinical manifestations include epigastric and abdominal fullness and distention, lack of appetite, lethargy, and mild constipation.

Chapter 20

— Antiparasitic Formulas

葛洪 Gē Hōng

葛洪 Gē Hōng, 284 – 364.

葛洪 Gē Hōng

Ai Ye (Folium Artemisiae Argyi),
the main ingredient used in moxa sticks.

Ge Hong was born into a poor family. When he was thirteen years old, his father died, and his family suffered extreme financial hardship. He began to work to support his family, and during his spare time, he borrowed books and studied diligently. He later became a famed physician and alchemist.

As a physician, he compiled his clinical experiences and published 肘后备急方 *Zhou Hou Bei Ji Fang* (Emergency Formulas to Keep Up One's Sleeve) in 341 CE. This is a valuable text that described in detail many diseases and their corresponding treatments using herbs that are simple, readily-available, inexpensive, and effective. For example, he is credited as the first person to treat jaundice with *Qing Hao* (Herba Artemisiae Annuae),¹ leg *qi* with milk from cows and sheep,² and bites from rabid dogs with the brain marrow from the attacking dog.³

As an alchemist, he experimented with various substances to prepare special pills, such as *Xiong Huang* (Realgar), *Liu Huang* (Sulfur), *Dan Fan* (Chalcanthitum), *Xiao Shi* (Niter), *Ci Shi* (Magnetitum), *Zhu Sha* (Cinnabaris), and others. Although many of these substances are no longer used today, he emphasized the use of pills and the concept that many dosage forms are available beyond decoction. Ge Hong demonstrated that there are many other viable preparation methods and effective forms of delivery of medicinal substances.

Ge Hong's wife, 鲍姑 Bao Gu, was also a skilled physician. Bao Gu is credited for the discovery of moxa and its medicinal properties. Moxa is made by rolling *Ai Ye* (Folium Artemisiae Argyi) into a stick. Since this herb grows all over China, her discovery follows the same principles put forth by her husband, that medicines should be simple, readily-available, inexpensive and effective.

1. Artemisinin from *Qing Hao* (Herba Artemisiae Annuae) is now a standard medication for treating malaria.
2. 脚气 Leg *qi* is a term that describes beriberi, which was treated with beans and milk which contain ample supply of vitamin B₁.
3. The brain marrow of rabid dogs contains antibodies, and has been confirmed to effectively prevent/treat rabies.

Chapter 20 — Overview

— Antiparasitic Formulas

Definition: Antiparasitic formulas consist mainly of herbs that calm, expel and/or kill various types of parasites affecting the human body. There are many different types of parasites, all with different clinical manifestations, and all require different treatment. This chapter emphasizes the treatment of intestinal parasites, such as ascariasis (roundworms), oxyuriasis (pinworms), cestodiasis (tapeworms), ancylostomiasis (hookworms), and others.

The common clinical manifestations of intestinal parasitic infestations include intermittent abdominal pain around the umbilical region, ability to eat despite pain, a sallow facial appearance, a greenish or pale face, development of white spots or red streaks on the face, nighttime teeth grinding, nausea, vomiting of clear fluids, a peeled tongue coating, and a big or small pulse. If the condition is untreated or treated inappropriately, there may be emaciation, loss of muscle mass, lack of appetite, lassitude, poor vision, dry and dull hair, enlarged and distended abdomen, protrusion of veins, and malnutrition.

SUBCATEGORIES OF ACTION

Antiparasitic formulas are usually not divided into subcategories. Clinical manifestations vary, however, with different types of parasitic infestations. Examples of parasitic infestation, associated signs and symptoms, and commonly used herbs, are as follows:

- Ascariasis (roundworms) is characterized by itching of the ears, nose and mouth accompanied by red and white spots on the mucous membranes of the mouth and lips, and white flakes and worm segments in the stools. Ascariasis may be treated with herbs such as *Shi Jun Zi* (Fructus Quisqualis), *Ku Lian Pi* (Cortex Meliae), *Bing Lang* (Semen Arecae), and *Lei Wan* (Omphalia).
- Oxyuriasis (pinworms) is characterized by an itching anus that is often worse at night. Oxyuriasis may be treated with *Shi Jun Zi* (Fructus Quisqualis), *Ku Lian Pi* (Cortex Meliae), *Bing Lang* (Semen Arecae), *Fei Zi* (Semen Torreyae), and *Mian Ma Guan Zhong* (Rhizoma Dryopteridis Crassirhizomatis).
- Cestodiasis (tapeworms) is characterized by stools containing white particles (parasite bodies). Cestodiasis may be treated with herbs such as *Bing Lang* (Semen Arecae), *Nan Gua Zi* (Semen Cucurbitae Moschatae), *Fei Zi* (Semen Torreyae), *He Shi* (Fructus Carpesii), and *Wu Yi* (Fructus Ulmi Praeparatus).
- Ancylostomiasis (hookworms) is characterized by a pale or sallow facial appearance, cravings for unusual foods, a marked change in appetite, uncharacteristic weakness, and swelling with edema. Ancylostomiasis may be treated with *Ku Lian Pi* (Cortex Meliae), *Fei Zi* (Semen Torreyae), *He Shi* (Fructus Carpesii), *Lei Wan* (Omphalia), and *Mian Ma Guan Zhong* (Rhizoma Dryopteridis Crassirhizomatis).

In addition, antiparasitic herbs and formulas have different characteristics, and are used for different general conditions.

- Parasitic infestations characterized by cold should be treated with warm herbs and formulas, such as *Gan Jiang* (Rhizoma Zingiberis), *Hua Jiao* (Pericarpium Zanthoxyli), and *Li Zhong An Hui Tang* (Regulate the Middle and Calm Roundworm Decoction).

Antiparasitic formulas calm, kill and/or expel various intestinal parasites, such as roundworm, pinworm, tapeworm, and hookworm.

It is best to verify [via stool examination] what parasites are present before administering a formula.

Chapter 20 — Overview

Antiparasitic formulas must be dosed properly: large doses may cause toxic side effects, but small doses may yield no therapeutic benefit.

- Parasitic infestations characterized by heat should be treated with the addition of cold herbs and formulas, such as *Hu Huang Lian* (Rhizoma Picrorhizae), *Huang Bo* (Cortex Phellodendri Chinensis), and *Lian Mei An Hui Tang* (Picrorhiza and Mume Decoction to Calm Roundworms).
- Parasitic infestations characterized by both cold and heat signs and symptoms should be treated with two types of herbs: acrid and warm herbs to dispel cold (e.g., *Gan Jiang* (Rhizoma Zingiberis) and *Fu Zi* (Radix Aconiti Lateralis Praeparata)), and bitter and cold herbs to clear heat (e.g., *Huang Lian* (Rhizoma Coptidis) and *Huang Bo* (Cortex Phellodendri Chinensis)). One exemplar formula is *Wu Mei Wan* (Mume Pill).
- Chronic parasitic infestation characterized by malnutrition and Spleen dysfunction should be treated with three types of herbs: herbs that strengthen and harmonize the middle *jiao*, such as *Shen Qu* (Massa Fermentata) and *Mai Ya* (Fructus Hordei Germinatus); herbs that regulate qi and awaken the Stomach, such as *Rou Dou Kou* (Semen Myristicae) and *Mu Xiang* (Radix Aucklandiae); and herbs that clear heat and kill parasites, such as *Huang Lian* (Rhizoma Coptidis), and *Zhu Dan* (Fel Porcus). A representative formula is *Fei Er Wan* (Fat Child Pill).
- Lastly, parasitic infestation characterized by Spleen deficiency should be treated with antiparasitic and tonic herbs, such as *Ren Shen* (Radix et Rhizoma Ginseng), *Fu Ling* (Poria), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). One exemplar formula is *Bu Dai Wan* (Cloth Sack Pill).

CAUTIONS / CONTRAINDICATIONS

- To ensure efficacy of the treatment, it is best to examine the stools and verify what parasites are present before administering a formula.
- Because these herbs have purgative actions, they should be used cautiously or not at all for weak, pregnant, or elderly patients.
- Because some antiparasitic herbs are toxic in nature, they must be dosed properly. Large doses may be associated with adverse effects, but small doses may yield little or no antiparasitic benefit.
- These formulas should be taken on an empty stomach. Greasy or oily foods should be avoided when taking these formulas, as digestion and absorption of the formulas could be affected.
- These formulas may cause Spleen and Stomach deficiencies, in which case tonic herbs may be indicated to address the underlying deficiency.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Certain antiparasitic formulas may also be used to treat other gastrointestinal disorders, such as diarrhea, ulcerative colitis, and irritable bowel syndrome.

Antiparasitic formulas are commonly used to treat various types of intestinal parasitic infestations.

- **Parasitic infestations:** The mechanisms of antiparasitic formulas are attributed to two actions: they directly kill parasites,¹ or they paralyze the muscles of the parasites, inhibit their mobility, and thereby facilitate their elimination from the intestines (parasites with paralyzed muscles cannot physically attach to the intestines of the host, and will be expelled).^{2,3} Clinical applications of these formulas include ascariasis (roundworms),^{4,5} oxyuriasis (pinworms),⁸ cestodiasis (tapeworms),⁶ ancylostomiasis (hookworms),⁶ biliary ascariasis (roundworms),⁷ schistosomiasis (trematode worms),⁸ and blood flukes.⁹ *Wu Mei Wan* (Mume Pill) is one of the most commonly used formulas in treatment of intestinal parasites.
- **Others:** In addition to treating parasites, certain antiparasitic formulas may also be used to treat other gastrointestinal disorders, such as diarrhea,¹⁰ ulcerative colitis,¹¹ and irritable bowel syndrome.¹²

Wū Méi Wán (Mume Pill)

烏梅丸

乌梅丸

Pinyin Name: *Wu Mei Wan*

Literal Name: Mume Pill

Alternate Name: Mume Formula

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Wu Mei</i> (Fructus Mume)	300 pieces or 480g [30g]
<i>Hua Jiao</i> (Pericarpium Zanthoxyli), <i>chao</i> (dry-fried) till aromatic	120g [6g]
<i>Xi Xin</i> (Radix et Rhizoma Asari)	180g [3g]
<i>Huang Lian</i> (Rhizoma Coptidis)	480g [6g]
<i>Huang Bo</i> (Cortex Phellodendri Chinensis)	180g [6g]
<i>Gan Jiang</i> (Rhizoma Zingiberis)	300g [9g]
<i>Gui Zhi</i> (Ramulus Cinnamomi)	180g [6g]
<i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata), <i>pao</i> (blast-fried)	180g [6g]
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	180g [6g]
<i>Dang Gui</i> (Radix Angelicae Sinensis)	120g [6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to steep *Wu Mei* (Fructus Mume) in a 50% vinegar solution overnight, then remove the pit and mash the fruit. Dry the mashed fruit under the sun, then mix it with the rest of the ingredients and grind them into powder, and form into pills with honey. The pills should resemble the size of *Wu Tong Zi* (Semen Firmianae), a small seed approximately 5 mm in diameter. Take 10 pills [9g] three times daily on an empty stomach with warm, boiled water. Today, this formula may be prepared as a decoction with the doses suggested in brackets. The source text states to avoid cold, raw, or spoiled foods during medication.

CHINESE THERAPEUTIC ACTIONS

1. Warms the internal organs
2. Calms roundworms

CLINICAL MANIFESTATIONS

Ascariasis (roundworms) characterized by heat in the Stomach and cold in the Intestines: irritability, recurrent nausea and vomiting, ingestion of food followed by vomiting of roundworms, extremely cold hands and feet, and abdominal pain; also for chronic dysentery and diarrhea.

CLINICAL APPLICATIONS

Ascariasis (biliary ascariasis, intestinal ascariasis, and ascariasis in children), hookworms, schistosomiasis, chronic gastritis, bacterial dysentery, chronic dysentery, ulcerative colitis, irritable bowel syndrome, chronic diarrhea, cholecystitis, and cholelithiasis.

EXPLANATION

Wu Mei Wan (Mume Pill) treats roundworms characterized by heat in the Stomach and cold in the Intestines. According to traditional Chinese medicine, roundworms prefer warmth and have aversion to cold. So while they reside in the intestines, they constantly move toward the stomach in search of warmth and food. However, their presence and movement disrupt the normal qi flow in the Stomach and Intestines, causing symptoms such as abdominal pain, irritability, recurrent nausea and vomiting, and ingestion of food followed by vomiting of ascaris. In cases of severe pain, the flow of yin and yang qi will be disrupted, causing extremely cold hands and feet.

Treatment of intestinal parasites follows the principle that “sweet taste [of herbs] induces movement [of the parasites], sour taste induces tranquility, acrid taste induces suppression, and bitter taste induces downward movement.” *Wu Mei* (Fructus Mume), a sour herb processed with vinegar, calms parasites. *Hua Jiao* (Pericarpium Zanthoxyli) and *Xi Xin* (Radix et Rhizoma Asari) are acrid and warm herbs that warm the interior, dispel cold, and suppress the movement of parasites. *Huang Lian* (Rhizoma Coptidis) and *Huang Bo* (Cortex Phellodendri Chinensis) are bitter and cold herbs that clear heat and drain parasites downward. *Gan Jiang* (Rhizoma Zingiberis), *Gui Zhi* (Ramulus Cinnamomi), and *Fu Zi* (Radix Aconiti Lateralis Praeparata) are acrid and hot herbs that warm the interior and dispel cold. In using herbs that are sour, acrid and bitter, this formula effectively calms the parasites, suppresses their movement,

Wū Méi Wán (Mume Pill)

Wu Mei Wan (Mume Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Ascariasis infection characterized by heat and cold	<ul style="list-style-type: none"> Irritability, recurrent nausea and vomiting, ingestion of food followed by vomiting; roundworms Severe pain and cold limbs: disrupted yin and yang qi circulation Chronic dysentery and diarrhea: underlying deficiency 	<ul style="list-style-type: none"> Warms the internal organs Calms parasites 	<ul style="list-style-type: none"> <i>Wu Mei</i> (Fructus Mume) calms parasites. <i>Hua Jiao</i> (Pericarpium Zanthoxyli) and <i>Xi Xin</i> (Radix et Rhizoma Asari) warm the interior, dispel cold, and suppress the movement of parasites. <i>Gan Jiang</i> (Rhizoma Zingiberis), <i>Gui Zhi</i> (Ramulus Cinnamomi), and <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) warm the interior and dispel cold. <i>Huang Lian</i> (Rhizoma Coptidis) and <i>Huang Bo</i> (Cortex Phellodendri Chinensis) clear heat and drain parasites downward. <i>Ren Shen</i> (Radix et Rhizoma Ginseng) and <i>Dang Gui</i> (Radix Angelicae Sinensis) tonify qi and blood.

and drains them out of the body via defecation. Moreover, it uses both cold herbs to clear heat in the Stomach and hot herbs to dispel cold in the Intestines. Since chronic parasitic infestation often causes generalized weakness and deficiency, this formula contains *Ren Shen* (Radix et Rhizoma Ginseng) and *Dang Gui* (Radix Angelicae Sinensis) to tonify qi and blood.

Interestingly, this formula can treat chronic dysentery and diarrhea with deficiency of *zheng* (upright) *qi*, because such cases are often complicated by the simultaneous presence of cold and heat.

MODIFICATIONS

- To enhance the antiparasitic effect, add *Shi Jun Zi* (Fructus Quisqualis), *Ku Lian Pi* (Cortex Meliae), *Fei Zi* (Semen Torreya), and *Bing Lang* (Semen Arecae).
- With vomiting, add *Wu Zhu Yu* (Fructus Evodiae) and *Ban Xia* (Rhizoma Pinelliae).
- With severe abdominal pain, add *Mu Xiang* (Radix Aucklandiae) and *Chuan Lian Zi* (Fructus Toosendan).
- With constipation, add *Da Huang* (Radix et Rhizoma Rhei) and *Bing Lang* (Semen Arecae).
- For patients without deficiencies, remove *Ren Shen* (Radix et Rhizoma Ginseng) and *Dang Gui* (Radix Angelicae Sinensis).
- With more heat, remove *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis).
- With more cold, remove *Huang Lian* (Rhizoma Coptidis) and *Huang Bo* (Cortex Phellodendri Chinensis).

CAUTIONS / CONTRAINDICATIONS

- Wu Mei Wan* may be used to treat chronic dysentery and diarrhea with deficiency of *zheng* (upright) *qi*, if it is

characterized by the presence of cold and heat at the same time. Do not use this formula, however, if the dysentery and diarrhea are due to damp-heat.

- This formula should be used with caution during pregnancy.¹

PHARMACOLOGICAL EFFECTS

- Antiparasitic:** *Wu Mei Wan* has been shown to have marked antiparasitic effects against roundworms. The mechanism of this action is attributed to the paralyzing effect of the formula, as the herbs do not actually kill the parasites. It has been suggested that the herbs paralyze the muscles of the parasites, inhibit their mobility, and thereby facilitate the elimination from the intestines.^{2,3}
- Cholagogic:** *Wu Mei Wan* has been shown to have a stimulating effect on the liver and gallbladder. It increases the production of bile acid by the liver, and stimulates the contraction of the gallbladder.^{4,5}
- Antibiotic:** Many herbs in *Wu Mei Wan* have shown marked inhibitory effects against various micro-organisms.⁶

CLINICAL STUDIES AND RESEARCH

- Intestinal ascariasis (roundworms):** In one study of 8 patients, intestinal obstruction caused by ascariasis was treated effectively using *Wu Mei Wan*. Most patients experienced relief of abdominal pain within 1-2 doses, and complete resolution of the condition in 3 days.⁷ Another study of patients also reported marked success expelling roundworms using modified *Wu Mei Wan*, with the addition of *Shi Jun Zi* (Fructus Quisqualis) and *Chuan Lian Zi* (Fructus Toosendan). The treatment protocol was to administer modified *Wu Mei Wan* first to paralyze the roundworms, followed by purgative herbs to expel them with the stools from the intestines.⁸

Wū Méi Wán (Mume Pill)

2. **Biliary ascariasis (roundworms):** One study of 48 patients reported marked success within 2-13 days using both acupuncture and *Wu Mei Wan* to treat biliary ascariasis.⁹ Another study reported good results to relieve pain within 1-3 packs of herbs in 30 of 31 patients using *Wu Mei Wan* plus *Mu Xiang* (*Radix Aucklandiae*), *Bing Lang* (*Semen Arecae*) and others.¹⁰ Furthermore, use of modified *Wu Mei Wan* in 40 patients with biliary ascariasis was associated with a 95% effectiveness. The duration of treatment varied between 2-6 doses.¹¹ Lastly, one study reported successful treatment of biliary ascariasis in 10 of 11 patients. The herbal treatment was based on *Wu Mei Wan*, with removal of *Huang Bo* (*Cortex Phellodendri Chinensis*), and the addition of *Wu Zhu Yu* (*Fructus Evodiae*), *Chuan Lian Zi* (*Fructus Toosendan*), *Zhi Gan Cao* (*Radix et Rhizoma Glycyrrhizae Praeparata cum Melle*), and others.¹²
3. **Ascariasis (roundworms) in children:** Complete recovery was reported in 24 patients with intestinal ascariasis when treated with modified *Wu Mei Wan*. Modifications were made based on the presentation of the individuals. For excess heat, *Huang Qin* (*Radix Scutellariae*) was added, the dose of *Huang Lian* (*Rhizoma Coptidis*) was increased, and the doses of *Gan Jiang* (*Rhizoma Zingiberis*) and *Hua Jiao* (*Pericarpium Zanthoxyli*) were reduced. For excess cold, the doses of *Gan Jiang* (*Rhizoma Zingiberis*) and *Hua Jiao* (*Pericarpium Zanthoxyli*) were increased, and the dose of *Huang Lian* (*Rhizoma Coptidis*) was reduced. For severe abdominal pain, the doses of *Hua Jiao* (*Pericarpium Zanthoxyli*) and *Gan Cao* (*Radix et Rhizoma Glycyrrhizae*) were increased, and *Yan Hu Suo* (*Rhizoma Corydalis*), *Wu Zhu Yu* (*Fructus Evodiae*), and *Bai Shao* (*Radix Paeoniae Alba*) were added. For severe nausea and vomiting, the doses of *Wu Mei* (*Fructus Mume*), *Ban Xia* (*Rhizoma Pinelliae*), and *Hua Jiao* (*Pericarpium Zanthoxyli*) were increased, and *Dou Kou* (*Fructus Amomi Rotundus*) and *Zhu Ru* (*Caulis Bambusae in Taenia*) were added.¹³
4. **Ancylostomiasis (hookworms):** One study reported 53.2% effectiveness using *Wu Mei Wan* to treat 60 patients with hookworm infestation.¹⁴
5. **Schistosomiasis (trematode worms):** Three hundred and nineteen patients with schistosomiasis were treated with 92.4% effectiveness and 75.9% rate of recovery using *Wu Mei Wan* plus *Da Chai Hu Tang* (Major Bupleurum Decoction) in decoction or pills. The decoction was given once every other day. The pills were made by grinding all the herbs into a fine powder and mixing with honey to make pills. Ten grams of pills were taken per dose, twice daily. The treatment protocol was to use decoctions for acute cases, and pills for chronic cases.¹⁵
6. **Chronic diarrhea:** Rectal instillation of *Wu Mei Wan* showed 97.8% effectiveness in treating 47 patients with chronic diarrhea of 2-20 years. The treatment protocol was to cook the herbs to yield 200 mL of herbal solution and instill 100 mL of the herbal solution rectally twice daily in the morning and at night.¹⁶
7. **Bacterial dysentery:** Use of modified *Wu Mei Wan* was associated with complete recovery in 53 of 60 patients with bacterial dysentery. The herbal treatment contained *Wu Mei Wan* plus *Hua Shi* (*Talcum*) as the base formula. Furthermore, *Gui Zhi* (*Ramulus Cinnamomi*) and *Xi Xin* (*Radix et Rhizoma Asari*) were added for aversion to cold; *Ban Xia* (*Rhizoma Pinelliae*) for nausea and vomiting; *Chi Shao* (*Radix Paeoniae Rubra*) and *Mu Xiang* (*Radix Aucklandiae*) for abdominal pain; and *Da Huang* (*Radix et Rhizoma Rhei*) for rectal tenesmus.¹⁷
8. **Ulcerative colitis:** According to one study, 25 patients with chronic ulcerative colitis were treated with modified *Wu Mei Wan* with complete recovery in 16 cases, improvement in 7 cases, and no effect in 2 cases.¹⁸
9. **Irritable bowel syndrome (IBS):** Use of modified *Wu Mei Wan* was associated with 91% effectiveness in treating IBS in 34 patients (23 males and 11 females). Modifications to *Wu Mei Wan* included the addition of *Ying Su Ke* (*Pericarpium Papaveris*) and *Yan Hu Suo* (*Rhizoma Corydalis*) for abdominal pain; dry-fried *Yi Yi Ren* (*Semen Coicis*) and *Bu Gu Zhi* (*Fructus Psoraleae*) for diarrhea; *Bai Shao* (*Radix Paeoniae Alba*) and *Huo Ma Ren* (*Fructus Cannabis*) for constipation; ginger-processed *Ban Xia* (*Rhizoma Pinelliae*) and *Zhe Shi* (*Haematitum*) for nausea and belching. Of 34 patients, the study reported complete recovery in 18 cases, significant improvement in 6 cases, and no response in 3 cases.¹⁹
10. **Cholecystitis:** One study reported 97.5% effectiveness in treating cholecystitis using modified *Wu Mei Wan*. For acute cholecystitis, *Jin Qian Cao* (*Herba Lysimachiae*) was added and *Dang Shen* (*Radix Codonopsis*) was removed from the formula. For chronic illness, *Ji Nei Jin* (*Endothelium Corneum Gigeriae Galli*) was added. The treatment protocol was to cook the herbs and administer the decoction in two to three equally-divided doses, followed by 10-30 mL of rice vinegar. Of 40 patients, the study reported complete recovery in 12 cases, marked improvement in 15 cases, moderate improvement in 12 cases, and no effect in 1 case.²⁰
11. **Cholelithiasis:** Use of modified *Wu Mei Wan* was associated with good result in treating 40 cases of cholelithiasis. In addition to the base formula, *Da Huang* (*Radix et Rhizoma Rhei*) and *Pu Gong Ying* (*Herba Taraxaci*) were added for excess heat; larger doses of *Fu*

Wū Méi Wán (Mume Pill)

Zi (Radix Aconiti Lateralis Praeparata) and *Gan Jiang* (Rhizoma Zingiberis) were used for excess cold; *Jiang Huang* (Rhizoma Curcumae Longae) and *Chuan Lian Zi* (Fructus Toosendan) for severe hypochondriac pain; *Ban Xia* (Rhizoma Pinelliae) and *Ru Xiang* (Gummi Olibanum) for nausea and vomiting; and *Yin Chen* (Herba Artemisiae Scopariae) and *Yu Jin* (Radix Curcumae) for jaundice. The duration of treatment was 1-3 courses, with 30 days per course. Of 47 patients, the study reported complete resolution in 5 cases, marked improvement in 16 cases, moderate improvement in 20 cases, and no effect in 6 cases. The overall effectiveness was 87.23%.²¹

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	2.1g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	3g
<i>Fu Ling</i> (Poria)	3g
<i>Hua Jiao</i> (Pericarpium Zanthoxyli)	0.9g [3g]
<i>Wu Mei</i> (Fructus Mume)	0.9g [3g]
<i>Gan Jiang</i> (Rhizoma Zingiberis), chao (dry-fried) to black	1.5g [2g]

The source text states to prepare the ingredients as a decoction. Today this formula can be prepared in pill form by proportionally increasing the doses of the ingredients, grinding them into a fine powder, and mixing the powder with honey to form pills. Take 5g of the pills three times daily with boiled water on an empty stomach. This formula may be prepared as a decoction with the doses suggested in brackets.

Li Zhong An Hui Tang (Regulate the Middle and Calm Roundworms Decoction) warms the middle *jiao* and expels internal parasites (namely ascariasis infestation). Clinically, it is often used for patients with ascaris and yang deficiency and cold in the middle *jiao*, characterized by loose stools, clear urine, polyuria, abdominal pain, borborygmus, cold limbs, a thin, white tongue coating, and a deficient, moderate pulse. Sometimes ascaris may even be found in the vomitus or stool.

Lián Méi Ān Huī Tāng

(Picrorhiza and Mume Decoction to Calm Roundworms)

連梅安蛔湯

連梅安蛔湯

Pinyin Name: *Lian Mei An Hui Tang*

Literal Name: Picrorhiza and Mume Decoction to Calm Roundworms

Original Source: *Tong Su Shang Han Lun* (Plain Version of Discussion of Cold-Induced Disorders) by Yu Gen-Chu in the Qing Dynasty

<i>Hu Huang Lian</i> (Rhizoma Picrorhizae)	3g
<i>Hua Jiao</i> (Pericarpium Zanthoxyli), chao (dry-fried)	10 pieces [1.5g]
<i>Lei Wan</i> (Omphalia)	9g
<i>Wu Mei</i> (Fructus Mume)	2 pieces [6g]
<i>Huang Bo</i> (Cortex Phellodendri Chinensis)	2.4g
<i>Bing Lang</i> (Semen Arecae), qie (sliced)	2 pieces [9g]

The source text states to prepare the ingredients as a decoction. Cook the herbs in water and decoct three times, then mix all three batches of the decoction together. Take the herbs on an empty stomach three times daily (twice in the morning and one time in the afternoon).

Lian Mei An Hui Tang (Picrorhiza and Mume Decoction to Calm Roundworms) clears heat and expels internal parasites. Clinical manifestations include abdominal pain, lack of appetite, vomiting with ascaris upon eating, fidgeting, irritability, a red face, feverish sensations, dry mouth, a red tongue body, and a rapid pulse.

AUTHORS' COMMENTS

Wu Mei Wan is the representative formula for treating ascariasis. The key signs and symptoms include abdominal pain, recurrent nausea and vomiting, ingestion of food followed by vomiting of ascaris, and cold limbs.

Wu Mei Wan, *Li Zhong An Hui Tang* (Regulate the Middle and Calm Roundworms Decoction) and *Lian Mei An Hui Tang* (Picrorhiza and Mume Decoction to Calm Roundworms) are three formulas that treat ascariasis.

- *Wu Mei Wan* is the most potent formula that treats severe cases of ascariasis characterized by underlying deficiency and excess, with interlocking of heat (in the Stomach) and cold (in the Intestines).
- *Li Zhong An Hui Tang* warms yang and dispels cold to treat ascariasis characterized by deficiency and cold of the middle *jiao*.
- *Lian Mei An Hui Tang* clears heat to treat cases of ascariasis characterized by Liver fire and Stomach heat.

Féi Ēr Wán (Fat Child Pill)

肥兒丸
肥儿丸

Pinyin Name: *Fei Er Wan*

Literal Name: Fat Child Pill

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>Shen Qu</i> (Massa Fermentata), <i>chao</i> (dry-fried)	300g
<i>Mai Ya</i> (Fructus Hordei Germinatus), <i>chao</i> (dry-fried)	150g
<i>Huang Lian</i> (Rhizoma Coptidis)	300g
<i>Rou Dou Kou</i> (Semen Myristicae), <i>wei</i> (roasted)	150g
<i>Mu Xiang</i> (Radix Aucklandiae)	60g
<i>Bing Lang</i> (Semen Arecae), <i>cuo</i> (grated) into thin particles and sun-dried	20 pieces [120g]
<i>Shi Jun Zi</i> (Fructus Quisqualis)	150g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder and form into small pills using bile from a pig's gallbladder. The pills should resemble *Su Mi* (Semen Setariae) in size. Take 30 pills daily on an empty stomach with warm, boiled water. Adjust the dose depending on the age of the patient.

Today, this formula is prepared by grinding the ingredients and sifting the resultant powders together. The mixed powder is then formed into small pills [3g each] using fresh bile from the gallbladder of a pig. Dissolve 1 pill in boiled water and take it on an empty stomach. Reduce the dose for infants under one year of age.

Féi Ēr Wán (Fat Child Pill)

CHINESE THERAPEUTIC ACTIONS

1. Kills parasites
2. Reduces accumulation
3. Strengthens the Spleen
4. Clears heat

CLINICAL MANIFESTATIONS

Intestinal parasites and *gan ji* (infantile malnutrition): abdominal pain, poor digestion, sallow and yellowish facial complexion, thin or emaciated appearance, lack of appetite, decreased food ingestion, loose stools, enlarged abdomen with swelling and fullness, weak constitution, low-grade fever, constant fatigue, possible nausea and vomiting, dry mouth and thirst, and foul breath.

CLINICAL APPLICATIONS

Parasitic infestation and infantile malnutrition.

EXPLANATION

Fei Er Wan (Fat Child Pill) treats patients with intestinal parasites with abdominal pain and poor digestion. Chronic parasitic infestation may cause *gan ji* (infantile malnutrition) characterized by Spleen deficiency and Stomach heat, with symptoms such as thin or emaciated appearance, enlarged abdomen, fever, foul breath, and loose stools.

This formula contains *Shen Qu* (Massa Fermentata) and *Mai Ya* (Fructus Hordei Germinatus) to strengthen the Spleen, harmonize the middle *jiao*, and reduce food stagnation. *Huang Lian* (Rhizoma Coptidis) clears Stomach heat. *Rou Dou Kou* (Semen Myristicae), an

aromatic herb, strengthens the Spleen and relieves loose stools. *Mu Xiang* (Radix Aucklandiae) regulates qi to relieve abdominal pain. *Bing Lang* (Semen Arecae) and *Shi Jun Zi* (Fructus Quisqualis) kill and expel parasites. Lastly, bile from a pig's gallbladder helps *Huang Lian* (Rhizoma Coptidis) clear heat from the Liver and Stomach.

MODIFICATIONS

- With dry mouth, thirst, and irritability, add *Mai Dong* (Radix Ophiopogonis) and *Wu Wei Zi* (Fructus Schisandrae Chinensis).
- With nausea, vomiting, and diarrhea, add *Ban Xia* (Rhizoma Pinelliae) and *Chen Pi* (Pericarpium Citri Reticulatae).
- With weak body constitution accompanied by alternating spells of chills and fever, add *Chai Hu* (Radix Bupleuri) and *Bai Shao* (Radix Paeoniae Alba).
- Without interior heat, remove *Huang Lian* (Rhizoma Coptidis).
- With Spleen and Stomach deficiencies, add *Ren Shen* (Radix et Rhizoma Ginseng) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- With constipation, add *Da Huang* (Radix et Rhizoma Rhei) and *Zhi Shi* (Fructus Aurantii Immaturus).

CAUTIONS / CONTRAINDICATIONS

- *Fei Er Wan* should **not** be used in cases of *gan ji* (infantile malnutrition) due to Spleen and Stomach deficiencies, as many herbs that expel parasites are rather harsh and may cause more deficiencies.
- Avoid foods that are raw, cold, oily, or greasy while taking this formula.¹

Fei Er Wan (Fat Child Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Intestinal parasites and <i>gan ji</i> (infantile malnutrition)	Abdominal pain and poor digestion, sallow and yellowish facial complexion, thin or emaciated appearance, enlarged abdomen, fever, foul breath, and loose stools: malnutrition due to parasitic infestation	<ul style="list-style-type: none"> • Kills parasites • Reduces accumulation • Strengthens the Spleen • Clears heat 	<ul style="list-style-type: none"> • <i>Shen Qu</i> (Massa Fermentata) and <i>Mai Ya</i> (Fructus Hordei Germinatus) strengthen the Spleen, harmonize the middle <i>jiao</i>, and reduce food stagnation. • <i>Bing Lang</i> (Semen Arecae) and <i>Shi Jun Zi</i> (Fructus Quisqualis) kill and expel parasites. • <i>Huang Lian</i> (Rhizoma Coptidis) sedates Stomach heat. • <i>Rou Dou Kou</i> (Semen Myristicae) strengthens the Spleen and relieves loose stools. • <i>Mu Xiang</i> (Radix Aucklandiae) regulates qi to relieve abdominal pain.

Féi Ēr Wán (Fat Child Pill)

RELATED FORMULA

Jin Jiàn Féi Ēr Wán

(Golden Pill to Construct a Fat Child)

金鑑肥兒丸

金鑑肥兒丸

Pinyin Name: *Jin Jian Fei Er Wan*

Literal Name: Golden Pill to Construct a Fat Child

Alternate Name: Ginseng and Hoelen Formula

Original Source: *Yi Zong Jin Jian* (Golden Mirror of the Medical Tradition) by Wu Qian in 1742

Ren Shen (Radix et Rhizoma Ginseng)

Bai Zhu (Rhizoma Atractylodis Macrocephalae)

Fu Ling (Poria)

Huang Lian (Rhizoma Coptidis)

Hu Huang Lian (Rhizoma Picrorhizae)

Shi Jun Zi (Fructus Quisqualis)

Shen Qu (Massa Fermentata)

Mai Ya (Fructus Hordei Germinatus)

Shan Zha (Fructus Crataegi)

Gan Cao (Radix et Rhizoma Glycyrrhizae)

Lu Hui (Aloe)

Jin Jian Fei Er Wan (Golden Pill to Construct a Fat Child) treats malnutrition in children or infants due to parasitic infestation. Intestinal parasites, transmitted via oral-anal route, create internal heat and then affect the gastrointestinal tract. Immediate signs and symptoms of parasitic infestation include lack of appetite, decreased food ingestion, dry mouth, thirst, and possibly nausea and vomiting. With chronic parasitic infestation, proper digestion and absorption of food will be compromised, leading to malnutrition characterized by a sallow facial appearance, muscle wasting, weak constitution, low-grade fever, and constant fatigue. The abdomen is often enlarged due to parasites.

Jin Jian Fei Er Wan incorporates *Si Jun Zi Tang* (Four-Gentlemen Decoction) as the base to strengthen the Spleen and tonify qi. In this formula, *Ren Shen* (Radix et Rhizoma Ginseng) tonifies *yuan* (source) *qi* as well as Spleen and Stomach qi. *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), in addition to tonifying Spleen qi, also dries dampness in the middle *jiao* to strengthen digestion. *Fu Ling* (Poria) tonifies and dispels dampness in the middle *jiao* through diuresis. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonifies Spleen qi and harmonizes the herbs in this formula. *Shan Zha* (Fructus Crataegi), *Mai Ya* (Fructus Hordei Germinatus), and *Shen Qu* (Massa Fermentata) promote digestion and eliminate food stagnation. *Shan Zha* (Fructus Crataegi) is most effective in digesting meat (protein) and fatty food; *Mai Ya* (Fructus Hordei Germinatus) is most effective in digesting carbohydrates; and *Shen Qu* (Massa Fermentata) is most effective in digesting alcohol and spoiled or rotten food. *Huang Lian* (Rhizoma Coptidis) clears damp-heat, which is common with food stagnation. *Shi Jun Zi* (Fructus Quisqualis), *Hu Huang Lian* (Rhizoma Picrorhizae), and *Lu Hui* (Aloe) have antiparasitic effects. They kill and expel intestinal parasites, treating the underlying cause of malnutrition.

Fei Er Wan (Fat Child Pill) and *Jin Jian Fei Er Wan* (Golden Pill to Construct a Fat Child) have similar names and functions to treat *gan ji* (infantile malnutrition) associated with parasitic infestation.

- *Fei Er Wan* focuses more on killing parasites and reducing accumulation, and less on strengthening the Spleen.
- *Jin Jian Fei Er Wan* emphasizes primarily on strengthening the Spleen and promoting digestion. Killing and expelling parasites are secondary functions.

Bù Dài Wán (Cloth Sack Pill)

布袋丸

Pinyin Name: *Bu Dai Wan*

Literal Name: Cloth Sack Pill

Original Source: *Bu Yao Xiu Zhen Xiao Er Fang Lun* (Supplement to the Pocket-Sized Discussion of Formulas for Children)

COMPOSITION

<i>Wu Yi</i> (Fructus Ulmi Praeparatus), <i>chao</i> (dry-fried)	60g
<i>Shi Jun Zi</i> (Fructus Quisqualis), <i>chao</i> (dry-fried)	60g
<i>Lu Hui</i> (Aloe), <i>yan</i> (ground) into thin particles	15g
<i>Ye Ming Sha</i> (Faeces Vespertilionis Murini), <i>jing</i> (cleaned)	60g
<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	15g
<i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae)	15g
<i>Fu Ling</i> (Poria)	15g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	15g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder, and form into large pills with water. Each pill should resemble a large bullet, and weigh approximately 10g. For administration, place 1 pill in a cheesecloth and cook it with 60g of pork in water until the pork is thoroughly cooked. The pork and the soup are given to children as medication. The pill in the cheesecloth may be used again the next day.

Today, this formula is normally prepared as a powder by proportionally adjusting all of the ingredients and grinding them into powder. Take 3g of powder with pork soup on an empty stomach in the morning upon awakening.

CHINESE THERAPEUTIC ACTIONS

1. Dispels roundworms and treats *gan ji* (infantile malnutrition)
2. Tonifies and strengthens the Spleen and Stomach

CLINICAL MANIFESTATIONS

Parasitic infestation with *gan ji* (infantile malnutrition) in infants and children: feeling of warmth in the body, sallow facial appearance, enlarged and distended abdomen, skinny arms and legs, dry, lusterless hair, and dull eyes.

CLINICAL APPLICATIONS

Parasitic infestation and malnutrition.

EXPLANATION

Bu Dai Wan (Cloth Sack Pill) treats parasitic infestation in infants and children with Spleen deficiency. Chronic infestation of parasites may lead to Spleen and Stomach deficiencies, leading to skinny limbs. With chronic illness, deficiency heat rises to cause the feeling of warmth in the body. The abdominal distention is due to Spleen and Stomach qi deficiencies and stagnation. Because of decreased absorption of nutrients due to Spleen and Stomach deficiencies, less blood is produced, resulting

Bu Dai Wan (Cloth Sack Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Parasitic infestation and <i>gan ji</i> (infantile malnutrition)	Sallow facial appearance, enlarged and distended abdomen, skinny arms and legs, dry and lusterless hair, and dull eyes: malnutrition due to parasitic infestation	<ul style="list-style-type: none"> • Dispels roundworms and treats <i>gan ji</i> (infantile malnutrition) • Tonifies and strengthens the Spleen and Stomach 	<ul style="list-style-type: none"> • <i>Wu Yi</i> (Fructus Ulmi Praeparatus) and <i>Shi Jun Zi</i> (Fructus Quisqualis) expel roundworms and treat <i>gan ji</i> (infantile malnutrition). • <i>Lu Hui</i> (Aloe) expels parasites by purging them out of the body through the bowels. • <i>Ye Ming Sha</i> (Faeces Vespertilionis Murini) clears Liver heat and brightens the vision. • <i>Ren Shen</i> (Radix et Rhizoma Ginseng), <i>Bai Zhu</i> (Rhizoma Atractylodis Macrocephalae), <i>Fu Ling</i> (Poria), and <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) tonify the Spleen and Stomach.

Bù Dài Wán (Cloth Sack Pill)

in a sallow facial appearance, dry, lusterless hair, and dull eyes.

Acrid, bitter, and warm *Wu Yi* (Fructus Ulmi Praeparatus) is combined with sweet and warm *Shi Jun Zi* (Fructus Quisqualis) in this formula to expel roundworms and treat *gan ji* (infantile malnutrition). Bitter and cold *Lu Hui* (Aloe) expels the parasites by purging them out of the body through the bowels. *Ye Ming Sha* (Faeces Vespertilionis Murini) clears Liver heat and brightens the vision. Since the root of this syndrome is Spleen and Stomach deficiencies, *Ren Shen* (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) are used to tonify the Spleen and Stomach. Indeed, this formula functions on both tonic and sedative levels. It safely and effectively sedates heat and removes parasites without injuring the Spleen and Stomach.

MODIFICATIONS

- With more heat, add *Huang Lian* (Rhizoma Coptidis).
- With food stagnation, add *Shen Qu* (Massa Fermentata) and *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli).

AUTHORS' COMMENTS

Bu Dai Wan is a formula that treats chronic parasitic infestation in infants and children with malnutrition. While the parasites are considered as an excess condition, the underlying malnutrition represents a deficiency condition. Because of the complexity of this condition, antiparasitic herbs that expel parasites must be used together with tonic herbs to address the underlying deficiencies. Lastly, this formula is prepared with pork for two reasons: 1) to mask the taste of the herbs and improve compliancy in infants and children who often dislike taking bitter herbs, and 2) its nourishing effect enhances the tonic herbs to treat *gan ji* (infantile malnutrition).

Huà Chóng Wán (Dissolve Parasites Pill)

化蟲丸
化虫丸

Pinyin Name: *Hua Chong Wan*

Literal Name: Dissolve Parasites Pill

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

COMPOSITION

<i>He Shi</i> (Fructus Carpesii)	1,500g
<i>Ku Lian Pi</i> (Cortex Meliae)	1,500g
<i>Bing Lang</i> (Semen Arecae)	1,500g
<i>Bai Fan</i> (Alumen)	375g
<i>Qian Dan</i> (Minium), <i>chao</i> (dry-fried)	1,500g

Note: *Qian Dan* (Minium) is a potentially toxic heavy metal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder and form into very small pills with flour. The pills should resemble *Huo Ma Ren* (Fructus Cannabis) in size. For infant around one year of age, take 5 pills anytime during the day. The pills may be taken with warm rice soup, or warm, boiled water plus 1-2 drops of sesame oil.

Huà Chóng Wán (Dissolve Parasites Pill)

CHINESE THERAPEUTIC ACTIONS

Expels and kills various intestinal parasites

CLINICAL MANIFESTATIONS

Intestinal parasites: intermittent severe pain migrating up and down the abdomen, nausea, and vomiting of clear fluids or parasites.

CLINICAL APPLICATIONS

Ascariasis (roundworms), oxyuriasis (pinworms), cestodiasis (tapeworms), cysticercosis (bladder worms), and fasciolopsiasis (intestinal flukes).

EXPLANATION

Hua Chong Wan (Dissolve Parasites Pill) is designed to treat retention of parasites in the intestines. The intermittent severe pain migrating up and down the abdomen is due to upward movement of the parasites. If the parasites affect the Stomach qi flow and cause rising Stomach qi, vomiting of clear fluids or parasites will occur.

This formula contains bitter, acrid, and slightly toxic *He Shi* (Fructus Carpesii) to kill and expel roundworms, pinworms and tapeworms. Bitter, cold, and toxic, *Ku Lian Pi* (Cortex Meliae) relieves abdominal pain and has a strong effect to kill roundworms, hookworms and pinworms. *Bing Lang* (Semen Arecae) activates qi to expel roundworms, tapeworms, hookworms and pinworms from the body. The astringent *Bai Fan* (Alumen) relieves toxicity and calms the parasites. Lastly, the toxic *Qian Dan* (Minium) kills all kinds of parasites.

Today, this formula is used to treat various types of parasitic infections. It can be used as a general formula to clear the intestinal pathways and expel various parasites. However, since the herbs in this formula are strong in nature, caution should be exercised in administering this formula.

To prevent possible injury to the qi, it is advisable to use Spleen and Stomach qi-tonifying herbs after administering this formula.

MODIFICATIONS

- With more abdominal pain, add *Zhi Qiao* (Fructus Aurantii) and *Mu Xiang* (Radix Aucklandiae).
- With more heat, add *Huang Lian* (Rhizoma Coptidis) or *Huang Bo* (Cortex Phellodendri Chinensis).
- With intestinal obstruction due to ascariasis (roundworms), add *Hou Po* (Cortex Magnoliae Officinalis), *Zhi Shi* (Fructus Aurantii Immaturus), *Mu Xiang* (Radix Aucklandiae), and *Da Xue Teng* (Caulis Sargentodoxae).

CAUTIONS / CONTRAINDICATIONS

- *Hua Chong Wan* is an extremely potent and slightly toxic formula for treatment of intestinal parasites. It must be used with caution in elderly patients and children. It should not be used in large doses, or for a prolonged period of time. Lastly, it should be discontinued once the desired effects are achieved. If the parasites are not completely expelled after the first dose, another dose may be given after one week of rest.
- Use of this formula is contraindicated during pregnancy, and in patients with loose stools or diarrhea.
- Because this is a potent formula that may injury the body, tonic herbs should be administered after the parasites are cleared to restore the patient's *zheng* (upright) *qi*.

AUTHORS' COMMENTS

Hua Chong Wan is a potent antiparasitic formula that may be used to treat various types of intestinal infestation of parasites, including but not limited to ascariasis (roundworms), oxyuriasis (pinworms), cestodiasis (tapeworms), cysticercosis (bladder worms), and fasciolopsiasis (intestinal flukes).

Hua Chong Wan (Dissolve Parasites Pill)

Fá Mù Wán (Quell Wood Pill)

伐木丸

Pinyin Name: Fa Mu Wan

Literal Name: Quell Wood Pill

Alternate Name: Zhu Fan Wan (Atractylodes and Melanterite Pill)

Original Source: Zhang San Feng Xian Chuan Fang (Divine Formulas from Zhang San-Feng)

COMPOSITION

Cang Zhu (Rhizoma Atractylodis), jin (soaked) in rice water and qie (sliced)	1,000g
Jiu Qu (Leaven), chao (dry-fried) to deep-red	120g
Zao Fan (Melanterite), ban (blended) with vinegar and duan (calcined) at high temperature	500g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to first prepare all three ingredients separately. Soak *Cang Zhu* (Rhizoma Atractylodis) in rice water for two nights, and then slice and dry the herb. Dry-fry *Jiu Qu* (Leaven) with the processed *Cang Zhu* (Rhizoma Atractylodis) until *Jiu Qu* (Leaven) becomes deep-red in color. Blend *Zao Fan* (Melanterite) with vinegar, allow it to dry, and calcine it at high temperature with fire. Grind all of the processed ingredients into a fine powder and form into small pills with vinegar. Take 30-40 pills two to three times daily with grain-based liquor or rice soup. Today this formula is prepared the same way, but the suggested administration has been changed to 8g of pills per dose once a day after meal with rice soup.

CHINESE THERAPEUTIC ACTIONS

1. Reduces accumulation
2. Dries dampness
3. Drains the Liver
4. Expels parasites

CLINICAL MANIFESTATIONS

Parasitic infestation (usually hookworms): a sallow facial appearance, edema, palpitations, hurried respiration, fatigue, and lack of energy.

CLINICAL APPLICATIONS

Parasitic infestation and malnutrition.

EXPLANATION

Fa Mu Wan (Quell Wood Pill) treats individuals with parasitic infestations accompanied by food accumulation and damp obstruction. Clinical presentations include a sallow facial appearance, edema, palpitations, hurried respiration, and fatigue.

This formula contains *Cang Zhu* (Rhizoma Atractylodis), a bitter and warm herb, to dry dampness. *Jiu Qu* (Leaven) promotes digestion and reduces food accumulation. *Zao Fan* (Melanterite) dissolves dampness, sedates the Liver, and expels parasites.

MODIFICATIONS

With indigestion or food stagnation, add *Ping Wei San* (Calm the Stomach Powder).

CAUTIONS / CONTRAINDICATIONS

Use of *Fa Mu Wan* has been associated with nausea and vomiting.¹

AUTHORS' COMMENTS

This formula is called "Quell Wood Pill" because one of its main functions is to drain the Liver and soothe the wood element to prevent the Liver (wood) from overacting on the Spleen (earth).

Reference

1. Zhong Yao Ming Fang Yao Li Yu Ying Yong (Pharmacology and Applications of Famous Herbal Formulas) 1989;638-9.

Chapter 20 — Summary

— Antiparasitic Formulas

Name	Similarities	Differences
Wu Mei Wan (Mume Pill)	Expel and/or kill parasites	Tonifies deficiency
Fei Er Wan (Fat Child Pill)		Strengthens the Spleen, clears Stomach heat
Bu Dai Wan (Cloth Sack Pill)		Tonifies Spleen and Stomach deficiencies
Hua Chong Wan (Dissolve Parasites Pill)		Strongly expels and kills intestinal parasites
Fa Mu Wan (Quell Wood Pill)		Reduces food accumulation, dries dampness

Wu Mei Wan (Mume Pill) is generally used to treat ascariasis (roundworms) complicated by heat and cold, and excess and deficiency. It warms the interior, tonifies the middle *jiao*, dispels cold, and expels the parasites. It is most effective for ascariasis characterized by irritability, recurrent nausea and vomiting, ingestion of food followed by vomiting with ascaris, abdominal pain, and extremely cold limbs.

Fei Er Wan (Fat Child Pill) and **Bu Dai Wan** (Cloth Sack Pill) both treat *gan ji* (infantile malnutrition) associated with parasitic infestations.

- **Fei Er Wan** clears heat, kills parasites, and strengthens the Spleen to treat *gan ji* (infantile malnutrition). Clinically, it is used to treat *gan ji* (infantile malnutrition) characterized by Spleen deficiency and Stomach heat.
- **Bu Dai Wan** expels parasites, strengthens the Spleen, and relieves *gan ji* (infantile malnutrition). This formula contains more tonic herbs, and is more suitable for *gan ji* (infantile malnutrition) with Spleen and Stomach deficiencies.

Hua Chong Wan (Dissolve Parasites Pill) expels and kills intestinal parasites. It has potent antiparasitic effects, and may be used to treat a wide variety of parasites, including ascariasis (roundworms), oxyuriasis (pinworms), cestodiasis (tapeworms), cysticercosis (bladder worms), and fasciolopsiasis (intestinal flukes).

Fa Mu Wan (Quell Wood Pill) reduces food accumulation, dries dampness, and expels parasites. It may be used for parasitic infestation (usually hookworms) with food stagnation and damp accumulation in the middle *jiao*, with signs and symptoms such as a thin, sallow facial appearance, edema, palpitations, hurried respiration, and lack of energy.

Chapter 21

— Emetic Formulas

张从正 Zhāng Cōng-Zhèng

张从正 Zhāng Cōng-Zhèng, also known as
张子和 Zhāng Zǐ-Hé, 1151 – 1231.

张从正 Zhāng Cōng-Zhèng

儒门事亲 *Ru Men Shi Qin* (Confucians' Duties to their Parents), published in 1228.

Zhang Cong-Zheng, also known as Zhang Zi-He, is one of the four famous physicians from the period of the Jin and Yuan dynasties. Heavily influenced by Liu Yuan-Su's theories of 火热论 *huo re lun* (discussion of fire and heat), Zhang developed 攻邪论 *gong xie lun* (discussion on attacking evil). Zhang proposed that all evils are derived from three sources: heaven (wind, cold, summer-heat, dampness, dryness and fire), earth (fog, dew, rain, ice, water and soil) and human (inappropriate diet of excessive sour, bitter, sweet, acrid, salty or bland foods). Correspondingly, all evils can be treated with three methods: *han fa* (sweating) to dispel evil at the exterior, *tu fa* (vomiting) to expel evil from upper body, and *xia fa* (draining downward) to purge evil from the lower body. In contrast to his aggressive treatment methods, Zhang also emphasized the importance of nutrition, and proposed the use of food and herbs to supplement diet and promote longevity. He was the first to establish clear guidelines for nutritional therapy.

Zhang was one of the first to establish the relationship among illnesses, the social environment and emotions. Zhang lived and practiced medicine during the end of the Jin dynasty and beginning of the Yuan dynasty, when there was extreme political instability and constant turmoil in the country. Because of this social unrest, people suffered from extreme emotional disturbances, including anger, joy, sadness, fear, worry, and other stressors.

Because of his skills and fame, Zhang was brought to the Imperial Palace as a supreme physician to treat the royal family and court officials. However, he resigned after five years, and opted to live a rambling and leisurely lifestyle that allowed him to read books, write poetry, and travel around the world. Zhang wrote many works in his lifetime, and is best known for *Ru Men Shi Qin* (Confucians' Duties to their Parents), published in 1228.

Mu Xiang Bing Lang Wan (Aucklandia and Betel Nut Pill) and *Gua Di San* (Melon Pedicle Powder) are two formulas created by Zhang Cong-Zheng that are still in use today.

Emetic Formulas (Summary)	1315

Chapter 21 — Overview

— Emetic Formulas

Definition: Emetic formulas induce vomiting to treat phlegm stagnation, food accumulation, and the ingestion of poisonous substances. This method of treatment is known as *tu fa* (vomiting), one of the *ba fa* (eight treatment methods) described in the *Huang Di Nei Jing* (Yellow Emperor's Inner Classic) in the first or second century, A.D.

These formulas are mainly used to dispel foreign substances from the throat, chest, diaphragm, or epigastrium. Their clinical applications include food stagnation, phlegm stagnation, ingestion of poisonous substances, convulsions, *zhong feng* (wind stroke), *bi zheng* (closed disorder) syndrome, *dian kuang* (mania and withdrawal), and *hou bi* (painful obstruction of the throat).

CAUTIONS / CONTRAINDICATIONS

- Emetic formulas are strong and harsh in nature. Therefore, they should be used with extreme caution during pregnancy, in pediatric or geriatric patients, and in cases of blood deficiency, palpitations with shortness of breath, dizziness and vertigo, wheezing and dyspnea, and generalized weakness and deficiency. Furthermore, these formulas must be discontinued once the desired effect is achieved.
- Some patients may not vomit immediately after ingestion of emetic formulas. To facilitate emesis, the patient should take the formula with warm water, and then physically induce vomiting by inserting a finger into the back of his or her throat. If the patient does not respond to emetic herbs, or if relief is not evident, he or she must immediately seek emergency medical treatment.
- The potent and harsh nature of emetic formulas can cause continuous vomiting and injure the Stomach qi. For patients who do not cease vomiting after taking the formula, general antidotes such as fresh juice of *Sheng Jiang* (*Rhizoma Zingiberis Recens*), cold congee, or cold water should be administered. If general antidotes do not work, specific antidotes are given. Specific antidotes vary and are listed in each individual formula monograph.
- Proper care must be given after emesis to ensure recovery and avoid complications. In order to restore the normal functions of the Spleen and Stomach, patients should consume only congee and other easy-to-digest foods, and avoid greasy, spicy, processed foods, or other foods that are hard to digest. Also, patients should avoid exposure to wind during and after vomiting to prevent contracting an exterior condition.
- Accidental poisonings manifest in different symptoms and signs, depending on the substance ingested. The use of emetic formulas is justified within a short period of time following ingestion of a poisonous substance, when the injurious matter is still in the stomach and can be ejected by vomiting.
- Emetic formulas should **not** be used to induce vomiting if corrosive substances have been ingested; this would only cause additional damage to the upper gastrointestinal tract when the corrosive elements are ejected as vomitus. Select other methods to neutralize or remove the corrosive substances, and have the patient seek immediate emergency medical treatment.

Emetic formulas induce vomiting and dispel foreign substances from the throat, chest, diaphragm, or epigastrium.

Proper care must be given after emesis to ensure recovery and avoid complications.

Chapter 21 — Overview

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Poisoning: The emetic effect of these formulas has been attributed in part to stimulation of the central nervous system and the gastrointestinal tract by herbs such as *Gua Di* (*Pedicellus Cucumeris*) and *Chang Shan* (*Radix Dichroae*). Emetic formulas are generally reserved for acute, urgent cases, such as the use of *Gua Di San* (Melon Pedicle Powder) for acute poisoning.¹

Reference

1. *Zhong Yao Xue* (Chinese Herbology) 1998;908-909.

Guā Dì Sǎn (Melon Pedicle Powder)

瓜蒂散

Pinyin Name: *Gua Di San*

Literal Name: Melon Pedicle Powder

Original Source: *Shang Han Lun* (Discussion of Cold-Induced Disorders) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

Gua Di (Pedicellus Cucumeris), *ao* (simmered) until yellow [1-2g]
Chi Xiao Dou (Semen Phaseoli) [1-2g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind equal amounts of the two herbs into a fine powder and sift together. Take 1 spoonful (1-3g) of the powder with a warm, strained decoction made from 6-9g of *Dan Dou Chi* (Semen Sojae Praeparatum). If vomiting is not induced, increase the dose slightly until vomiting is achieved. In addition to using the herbs, vomiting can also be induced physically via the gag reflex. Discontinue the formula when vomiting occurs.

CHINESE THERAPEUTIC ACTIONS

Induces vomiting of phlegm or stagnant food

CLINICAL MANIFESTATIONS

Phlegm or food stagnation in the chest and epigastrium; chest or epigastric distention and hardness, feelings of discomfort, a feeling of qi rising to the throat causing difficulty in breathing, restlessness, and a slightly superficial pulse at the *cun* position.

CLINICAL APPLICATIONS

Acute poisoning, mania, hepatitis, and jaundice.

EXPLANATION

Gua Di San (Melon Pedicle Powder) treats acute and severe phlegm accumulation in the chest, or food stagnation in the epigastrium. The phlegm accumulation and food stagnation may obstruct the proper flow of qi, causing distention and hardness in the chest or epigastrium.

Moreover, qi stagnation may lead to reversed flow of qi, which produces a feeling of qi rising to the throat and causing difficulty in breathing. Because the stagnation is most severe in the chest region, a slightly superficial pulse at the *cun* position may be felt.

This formula contains *Gua Di* (Pedicellus Cucumeris) to induce vomiting of phlegm and stagnant food. *Gua Di* (Pedicellus Cucumeris) also works with *Chi Xiao Dou* (Semen Phaseoli) to expel phlegm and relieve distention and hardness. *Dan Dou Chi* (Semen Sojae Praeparatum) ventilates the Lung, disperses qi stagnation in the chest, and relieves irritability. It also harmonizes the Stomach and regulates the middle *jiao* to prevent vomiting from damaging the Spleen and Stomach.

CAUTIONS / CONTRAINDICATIONS

- Since *Gua Di* (Pedicellus Cucumeris) is toxic and can easily injure the qi and Stomach, it is contraindicated in patients who have Spleen and Stomach deficiencies.
- *Gua Di San* is contraindicated if there is lack of stagnant phlegm in the chest. Do not use this formula to induce vomiting if the stagnant food has already passed from the stomach to the intestines.
- This formula should only be used in acute and excess conditions. It should be used with extreme caution in children, the elderly, postpartum patients with blood deficiency, and those with dizziness and palpitations caused by qi and blood deficiencies.

Gua Di San (Melon Pedicle Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Phlegm or food stagnation in the chest and epigastrium	<ul style="list-style-type: none"> • Distention and hardness in the chest or epigastrium: phlegm accumulation and food stagnation • Difficult breathing: obstructed qi circulation due to phlegm accumulation and food stagnation 	Induces vomiting of phlegm or stagnant food	<ul style="list-style-type: none"> • <i>Gua Di</i> (Pedicellus Cucumeris) induces vomiting of phlegm and stagnant food. • <i>Chi Xiao Dou</i> (Semen Phaseoli) expels phlegm and relieves distention and hardness. • <i>Dan Dou Chi</i> (Semen Sojae Praeparatum) ventilates the Lung, disperses qi stagnation in the chest, and relieves irritability.

Guā Dì Sǎn (Melon Pedicle Powder)

- *Gua Di San* must be discontinued when the desired effect is achieved. Do not use it for a prolonged period of time.

Do not use this formula to induce vomiting of corrosive substances this causes additional damage to the upper gastrointestinal tract when the corrosive elements are ejected as vomitus.

CLINICAL STUDIES AND RESEARCH

1. **Acute poisoning:** Acute poisoning treated with a modified *Gua Di San* preparation was associated with successful emptying of the stomach in 56 of 58 patients. The overall effectiveness was 96.55%. The average time to empty the stomach of the offending agent was 20.7 minutes. The herbal treatment contained *Gua Di* (Pedicellus Cucumeris), *Sheng Ma* (Rhizoma Cimicifugae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). In comparison with other treatment modalities, 58 patients treated with gastric lavage needed an average of 46.4 minutes to empty the stomach, and 56 patients treated with warm water to induce vomiting had only 71.42% effectiveness.¹
2. **Hepatitis:** Use of *Gua Di San* via intranasal administration has been shown in many studies to effectively treat acute or chronic viral hepatitis.² In one study, 153 of 188 patients with acute icteric viral hepatitis showed significant improvement with intranasal administration of 0.1g of *Gua Di San* bilaterally, one time daily, for 3 days per course of treatment.³

TOXICOLOGY

Administration of a small dose of *Gua Di San* has not been associated with significant changes to respiration, blood pressure, or heartbeat. However, administration of a large dose has been associated with irregular respiration, decreased blood pressure, reduced heart rate, and eventually, weakened and collapsed respiration.⁴ Fatality was reported in one individual eight hours after ingestion of 30g of *Gua Di* (Pedicellus Cucumeris) and 15g of *Chi Xiao Dou* (Semen Phaseoli) on an empty stomach with warm water.⁵ Another reported case of fatality involved an individual who ingested *Gua Di San* (actual dose unknown), which subsequently caused gastrointestinal bleeding and eventual fatality on the same day.⁶

TREATMENT OF OVERDOSE

Gua Di San should be used with extreme caution and only when needed. It must be discontinued when the desired effects are achieved. If vomiting persists after the herbs are discontinued, an antidote must be given immediately. Persistent vomiting associated with the use

of *Gua Di San* can be relieved with 0.03-0.06 gram of *She Xiang* (Moschus) or 0.3-0.6 gram of *Ding Xiang* (Flos Caryophylli).

RELATED FORMULA

Sān Shèng Sǎn (Three-Sage Powder)

三聖散

三圣散

Pinyin Name: *San Sheng San*

Literal Name: Three-Sage Powder

Original Source: *Ru Men Shi Qin* (Confucians' Duties to their Parents) by Zhang Cong-Zheng in 1228

Fang Feng (Radix Saposhnikoviae) 90g [5g]

Gua Di (Pedicellus Cucumeris),
chao (dry-fried) till yellow 90g [5g]

Li Lu (Radix et Rhizoma Veratri) 0.75-30 g [1-3g]

The source text states to grind the ingredients into a coarse powder and prepare as a decoction. Sip the decoction slowly, and stop when vomiting begins. Today, this formula may be prepared as a decoction with the doses suggested in brackets. It may also be administered via a nasogastric tube.

This formula induces vomiting and dispels wind-phlegm. Clinically, it may be used for patients with *zhong feng* (wind stroke) and *bi zheng* (closed disorder), showing symptoms such as loss of voice, facial paralysis with deviation of the eyes and mouth, unconsciousness, locked jaws, and a superficial, slippery and excess pulse. This formula is also good for treating poisoning when the offending agent is still in the stomach.

San Sheng San (Three-Sage Powder) should be used with extreme caution and only when needed. It must be discontinued when the desired effects are achieved. If vomiting persists after the herbs are discontinued, an antidote must be given immediately. Persistent vomiting associated with the use of *San Sheng San* can be alleviated with a decoction of *Cong Bai* (Bulbus Allii Fistulosi).

Gua Di San and *San Sheng San* (Three-Sage Powder) both induce vomiting.

- *Gua Di San* eliminates food and phlegm stagnation, and treats chest distention and hardness with qi rising to the throat, causing difficulty breathing.
- *San Sheng San* has more potent emetic action. It eliminates wind-phlegm to treat *zhong feng* (wind stroke), *bi zheng* (closed disorder), and *dian kuang* (mania and withdrawal).

Guā Dì Sǎn (Melon Pedicle Powder)

AUTHORS' COMMENTS

Gua Di San is generally regarded as the standard formula for inducing vomiting. Historically, it has been used to treat severe phlegm accumulation in the chest or food stagnation in the epigastrium. Today, it is also used to treat food poisoning. This formula helps to eliminate offending agents from the stomach, and minimizes their further absorption in the digestive tract.

Jiù Jí Xī Xián Sǎn (Urgent Powder to Dilute Saliva)

救急稀涎散

Pinyin Name: *Jiu Ji Xi Xian San*

Literal Name: Urgent Powder to Dilute Saliva

Original Source: *Sheng Ji Zong Lu* (General Collection for Holy Relief) by a staff of court physicians in the Northern Song Dynasty around 1111-1117

COMPOSITION

<i>Zao Jiao</i> (Fructus Gleditsiae)	15g
<i>Bai Fan</i> (Alumen)	30g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into an extremely fine powder. Take 1.5g of the powder with warm water that has been boiled. The dose may be increased (up to 3g) for severe condition. However, do not overdose as it may cause weakness and deficiency.

a feeling of oppression, decreased muscle tone in the four limbs, altered consciousness or unconsciousness, deviation of the mouth, and a slippery, excess and forceful pulse. It is also used for *hou bi* (painful obstruction of the throat).

CHINESE THERAPEUTIC ACTIONS

- 1. Opens the sensory orifices
- 2. Dispels phlegm
- 3. Induces vomiting

CLINICAL APPLICATIONS

Sudden unconsciousness.

CLINICAL MANIFESTATIONS

Zhong feng (wind stroke) and *bi zheng* (closed disorder) syndrome: profuse amount of phlegm and saliva with a rattling sound in the throat, obstruction of qi circulation,

EXPLANATION

Jiu Ji Xi Xian San (Urgent Powder to Dilute Saliva) treats individuals with *zhong feng* (wind stroke) and *bi zheng* (closed disorder) syndromes characterized by phlegm accumulation. The primary functions of this formula are to dissolve phlegm and open the sensory orifices, and the secondary function is to induce vomiting. As a result of

Jiu Ji Xi Xian San (Urgent Powder to Dilute Saliva)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Zhong feng</i> (wind stroke) and <i>bi zheng</i> (closed disorder) syndromes	<ul style="list-style-type: none">• Profuse amount of phlegm and saliva with a rattling sound in the throat: phlegm obstructing the airways• Altered consciousness or unconsciousness: phlegm obstructing the sensory orifices• Decreased muscle tone in the four limbs and deviation of the mouth: phlegm obstructing the channels and collaterals• Slippery, excess and forceful pulse: phlegm accumulation	<ul style="list-style-type: none">• Opens the sensory orifices• Induces vomiting	<ul style="list-style-type: none">• <i>Zao Jiao</i> (Fructus Gleditsiae) opens the orifices by dispelling phlegm.• <i>Bai Fan</i> (Alumen) induces vomiting and dissolves phlegm.

Jiù Jí Xī Xián Sǎn (Urgent Powder to Dilute Saliva)

zhong feng (wind stroke), phlegm and saliva begin to accumulate in the interior, producing qi stagnation with a feeling of chest oppression, breathing difficulty, and, in severe cases, *bi zheng* (closed disorder) syndrome with altered consciousness or unconsciousness.

Zao Jiao (Fructus *Gleditsiae*) opens the orifices by dispelling phlegm, while *Bai Fan* (Alumen) induces vomiting and dissolves phlegm. Once the excessive phlegm and

saliva are eliminated, the acute condition of their accumulation will be resolved, hence this formula's name: "Urgent Powder to Dilute Saliva."

CAUTIONS / CONTRAINDICATIONS

Jiu Ji Xi Xian San is designed to treat an urgent situation characterized by acute accumulation of phlegm and saliva. Once this condition is resolved, other herbs and formulas should be used to treat the underlying cause.

Yán Tāng Tàn Tù Fāng (Salt Decoction to Induce Vomiting)

鹽湯探吐方
盐汤探吐方

Pinyin Name: *Yan Tang Tan Tu Fang*

Literal Name: Salt Decoction to Induce Vomiting

Original Source: *Bei Ji Qian Jin Yao Fang* (Thousands of Golden Prescriptions for Emergencies) by Sun Si-Miao in Tang Dynasty

COMPOSITION

Shi Yan (Sodium Chloride)

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to dissolve a large amount of *Shi Yan* (Sodium Chloride) in 3 bowls of hot water to make it extremely salty and concentrated. Take 1 bowl per dose while warm, and repeat with additional doses until all the stagnant food are removed via vomiting.

Today, this formula is prepared by dissolving *Shi Yan* (Sodium Chloride) in warm, boiled water until the solution becomes fully saturated. Take 2,000 mL of this preparation per dose to induce vomiting.

CHINESE THERAPEUTIC ACTIONS

Induces vomiting of stagnant food or poisonous substances

CLINICAL MANIFESTATIONS

Food stagnation, and sudden turmoil disorder with inability to vomit or defecate.

CLINICAL APPLICATIONS

Ingestion of poisonous substances.

EXPLANATION

Yan Tang Tan Tu Fang (Salt Decoction to Induce Vomiting) treats food stagnation characterized by the patient's inability to vomit. In this syndrome, the patient may have the desire to vomit, but is unable to do so.

This formula uses salt to induce vomiting and relieve stagnation in the body. It is a mild and convenient formula. If the patient does not respond immediately, try administering more salt water, or insert a finger in the back of the throat to induce vomiting.

This formula may also be used for sudden turmoil disorder with severe abdominal pain, in which the patient cannot vomit or defecate. Lastly, it may be used for unconsciousness syndromes that are caused by overeating or Liver qi stagnation.

***Yan Tang Tan Tu Fang* (Salt Decoction to Induce Vomiting)**

Diagnosis	Signs and Symptoms	Treatment	Herbs
Food stagnation	Food stagnation with a desire to vomit	Induces vomiting	<i>Shi Yan</i> (Sodium Chloride) induces vomiting and relieves stagnation

Chapter 21 — Summary

— Emetic Formulas

Name	Similarities	Differences
Gua Di San (Melon Pedicle Powder)		Strongest emetic effect
Jiu Ji Xi Xian San (Urgent Powder to Dilute Saliva)	Induce vomiting	Mildest emetic effect
Yan Tang Tan Tu Fang (Salt Decoction to Induce Vomiting)		Moderate and gentle emetic effect

Gua Di San (Melon Pedicle Powder) has the strongest emetic action. It resolves food accumulation in the Stomach and phlegm stagnation in the chest or diaphragm. Clinical manifestations include chest or epigastric fullness and hardness, heartburn, irritability, a feeling of obstruction in the throat, and a slightly superficial pulse at the *cun* position.

Jiu Ji Xi Xian San (Urgent Powder to Dilute Saliva) has the mildest emetic action. This formula treats *zhong feng* (wind stroke) and *bi zheng* (closed disorder) syndromes with profuse amount of phlegm, obstruction of saliva, and stagnation of qi. Clinical manifestations include a feeling of oppression, decreased muscle tone in the four extremities, altered consciousness or unconsciousness, deviation of the mouth, and a slippery, excess and forceful pulse.

Yan Tang Tan Tu Fang (Salt Decoction to Induce Vomiting) has a gentle and moderate emetic function. It treats the presence of stagnant food or ingestion of poisonous substances. It is also used for sudden turmoil disorder characterized by the presence of abdominal pain with inability to vomit or defecate.

Chapter 22

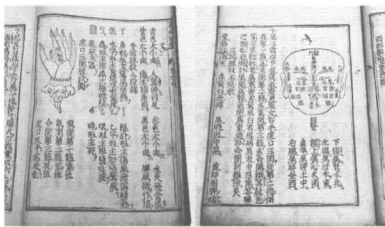

— Formulas that Treat Abscesses and Sores

龚廷贤 Gōng Tíng-Xiān

龚廷贤 Gōng Tíng-Xiān, 1522 – 1619.

龚廷贤 Gōng Tíng-Xiān

万病回春 *Wan Bing Hui Chun* (Restoration of Health from the Myriad Diseases) in 1587.

寿世保元 *Shou Shi Bao Yuan* (Achieving Longevity by Guarding the Source) in 1615.

Gong Ting-Xian was one of the most famous physicians of the Ming dynasty in the 16th century. Gong's father was a supreme physician in the Imperial Palace, and subsequently trained him to also become a supreme physician. Gong studied many aspects of medicine, and published many books in his lifetime.

His most famous works include *Wan Bing Hui Chun* (Restoration of Health from the Myriad Diseases) in 1587 and *Shou Shi Bao Yuan* (Achieving Longevity by Guarding the Source) in 1615. The former text totaled 8 volumes, and contained detailed information on differential diagnosis, pathology, treatment, and prevention of, as the name of the text suggests, a myriad of diseases. The latter text contained 10 volumes, and discussed the diagnosis and treatment of internal medicine, external medicine, gynecology, pediatrics and more.

These texts presented many formulas that are commonly prescribed today, such as

- *Jing Jie Lian Qiao Tang* (Schizonepeta and Forsythia Decoction)
- *Shu Gan Tang* (Spread the Liver Decoction)
- *Qing Shang Fang Feng Tang* (Clear the Upper and Guard the Wind Decoction)
- *Wen Qing Yin* (Warming and Clearing Decoction)
- *Fen Xiao Tang* (Separate and Reduce Decoction)
- *Shu Jing Huo Xue Tang* (Relax the Channels and Invigorate the Blood Decoction)
- *Qing Fei Tang* (Clear the Lung Decoction)
- *Qian Jin Nei Tuo San* (Drain-the-Interior Powder Worthy of a Thousand Gold)
- *Shi Liu Wei Liu Qi Yin* (Sixteen-Ingredient Decoction to Flow Qi)
- *San Zhong Kui Jian Tang* (Disperse the Swelling and Break the Hardness Decoction)

Formulas that Treat Abscesses and Sores (Summary)	1385

Chapter 22 — Overview

— Formulas that Treat Abscesses and Sores

Definition: Formulas that treat abscesses and sores generally clear heat, eliminate toxins, reduce swellings, drain the interior, discharge pus, promote the generation of new flesh, and astringe ulcerations. Clinically, their applications are not restricted to treating abscesses and sores. Rather, they may treat both external conditions (including abscesses, sores, cellulitis, boils, erysipelas, multiple abscesses, carbuncles, furuncles, scrofula, goiter, and tumor), and internal disorders (such as abscesses of the organs).

Abscesses and sores are either externally contracted or internally generated. External causes of abscesses and sores include *liu yin* (six exogenous factors), insect or animal bites, cuts and burns, and various sport injuries or traumas. Internal causes of abscesses and sores include damage caused by imbalance of the *qi qing* (seven emotions), or an improper diet consisting of too much acrid or hot food. These etiological factors lead to stagnation within the channels and collaterals and disharmony between qi and blood. If this stagnation is left untreated, heat formation results, and abscesses and sores eventually form. Other factors, such as cold, dampness, or phlegm, can also stagnate in the muscles, tendons, ligaments, and channels and collaterals, to cause either *yin* (deep-rooted) or *yang* (superficial) type of abscesses and sores.

Differential diagnosis of abscesses and sores begins with assessment of whether the condition is externally contracted or internally generated.

- Diagnostic criteria for externally-contracted abscesses and sores include the differentiation of yin and yang. For example, *yang* (superficial) abscesses and sores are characterized by prominent swelling and inflammation, limited size or surface area with defined borders, redness, and warm, burning sensations in the affected area. On the other hand, *yin* (deep-rooted) abscesses and sores are usually characterized by very slight swelling (almost flat) that may be hard or soft. The affected area is widespread, involves a large surface area, and shows no change in skin color.
- Diagnostic criteria for internally-generated abscesses and sores include differentiation of cold or heat, deficiency or excess, and the presence or absence of pus. Lung and intestinal abscesses are the most common internal abscess disorders affecting the *zang fu* organs.

~
Internal and external abscesses and sores may be treated via oral ingestion and/or topical application.
~

External abscesses and sores are treated internally with three main treatment methods: *xiao fa* (reducing method) in the early stage, *tuo fa* (draining method) in the middle stage when pus has formed, and *bu fa* (tonifying method) in the late stage involving ulcerations.

- *Xiao fa* (reducing method) is used in early stage abscesses and sores, prior to the formation of pus, to disperse heat and toxins, reduce swelling, and terminate the illness. Specific types of *xiao fa* (reducing method) include the use of herbs that release the exterior, clear heat, warm and unblock, resolve phlegm, move qi, activate blood circulation, and eliminate stagnation.
- *Tuo fa* (draining method) is used in the early to middle stages of abscesses and sores, marked by pus formation in the presence of heat and toxins, or generalized weakness and deficiency with inability to discharge the pus. *Tuo fa* (draining method) brings the heat and toxins from the deep aspects of the body to the superficial, and facilitates the perforation and discharge of pus. However, because this stage is usually characterized by underlying weakness and deficiency, the use of *bu fa* (tonifying method) may also be necessary to facilitate the healing process.

Chapter 22 — Overview

Some formulas emphasize treatment based on differentiation of yin or yang, hot or cold, and excess or deficiency; others focus on the physical location of sores.

- *Bu fa* (tonifying method) is employed in the late stage when the abscesses and sores have perforated and ulcerated, and pus is being discharged. However, the area of ulceration may not have reduced in size, and the pus may continue to discharge and not heal because of underlying deficiencies of qi and blood, the Spleen and Stomach, or the Liver and Kidney. In these circumstances, *bu fa* (tonifying method) is used to tonify deficiencies, astringe the ulcerations, dry the pus, promote the generation of tissue, and facilitate healing.

Internal abscesses and sores affecting the interior *zang fu* organs should be treated with multiple methods to clear heat, eliminate toxins, and dispel stagnation to reduce swelling. Depending on the individual condition, it may be necessary to add herbs to drain pus and tonify the underlying deficiencies.

SUBCATEGORIES OF ACTION

Formulas that treat abscesses and sores are divided into two subcategories to indicate their use in treating external and internal abscesses and sores.

1. External Abscesses and Sores

External abscesses and sores can have various presentations, and require formulas of corresponding characteristics for treatment. Some formulas emphasize treatment based on differentiation of yin or yang, hot or cold, and excess or deficiency, others focus on the physical location of the abscesses and sores.

- External abscesses and sores characterized by excess, heat, and yang should be treated with formulas that clear heat, eliminate toxins, break hardness, and reduce swelling, such as *Xian Fang Huo Ming Yin* (Sublime Formula for Sustaining Life).
- External abscesses and sores characterized by deficiency, cold, and yin should be treated with formulas that tonify, warm and disperse cold, such as *Yang He Tang* (Yang-Heartening Decoction) and *Xiao Jin Dan* (Minor Gold Special Pill).

Moreover, depending on the nature of the disease (excess or deficiency) and the underlying constitution of the patient, formulas with various functions may be used.

- Exemplar formulas that drain the interior and discharge pus include *Xian Fang Huo Ming Yin* (Sublime Formula for Sustaining Life) and *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins).
- Exemplar formulas that tonify the underlying deficiencies and drain abscesses and sores include *Nei Bu Huang Qi Tang* (Tonify the Interior Decoction with Astragalus) and *Yang He Tang* (Yang-Heartening Decoction).

Internal abscesses and sores generally affect the lungs and the intestines.

Lastly, external abscesses and sores may affect different parts of the body, and thus require formulas that treat these affected areas. Formulas in this subcategory include formulas from other chapters that also treat abscesses and sores.

- Formulas that disperse and clear wind-heat are often used to treat abscesses and sores affecting the upper parts of the body (head, face, neck, and shoulders), such as *Niu Bang Jie Ji Tang* (Arctium Decoction to Release the Muscle Layer).
- Formulas that regulate Liver qi circulation, purge fire and eliminate toxins are incorporated to treat abscesses and sores affecting the middle parts of the body (chest, back, and abdomen), such as *Jia Wei Xiao Yao San* (Augmented Rambling Powder) and *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity).
- Formulas that clear heat, eliminate toxins, and activate qi and blood circulation in the peripheral channels and collaterals are frequently deployed to treat abscesses and sores affecting the limbs (arms and legs), such as *Si Miao Yong An Tang* (Four-Valiant Decoction for Well-Being).

Chapter 22 — Overview

2. Internal Abscesses and Sores

Internal abscesses and sores generally affect the lungs and intestines. Lung abscesses characterized by phlegm, heat, and blood stagnation are treated with formulas such as *Wei Jing Tang* (Reed Decoction). Intestinal abscesses characterized by damp-heat accumulation and qi and blood stagnation are treated with formulas such as *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction).

CAUTIONS / CONTRAINDICATIONS

Accurate differential diagnosis and proper selection of treatment methods are essential to obtaining successful results. Incorrect diagnosis or use of inappropriate treatment methods will delay healing, or possibly worsen the condition.

- **Xiao fa** (reducing method) is used for early stage abscesses and sores. Use of this strong method is inappropriate in late stage abscesses and sores with underlying deficiencies, as it will damage qi and blood, leading to prolonged duration of the illness due to the inability of the ulcerations to heal.
- **Tuo fa** (draining method) is used in the middle stage of abscesses and sores. This method is not recommended if the abscesses and sores are characterized by the presence of excess heat and toxins, which should be treated with herbs that clear heat and eliminate toxins.
- **Bu fa** (tonifying method) is employed in the late stage of abscesses and sores. This method should not be used during the early stage, or in cases of accumulation of heat and toxins in the interior, because this method will contribute to more excess and stagnation.

Formulas that treat abscesses and sores have antibiotic and anti-inflammatory effects on infections and inflammations affecting superficial tissues and internal organs.

PHARMACOLOGICAL EFFECTS & CLINICAL APPLICATIONS

Although these formulas are known for treating abscesses and sores, they have a wide variety of pharmacological effects and clinical applications. These formulas can treat disorders characterized by infections and inflammations that come with abscesses, sores, nodules, and hardness.

- **Dermatological disorders:** These formulas may be used to treat various disorders affecting the skin, such as carbuncles and sores,^{1,2} cellulitis,³ acne vulgaris,⁴ gangrene,⁵ and erysipelas.⁶ Exemplar formulas include *Xian Fang Huo Ming Yin* (Sublime Formula for Sustaining Life), *Si Miao Yong An Tang* (Four-Valiant Decoction for Well-Being), and *Shi Wei Bai Du Tang* (Ten-Ingredient Decoction to Overcome Pathogenic Influences).
- **Blood vessel disorders:** These formulas are effective in treating inflammatory conditions of the blood vessels, such as phlebitis,⁷ thrombophlebitis,^{8,9,10} thromboangiitis obliterans,^{11,12,13} and thrombosis of the iliofemoral vein.¹⁴ Representative formulas include *Xian Fang Huo Ming Yin* (Sublime Formula for Sustaining Life), *Si Miao Yong An Tang* (Four-Valiant Decoction for Well-Being), and *Yang He Tang* (Yang-Heartening Decoction).
- **Breast disorders:** These formulas demonstrate effectiveness in treating various types of breast disorders, such as mastitis,^{15,16} breast abscesses,¹⁷ hyperplasia of the mammary glands,^{18,19} and cystic hyperplasia of the breast.²⁰ Representative formulas include *Xian Fang Huo Ming Yin* (Sublime Formula for Sustaining Life), *Xiao Luo Wan* (Reduce Scrofula Pill), *Yang He Tang* (Yang-Heartening Decoction), and *Hai Zao Yu Hu Tang* (Sargassum Decoction for the Jade Flask).
- **Throat disorders:** *Xian Fang Huo Ming Yin* (Sublime Formula for Sustaining Life) and *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins) are formulas commonly used to treat parotitis, tonsillitis, and peritonsillar abscesses.^{21,22,23,24}
- **Others:** Some of these formulas treat other inflammatory diseases, such as pelvic inflammatory disease,^{25,26} appendicular abscess,²⁷ osteomyelitis,^{28,29} and myelitis.³⁰

Formulas that treat internal abscesses and sores treat various infections and inflammation of the internal organs with abscesses and sores.

- **Pulmonary disorders:** *Wei Jing Tang* (Reed Decoction) has been shown to effectively treat infection and inflammation of the lungs. The clinical applications of this formula include pulmonary abscesses,^{31,32} pneumonia (lobar pneumonia, lobular pneumonia, bronchopneumonia,

Chapter 22 — Overview

and mycoplasmal pneumonia),³³ and bronchitis (bronchitis in children, suppurative bronchitis, and chronic bronchitis).^{34,35,36}

- **Appendicitis:** These formulas have been used successfully to treat acute appendicitis,³⁷ chronic appendicitis,³⁸ ruptured appendix with peritonitis,³⁹ and periappendicular abscess.⁴⁰ Two representative formulas are *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction) and *Yi Yi Fu Zi Bai Jiang San* (Coicis, Prepared Aconite, and Patrinia Powder).
- **Others:** Formulas that treat internal abscesses and sores have also been shown to treat other diseases characterized by infection and/or inflammation of the internal organs, such as pelvic inflammatory disease,^{41,42} acute cholecystitis,⁴³ ulcerative colitis,⁴⁴ chronic prostatitis,⁴⁵ and suppurative tonsillitis.⁴⁶

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients with 1 large bowl of grain-based liquor and bring it to a boil 5-7 times. Today, it is prepared as a decoction with water or with a 50:50 mixture of water and grain-based liquor.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and eliminates toxins
2. Reduces swelling and breaks the hardness
3. Activates blood circulation and stops pain

CLINICAL MANIFESTATIONS

Early onset of abscesses and sores characterized by accumulation of heat and toxins and stagnation of qi and blood: local redness; swelling and pain with or without fever and chills; a thin and white or yellow tongue coating; and a rapid, forceful pulse.

CLINICAL APPLICATIONS

Carbuncles, furuncles, sores, breast abscesses, appendicular abscesses, acute appendicitis, thrombophlebitis, mastitis, mammary abscess, pelvic inflammatory disease, cervicitis, vaginitis, tonsillitis, peritonsillar abscesses, anal sinusitis, sty, post-herpetic neuralgia, psoriasis, reflux esophagitis, peptic ulcer disease, ulcerative colitis, osteoradionecrosis, osteomyelitis, pneumonia, and tumors.

EXPLANATION

Xian Fang Huo Ming Yin (Sublime Formula for Sustaining Life) treats early onset of abscesses and sores characterized by accumulation of heat and toxins and stagnation of qi and blood. It is suitable for early onset of abscesses and sores, in which pus has not yet formed. In this syndrome, heat and toxins in the skin and muscles may cause local redness and swelling, while qi and blood stagnation may cause pain. Since the disease is still located at the exterior,

Xīān Fāng Huó Mìng Yīn (Sublime Formula for Sustaining Life)

Xian Fang Huo Ming Yin (Sublime Formula for Sustaining Life)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Early onset of abscesses and sores	<ul style="list-style-type: none"> • Abscesses, sores, local redness and swelling: heat and toxins in the skin and muscles • Local pain: qi and blood stagnation • Fever and chills: exterior condition • Thin and white or yellow tongue coating: early stage of heat • Rapid, forceful pulse: excess heat condition 	<ul style="list-style-type: none"> • Clears heat and eliminates toxins • Reduces swelling and breaks the hardness • Activates blood circulation and stops pain 	<ul style="list-style-type: none"> • <i>Jin Yin Hua</i> (Flos Lonicerae Japonicae) clears heat and eliminates toxins. • <i>Fang Feng</i> (Radix Saposhnikovia) and <i>Bai Zhi</i> (Radix Angelicae Dahuricae) disperse and dispel heat toxins. • <i>Dang Gui Wei</i> (Extremities Radix Angelicae Sinensis), <i>Chi Shao</i> (Radix Paeoniae Rubra), <i>Ru Xiang</i> (Gummi Olibanum), and <i>Mo Yao</i> (Myrrha) activate blood circulation and remove blood stagnation. • <i>Bei Mu</i> (Bulbus Fritillariae) and <i>Tian Hua Fen</i> (Radix Trichosanthis) resolve phlegm, clear heat, reduce swelling, dispel pus, and break the hardness. • <i>Chuan Shan Jia</i> (Squama Manis) and <i>Zao Jiao Ci</i> (Spina Gleditsiae) drain abscesses and soften nodules. • <i>Chen Pi</i> (Pericarpium Citri Reticulatae) regulates the qi flow. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) clears heat, eliminates toxins and harmonizes the Stomach.

fever and chills are present. A thin and white or yellow tongue coating indicates that the heat has not yet progressed to the interior organs, while a rapid, forceful pulse suggests excess heat in the body.

Jin Yin Hua (Flos Lonicerae Japonicae) clears heat and eliminates toxins. *Fang Feng* (Radix Saposhnikovia) and *Bai Zhi* (Radix Angelicae Dahuricae) disperse and dispel heat and toxins from the superficial parts of the body. *Dang Gui Wei* (Extremities Radix Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubra), *Ru Xiang* (Gummi Olibanum), and *Mo Yao* (Myrrha) activate blood circulation and remove blood stagnation to reduce the redness, swelling, and pain. *Bei Mu* (Bulbus Fritillariae) and *Tian Hua Fen* (Radix Trichosanthis) resolve phlegm, clear heat, reduce swelling, dispel pus, and disperse nodules. *Chuan Shan Jia* (Squama Manis) and *Zao Jiao Ci* (Spina Gleditsiae) open the channels and collaterals to drain the abscesses and soften the nodules. *Chen Pi* (Pericarpium Citri Reticulatae) regulates the qi flow. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) clears heat, eliminates toxins and harmonizes the Stomach. The use of grain-based liquor helps to activate blood circulation and open the channels and collaterals.

MODIFICATIONS

- For abscesses and sores in the head region, add *Chuan Xiong* (Rhizoma Chuanxiong).
- For abscesses and sores in the chest region, add *Gua Lou* (Fructus Trichosanthis).
- For abscesses and sores in the hypochondriac area, add *Chai Hu* (Radix Bupleuri).
- For abscesses and sores in the waist and back regions, add *Qin Jiao* (Radix Gentianae Macrophyllae).
- For abscesses and sores in the lower extremities, add *Niu Xi* (Radix Achyranthis Bidentatae).
- With swelling and pain, add *Zi Hua Di Ding* (Herba Violae) and *Pu Gong Ying* (Herba Taraxaci).
- With damaged body fluids caused by high fever, increase the dose of *Tian Hua Fen* (Radix Trichosanthis).
- With heat in the *xue* (blood) level, add *Di Huang* (Radix Rehmanniae), *Xuan Shen* (Radix Scrophulariae), and *Mu Dan Pi* (Cortex Moutan).
- With qi deficiency, add *Huang Qi* (Radix Astragali).
- With constipation, add *Mang Xiao* (Natrii Sulfas) and *Da Huang* (Radix et Rhizoma Rhei).

CAUTIONS / CONTRAINDICATIONS

- *Xian Fang Huo Ming Yin* should be used with caution in

Xiān Fāng Huó Míng Yīn (Sublime Formula for Sustaining Life)

patients with Spleen and Stomach deficiencies, or qi and blood deficiencies.

- This formula is indicated for early stages of abscesses and sores. It is contraindicated for *yin* (deep-rooted) sores, or if the lesions have already ulcerated.

CLINICAL STUDIES AND RESEARCH

- 1. Abscesses and sores:** One study reported 100% effectiveness using modified *Xian Fang Huo Ming Yin* to treat generalized sores and abscesses.¹ Another study reported 96.3% effectiveness in treating 54 patients with swelling and deep-rooted sores.²
- 2. Breast abscesses:** Researchers reported complete recovery in 29 of 30 patients with breast abscesses using both oral and topical applications of herbs. Oral formulation was given as a decoction daily, for 7 days per course of treatment, for 1-2 courses total. The formula contained *Jin Yin Hua* (Flos *Lonicerae Japonicae*) 20g, *Bai Zhi* (Radix *Angelicae Dahuricae*) 10g, *Dang Gui* (Radix *Angelicae Sinensis*) 10g, *Chuan Bei Mu* (Bulbus *Fritillariae Cirrhosae*) 10g, *Fang Feng* (Radix *Saposhnikoviae*) 10g, *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*) 10g, *Ru Xiang* (Gummi *Olibanum*) 6g, *Mo Yao* (Myrrha) 6g, *Zao Jiao Ci* (Spina *Gleditsiae*) 10g, *Tian Hua Fen* (Radix *Trichosanthis*) 10g, and *Chen Pi* (Pericarpium *Citri Reticulatae*) 10g. The treatment protocol was to administer the herbs in decoction with a small amount of grain-based liquor. The topical formulation contained 60g each of *Da Huang* (Radix et Rhizoma *Rhei*) and *Mang Xiao* (Natrii *Sulfas*). These two herbs were cooked in 8,000 mL of water for 40 minutes, and the decoction was given as a room-temperature herbal wash to the affected area.³
- 3. Mastitis:** One hundred and eight patients with acute mastitis were treated with modified *Xian Fang Huo Ming Yin*, with complete recovery in 82 cases, marked improvement in 15 cases, slight improvement in 10 cases, and no effect in 1 case. The herbal formula contained *Jin Yin Hua* (Flos *Lonicerae Japonicae*) 20g, *Fang Feng* (Radix *Saposhnikoviae*) 10g, *Bai Zhi* (Radix *Angelicae Dahuricae*) 10g, *Zhe Bei Mu* (Bulbus *Fritillariae Thunbergii*) 20g, *Tian Hua Fen* (Radix *Trichosanthis*) 10g, dry-fried *Ru Xiang* (Gummi *Olibanum*) 10g, dry-fried *Mo Yao* (Myrrha) 10g, vinegar-fried *Chai Hu* (Radix *Bupleuri*) 20g, vinegar-fried *Xiang Fu* (Rhizoma *Cyperii*) 12g, *Huang Qin* (Radix *Scutellariae*) 10g, *Wang Bu Liu Xing* (Semen *Vaccariae*) 10g, and others as deemed necessary. The treatment protocol was to cook the herbs in water, drink the decoction, and apply the warm herb residue topically to the affected area.⁴
- 4. Appendicular abscess:** Use of *Xian Fang Huo Ming Yin* was effective in treating 27 of 30 patients with appendicular abscess. The formula effectively reduced

inflammation, relieved pain, and lowered body temperature.⁵

- 5. Thrombophlebitis:** Two studies reported good results using modified *Xian Fang Huo Ming Yin* to treat thrombophlebitis. According to the first study, 12 patients were treated with both oral and topical applications of herbs on a daily basis. The herbal formula contained *Jin Yin Hua* (Flos *Lonicerae Japonicae*) 50g, *Pu Gong Ying* (Herba *Taraxaci*) 30g, *Lian Qiao* (Fructus *Forsythiae*) 15g, *Tian Hua Fen* (Radix *Trichosanthis*) 15g, *Dang Gui* (Radix *Angelicae Sinensis*) 15g, *Ji Xue Teng* (Caulis *Spatholobi*) 15g, *Xiang Fu* (Rhizoma *Cyperii*) 15g, *Chen Pi* (Pericarpium *Citri Reticulatae*) 15g, *Si Gua Luo* (Retinervus *Luffae Fructus*) 15g, *Wei Ling Xian* (Radix et Rhizoma *Clematidis*) 10g, *Fang Feng* (Radix *Saposhnikoviae*) 10g, *Chuan Shan Jia* (Squama *Manis*) 10g, *Bai Zhi* (Radix *Angelicae Dahuricae*) 10g, *Chi Shao* (Radix *Paeoniae Rubra*) 10g, *Hong Hua* (Flos *Carthami*) 10g, *Ru Xiang* (Gummi *Olibanum*) 10g, *Mo Yao* (Myrrha) 10g, *Mu Xiang* (Radix *Aucklandiae*) 10g, *Cang Zhu* (Rhizoma *Atractylodis*) 10g, *Huang Bo* (Cortex *Phellodendri Chinensis*) 10g, *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*) 10g, *Niu Xi* (Radix *Achyranthis Bidentatae*) 25g, and 50 mL of grain-based liquor. The treatment protocol was to cook the herbs in water, and drink the decoction. The herb residue was placed inside a cheese cloth which was applied topically to the affected area while warm. Of 12 patients, the study reported complete recovery in 9 cases and marked improvement in 3 cases.⁶ In another study, 111 patients with thrombophlebitis were also treated with good results using modified *Xian Fang Huo Ming Yin*. Of 60 patients diagnosed with damp-heat, 49 had complete recovery and 11 had improvement. Of 51 patients diagnosed with blood stagnation, 28 had complete recovery and 20 had improvement.⁷
- 6. Tonsillitis:** Use of modified *Xian Fang Huo Ming Yin* was associated with complete recovery in all 36 patients with acute tonsillitis (19 males and 17 females, between 4-65 years of age). The duration of treatment ranged from 3-8 days, with improvement noted in most patients within the first 1-2 days. The herbal formula contained *Jin Yin Hua* (Flos *Lonicerae Japonicae*) 9-30g, *Dang Gui* (Extremities Radix *Angelicae Sinensis*) 6-15g, *Chi Shao* (Radix *Paeoniae Rubra*) 6-15g, processed *Ru Xiang* (Gummi *Olibanum*) 3-15g, processed *Mo Yao* (Myrrha) 6-15g, *Zhe Bei Mu* (Bulbus *Fritillariae Thunbergii*) 3-15g, *Tian Hua Fen* (Radix *Trichosanthis*) 6-15g, processed *Chuan Shan Jia* (Squama *Manis*) 3-15g, dry-fried *Zao Jiao Ci* (Spina *Gleditsiae*) 3-15g, *Chen Pi* (Pericarpium *Citri Reticulatae*) 6-18g, *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*) 3-9g, *Fang Feng* (Radix *Saposhnikoviae*) 3-15g, *Bai Zhi* (Radix *Angelicae Dahuricae*) 6-15g, and

Xiān Fāng Huó Mìng Yīn (Sublime Formula for Sustaining Life)

others as needed. The herbs were cooked in water, and the decoction administered in three equally-divided doses.⁸

7. **Peritonsillar abscesses:** One study reported complete recovery in 57 of 60 patients (54 males and 6 females, between 18-55 years of age) with peritonsillar abscesses using modified *Xian Fang Huo Ming Yin*. The duration of treatment ranged from 3-7 packs of herbs. The herbal formula contained 10 grams each of *Jin Yin Hua* (Flos Lonicerae Japonicae), *Bai Zhi* (Radix Angelicae Dahuricae), *Bei Mu* (Bulbus Fritillariae), *Fang Feng* (Radix Saposhnikoviae), *Chi Shao* (Radix Paeoniae Rubra), *Dang Gui* (Radix Angelicae Sinensis), *Zao Jiao Ci* (Spina Gleditsiae), *Chuan Shan Jia* (Squama Manis) and *Tian Hua Fen* (Radix Trichosanthis); and 6 grams each of *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Chen Pi* (Pericarpium Citri Reticulatae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). Additional modifications were made if necessary.⁹
8. **Anal sinusitis:** One hundred and fifty-six patients with anal sinusitis showed marked improvement using oral and topical application of herbs. The formula for oral ingestion contained *Jin Yin Hua* (Flos Lonicerae Japonicae), *Chen Pi* (Pericarpium Citri Reticulatae), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), *Tian Hua Fen* (Radix Trichosanthis), *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Dang Gui Wei* (Extremities Radix Angelicae Sinensis), *Bai Zhi* (Radix Angelicae Dahuricae), *Fang Feng* (Radix Saposhnikoviae), *Chi Shao* (Radix Paeoniae Rubra), *Zao Jiao Ci* (Spina Gleditsiae), processed *Chuan Shan Jia* (Squama Manis), *Da Huang* (Radix et Rhizoma Rhei), and *Huang Bo* (Cortex Phellodendri Chinensis). The herbs used as a topical wash included *Ku Shen* (Radix Sophorae Flavescentis), *Da Huang* (Radix et Rhizoma Rhei), *Mang Xiao* (Natrii Sulfas) and *Huang Bo* (Cortex Phellodendri Chinensis). The duration of treatment was 10-20 days.¹⁰
9. **Stye:** One study evaluated the use of *Xian Fang Huo Ming Yin* in treating styes in 30 patients (21 males and 9 females, between 8-35 years of age; 24 were affected in one eye, 6 in both eyes). The herbs were administered in decoction daily, with complete recovery in 28 of 30 cases. The duration of treatment was 4-5 days in most patients, and up to 6-7 days in 3 cases. The herbal formula included *Jin Yin Hua* (Flos Lonicerae Japonicae) 25g, *Bai Zhi* (Radix Angelicae Dahuricae) 10g, *Fang Feng* (Radix Saposhnikoviae) 10g, *Dang Gui* (Radix Angelicae Sinensis) 10g, *Chen Pi* (Pericarpium Citri Reticulatae) 10g, *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) 9g, processed *Chuan Shan Jia* (Squama Manis) 10g, *Chi Shao* (Radix Paeoniae Rubra) 15g, *Tian Hua Fen* (Radix Trichosanthis) 15g, *Zi Hua Di Ding* (Herba Violae) 15g, *Ru Xiang* (Gummi Olibanum) 6g, *Mo Yao* (Myrrha) 6g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 3g. Furthermore, *Pu Gong Ying* (Herba Taraxaci) was added for toxic heat, and *Da Huang* (Radix et Rhizoma Rhei) for constipation. The treatment protocol was to give one pack of herbs in decoction daily.¹¹
10. **Pelvic inflammatory disease:** One study reported good results using modified *Xian Fang Huo Ming Yin* to treat pelvic inflammatory disease. The duration of illness varied from 5-22 days among 34 patients (between 21-44 years of age). The herbal formula contained *Chuan Shan Jia* (Squama Manis) 12g, *Tian Hua Fen* (Radix Trichosanthis) 20g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 6g, *Ru Xiang* (Gummi Olibanum) 6g, *Mo Yao* (Myrrha) 6g, *Bai Zhi* (Radix Angelicae Dahuricae) 6g, *Chi Shao* (Radix Paeoniae Rubra) 12g, *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) 12g, *Fang Feng* (Radix Saposhnikoviae) 10g, *Zao Jiao Ci* (Spina Gleditsiae) 12g, *Dang Gui Wei* (Extremities Radix Angelicae Sinensis) 12g, *Chen Pi* (Pericarpium Citri Reticulatae) 10g, and *Jin Yin Hua* (Flos Lonicerae Japonicae) 30g. *Pu Gong Ying* (Herba Taraxaci), *Gua Lou* (Fructus Trichosanthis), *Huang Bo* (Cortex Phellodendri Chinensis), and *Chi Fu Ling* (Poria Rubra) were added for excess heat; and *Hong Hua* (Flos Carthami), *San Leng* (Rhizoma Sparganii), and *E Zhu* (Rhizoma Curcumae) were added for inflammation and abscesses. The treatment protocol was to cook the herbs in water and drink the decoction in four equally-divided doses daily. In addition, the herb residue was fried with vinegar, placed inside a cheese cloth, and applied topically to the abdominal area for 30 minutes. Of 34 patients, the study reported complete recovery in 15 cases, marked effect in 9 cases, improvement in 8 cases, and no effect in 2 cases. The overall effectiveness was 94.1%.¹²
11. **Cervicitis and vaginitis:** Modified *Xian Fang Huo Ming Yin* was reported to successfully treat 21 patients with cervicitis and 30 patients with vaginitis. In addition to *Xian Fang Huo Ming Yin* as the base formula, *Da Xue Teng* (Caulis Sargentodoxae) and *Bai Jiang Cao* (Herba cum Radice Patriniae) were added for lower abdominal pain; *Tao Ren* (Semen Persicae), *Hong Hua* (Flos Carthami), *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae) were added for lower abdominal hardness and pain that intensify with pressure; and *Gua Lou Zi* (Semen Trichosanthis) and *Dong Gua Zi* (Semen Benincasae) for itching and leukorrhea. Patients were instructed to soak the affected area in an herbal solution made from *Er Cha* (Catechu), *Wu Bei Zi* (Galla Chinensis), *Tong Lu* (Verdigris), *Xiong Huang* (Realgar), *Qing Dai* (Indigo Naturalis), *Bing Pian* (Borneolum Syntheticum), *Hua Jiao* (Pericarpium Zanthoxyli), *She Chuang Zi* (Fructus Cnidii), and *Di Fu Zi* (Fructus Kochiae).²¹

Xiān Fāng Huó Mìng Yīn (Sublime Formula for Sustaining Life)

- 12. Post-herpetic neuralgia:** One study reported complete recovery in all 44 patients (26 males and 18 females, between 45-85 years of age) with post-herpetic neuralgia using modified *Xian Fang Huo Ming Yin*. The herbal formula contained *Jin Yin Hua* (Flos *Lonicerae Japonicae*) 12g, *Ru Xiang* (Gummi *Olibanum*) 6g, *Mo Yao* (Myrrha) 6g, *Zao Jiao Ci* (Spina *Gleditsiae*) 6g, *Bai Zhi* (Radix *Angelicae Dahuricae*) 6g, *Chi Shao* (Radix *Paeoniae Rubra*) 10g, *Dang Gui Wei* (Extremities Radix *Angelicae Sinensis*) 10g, *Tian Hua Fen* (Radix *Trichosanthis*) 10g, *Chen Pi* (Pericarpium *Citri Reticulatae*) 10g, *Tao Ren* (Semen *Persicae*) 10g, *Yan Hu Suo* (Rhizoma *Corydalis*) 10g, *Chuan Shan Jia* (Squama *Manis*) 3g, *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*) 3g, *Dan Shen* (Radix et Rhizoma *Salviae Miltiorrhizae*) 30g, and *Hong Hua* (Flos *Carthami*) 5g. Moreover, *Chuan Lian Zi* (Fructus *Toosendan*) 10g, *Yu Jin* (Radix *Curcumae*) 12g, and *Chai Hu* (Radix *Bupleuri*) 6g were added for shingles affecting the trunk; *Jiang Huang* (Rhizoma *Curcumae Longae*) 12g was added for upper extremities; *Chuan Niu Xi* (Radix *Cyathulae*) for lower extremities; and *Quan Xie* (Scorpio) for prolonged duration of pain. The herbs were given in decoction daily, with duration varying from 9-26 packs of herbs.¹³
- 13. Psoriasis:** Use of *Xian Fang Huo Ming Yin* to treat psoriasis in 25 patients was associated with a 72% rate of recovery and 92% effectiveness. The herbal formula contained *Jin Yin Hua* (Flos *Lonicerae Japonicae*), *Fang Feng* (Radix *Saposhnikoviae*), *Bai Zhi* (Radix *Angelicae Dahuricae*), *Zao Jiao Ci* (Spina *Gleditsiae*), *Chuan Shan Jia* (Squama *Manis*), *Tian Hua Fen* (Radix *Trichosanthis*), *Ru Xiang* (Gummi *Olibanum*), *Mo Yao* (Myrrha), *Chi Shao* (Radix *Paeoniae Rubra*), and *Chen Pi* (Pericarpium *Citri Reticulatae*). The patients were given 6g of pills made from herbal extract, three times daily, for 30 days per course of treatment, for 2 courses total.¹⁴
- 14. Reflux esophagitis:** One study reported complete recovery in 78 of 104 patients with reflux esophagitis who were treated with modified *Xian Fang Huo Ming Yin*. The base formula contained *Jin Yin Hua* (Flos *Lonicerae Japonicae*) 30g, *Zao Jiao Ci* (Spina *Gleditsiae*) 30g, *Dang Gui* (Radix *Angelicae Sinensis*) 12g, *Chen Pi* (Pericarpium *Citri Reticulatae*) 10g, *Chi Shao* (Radix *Paeoniae Rubra*) 10g, *Tian Hua Fen* (Radix *Trichosanthis*) 10g, *Bei Mu* (Bulbus *Fritillariae*) 6g, processed *Chuan Shan Jia* (Squama *Manis*) 6g, *Ru Xiang* (Gummi *Olibanum*) 6g, *Mo Yao* (Myrrha) 6g, and *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*) 6g. In addition, *Hai Piao Xiao* (Endoconcha *Sepiae*) 10g and *Wa Leng Zi* (Concha *Arcae*) 10g were added for acid reflux and belching; *Xian He Cao* (Herba *Agrimoniae*) 15g and *Ou Jie* (Nodus *Nelumbinis Rhizomatis*) 10g for bleeding; and *She Gan* (Rhizoma *Belamcandae*) 10g and *Xuan Shen* (Radix *Scrophulariae*) 10g for soreness and pain of the throat. The duration of treatment ranged from 1-3 weeks.¹⁵
- 15. Peptic ulcer disease:** One study reported 94.3% effectiveness using modified *Xian Fang Huo Ming Yin* to treat peptic ulcers in 53 patients (39 males and 14 females, between 20-60 years of age). The herbal formula contained 15g each of *Dang Gui Wei* (Extremities Radix *Angelicae Sinensis*), *Chi Shao* (Radix *Paeoniae Rubra*), *Zhe Bei Mu* (Bulbus *Fritillariae Thunbergii*), *Tian Hua Fen* (Radix *Trichosanthis*), and *Jin Yin Hua* (Flos *Lonicerae Japonicae*); 10g each of *Fang Feng* (Radix *Saposhnikoviae*), *Bai Zhi* (Radix *Angelicae Dahuricae*), *Chen Pi* (Pericarpium *Citri Reticulatae*), and *Zao Jiao Ci* (Spina *Gleditsiae*); and 6g each of *Ru Xiang* (Gummi *Olibanum*), *Mo Yao* (Myrrha), *Chuan Shan Jia* (Squama *Manis*), and *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*). The treatment protocol was to administer the herbs in decoction daily, for 30 days per course of treatment. Of 53 patients, the study reported complete recovery in 35 cases, improvement in 15 cases, and no effect in 3 cases.¹⁶
- 16. Ulcerative colitis:** Modified *Xian Fang Huo Ming Yin* was effective in treating chronic ulcerative colitis in 42 patients (24 male, 18 female, between 16-67 years of age). The history of illness ranged from 6 months to 5 years. The base herbal formula contained *Jin Yin Hua* (Flos *Lonicerae Japonicae*) 30g, *Zao Jiao Ci* (Spina *Gleditsiae*) 30g, *Chuan Shan Jia* (Squama *Manis*) 30g, *Fang Feng* (Radix *Saposhnikoviae*) 9g, *Tian Hua Fen* (Radix *Trichosanthis*) 9g, *Mo Yao* (Myrrha) 9g, *Huai Hua* (Flos *Sophorae*) 9g, *Dang Gui* (Radix *Angelicae Sinensis*) 10g, *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*) 10g, *Chuan Bei Mu* (Bulbus *Fritillariae Cirrhosae*) 6g, *Ru Xiang* (Gummi *Olibanum*) 6g, and *Bai Ji* (Rhizoma *Bletillae*) 6g. Furthermore, *He Zi* (Fructus *Chebulae*) 6g and *Ying Su Ke* (Pericarpium *Papaveris*) 6g were added for severe diarrhea; *Mu Xiang* (Radix *Aucklandiae*) 6g and *Zhi Qiao* (Fructus *Aurantii*) 6g for severe abdominal pain; *Huang Bo* (Cortex *Phellodendri Chinensis*) 9g and *Huang Lian* (Rhizoma *Coptidis*) 6g for rectal tenesmus; and *Mu Dan Pi* (Cortex *Moutan*) 9g and *Ce Bai Ye* (Cacumen *Platycladi*) 9g for hematochezia. The duration of treatment ranged from 10-20 days. Of 42 patients, the study reported complete recovery in 24 cases, improvement in 10 cases, and no effect in 8 cases.¹⁷
- 17. Osteoradionecrosis:** Concurrent Western and herbal treatments showed good results in treating 42 patients with bone necrosis following irradiation. The base formula included *Dang Gui* (Radix *Angelicae Sinensis*) 12g, *Chuan Shan Jia* (Squama *Manis*) 12g, *Jin Yin Hua* (Flos *Lonicerae Japonicae*) 10g, *Tian Hua Fen*

Xiān Fāng Huó Mìng Yīn (Sublime Formula for Sustaining Life)

(Radix Trichosanthis) 10g, *Bai Zhi* (Radix Angelicae Dahuricae) 10g, *Fang Feng* (Radix Saposhnikovia) 10g, *Zao Jiao Ci* (Spina Gleditsiae) 10g, *Chen Pi* (Pericarpium Citri Reticulatae) 10g, *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) 10g, *Ru Xiang* (Gummi Olibanum) 9g, *Mo Yao* (Myrrha) 9g, *Chi Shao* (Radix Paeoniae Rubra) 8g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 8g. Additional modifications were made as deemed necessary. The treatment protocol was to cook the herbs in water, and administer the decoction twice daily in two equally-divided doses before breakfast and at bedtime, for 7 days per course of treatment, for 3-4 courses total. Of 42 patients, the study reported complete recovery in 23 cases, improvement in 14 cases, and no effect in 5 cases.¹⁸ Note: Details of the Western treatment were unavailable at the time of publication.

18. Osteomyelitis: Individuals with osteomyelitis were treated with good results using *Xian Fang Huo Ming Yin* and *Yang He Tang* (Yang-Heartening Decoction), plus topical application of other medicine(s). Of 28 patients, the study reported complete recovery in 19 cases after 3-4 months, 4 cases after 5-6 months, and unsatisfactory effect in 5 cases.¹⁹ Note: Details of the medicine(s) used topically were unavailable at the time of publication.

19. Pneumonia: Use of modified *Xian Fang Huo Ming Yin* was associated with 87% effectiveness in treating pneumonia in 46 patients (28 males and 18 females, between 18-67 years of age). The herbal formula contained *Jin Yin Hua* (Flos Lonicerae Japonicae) 30g, *Chuan Shan Jia* (Squama Manis) 20g, *Fang Feng* (Radix Saposhnikovia) 10g, *Bai Zhi* (Radix Angelicae Dahuricae) 12g, *Dang Gui* (Radix Angelicae Sinensis) 10g, *Chen Pi* (Pericarpium Citri Reticulatae) 10g, *Bei Mu* (Bulbus Fritillariae) 10g, *Huang Qin* (Radix Scutellariae) 10g, *Zao Jiao Ci* (Spina Gleditsiae) 20g, *Tian Hua Fen* (Radix Trichosanthis) 15g, *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 5g, *Sang Bai Pi* (Cortex Mori) 12g, and *Jie Geng* (Radix Platycodonis) 12g. *Yu Xing Cao* (Herba Houttuyniae) 30g was added for dark, thick phlegm; and *Gua Lou* (Fructus Trichosanthis) 15g for chest pain. The herbs were given in decoction daily, for 7 days per course of treatment. Of 46 patients, 29 had significant improvement, 11 had moderate improvement, and 6 had no effect.²⁰

<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	9g

Xian Fang Huo Ming Yin and *Zhen Ren Huo Ming Yin* (True Man's Decoction to Revitalize Life) are essentially the same formula, except that *Xian Fang Huo Ming Yin* contains *Chi Shao* (Radix Paeoniae Rubra), while *Zhen Ren Huo Ming Yin* (True Man's Decoction to Revitalize Life) does not.

According to Dr. Chang Wei-Yen, male infertility caused by spermophlebectasia (varicocele) or inflammation can be treated with *Zhen Ren Huo Ming Yin* (True Man's Decoction to Revitalize Life) combined with *Da Ding Huang* (Caulis Euonymi), *Zao Jiao Ci* (Spina Gleditsiae), *Ma Bian Cao* (Herba Verbenae), and *Cha Chi Huang* (Herba Stellariae Aquaticae). Also according to Chang, prostate enlargement can be effectively treated with the combination of *Zhen Ren Huo Ming Yin* (True Man's Decoction to Revitalize Life), *San Zhong Kui Jian Tang* (Disperse the Swelling and Break the Hardness Decoction), and *Shi Liu Wei Liu Qi Yin* (Sixteen-Ingredient Decoction to Flow Qi). This can be done by combining prepared formulas together, such as with extracts in granular or capsule forms.

The source text states to cook the ingredients with *Hong Hua* (Flos Carthami) to make a decoction. However, the doses of the ingredients are unavailable from the source text. Today, the decoction is prepared by using the doses suggested in brackets.

The main actions of *Lian Qiao Bai Du San* (Forsythia Powder to Overcome Pathogenic Influences) are to release wind-heat, clear heat, and eliminate heat and toxins. Clinically, this formula has been used to treat mumps. In addition to the base formula, modifications can be made as follows: *Tian Hua Fen* (Radix Trichosanthis) for thirst; *Bai Zhi* (Radix Angelicae Dahuricae) for swelling in the face; *Wei Ling Xian* (Radix et Rhizoma Clematidis) for swelling on the neck; *Da Huang* (Radix et Rhizoma Rhei) and *Chuan Shan Jia* (Squama Manis) for constipation due to excess; and *Ren Shen* (Radix et Rhizoma Ginseng) for deficiency.

AUTHORS' COMMENTS

Xian Fang Huo Ming Yin is one of the most commonly used formulas for treating all sorts of abscesses, sores, nodules or swellings that are red, hot, hard, and painful to the touch. The lesions may or may not contain pus. The effect of this formula can be maximized by both oral and topical use of herbs. After serving the decoction, the herb residue can be applied topically to ease pain and swelling.

Xian Fang Huo Ming Yin and *Pu Ji Xiao Du Yin* (Universal Benefit Decoction to Eliminate Toxin) both clear heat and eliminate toxins.

- *Xian Fang Huo Ming Yin*, besides clearing heat and eliminating toxins, also moves qi and blood to disperse the initial stages of nodules, swellings, carbuncles, and sores.
- *Pu Ji Xiao Du Yin* focuses on treating toxic heat affecting the upper *jiao*, manifesting in symptoms such as redness, swelling and pain of the face, difficulty in opening the eyes, sore throat, thirst, and fever. It disperses wind-heat as well as toxins lodged in the head.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction. However, the doses of the ingredients are unavailable from the source text. Today, the decoction is prepared by using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Disperses exterior wind and clears heat

2. Cools the blood and reduces swelling

CLINICAL MANIFESTATIONS

Localized abscesses and swelling due to exterior wind-heat invasion: phlegm and toxins in the neck, toothache caused by wind-heat, abscesses with redness, swelling, and pain; chills and fever (more fever than chills), mild perspiration, thirst, yellow urine, a white or yellow tongue coating, and a superficial, rapid pulse.

CLINICAL APPLICATIONS

Cellulitis, mastitis, and various abscesses and sores.

EXPLANATION

Niu Bang Jie Ji Tang (Arctium Decoction to Release the Muscle Layer) treats localized abscesses and swellings (mostly on the face and neck) accompanied by exterior wind-heat. Local accumulation of heat and toxins may cause redness and pain. Chills and fever, with more fever than chills, suggest an exterior wind-heat syndrome. Mild perspiration, thirst, toothache, and yellowish urine indicate that the heat has damaged the body fluids. The yellow tongue coating and a superficial, rapid pulse signify a wind-heat syndrome.

Niu Bang Zi (Fructus Arctii) disperses wind-heat, eliminates toxins, and reduces swelling, especially from

the head and face. *Bo He* (Herba Menthae) and *Jing Jie* (Herba Schizonepetae) disperse the wind-heat and release exterior symptoms. *Lian Qiao* (Fructus Forsythiae) clears heat, eliminates toxins, disperses nodules, and reduces abscesses. *Mu Dan Pi* (Cortex Moutan), *Xia Ku Cao* (Spica Prunellae), and *Zhi Zi* (Fructus Gardeniae) sedate fire and cool the blood. *Xuan Shen* (Radix Scrophulariae) sedates heat and eliminates toxins; also, it is combined with *Shi Hu* (Caulis Dendrobii) to clear heat and nourish yin and body fluids.

CAUTIONS / CONTRAINDICATIONS

Niu Bang Jie Ji Tang should be used with caution in patients with underlying yin and body fluid deficiencies, or those without excess heat or fire.

AUTHORS' COMMENTS

Niu Bang Jie Ji Tang was used originally for localized abscesses and swellings on the face and neck. Today, its application has been expanded to include most regions of the body, as long as the condition is characterized by localized abscesses and swellings accompanied by exterior wind-heat invasion.

Alternate Names: *Ching Fang Pai Tu San*, Schizonepeta and Siler Detoxifying Formula, Schizonepeta and Siler Formula
Original Source: *She Sheng Zhong Miao Fang* (Marvelous Formulas for the Health of Multitudes) by Zhang Shi-Che in 1550

COMPOSITION

<i>Chai Hu</i> (Radix Bupleuri)	4.5g
<i>Qian Hu</i> (Radix Peucedani)	4.5g
<i>Jing Jie</i> (Herba Schizonepetae)	4.5g
<i>Fang Feng</i> (Radix Saposhnikoviae)	4.5g
<i>Qiang Huo</i> (Rhizoma et Radix Notopterygii)	4.5g
<i>Du Huo</i> (Radix Angelicae Pubescentis)	4.5g
<i>Jie Geng</i> (Radix Platycodonis)	4.5g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	4.5g
<i>Fu Ling</i> (Poria)	4.5g
<i>Zhi Qiao</i> (Fructus Citri Aurantii)	4.5g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	1.5g [3g]

DOSAGE / PREPARATION / ADMINISTRATION

Prepare the ingredients as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Releases the exterior and induces diaphoresis
2. Treats skin and external diseases
3. Relieves pain

CLINICAL MANIFESTATIONS

Early stage of skin and external diseases: abscesses and sores with redness, swelling and pain, aversion to cold, fever, absence of perspiration, no thirst, a thin, white tongue coating, and a superficial, rapid pulse.

CLINICAL APPLICATIONS

Carbuncles, pustules, boils, urticaria, eczema, dermatitis, abscesses, sores, suppuration, mastitis, eye disorders, syphilis, and scabies.

EXPLANATION

Jing Fang Bai Du San (Schizonepeta and Saposhnikovia Powder to Overcome Pathogenic Influences) primarily treats skin and external disorders, such as abscesses and sores. Local signs and symptoms include redness, swelling and pain of the affected area, and systemic signs and symptoms include aversion to cold, fever, absence of perspiration, and lack of thirst.

Chai Hu (Radix Bupleuri) and *Qian Hu* (Radix Peucedani) are exterior-releasing herbs that dispel wind and heat. *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), *Qiang Huo* (Rhizoma et Radix Notopterygii), and *Du Huo* (Radix Angelicae Pubescentis) release the exterior, eliminate toxins, and relieve pain. *Jie Geng* (Radix Platycodonis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Fu Ling* (Poria) reduce swelling and inflammation, move the blood, and eliminate pus. *Zhi Qiao* (Fructus Aurantii) regulates qi circulation and removes stagnation. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

MODIFICATIONS

- If there is swelling and pain caused by more heat, add *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis).
- If there is swelling and pain caused by more formation of pus, add *Bai Zhi* (Radix Angelicae Dahuricae) and *Zao Jiao* (Fructus Gleditsiae).
- For allergic dermatitis, add *Wen Qing Yin* (Warming and Clearing Decoction).
- For eczema or rashes, add *Xiao Feng San* (Eliminate Wind Powder).
- If there is exterior cold and interior heat with symptoms of sore throat, a red tongue tip, and a dry mouth, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), *Niu Bang Zi* (Fructus Arctii), *Ban Lan Gen*

Early stages of skin and external diseases	<ul style="list-style-type: none"> Abscesses and sores with redness, swelling and pain: wind, cold and dampness in the muscle layer Aversion to cold, fever and absence of perspiration: presence of wind at the exterior Thin, white tongue coating, and a superficial, rapid pulse: exterior condition 	<ul style="list-style-type: none"> Releases the exterior and induces diaphoresis Treats skin and external diseases 	<ul style="list-style-type: none"> <i>Chai Hu</i> (Radix Bupleuri) and <i>Qian Hu</i> (Radix Peucedani) release wind and heat from the exterior parts of the body. <i>Jing Jie</i> (Herba Schizonepetae), <i>Fang Feng</i> (Radix Saposhnikoviae), <i>Qiang Huo</i> (Rhizoma et Radix Notopterygii), and <i>Du Huo</i> (Radix Angelicae Pubescentis) release the exterior, eliminate toxins, and relieve pain. <i>Jie Geng</i> (Radix Platycodonis), <i>Chuan Xiong</i> (Rhizoma Chuanxiong), and <i>Fu Ling</i> (Poria) reduce swelling and inflammation, move the blood, and eliminate pus. <i>Zhi Qiao</i> (Fructus Aurantii) regulates qi circulation and removes stagnation. <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes the herbs.

(Radix Isatidis); and remove *Du Huo* (Radix Angelicae Pubescentis) and *Chuan Xiong* (Rhizoma Chuanxiong).

- For infectious parotitis with severe redness, swelling and burning pain of the tonsils, add *Niu Bang Zi* (Fructus Arctii), *Ma Bo* (Lasiosphaera seu Calvatia), and *She Gan* (Rhizoma Belamcandae).

CAUTIONS / CONTRAINDICATIONS

Avoid foods that are raw, cold, oily, or greasy while taking *Jing Fang Bai Du San*.¹

CLINICAL STUDIES AND RESEARCH

High fever: One study reported success in the treatment of high fever in 36 of 45 patients using modified *Jing Fang Bai Du San*. The causes of high fever included postpartum illness, nephritis, respiratory tract infection, and others. The herbal treatment contained *Jing Jie* (Herba Schizonepetae) 30g, *Chai Hu* (Radix Bupleuri) 15g, *Fang Feng* (Radix Saposhnikoviae) 10g, and *Bo He* (Herba Menthae) 10g as the base formula. Modifications varied depending on the causes of fever. For postpartum fever, *Dang Shen* (Radix Codonopsis) and *Dang Gui* (Radix Angelicae Sinensis) were added. For nephritis and fever, *Jin Qian Cao* (Herba Lysimachiae) and *Qu Mai* (Herba Dianthi) were added. For exterior cold with fever, *Huo Xiang* (Herba Agastaches) and *Hou Po* (Cortex Magnoliae Officinalis) were added. The treatment protocol was to cook the herbs in water and administer the decoction in two equally-divided doses daily.²

Chuan Xiong (Rhizoma Chuanxiong)

Bo He (Herba Menthae)

Jin Yin Hua (Flos Lonicerae Japonicae)

Lian Qiao (Fructus Forsythiae)

Chi Fu Ling (Poria Rubra)

Grind equal proportions of all the ingredients into powder and prepare as a decoction with *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Bo He* (Herba Menthae).

This formula treats skin and external disorders with suppuration caused by wind-heat and toxins. Suppuration may occur at various parts of the body, including, but not limited to, the skin and glands. The presence of wind is characterized by such exterior signs and symptoms as aversion to wind and cold, and headache; and the presence of heat is characterized by fever and soreness and swelling of the throat. As the disease progresses, suppuration develops as swelling and inflammation at the affected area begin to form and discharge pus. At this time, treatment must focus on dispelling exterior wind and heat, reducing swelling and inflammation, and eliminating toxins and pus.

Clinical applications of this formula include carbuncles, pustules, boils, urticaria, eczema, dermatitis, abscesses, sores, suppuration, mastitis, proctitis, eye disorders, syphilis, and scabies.

AUTHORS' COMMENTS

These three formulas have identical names, but are derived from different sources and have slightly different compositions and applications.

- *Jīng Fāng Bāi Dú Sǎn* from *She Sheng Zhong Miao Fang* (Marvelous Formulas for the Health of Multitudes) primarily treats early-stage skin and external disorders characterized by wind, cold, and dampness.
- *Jīng Fāng Bāi Dú Sǎn* from *Qi Xiao Liang Fang* (Fine Formulas with Miraculous Results) also treats early-stage skin and external disorders characterized by wind, cold, and dampness. This formula contains *Sheng Jiang* (Rhizoma Zingiberis Recens) and *Bo He* (Herba Menthae), and is slightly stronger than the previous formula.
- *Jīng Fāng Bāi Dú Sǎn* from *Wan Bing Hui Chun* (Restoration of Health from the Myriad Diseases) mainly treats skin and external disorders with suppuration, caused by wind, heat, and toxins.

Bai Du San (Overcome Pathogenic Influences Powder) and *Jīng Fāng Bāi Dú Sǎn* are two very commonly used formulas with similar actions and functions. Both formulas treat external abscesses and sores, but have the following differences:

- *Bai Du San* is more suitable for deficient patients because it contains *Ren Shen* (Radix et Rhizoma Ginseng), which strengthens *yuan* (source) *qi*. In addition, it has only a mild exterior-releasing action, which is all that a weak patient can withstand.
- *Jīng Fāng Bāi Dú Sǎn* is a potent formula that contains many exterior-releasing herbs, but no tonic herbs to moderate its exterior-releasing actions. *Jīng Fāng Bāi Dú Sǎn* is indicated for patients who have no deficiencies.

Literal Name: Five-Ingredient Decoction to Eliminate Toxins

Alternate Names: Dandelion and Wild Chrysanthemum Combination, Five-Ingredient Decoction to Eliminate Pathogenic Influences

Original Source: *Yi Zong Jin Jian* (Golden Mirror of the Medical Tradition) by Wu Qian in 1742

COMPOSITION

<i>Jin Yin Hua</i> (Flos <i>Lonicerae Japonicae</i>)	9g [20g]
<i>Zi Hua Di Ding</i> (Herba <i>Violae</i>)	3.6g [15g]
<i>Pu Gong Ying</i> (Herba <i>Taraxaci</i>)	3.6g [15g]
<i>Ye Ju Hua</i> (Flos <i>Chrysanthemi Indici</i>)	3.6g [15g]
<i>Tian Kui Zi</i> (Radix <i>Semiaquilegiae</i>)	3.6g [15g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients with 2 large bowl of water until the liquid is reduced to 80%. Add 0.5 bowl of grain-based liquor and bring it to a boil 2-3 times. Take the hot, strained decoction, and cover the body with blankets to promote sweating.

Today, it is prepared as a decoction, with the doses suggested in brackets, and taken with 1-2 spoonfuls of grain-based liquor. The herb residue is crushed into a paste and applied topically to the affected area.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and eliminates toxins
2. Disperses external carbuncles and furuncles

CLINICAL MANIFESTATIONS

Carbuncles, furuncles, and other types of epithelial inflammations due to accumulation of fire and toxins: local redness, swelling, heat and pain sensations, fever, aversion to cold, carbuncles and furuncles that are hard

and deeply rooted, a red tongue body with a yellow tongue coating, and a rapid pulse.

CLINICAL APPLICATIONS

Cellulitis, febrile disorder, viral hepatitis, acute cholecystitis, acute pyelonephritis, chronic pyelonephritis, glomerulonephritis, pelvic inflammation, Bartholinitis, urinary tract infection, tonsillitis, pericoronitis, burns, myelitis, shingles, eczema, boils, acne, carbuncles, and furuncles.

EXPLANATION

Wu Wei Xiao Du Yin (Five-Ingredient Decoction to Eliminate Toxins) treats carbuncles, furuncles, and other types of epithelial inflammations characterized by accumulation of fire and toxins. Accumulation of fire and toxins in the interior *zang fu* organs may result in nail-like carbuncles and furuncles that are hard and deeply rooted, and are characterized by local redness, swelling, heat, and pain. A red tongue body with a yellow tongue coating

Wu Wei Xiao Du Yin (Five-Ingredient Decoction to Eliminate Toxins)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Carbuncles, furuncles, and other types of epithelial inflammations	<ul style="list-style-type: none">• Nail-like nodules that are hard and deeply rooted: stagnation of fire and toxins• Local redness, swelling, heat, and pain: qi and blood stagnation• Red tongue body with a yellow tongue coating: heat and toxins• Rapid pulse: heat and toxins	<ul style="list-style-type: none">• Clears heat, fire, and toxins• Disperses carbuncles and furuncles	<ul style="list-style-type: none">• <i>Jin Yin Hua</i> (Flos <i>Lonicerae Japonicae</i>) clears heat and eliminates toxins from both the <i>qi</i> (energy) and <i>xue</i> (blood) levels.• <i>Zi Hua Di Ding</i> (Herba <i>Violae</i>), <i>Pu Gong Ying</i> (Herba <i>Taraxaci</i>), <i>Ye Ju Hua</i> (Flos <i>Chrysanthemi Indici</i>), and <i>Tian Kui Zi</i> (Radix <i>Semiaquilegiae</i>) clear heat, eliminate toxins, cool the blood, disperse nodules, and relieve pain.

Wǔ Wèi Xiǎo Dú Yīn

(Five-Ingredient Decoction to Eliminate Toxins)

and a rapid pulse suggest that the heat toxins are located mainly in the interior.

This formula contains *Jin Yin Hua* (Flos *Lonicerae Japonicae*) to clear heat and eliminate toxins from both the *qi* (energy) and *xue* (blood) levels. *Zi Hua Di Ding* (Herba *Viola*), *Pu Gong Ying* (Herba *Taraxaci*), *Ye Ju Hua* (Flos *Chrysanthemi Indici*), and *Tian Kui Zi* (Radix *Semiaquilegiae*) clear heat, eliminate toxins, cool the blood, disperse nodules, and relieve pain. Grain-based liquor helps to activate blood circulation, and distribute the herbs to the affected area of the body.

MODIFICATIONS

- With more fire and toxins, add *Lian Qiao* (Fructus *Forsythiae*), *Ban Zhi Lian* (Herba *Scutellariae Barbatae*), and *Huang Lian* (Rhizoma *Coptidis*).
- With more swelling and inflammation, add *Fang Feng* (Radix *Saposhnikoviae*) and *Chan Tui* (Periostracum *Cicadae*).
- With heat in the *xue* (blood) level, add *Chi Shao* (Radix *Paeoniae Rubra*) and *Mu Dan Pi* (Cortex *Moutan*).
- For swelling with pus that does not perforate, or sores that have perforated and ulcerated but do not heal, add *Zao Jiao Ci* (Spina *Gleditsiae*).
- For acute tonsillitis, add *Jie Geng* (Radix *Platycodonis*), *She Gan* (Rhizoma *Belamcandae*), and *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*).
- For breast abscess with swelling, redness, and pain, add *Gua Lou* (Fructus *Trichosanthis*), *Bei Mu* (Bulbus *Fritillariae*), and *Qing Pi* (Pericarpium *Citri Reticulatae Viride*).
- For infection or inflammation in constitutionally-deficient individuals, add *Ren Shen* (Radix et Rhizoma *Ginseng*) or *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood).
- For acute nephritis with edema, swelling, dysuria, red tongue body, and a rapid pulse, add *Ze Xie* (Rhizoma *Alismatis*), *Zhi Zi* (Fructus *Gardeniae*), and *Che Qian Zi* (Semen *Plantaginis*).

CAUTIONS / CONTRAINDICATIONS

- *Wu Wei Xiao Du Yin* should be used with caution in patients with Spleen and Stomach deficiencies, or *qi* and blood deficiencies.
- This formula is contraindicated for *yin* (deep-rooted) type of abscesses and sores with underlying deficiencies.

PHARMACOLOGICAL EFFECTS

Antibacterial: According to *in vitro* studies, *Wu Wei Xiao Du Yin* has an inhibitory effect against *Staphylococcus*

albus, *Staphylococcus aureus*, *alpha-hemolytic streptococcus*, *beta-hemolytic streptococcus*, *Salmonella typhi* and *Bacillus proteus*. At high doses, it has an inhibitory effect against *Pseudomonas aeruginosa*. It is ineffective against *E. coli*.^{1,2}

CLINICAL STUDIES AND RESEARCH

1. **Cellulitis:** Forty-five patients with cellulitis were treated successfully using modified *Wu Wei Xiao Du Yin*. The herbal formula contained *Jin Yin Hua* (Flos *Lonicerae Japonicae*) 25g, *Ye Ju Hua* (Flos *Chrysanthemi Indici*) 20g, *Pu Gong Ying* (Herba *Taraxaci*) 20g, *Zi Hua Di Ding* (Herba *Viola*) 20g, *Lian Qiao* (Fructus *Forsythiae*) 25g, *Shi Gao* (Gypsum *Fibrosum*) 30g, *Bo He* (Herba *Menthae*) 5g, *Niu Bang Zi* (Fructus *Arctii*) 15g, *Jiang Can* (Bombyx *Batryticatus*) 10g, *Mu Dan Pi* (Cortex *Moutan*) 10g, *Sheng Ma* (Rhizoma *Cimicifugae*) 10g, and *Zao Jiao Ci* (Spina *Gleditsiae*) 10g. Furthermore, modifications were made by adding *Da Huang* (Radix et Rhizoma *Rhei*) 5g and *Xuan Ming Fen* (Natrii Sulfas *Exsiccatus*) 5g for constipation; *Jing Jie* (Herba *Schizonepetae*) 15g for aversion to cold; *Gu Sui Bu* (Rhizoma *Drynariae*) 10g and *Xuan Shen* (Radix *Scrophulariae*) 10g for chronic illness; and *Ban Lan Gen* (Radix *Isatidis*) 20g and *Ku Shen* (Radix *Sophorae Flavescentis*) 15g for severe inflammation. The treatment protocol was to give the herbs in decoction for 6-18 packs of herbs. Of 45 patients, the study reported complete recovery in 30 cases, significant improvement in 10 cases, moderate improvement in 1 case, and no effect in 4 cases. The overall effectiveness was 91.11%.³
2. **Shingles:** Administration of 3-6 packs of herbs in decoction was effective in treating all 38 patients with shingles. The herbal treatment contained *Wu Wei Xiao Du Yin* and *Si Wu Tang* (Four-Substance Decoction) as the base formula, with the addition of *Lian Qiao* (Fructus *Forsythiae*) and *Ban Lan Gen* (Radix *Isatidis*) for toxic heat; *Long Dan* (Radix et Rhizoma *Gentianae*) for a bitter taste in the mouth and dysuria; *Da Huang* (Radix et Rhizoma *Rhei*) for constipation; and *Tu Fu Ling* (Rhizoma *Smilacis Glabrae*) and a large dose of *Di Huang* (Radix *Rehmanniae*) for itching and pain.⁴
3. **Febrile disorder:** Use of modified *Wu Wei Xiao Du Yin* was associated with 81.1% effectiveness in treating externally-contracted febrile disorders. In addition to the base formula, modifications were made based on the differential diagnosis of the condition. For exterior wind-heat, *Lian Qiao* (Fructus *Forsythiae*), *Bo He* (Herba *Menthae*), and *Lu Gen* (Rhizoma *Phragmitis*) were added. For exterior wind-cold, *Jing Jie* (Herba *Schizonepetae*), *Fang Feng* (Radix *Saposhnikoviae*), and *Qiang Huo* (Rhizoma et Radix *Notopterygii*) were added. For Lung heat,

Wǔ Wèi Xiāo Dú Yīn

(Five-Ingredient Decoction to Eliminate Toxins)

- Ma Huang* (Herba Ephedrae), *Ku Xing Ren* (Semen Armeniacae Amarum), and *Shi Gao* (Gypsum Fibrosum) were added. For Stomach heat, *Shi Gao* (Gypsum Fibrosum) and *Zhi Mu* (Rhizoma Anemarrhenae) were added. For Gallbladder heat, *Chai Hu* (Radix Bupleuri), *Huang Qin* (Radix Scutellariae), and *Bai Jiang Cao* (Herba cum Radice Patriniae) were added. For Large Intestine heat, *Ge Gen* (Radix Puerariae Lobatae), *Huang Qin* (Radix Scutellariae), and *Huang Lian* (Rhizoma Coptidis) were added. For Urinary Bladder damp-heat, *Mu Tong* (Caulis Akebiae), *Hua Shi* (Talcum), and *Shi Wei* (Folium Pyrrosiae) were added. For constipation, *Da Huang* (Radix et Rhizoma Rhei) was added. Of 122 patients, the study reported complete recovery in 81 cases, marked improvement in 18 cases, moderate improvement in 16 cases, and no effect in 7 cases.⁵
4. **Viral hepatitis:** Administration of modified *Wu Wei Xiao Du Yin* in decoction daily was effective in treating 248 hepatitis patients (183 hepatitis A cases and 65 hepatitis B). Most patients received 60-100 packs of herbs. However, those with severe conditions required up to 200-300 packs.⁶
 5. **Acute cholecystitis:** According to one study, 20 patients with acute cholecystitis were treated with modified *Wu Wei Xiao Du Yin* with 75% effectiveness.⁷ Another study reported satisfactory results in all 60 patients (21 males and 39 females) with acute cholecystitis treated with modified *Wu Wei Xiao Du Yin*. The formula was modified by adding *Ze Lan* (Herba Lycopi) and *Fu Ling* (Poria) for dampness; *Dang Gui* (Radix Angelicae Sinensis) and *Tao Ren* (Semen Persicae) for chronic illness; *Da Huang* (Radix et Rhizoma Rhei) and *Po Xiao* (Sal Glauberis) for constipation; *Yan Hu Suo* (Rhizoma Corydalis), *Ru Xiang* (Gummi Olibanum), and *Mo Yao* (Myrrha) for severe pain; *Chen Pi* (Pericarpium Citri Reticulatae) and *Ban Xia* (Rhizoma Pinelliae) for nausea and vomiting; *Yin Chen* (Herba Artemisiae Scopariae) and *Jin Qian Cao* (Herba Lysimachiae) for jaundice; and others as deemed necessary.⁸
 6. **Acute pyelonephritis:** Administration of modified *Wu Wei Xiao Du Yin* in decoction daily was associated with 91.4% effectiveness in treating acute pyelonephritis. The duration of treatment ranged from 1-2 courses, with 7 days per course. Of 58 patients with acute pyelonephritis, the study reported complete recovery in 41 cases, improvement in 12 cases, and no effect in 5 cases.⁹
 7. **Chronic pyelonephritis:** Administration of modified *Wu Wei Xiao Du Yin* in 13 patients with chronic pyelonephritis was associated with complete recovery in 8 cases, improvement in 3 cases, and no effect in 2 cases.¹⁰
 8. **Glomerulonephritis:** Use of modified *Wu Wei Xiao Du Yin* was associated with marked success in treating glomerulonephritis in children. The herbal treatment contained *Wu Wei Xiao Du Yin* plus *Mu Tong* (Caulis Akebiae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) as the base formula. Furthermore, modifications were made as follows: *Ma Huang* (Herba Ephedrae) and *Shi Gao* (Gypsum Fibrosum) for wind and water accumulation; *Wu Ling San* (Five-Ingredient Powder with Poria) for water and damp accumulation; and *Shi Gao* (Gypsum Fibrosum), *Bai Mao Gen* (Rhizoma Imperatae), *Dan Zhu Ye* (Herba Lophatheri), and *Xiao Ji* (Herba Cirsii) for damp-heat accumulation. Of 36 patients, the study reported complete recovery in 30 cases, improvement in 4 cases, and no effect in 2 cases. The overall effectiveness was 94.4%.¹¹
 9. **Pelvic inflammation:** Use of modified *Wu Wei Xiao Du Yin* in solution at 37°C / 98.6°F via rectal instillation one time per day for 10 days was associated with complete recovery in 52 of 55 patients. The overall rate of effectiveness was 94.5%.¹²
 10. **Bartholinitis:** Acute inflammation of the Bartholin's glands was successfully treated using modified *Wu Wei Xiao Du Yin*. The herbal treatment contained *Wu Wei Xiao Du Yin* plus *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Chi Shao* (Radix Paeoniae Rubra), *Mu Dan Pi* (Cortex Moutan), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) as the base formula. *Chai Hu* (Radix Bupleuri) was added for aversion to cold with fever. *Huang Qi* (Radix Astragali) was added for formation of abscesses. *Dong Gua Zi* (Semen Benincasae) and *Yi Yi Ren* (Semen Coicis) were added for pus. *Da Huang* (Radix et Rhizoma Rhei) [post-decocted] and *Zhi Shi* (Fructus Aurantii Immaturus) were added for constipation. Lastly, an herbal wash was applied topically using *Ku Shen* (Radix Sophorae Flavescentis), *Da Huang* (Radix et Rhizoma Rhei), *Huang Bo* (Cortex Phellodendri Chinensis), and *Pu Gong Ying* (Herba Taraxaci). Of 48 patients, the study reported complete recovery in 35 cases, improvement in 11 cases, and no effect in 2 cases. The rate of effectiveness was 95.8%.¹³
 11. **Tonsillitis:** One study reported complete recovery in all 38 patients with acute tonsillitis when treated with modified *Wu Wei Xiao Du Yin* in decoction twice daily for 2-5 days. In addition to the base formula, *Lian Qiao* (Fructus Forsythiae) and *Niu Bang Zi* (Fructus Arctii) were added for exterior wind-heat; *Jing Jie* (Herba Schizonepetae) and *Fang Feng* (Radix Saposhnikoviae) for exterior wind-cold; and *Huang Qin* (Radix Scutellariae) and *Huang Lian* (Rhizoma Coptidis) for high fever.¹⁴

Wǔ Wèi Xiǎo Dú Yīn

(Five-Ingredient Decoction to Eliminate Toxins)

12.Pericoronitis: Administration of modified *Wu Wei Xiao Du Yin* was associated with 94.7% effectiveness in treating 150 patients with acute inflammation around the crown of a partially-erupted tooth. The herbs were cooked in water to yield an herbal decoction. Patients were instructed to gargle with the decoction before swallowing twice daily. The herbal formula contained *Wu Wei Xiao Du Yin* plus *Huang Qin* (Radix Scutellariae) as the base formula, with the addition of *Shi Gao* (Gypsum Fibrosum) and *Lu Gen* (Rhizoma Phragmitis) for fever; and *Di Huang* (Radix Rehmanniae) and *Sha Ren* (Fructus Amomi) for severe pain.¹⁵

13.Burns: Fourteen of 15 patients with various degrees of burns were treated successfully with modified *Wu Wei Xiao Du Yin* for prevention and treatment of infection. Depending on the severity of burns and infection, the duration of treatment ranged from 7-21 days. The herbal formula contained *Wu Wei Xiao Du Yin* as the base formula, with the addition of *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali), and *Mai Dong* (Radix Ophiopogonis) for qi and yin deficiencies; *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity) or *Si Miao San* (Four-Marvel Powder) for fire and toxins; and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Chi Shao* (Radix Paeoniae Rubra) during the middle stage of recovery.¹⁶

14.Myelitis: Thirteen patients with inflammation of the spinal cord or the bone marrow were treated successfully using both antibiotic drugs and modified *Wu Wei Xiao Du Yin*. Concurrent drug and herb treatment was employed for 3-4 days to control acute infection and inflammation, followed by use of herbs to maintain and consolidate the condition. All 13 patients reported significant improvement or complete recovery within one month. The herbal formula was based on *Wu Wei Xiao Du Yin*, with the removal of *Tian Kui Zi* (Radix Semiaquilegiae), and the addition of processed *Chuan Shan Jia* (Squama Manis) and *Lian Qiao* (Fructus Forsythiae). *Huang Qi* (Radix Astragali) was added for qi deficiency when necessary.¹⁷

15.Urinary tract infection: One study reported 94.6% effectiveness using modified *Wu Wei Xiao Du Yin* to treat 37 children with acute urinary tract infection. In addition to *Wu Wei Xiao Du Yin*, *Chai Hu* (Radix Bupleuri) was added for more heat; *Bai Mao Gen* (Rhizoma Imperatae), *Da Ji* (Herba Cirsii Japonici), and *Xiao Ji* (Herba Cirsii) for hematuria; *Che Qian Zi* (Semen Plantaginis) and *Mu Tong* (Caulis Akebiae) for frequent urination with urgency; and *Huang Qi* (Radix Astragali) for qi deficiency. Of 37 patients, the study reported complete recovery in 26 cases, improvement in 9 cases, and no effect in 2 cases.¹⁸

16.Re lin (heat dysuria): One hundred and fourteen patients out of 128 were successfully treated using modified *Wu Wei Xiao Du Yin*. In addition to the base formula, *Che Qian Zi* (Semen Plantaginis) and *Fu Ling* (Poria) were added for dysuria; *Da Huang* (Radix et Rhizoma Rhei) and *Zhi Shi* (Fructus Aurantii Immaturus) for constipation with a yellow, greasy tongue coating; *Di Huang* (Radix Rehmanniae) and *Bai Mao Gen* (Rhizoma Imperatae) for damp-heat damaging yin; and *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali) for generalized deficiency.¹⁹

Huang Lian (Rhizoma Coptidis)

Xia Ku Cao (Spica Prunellae)

Note: *Xi Jiao* (Cornu Rhinoceri) is derived from an endangered animal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions.

The doses of herbs were not given in the source text. The main actions of *Yin Hua Jie Du Tang* (Honeysuckle Decoction to Relieve Toxicity) are to clear heat, eliminate toxins, purge fire, and cool the blood. Clinically, this formula may be used to treat carbuncles, cellulitis, boils, and other types of epithelial inflammations caused by dampness, heat, wind, and fire. In patients with exterior signs and symptoms, this formula should be modified accordingly.

Wǔ Wèi Xiāo Dú Yīn

(Five-Ingredient Decoction to Eliminate Toxins)

Wu Wei Xiao Du Yin and *Yin Hua Jie Du Tang* (Honey-suckle Decoction to Relieve Toxicity) have very similar functions:

- *Wu Wei Xiao Du Yin* focuses on clearing heat and eliminating toxins.
- *Yin Hua Jie Du Tang* emphasizes clearing heat, eliminating toxins, purging fire, and cooling the blood.

(Ten-Ingredient Decoction to Overcome Pathogenic Influences)

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction. Today, the decoction may be prepared using a higher dose of ingredients (approximately 2-3 times higher).

CHINESE THERAPEUTIC ACTIONS

- 1. Dispels wind
- 2. Eliminates toxins

CLINICAL MANIFESTATIONS

Accumulation of heat and toxin at the exterior: various types of suppurative skin disorders, such as acne, eczema, urticaria, boils, carbuncles, furuncles, lymphadenitis, mastitis, sinusitis, and otitis media.

CLINICAL APPLICATIONS

Acne vulgaris, acne rash, eczema, urticaria, boils, carbuncles, furuncles, lymphadenitis, mastitis, sinusitis, otitis media, tinea pedis (athlete's foot), and allergic ophthalmia.

EXPLANATION

Accumulation of heat and toxin at the exterior is often characterized by redness, swelling and pain in the early stages. As the disease progresses, the heat and toxins turn into pus and abscess, leading to the discharge of fluids. This formula may be used to treat heat and toxins in the early to late stage in various parts of the body.

Shi Wei Bai Du Tang (Ten-Ingredient Decoction to Overcome Pathogenic Influences) contains herbs to clear heat and eliminate toxins from the exterior. *Chai Hu* (Radix Bupleuri) and *Sheng Jiang* (Rhizoma Zingiberis Recens)

work as a pair to harmonize the interior and release the exterior. *Du Huo* (Radix Angelicae Pubescentis), *Fang Feng* (Radix Saposhnikoviae), and *Fu Ling* (Poria) dispel wind and resolve dampness. *Jie Geng* (Radix Platycodonis) and *Chuan Xiong* (Rhizoma Chuanxiong) activate blood circulation and drain pus and phlegm. *Jing Jie* (Herba Schizonepetae) and *Ye Ying Pi* (Pericarpium Prunus Pseudocerasus) eliminate toxins. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs in the formula. In short, this formula treats various suppurative dermatological conditions characterized by heat and toxins.

MODIFICATIONS

- With more heat and toxins, add *Lian Qiao* (Fructus Forsythiae) and *Jin Yin Hua* (Flos Lonicerae Japonicae).
- With more pus, add *Yi Yi Ren* (Semen Coicis).
- With thirst, add *Shi Gao* (Gypsum Fibrosum).
- With more itching, add *Shui Ding Xiang* (Herba Ludwigiae Prostratae) and *Huang Shui Qie* (Herba Solani); or *Xiao Feng San* (Eliminate Wind Powder).
- With constipation, add *Da Huang* (Radix et Rhizoma Rhei) or *Da Cheng Qi Tang* (Major Order the Qi Decoction).
- For ulcerations accompanied by swelling and pus, add *Tuo Li Xiao Du Yin* (Drain the Interior and Detoxify Decoction) or *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins).
- For hypertrophic rhinitis, add *Xin Yi Hua* (Flos Magnoliae) and *Ge Gen* (Radix Puerariae Lobatae); or *Xin Yi San* (Magnolia Flower Powder).
- For urticaria, add *Lian Qiao* (Fructus Forsythiae), *Yi Yi Ren* (Semen Coicis), *Yin Chen* (Herba Artemisiae Scopariae), and *Zhi Zi* (Fructus Gardeniae).

Shi Wei Bai Du Tang (Ten-Ingredient Decoction to Overcome Pathogenic Influences)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Accumulation of heat and toxin at the exterior	Suppurative skin disorders with redness, swelling, and pain in the early stages, and the formation of pus and abscess in the later stages: heat and toxin accumulation at the exterior	<ul style="list-style-type: none">• Dispels wind• Eliminates toxins	<ul style="list-style-type: none">• <i>Chai Hu</i> (Radix Bupleuri) and <i>Sheng Jiang</i> (Rhizoma Zingiberis Recens) harmonize the interior and release the exterior.• <i>Du Huo</i> (Radix Angelicae Pubescentis), <i>Fang Feng</i> (Radix Saposhnikoviae), and <i>Fu Ling</i> (Poria) dispel wind and resolve dampness.• <i>Jie Geng</i> (Radix Platycodonis) and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) activate blood circulation and drain pus and phlegm.• <i>Jing Jie</i> (Herba Schizonepetae) and <i>Ye Ying Pi</i> (Pericarpium Prunus Pseudocerasus) eliminate toxins.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs.

Shi Wei Bai Du Tang

(Ten-Ingredient Decoction to Overcome Pathogenic Influences)

- For cellulitis that is warm and swollen, add *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity).
- For acne with redness and pus, add *Yi Yi Ren* (Semen Coicis), *Lian Qiao* (Fructus Forsythiae), and *Da Huang* (Radix et Rhizoma Rhei).
- For measles and eczema, add *Sheng Ma Ge Gen Tang* (Cimicifuga and Kudzu Decoction).

CLINICAL STUDIES AND RESEARCH

1. **Acne vulgaris (pimples):** Administration of *Shi Wei Bai Du Tang* was associated with a suppressed production of propionic acid and butyric acid by all strains of *Propionibacterium acnes* tested. No significant difference in the rate of suppressed production was noted between different *P. acnes* biotype, nor between isolates from mild skin rash and more severe skin rash. Based on this information, the researchers concluded that the clinical effectiveness of *Shi Wei Bai Du Tang* did not seem to be influenced by the degree of acne rash or the *P. acnes* biotype.¹
2. **Acne rashes:** One study showed *Shi Wei Bai Du Tang* to be an effective therapy for the treatment of acne rashes as well as incidental symptoms.²

Sì Miào Yǒng Ān Tāng (Four-Valiant Decoction for Well-Being)

四妙勇安湯
四妙勇安汤

Pinyin Name: *Si Miao Yong An Tang*

Literal Name: Four-Valiant Decoction for Well-Being

Original Source: *Yan Fang Xin Bian* (New Compilation of Time-Tested Formulas) by Bao Xiang-Ao in 1846

COMPOSITION

<i>Jin Yin Hua</i> (Flos <i>Lonicerae Japonicae</i>)	90g [30-90g]
<i>Xuan Shen</i> (Radix <i>Scrophulariae</i>)	90g [30-90g]
<i>Dang Gui</i> (Radix <i>Angelicae Sinensis</i>)	60g [15-30g]
<i>Gan Cao</i> (Radix et Rhizoma <i>Glycyrrhizae</i>)	30g [10-15g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction. The source text specifically emphasizes to use all four herbs in decoction for a total of 10 packs of herbs. Today, this formula may be prepared as a decoction with the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and eliminates toxins
2. Activates blood circulation and relieves pain

CLINICAL MANIFESTATIONS

Gangrene: gangrene of the extremities with purulent abscess, dark red discoloration, local inflammation and swelling, a burning sensation, sometimes severe pain, possible fever, thirst, a red tongue body, and a rapid pulse.

CLINICAL APPLICATIONS

Thromboangiitis obliterans, thrombophlebitis, phlebitis, iliofemoral vein thrombosis, arteriosclerotic gangrene, chronic hepatitis, chronic gastritis, sciatica, prostatic hypertrophy, carpal tunnel syndrome, gout, and erysipelas.

EXPLANATION

Si Miao Yong An Tang (Four-Valiant Decoction for Well-Being) treats gangrene in the extremities, especially the lower legs, characterized by severe accumulation of heat and toxins. Severe heat and toxin accumulation may injure the body tissues and damage the qi and blood, causing gangrene of the extremities with local inflammation, purulent abscess, dark red color, swelling, and a burning sensation. In acute conditions, there may be severe pain. Fever, thirst, red tongue body, and a rapid pulse suggest interior heat.

This formula contains a large dose of *Jin Yin Hua* (Flos *Lonicerae Japonicae*) to clear heat and eliminate

toxins. *Xuan Shen* (Radix *Scrophulariae*) purges fire and eliminates toxins. *Dang Gui* (Radix *Angelicae Sinensis*) activates blood circulation and disperses stagnation. *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*) assists *Jin Yin Hua* (Flos *Lonicerae Japonicae*) in clearing heat and eliminating toxins.

MODIFICATIONS

- With severe pain, add *Ru Xiang* (Gummi *Olibanum*) and *Mo Yao* (Myrrh).
- With more blood stagnation, add *Tao Ren* (Semen *Persicae*) and *Hong Hua* (Flos *Carthami*).
- With qi deficiency, add *Huang Qi* (Radix *Astragali*) and *Dang Shen* (Radix *Codonopsis*).
- With cold excess and yang deficiency, add *Fu Zi* (Radix *Aconiti Lateralis Praeparata*), *Gui Zhi* (Ramulus *Cinnamomi*), and *Lu Jiao Shuang* (Cornu *Cervi Degelatinatum*).
- With severe swelling and inflammation due to damp-heat, add *Fang Ji* (Radix *Stephaniae Tetrandrae*), *Huang Bo* (Cortex *Phellodendri Chinensis*), and *Cang Zhu* (Rhizoma *Atractylodis*).
- For gangrene in the lower extremities, add *Niu Xi* (Radix *Achyranthis Bidentatae*) and *Yi Yi Ren* (Semen *Coicis*).
- For gangrene in the upper extremities, add *Chuan Xiong* (Rhizoma *Chuanxiong*).
- For gangrene in the trunk of the body, add *Du Zhong* (Cortex *Eucommiae*).
- For thromboangiitis obliterans, add *Mao Dong Qing* (Radix *Ilicis Pubescentis*), *Pu Gong Ying* (Herba *Taraxaci*), *Dan Shen* (Radix et Rhizoma *Salviae Miltiorrhizae*), *Chi Xiao Dou* (Semen *Phaseoli*), *Chuan Shan Jia* (Squama *Manis*), and *Di Long* (Pheretima).

CAUTIONS / CONTRAINDICATIONS

- The source text states to avoid scratching the affected area while taking this formula.

Sì Miào Yǒng Ān Tāng (Four-Valiant Decoction for Well-Being)

Si Miao Yong An Tang (Four-Valiant Decoction for Well-Being)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Gangrene	<ul style="list-style-type: none"> • Gangrene in the extremities, local inflammation, purulent abscess, dark red color, swelling and a burning sensation: severe heat and toxins damaging the qi and blood • Thirst: heat consuming body fluids • Red tongue body and a rapid pulse: interior heat 	<ul style="list-style-type: none"> • Clears heat and eliminates toxins • Activates blood circulation and relieves pain 	<ul style="list-style-type: none"> • <i>Jin Yin Hua</i> (Flos <i>Lonicerae Japonicae</i>) clears heat and eliminates toxins. • <i>Xuan Shen</i> (Radix <i>Scrophulariae</i>) purges fire and eliminates toxins. • <i>Dang Gui</i> (Radix <i>Angelicae Sinensis</i>) activates the blood and disperses stagnation. • <i>Gan Cao</i> (Radix et Rhizoma <i>Glycyrrhizae</i>) clears heat, eliminates toxins, and harmonizes all of the herbs.

- *Si Miao Yong An Tang* is designed for gangrene characterized by heat and toxins. It is inappropriate for gangrene characterized by cold.
- In severe cases of gangrene in which there is confirmed necrosis of the tissues, use of this formula is not sufficient. Instead, surgery, or possibly even amputation, is necessary to remove the necrotic tissue.

PHARMACOLOGICAL EFFECTS

1. **Analgesic:** Administration of *Si Miao Yong An Tang* was associated with marked analgesic effects in mice, starting 40 minutes after oral ingestion.¹
2. **Effect on coagulation:** Administration of *Si Miao Yong An Tang* did not affect coagulation or bleeding time in rabbits and mice.²

CLINICAL STUDIES AND RESEARCH

1. **Arteriosclerotic gangrene:** One study used modified *Si Miao Yong An Tang* to treat 28 patients with arteriosclerotic gangrene. In addition to the base formula, *Quan Xie* (Scorpio), *Wu Gong* (Scolopendra), and *Bai Shao* (Radix *Paeoniae Alba*) were added for severe pain; *Pu Gong Ying* (Herba *Taraxaci*), *Huang Bo* (Cortex *Phellodendri Chinensis*), and *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone) for heat and toxins; *Dan Shen* (Radix et Rhizoma *Salviae Miltiorrhizae*), *Tao Ren* (Semen *Persicae*), and *Hong Hua* (Flos *Carthami*) for blood stagnation; *Huang Qi* (Radix *Astragali*), *Bai Zhu* (Rhizoma *Atractylodis Macrocephalae*), and *Fu Ling* (Poria) for qi deficiency; and *Jue Ming Zi* (Semen *Cassiae*) for constipation. Of 28 patients, the study reported complete recovery in 19 cases, marked improvement in 3 cases, and no effect in 2 cases.³
2. **Thromboangiitis obliterans:** Thirty-three patients (32 males and 1 females) with thromboangiitis obliterans were treated with complete recovery in 16 cases, improvement in 11 cases, and no effect in 6 cases. The herbal formula contained *Si Miao Yong An Tang* plus *Huang*

Qin (Radix *Scutellariae*), *Ban Lan Gen* (Radix *Isatidis*), and *Chuan Niu Xi* (Radix *Cyathulae*).⁴ Another study reported complete recovery in 28 of 30 patients with thromboangiitis obliterans using *Si Miao Yong An Tang*.⁵

3. **Thrombophlebitis:** Twenty-eight patients with thrombophlebitis were treated with complete recovery in 22 cases, significant effect in 5 cases, and no effect in 1 case. The herbal treatment used *Si Miao Yong An Tang* as the base formula. In addition, depending on the affected area, the following additions were made: *Chuan Xiong* (Rhizoma *Chuanxiong*) for upper extremities, *Niu Xi* (Radix *Achyranthis Bidentatae*) for lower extremities, *Du Zhong* (Cortex *Eucommiae*) for the trunk of the body, and *Chuan Shan Jia* (Squama *Manis*) for obvious swelling and inflammation.⁶
4. **Phlebitis:** One study reported marked effectiveness using modified *Si Miao Yong An Tang* to treat 32 patients with phlebitis in the lower extremities. Modifications to the base formula included: *Che Qian Zi* (Semen *Plantaginis*), *Bai Hua She She Cao* (Herba *Hedyotis*), and *Chuan Niu Xi* (Radix *Cyathulae*) for early-stage phlebitis; and *Shui Zhi* (Hirudo), *Huang Qi* (Radix *Astragali*), and *E Zhu* (Rhizoma *Curcumae*) for late-stage phlebitis. The herbs were cooked in water and the decoction was given orally to the patient. In addition, the herb residue was cooked again in water, and the solution was used as an herbal wash and applied to the affected area. Of 32 patients, the study reported complete recovery in 29 cases and marked improvement in 3 cases.⁷
5. **Thrombosis of iliofemoral vein:** Integrative treatment was found to be effective in 97.2% of patients with iliofemoral vein thrombosis. The herbal treatment contained *Si Miao Yong An Tang*, modified by removing *Gan Cao* (Radix et Rhizoma *Glycyrrhizae*) and adding *Chuan Xiong* (Rhizoma *Chuanxiong*), *Da Huang* (Radix et Rhizoma *Rhei*) and others as needed. In addition, patients also received an intravenous infusion of *Dan Shen* (Radix et Rhizoma *Salviae Miltiorrhizae*) and oral

Sì Miào Yǒng Ān Tāng (Four-Valiant Decoction for Well-Being)

ingestion of aspirin (300 mg/day for five days, followed by 100 mg/day daily). Antibiotic drugs were given if necessary. Of 36 patients, the study reported complete recovery in 28 cases, marked improvement in 7 cases, and no effect in 1 case.⁸

6. **Chronic hepatitis:** One study reported 94% effectiveness using modified *Si Miao Yong An Tang* to treat chronic hepatitis. Of 33 patients, 25 had significant improvement, 6 had moderate improvement, and 2 had no effect. The herbal formula contained *Si Miao Yong An Tang* plus *Bai Mao Gen* (Rhizoma Imperatae), *Huang Qi* (Radix Astragali), *Tu Fu Ling* (Rhizoma Smilacis Glabrae), and others as the base formula. Modifications included the addition of *Yin Chen* (Herba Artemisiae Scopariae) and *Ku Shen* (Radix Sophorae Flavescentis) for jaundice; *Ji Nei Jin* (Endothelium Corneum Gigeriae Galli) and processed *Chuan Shan Jia* (Squama Manis) for splenomegaly; *Gan Jiang* (Rhizoma Zingiberis), *Cang Zhu* (Rhizoma Atractylodis), and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae) for damp-cold in the Spleen; *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae) and *Chuan Xiong* (Rhizoma Chuanxiong) for blood stagnation; and *Xian He Cao* (Herba Agrimoniae) and *San Qi* (Radix et Rhizoma Notoginseng) for bleeding. The herbs were given in decoction daily for 30 days per course of treatment.⁹
7. **Chronic gastritis:** Use of modified *Si Miao Yong An Tang* to treat 64 patients with chronic gastritis was associated with significant improvement in 54 cases, moderate improvement in 5 cases, and no effect in 5 cases. The overall effectiveness was 92.18%. The treatment protocol was to use *Si Miao Yong An Tang* plus *Pu Gong Ying* (Herba Taraxaci), *Yan Hu Suo* (Rhizoma Corydalis), and *Sha Ren* (Fructus Amomi) as the base formula. Furthermore, modifications included the addition of *Cang Zhu* (Rhizoma Atractylodis), *Hou Po* (Cortex Magnoliae Officinalis), and dry-fried *Lai Fu Zi* (Semen Raphani) for nausea and abdominal distention; *Gao Liang Jiang* (Rhizoma Alpiniae Officinarum) and *Xiang Fu* (Rhizoma Cyperi) for qi stagnation with cold; *Chai Hu* (Radix Bupleuri), *Sheng Ma* (Rhizoma Cimicifugae), and *Huang Qi* (Radix Astragali) for Spleen deficiency and *zhong* (central) *qi* deficiency; and *Wa Leng Zi* (Concha Arcae) or *Zuo Jin Wan* (Left Metal Pill) for belching and acid reflux.¹⁰
8. **Sciatica:** Use of modified *Si Miao Yong An Tang* in 30 patients with sciatica was associated with complete recovery in 21 cases, marked improvement in 8 cases, and no effect in 1 case. The herbal treatment included *Si Miao Yong An Tang* plus *Wei Ling Xian* (Radix et Rhizoma Clematidis), *Qian Nian Jian* (Rhizoma Homalomenae) and *Chuan Niu Xi* (Radix Cyathulae) as the base formula. Furthermore,

modifications to the original formula included the addition of *Huang Bo* (Cortex Phellodendri Chinensis) and *Di Long* (Pheretima) for soreness, heaviness and pain due to damp-heat; *Fu Zi* (Radix Aconiti Lateralis Praeparata) and *Xi Xin* (Radix et Rhizoma Asari) for cold extremities and aversion to cold due to damp-cold; *Du Zhong* (Cortex Eucommiae) and *Sang Ji Sheng* (Herba Taxilli) for low back pain; and *Bai Shao* (Radix Paeoniae Alba), *Yu Zhu* (Rhizoma Polygonati Odorati), and *Shen Jin Cao* (Herba Lycopodii) for muscle spasms, cramps and/or atrophy.¹¹

9. **Prostatic hypertrophy:** One study reported good results using modified *Si Miao Yong An Tang* to treat prostatic hypertrophy. The base formula included *Si Miao Yong An Tang* plus *Tao Ren* (Semen Persicae), *Niu Xi* (Radix Achyranthis Bidentatae), *Ze Xie* (Rhizoma Alismatis), *Ju He* (Semen Citri Reticulatae), *Rou Gui* (Cortex Cinnamomi), and *Chuan Shan Jia* (Squama Manis). Furthermore, *Yan Hu Suo* (Rhizoma Corydalis) and *Mu Xiang* (Radix Aucklandiae) were added for testicular swelling and pain; *Mang Xiao* (Natrii Sulfas) for constipation; *Yin Yang Huo* (Herba Epimedii) and *Du Zhong* (Cortex Eucommiae) for weakness and soreness of lower back and knees; *Mo Han Lian* (Herba Ecliptae) and *Bai Mao Gen* (Rhizoma Imperatae) for hematuria; and *Bie Jia* (Carapax Trionycis) and *Hong Hua* (Flos Carthami) for hardness and nodules in the prostate area. Of 28 patients, the study reported significant improvement in 13 cases, moderate improvement in 12 cases, and no effect in 3 cases.¹²
10. **Carpal tunnel syndrome:** Use of modified *Si Miao Yong An Tang* was associated with 94.74% effectiveness in treating 19 patients with carpal tunnel syndrome. The herbal treatment included *Si Miao Yong An Tang* plus *Wei Ling Xian* (Radix et Rhizoma Clematidis), processed *Ru Xiang* (Gummi Olibanum), and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae). After cooking the herbs in water, the patients were instructed to drink the decoction and apply the herb residue topically to the affected area for 20-30 minutes. The duration was 15 days per course of treatment. Of 19 patients, the study reported complete recovery in 15 cases (complete resolution of numbness, pain, and other symptoms), moderate improvement in 3 cases (over 50% relief of symptoms) and no effect in 1 case.¹³
11. **Gout:** Sixteen patients with gout were treated with herbs resulting in complete recovery in 9 cases, improvement in 6 cases, and no effect in 1 case. The overall effectiveness was 93.7%. The herbal formula included *Si Miao Yong An Tang*, *Si Miao San* (Four-Marvel Powder), *Jin Qian Cao* (Herba Lysimachiae), *Ru Xiang* (Gummi Olibanum), and *Mo Yao* (Myrrha). Modifications included the addition

Sì Miào Yǒng Ān Tāng (Four-Valiant Decoction for Well-Being)

of *Shi Gao* (Gypsum Fibrosum) for heat; *Bai Zhi* (Radix Angelicae Dahuricae) for headache; *Da Huang* (Radix et Rhizoma Rhei) [post-decocted] for constipation; *Tu Fu Ling* (Rhizoma Smilacis Glabrae) for swelling and pain of the joints; *Wu Gong* (Scolopendra), and *Chuan Shan Jia* (Squama Manis) to enhance the efficacy of the herbal formula; and *Jin Qian Cao* (Herba Lysimachiae) for urinary stones. In addition, an herbal solution was applied topically to the affected area to treat redness, swelling, and pain. The topical solution was made from *Shang Lu* (Radix Phytolaccae), *Gan Sui* (Radix Kansui), and *Ze Lan* (Herba Lycopi).¹⁴

12. **Erysipelas:** Use of modified *Si Miao Yong An Tang* as a decoction in 31 patients was associated with complete recovery in 19 cases after 2-3 days, 10 cases after 4-6 days, and 2 cases after 1 week.¹⁵ Another study reported marked effect in all 28 patients with erysipelas of the lower extremities when treated with *Si Miao Yong An Tang* plus *Huang Bo* (Cortex Phellodendri Chinensis), *Chuan Niu Xi* (Radix Cyathulae), *Di Long* (Pheretima), and others.¹⁶

<i>Niu Xi</i> (Radix Achyranthis Bidentatae)	15g [10g]
<i>Zi Hua Di Ding</i> (Herba Viola)	30g [20g]

The source text states to prepare the ingredients as a decoction. Today, the decoction may be prepared using the doses suggested in brackets.

Wu Shen Tang (Five-Miracle Decoction) clears heat, eliminates toxins, and drains damp-heat. It is used to treat abscesses of the bones and legs, erysipelas, and toxic rash around *Weizhong* (BL 40) [popliteal region].

Shén Xiào Tuō Lǐ Sǎn

(Miraculous Powder for Supporting the Interior)

神效托裡散

Pinyin Name: *Shen Xiao Tuo Li San*

Literal Name: Miraculous Powder for Supporting the Interior

Alternate Name: *Si Miao San* (Four-Marvel Powder)

Original Source: *Tai Ping Hui Min He Ji Ju Fang* (Imperial Grace Formulary of the Tai Ping Era) by the Imperial Medical Department in 1078-85

<i>Ren Dong Teng</i> (Caulis Lonicerae Japonicae)	150g
<i>Huang Qi</i> (Radix Astragali)	150g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	36g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	
<i>Praeparata cum Melle</i>	240g

The source text states to grind the ingredients into a fine powder. Cook 6g of the powder with 1.5 bowls of grain-based liquor until the liquid is reduced to 0.5 bowl. If the affected area is in the upper body, take the formula after meals. If the affected area is in the lower body, take the formula before meals. Apply the herb residue topically to the affected area.

Shen Xiao Tuo Li San (Miraculous Powder for Supporting the Interior) tonifies qi, nourishes the blood, promotes the generation of flesh, and eliminates toxins. Clinically, it is used to treat individuals with qi and blood deficiencies with intestinal abscesses, breast abscesses, and any other types of swelling, sores, and abscesses, accompanied by fever and chills.

AUTHORS' COMMENTS

Si Miao Yong An Tang is the representative formula for treating gangrene, with such key diagnostic symptoms as localized inflammation, purulent abscess, dark red color, swelling, and a burning sensation. The original text notes that successful treatment of gangrene requires the use of this formula in large doses for a prolonged duration (at least 10 packs of herbs). The use of this formula at a low dose or for a short period of time will not be effective.

Si Miao Yong An Tang, *Wu Shen Tang* (Five-Miracle Decoction), and *Shen Xiao Tuo Li San* (Miraculous Powder for Supporting the Interior) all clear heat and eliminate toxins. The differences are as follows:

- *Si Miao Yong An Tang* eliminates toxins, clears heat, activates the blood, and disperses blood stasis. It is most effective for gangrene due to heat and toxins with underlying yin and blood deficiencies.
- *Wu Shen Tang* eliminates toxins, clears heat, and drains damp-heat. It is best for abscesses and erysipelas due to heat, toxins and damp-heat.
- *Shen Xiao Tuo Li San* clears heat and eliminates toxins, as well as tonifies qi and blood. It treats chronic abscesses and sores with underlying qi and blood deficiencies.

Zǐ Cǎo Gēn Mǔ Lì Tāng (Arnebia and Oyster Shell Decoction)

紫草根牡蠣湯
紫草根牡蛎汤

Pinyin Name: Zi Cao Gen Mu Li Tang
Literal Name: Arnebia and Oyster Shell Combination
Alternate Name: Zi Gen Mu Li Tang, Lithospermum and Oyster Shell Decoction
Original Source: *Bai Rai Shin Shu* (A New Study of Dermatomycosis and Dermatitis) by Tsursure Katakura

COMPOSITION

<i>Zi Cao</i> (Radix Arnebiae)	3g
<i>Jin Yin Hua</i> (Flos Lonicerae Japonicae)	1.5g
<i>Sheng Ma</i> (Rhizoma Cimicifugae)	2g
<i>Mu Li</i> (Concha Ostreae)	4g
<i>Huang Qi</i> (Radix Astragali)	2g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	5g
<i>Bai Shao</i> (Radix Paeoniae Alba)	3g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	3g
<i>Da Huang</i> (Radix et Rhizoma Rhei)	1.5g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	1g

Note: *Zi Cao* (Radix Arnebiae) may be derived from three sources: *Arnebiae euchroma*, *Arnebiae guttata*, and *Lithospermum erythrorhizon*. All three herbs have similar functions, and have been used interchangeably in the history of Chinese herbal medicine. However, *Zhong Hua Ren Min Gong He Guo Yao Dian* (Pharmacopoeia of People's Republic of China) in 2005 identifies the arnebia genus as the official source of *Zi Cao*. Therefore, we have adopted arnebia as the standard nomenclature for both single herbs and herbal formulas throughout this text.

DOSAGE / PREPARATION / ADMINISTRATION

The source texts states to cook the herbs in 5 cups of water until the liquid is reduced to 2.5 cups. Take the warm, strained decoction in three equally-divided doses daily. Today, the decoction may be prepared using a higher dose of the ingredients (approximately 2-3 times higher).

CHINESE THERAPEUTIC ACTIONS

1. Clears heat and eliminates toxins

2. Reduces swelling and disperses nodules and hardness

Zǐ Cǎo Gēn Mǔ Lì Tāng (Arnebia and Oyster Shell Decoction)

CLINICAL MANIFESTATIONS

Malignant abscesses and sores: various types of abscesses, sores, nodules, hardness, and dermatological disorders of unknown origin.

CLINICAL APPLICATIONS

Breast cancer, mastitis, lymphadenitis, gangrene, herpes, and skin lesions from syphilis.

EXPLANATION

Zi Cao Gen Mu Li Tang (Arnebia and Oyster Shell Decoction) treats various types of dermatological disorders characterized by heat and toxins. It has a broad range of effects, and is effective against sores, abscesses, nodules, and hardness.

Zi Cao (Radix Arnebiae) and *Jin Yin Hua* (Flos Lonicerae Japonicae) clear heat and eliminate toxins from the blood. They are also effective in treating various types of chronic and stubborn abscesses and sores due to infection. *Sheng Ma* (Rhizoma Cimicifugae) raises and disperses yang qi while eliminating heat and toxins. *Mu Li* (Concha Ostreae) softens hardness and disperses nodules. *Huang Qi* (Radix Astragali) tonifies qi and promotes healing, and

is one of the most important herbs for treating patients with suppurative disorders. *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Xiong* (Rhizoma Chuanxiong) tonify blood and strengthen the body. *Da Huang* (Radix et Rhizoma Rhei) drains damp-heat. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs in the formula.

MODIFICATIONS

- With painful bruises and swelling, add *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- With swelling caused by wind and dampness, add *Bai Zhi* (Radix Angelicae Dahuricae) and *Bai Zhu* (Rhizoma Atractylodis Macrocephalae).
- For herpes, add *Jing Jie* (Herba Schizonepetae), *Fang Feng* (Radix Saposhnikoviae), and *Lian Qiao* (Fructus Forsythiae).
- For herpes with neuralgia, add *Gui Zhi* (Ramulus Cinnamomi), *Qian Niu Zi* (Semen Pharbitidis), and *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- For herpes affecting the eyes, add *Ju Hua* (Flos Chrysanthemi), *Che Qian Zi* (Semen Plantaginis), *Jie Geng* (Radix Platycodonis), *Fang Feng* (Radix Saposhnikoviae), and *Lian Qiao* (Fructus Forsythiae).

Zi Cao Gen Mu Li Tang (Arnebia and Oyster Shell Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Malignant abscesses and sores	Abscesses, sores, nodules and hardness: heat and toxins accumulation	<ul style="list-style-type: none">• Clears heat and eliminates toxins• Reduces swelling and disperses nodules and hardness	<ul style="list-style-type: none">• <i>Zi Cao</i> (Radix Arnebiae) and <i>Jin Yin Hua</i> (Flos Lonicerae Japonicae) clear heat and eliminate toxins from the blood.• <i>Sheng Ma</i> (Rhizoma Cimicifugae) raises and disperses yang qi while eliminating heat and toxins.• <i>Mu Li</i> (Concha Ostreae) softens hardness and disperses nodules.• <i>Huang Qi</i> (Radix Astragali) tonifies qi and promotes healing.• <i>Dang Gui</i> (Radix Angelicae Sinensis), <i>Bai Shao</i> (Radix Paeoniae Alba) and <i>Chuan Xiong</i> (Rhizoma Chuanxiong) tonify blood and strengthen the body.• <i>Da Huang</i> (Radix et Rhizoma Rhei) drains damp-heat.• <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs.

Xi Huang Wan (Cattle Gallstone Pill)

犀黃丸
犀黃丸

Pinyin Name: *Xi Huang Wan*
Literal Name: Cattle Gallstone Pill
Original Source: *Wai Ke Zheng Zhi Quan Sheng Ji* (Complete Collection of Patterns and Treatments in External Medicine) by Wang Wei-De in 1740

COMPOSITION

<i>Niu Huang</i> (Calculus Bovis)	0.9g [15g]
<i>She Xiang</i> (Moschus)	4.5g [75g]
<i>Ru Xiang</i> (Gummi Olibanum), oil removed and <i>yan</i> (ground) into fine powder	30g [500g]
<i>Mo Yao</i> (Myrrha), oil removed and <i>yan</i> (ground) into fine powder	30g [500g]

Although this formula is called *Xi Huang Wan*, literally “Rhinoceros Gallstone Pill,” it is *Niu Huang* (Calculus Bovis), **not** *Xi Huang* (Calculus Rhinoceri), that is used in this formula. Therefore, to more accurately state the composition of this formula, the literal name is translated as “Cattle Gallstone Pill,” **not** “Rhinoceros Gallstone Pill.”

Note: *She Xiang* (Moschus) is derived from an endangered animal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions.

Today, this formula is prepared using the doses suggested in brackets. Steam 350g of rice and all of the ingredients, except *Niu Huang* (Calculus Bovis) and *She Xiang* (Moschus), until the rice is well-cooked. Oven-dry the herbs and grind them into a fine powder. Separately grind *Niu Huang* (Calculus Bovis) and *She Xiang* (Moschus) into a fine powder. Mix and sift all the powders evenly. Form the powder into pills with water, and dry the pills in a cool place without direct exposure to sunlight.

CHINESE THERAPEUTIC ACTIONS

- 1. Eliminates toxins and reduces abscesses
- 2. Dissolves phlegm and disperses nodules
- 3. Activates blood circulation and dispels blood stasis

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into fine powder and form into pills with mashed, cooked rice. Allow the pills to sun-dry naturally. Do not dry the pills by baking or exposing them to fire. Take 9g of pills per dose with aged, grain-based liquor. If the disease is in the upper body, take the formula before bedtime. If the disease is in the lower body, take it on an empty stomach.

CLINICAL MANIFESTATIONS

Yang-type abscesses and sores: breast cancer, buboes, scrofula, subcutaneous nodules, multiple abscesses, lung abscesses, and intestinal abscesses.

EXPLANATION

Xi Huang Wan (Cattle Gallstone Pill) treats various yang-type abscesses and sores characterized by accumulation and stagnation of fire, phlegm, heat, and toxins. As a result of such accumulation and stagnation, yin

Xi Huang Wan (Cattle Gallstone Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Yang-type abscesses and sores	Breast cancer, buboes, scrofula, subcutaneous nodules, multiple abscesses, lung abscesses, and intestinal abscesses: accumulation of fire, phlegm, heat, and toxins	<ul style="list-style-type: none">• Eliminates toxins and reduces abscesses• Dissolves phlegm and disperses nodules• Activates blood and dispels blood stasis	<ul style="list-style-type: none">• <i>Niu Huang</i> (Calculus Bovis) clears heat, eliminates toxins, dissolves phlegm, and disperses nodules.• <i>She Xiang</i> (Moschus) disperses and unblocks stagnation and nodules.• <i>Ru Xiang</i> (Gummi Olibanum) and <i>Mo Yao</i> (Myrrha) activate the blood, dispel blood stasis, reduce swelling, and relieve pain.

Xī Huáng Wán (Cattle Gallstone Pill)

and yang become unbalanced, channels and collaterals become obstructed, and the *zang fu* organs cannot perform their functions. Over time, abscesses and sores form at various parts of the body.

In this formula, *Niu Huang* (Calculus Bovis) clears heat, eliminates toxins, dissolves phlegm, and disperses nodules. *She Xiang* (Moschus) disperses and unblocks stagnation and nodules. *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha) activate blood circulation, dispel blood stasis, reduce swelling, and relieve pain. Rice nourishes the Stomach and protects it from the harsh characteristics of the other herbs in this formula. Lastly, this formula is taken with aged grain-based liquor to enhance the blood-activating function.

CAUTIONS / CONTRAINDICATIONS

- *Xi Huang Wan* treats nodules and abscesses while they are still hard. It should not be used for individuals with qi, yin and blood deficiencies, or in conditions in which the nodules and abscesses have already broken into open lesions and ulcerations with discharge of fluids and pus. Use of *Xi Huang Wan* under these circumstances will only consume *zheng* (upright) *qi*.
- This formula should only be given as pills for two reasons. First, pills are more appropriate than decoction as pills provide consistent and continuous effect needed to slowly dissolve phlegm and disperse nodules. Second, many ingredients in this formula cannot be prepared in decoction because they are acrid and aromatic, and contain volatile oils which evaporate easily during cooking.
- This formula should not be taken for a prolonged period of time, as it contains many herbs that are acrid and drying in nature.
- This formula is contraindicated during pregnancy.

RELATED FORMULAS

Xīng Xiǎo Wán (Awake and Disperse Pill)

醒消丸

Pinyin Name: *Xīng Xiao Wan*

Literal Name: Awake and Disperse Pill

<i>Ru Xiang</i> (Gummi Olibanum), oil removed	30g
<i>Mo Yao</i> (Myrrha), oil removed	30g
<i>She Xiang</i> (Moschus), <i>yan</i> (ground) into fine powder	4.5g
<i>Xiong Huang</i> (Realgar), <i>yan</i> (ground) into fine powder	15g

Note: *Xiong Huang* (Realgar) is a potentially toxic heavy metal, and *She Xiang* (Moschus) is derived from an

endangered animal. They are rarely used as medicinal substances today. Their discussion here is included primarily for academic purposes, to reflect the historical use of these substances in their original formulations. Most herbal products today have removed them completely, or replaced them with substitutes with similar functions. For additional information on the toxicity of *Xiong Huang* (Realgar), please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

The source text states to mash the ingredients and form into pills with 30g of cooked rice. The pills should resemble *Lai Fu Zi* (Semen Raphani) in size. Allow the pills to sun-dry naturally. Do not dry the pills by baking or exposing them to fire. Take 9g of pills per dose with aged, grain-based liquor. The patient should be covered with blankets to promote sweating.

Xīng Xiǎo Wán (Awake and Disperse Pill) activates the blood, disperses nodules, and eliminates toxins. It can be used for all types of abscesses characterized by redness and swelling. This formula is potentially toxic, and should be used with extreme caution and only for a short period of time. This formula is contraindicated during pregnancy.

Chán Sū Wán (Toad Venum Pill)

蟾酥丸

Pinyin Name: *Chan Su Wan*

Literal Name: Toad Venum Pill

Original Source: *Wai Ke Zheng Zong* (True Lineage of External Medicine) by Chen Shi-Gong in 1617

<i>Chan Su</i> (Venenum Bufonis), <i>hua</i> (dissolved) with liquor	6g
<i>Qīng Fēn</i> (Calomelas)	1.5g

<i>She Xiang</i> (Moschus)	3g
<i>Xiong Huang</i> (Realgar)	6g
<i>Wō Niú</i> (Eulota)	21 pieces
<i>Zhu Sha</i> (Cinnabaris)	9g

Note: *Zhu Sha* (Cinnabaris) and *Qīng Fēn* (Calomelas) are potentially toxic heavy metals, and *She Xiang* (Moschus) is derived from an endangered animal. They are rarely used as medicinal substances today. Their discussion here is included primarily for academic purposes, to reflect the historical use of these substances in their original

Xī Huáng Wán (Cattle Gallstone Pill)

formulations. Most herbal products today have removed them completely, or replaced them with substitutes with similar functions. For additional information on the toxicity, please refer to *Chinese Medical Herbology and Pharmacology* by John Chen and Tina Chen.

The source text states to mash *Wo Niu* (Eulota) with *Chan Su* (Venenum Bufonis) and grind them together. Separately grind the other ingredients into powder. Mix all the powders together thoroughly, and form into pills that resemble the size of *Lu Dou* (Semen Phaseoli Radiati). For administration, chew 5 *cun* (approximately 5 inches) of *Cong Bai* (Bulbus Allii Fistulosi) first, then take 3 pills with 1 bowl of hot, grain-based liquor, and cover the body with blankets to promote sweating.

Chan Su Wan (Toad Venum Pill) eliminates toxins, reduces swellings, activates blood circulation, and relieves pain. It treats furuncles, lumbodorsal cellulitis, carbuncles of the nape, breast abscesses, pyogenic infection of the bone, deep-rooted carbuncles of the hips and legs, and all other

types of abscesses and sores. This formula is potentially toxic. It should **not** be used at a large dose or for a prolonged period of time. It should be used with extreme caution for individuals with underlying qi and blood deficiencies. This formula is contraindicated during pregnancy.

AUTHORS' COMMENTS

Xi Huang Wan, *Xing Xiao Wan* (Awake and Disperse Pill), and *Chan Su Wan* (Toad Venum Pill) all activate blood circulation, reduce swelling, eliminate toxins, and disperse nodules and hardness.

- *Xi Huang Wan* potently clears heat and eliminates toxins, and is primarily used to treat yang-type abscesses and sores.
- *Xing Xiao Wan* moderately clears heat and eliminates toxins, and is primarily used to treat yang-type abscesses characterized by redness and swelling.
- *Chan Su Wan* clears heat and eliminates toxins via its warming and dispersing herbs. It may be used for both superficial or deep-rooted abscesses.

Hǎi Zǎo Yù Hú Tāng (Sargassum Decoction for the Jade Flask)

海藻玉壺湯
海藻玉壺汤

Pinyin Name: *Hai Zao Yu Hu Tang*

Literal Name: Sargassum Decoction for the Jade Flask

Alternate Name: Sargassum Combination for the Jade Flask

<i>Lian Qiao</i> (Fructus Forsythiae)	3g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	3g

Hǎi Zǎo Yù Hú Tāng (Sargassum Decoction for the Jade Flask)

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction by cooking the herbs in 2 cups of water until it is reduced down to 80%. Take the decoction before meals if the affected area is in the upper body, and after meals for lower body.

CHINESE THERAPEUTIC ACTIONS

1. Dissolves phlegm and softens hardness
2. Reduces and disperses goiter and tumor

CLINICAL MANIFESTATIONS

Goiter due to Liver and Spleen disharmony and qi and phlegm stagnation: immobile goiter in the neck region that is hard as a rock, with no pain, no change in skin color, and no inflammation.

CLINICAL APPLICATIONS

Goiter, thyroid adenocarcinoma, hyperthyroidism, lymphadenitis, hyperplasia of mammary glands, and panniculitis.

EXPLANATION

Hai Zao Yu Hu Tang (Sargassum Decoction for the Jade Flask) treats goiter caused by qi and phlegm stagnation, which often arises from the disharmony between the Liver and Spleen. The local qi and phlegm stagnation can then produce blood stagnation. The nodule is usually located on the neck, and is immobile, with no color change, no pain, does not perforate, and is often described as "hard as rock."

This formula has *Hai Zao* (Sargassum), *Kun Bu* (Thallus Eckloniae), and *Hai Dai* (Thallus Laminariae) to dissolve phlegm and soften nodules. *Bei Mu* (Bulbus Fritillariae) and *Ban Xia* (Rhizoma Pinelliae) dry dampness and resolve phlegm. *Qing Pi* (Pericarpium Citri Reticulatae Viride) and *Chen Pi* (Pericarpium Citri Reticulatae) regulate the qi and spread the Liver. *Dang Gui* (Radix Angelicae Sinensis), *Chuan Xiong* (Rhizoma Chuanxiong), and *Du Huo* (Radix Angelicae Pubescentis) activate blood circulation and disperse the nodule. *Lian Qiao* (Fructus Forsythiae) disperses nodules and reduces swelling. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonizes all of the herbs in the formula.

MODIFICATIONS

- For rock-hard nodules, add *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae).
- For nodules associated with Liver qi stagnation, add *Chai Hu* (Radix Bupleuri) and *Xiang Fu* (Rhizoma Cyperi).
- With a stifling sensation in the chest due to phlegm accumulation and qi stagnation, add *Xiang Fu* (Rhizoma Cyperi), *Zi Su Geng* (Caulis Perillae), *Yu Jin* (Radix Curcumae), and *Ge Qiao* (Concha Meretricis seu Cyclinae).
- With palpitations and sweating caused by blood deficiency and heat, add *Di Huang* (Radix Rehmanniae), *Shu Di Huang* (Radix Rehmanniae Praeparata), *Fu Shen* (Poria Paradicis), and *Suan Zao Ren* (Semen Ziziphi Spinosae).
- With hand and tongue tremors due to Liver wind, add *Zhen Zhu Mu* (Concha Margaritiferae), *Gou Teng* (Ramulus Uncariae cum Uncis), *Bai Shao* (Radix Paeoniae

- With frequent thirst and hunger due to Stomach heat, add *Shi Gao* (Gypsum Fibrosum), *Zhi Mu* (Rhizoma Anemarrhenae), and *Tian Hua Fen* (Radix Trichosanthis).
- With irregular menstruation, add *Lu Jiao* (Cornu Cervi), *Rou Cong Rong* (Herba Cistanches), *Yi Mu Cao* (Herba Leonuri), and *Tu Si Zi* (Semen Cuscutae).

CAUTIONS / CONTRAINDICATIONS

While taking *Hai Zao Yu Hu Tang*, patients should avoid foods that are sweet, fatty, or heavy in nature.

CLINICAL STUDIES AND RESEARCH

1. **Hyperthyroidism:** Use of modified *Hai Zao Yu Hu Tang* in 23 patients with hyperthyroidism was associated with 87% effectiveness. The herbal treatment contained *Hai Zao* (Sargassum), *Kun Bu* (Thallus Eckloniae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Qing Pi* (Pericarpium Citri Reticulatae Viride), *Chen Pi* (Pericarpium Citri Reticulatae), *Di Huang* (Radix Rehmanniae), *Bai Shao* (Radix Paeoniae Alba), *Tian Dong* (Radix Asparagi), *Xuan Shen* (Radix Scrophulariae), *Xia Ku Cao* (Spica Prunellae), *Huang Qin* (Radix Scutellariae), and *Mu Li* (Concha Ostreae). Clinical results included both subjective and objective improvements, with resolution of signs and symptoms and normalization of T3 and T4. Of 23 patients, the study reported recovery in 11 cases, improvement in 9 cases, and no effect in 3 cases.¹
2. **Hyperplasia of mammary glands:** One study reported 94.2% effectiveness using modified *Hai Zao Yu Hu Tang* to treat hyperplasia of mammary glands in 52 women (2 women younger than 18 years of age, 43 women between 19-45 years of age, and 7 women older than 46 years of age). The herbal treatment contained *Hai Zao* (Sargassum), *Kun Bu* (Thallus Eckloniae), *Xia Ku Cao* (Spica Prunellae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), *Xiang Fu* (Rhizoma Cyperi), *Ban Xia* (Rhizoma Pinelliae), *Shui Zhi* (Hirudo), *Tu Bie Chong* (Eupolyphaga seu Steleophaga), *San Leng* (Rhizoma Sparganii), *E Zhu* (Rhizoma Curcumae), *Lian Qiao* (Fructus Forsythiae), and *Bai Hua She She Cao* (Herba Hedyotis). Overall, the study reported a reduction in the number and size of breast nodules by more than 50%. Of 52 patients, 32 had complete recovery, 17 had marked improvement, and 3 had no effect.² Another study reported marked results (92.1% effectiveness) using modified *Hai*

Zao Yu Hu Tang to treat 26 women with hyperplasia of mammary glands. Guidelines for modifications were to add *Chai Hu* (Radix Bupleuri), *Xiang Fu* (Rhizoma Cyperi) and *Jie Geng* (Radix Platycodonis) for qi stagnation with distention and pain; *San Leng* (Rhizoma Sparganii) and *Chuan Shan Jia* (Squama Manis) for blood stagnation; *Gua Lou* (Fructus Trichosanthis) and *Bai Jie Zi* (Semen Sinapis) for a white, greasy tongue coating with a wiry, slippery pulse; *Huang Qi* (Radix Astragali), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), and *Fu Ling* (Poria) for lack of energy; *Lu Jiao Jiao* (Colla Cornus Cervi) and *Yin Yang Huo* (Herba Epimedii) for aversion to cold with low back soreness; and other modifications as needed. Of 26 patients, the study reported complete recovery in 16 patients, significant improvement in 5 cases, moderate improvement in 3 cases, and no effect in 2 cases.³

3. **Panniculitis:** One study reported satisfactory results using modified *Hai Zao Yu Hu Tang* to treat 12 patients with painful inflammatory and necrotic nodules in the subcutaneous tissues affecting the extremities, buttocks, and other areas of the body. The herbal formula contained *Hai Zao* (Sargassum) 10g, *Kun Bu* (Thallus Eckloniae) 10g, *Lian Qiao* (Fructus Forsythiae) 10g, *Bei Mu* (Bulbus Fritillariae) 10g, *Dang Gui* (Radix Angelicae Sinensis) 10g, *Hai Dai* (Thallus Laminariae) 10g, *Du Huo* (Radix Angelicae Pubescentis) 10g, *Tao Ren* (Semen Persicae) 10g, *Yi Yi Ren* (Semen Coicis) 10g, *Si Gua Luo* (Retinervus Luffae Fructus) 10g, *Qing Pi* (Pericarpium Citri Reticulatae Viride) 5g, *Chen Pi* (Pericarpium Citri Reticulatae) 5g, *Ban Xia* (Rhizoma Pinelliae) 5g, *Chuan Xiong* (Rhizoma Chuanxiong) 5g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 5g. Modifications were made by adding *Ren Dong Teng* (Caulis Lonicerae Japonicae) and *Chi Xiao Dou* (Semen Phaseoli) for early stage inflammation with redness, swelling and pain; and *Tu Bie Chong* (Eupolyphaga seu Steleophaga) and *Chi Shao* (Radix Paeoniae Rubra) for middle stage inflammation with hardness and stiffness of the affected tissues and dark discoloration. The treatment protocol was to administer the herbs for 15 days per course of treatment, for 1-2 courses total. Of 12 patients, the study reported complete recovery in 10 cases, improvement in 1 case, and no response in 1 case.⁴
4. **Vocal cord nodule:** One study reported good success using modified *Hai Zao Yu Hu Tang* to treat formation of vocal cord nodules in 37 patients (3 males and 34 females). The herbal formula contained *Hai Zao* (Sargassum), *Kun Bu* (Thallus Eckloniae), *Mu Li* (Concha Ostreae), *Dang Gui* (Radix Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubra), *Chuan Xiong* (Rhizoma Chuanxiong), *Mai Dong* (Radix Ophiopogonis), *Pu Gong*

Hǎi Zǎo Yù Hú Tāng (Sargassum Decoction for the Jade Flask)

Ying (Herba Taraxaci), *Jin Yin Hua* (Flos Lonicerae Japonicae), *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii), and *Chen Pi* (Pericarpium Citri Reticulatae). The herbs were given in decoction daily. Clinical improvements included normalization of voice, reduced redness and swelling, and reduction or resolution of vocal nodules. Of 37 patients, the study reported complete recovery in 26 cases, significant recovery in 9 cases, and no effect in 2 cases.⁵

AUTHORS' COMMENTS

Hai Zao Yu Hu Tang is one of the most commonly used formulas today for various thyroid disorders with enlargement of the thyroid glands, such as goiter and thyroid tumor. The duration of treatment necessary for improvement ranges from 3-6 months. Should the nodule remain the same size or increase in size, surgery should be considered.

According to *Shi Ba Fan* (Eighteen Incompatibles), *Hai Zao* (Sargassum) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) are not compatible with each other and should not be used together. However, this formula has been prescribed since 1742, and there has been no reported toxicity or side effects associated with its use. Furthermore, when prescribed, this formula is usually given for approximately 3-6 months. Thus, it is presumed that the use of these two herbs together in this formula is considered safe.

Xiāo Luǒ Wán (Reduce Scrofula Pill)

消癭丸

Pinyin Name: *Xiao Luo Wan*

Literal Name: Reduce Scrofula Pill

Alternate Name: Scrophularia and Fritillaria Combination

Original Source: *Yi Xue Xin Wu* (Medical Revelations) by Cheng Guo-Peng in 1732

COMPOSITION

<i>Xuan Shen</i> (Radix Scrophulariae), <i>zheng</i> (steamed)	120g
<i>Bei Mu</i> (Bulbus Fritillariae), <i>zheng</i> (steamed)	120g
<i>Mu Li</i> (Concha Ostreae), <i>duan</i> (calcined) and <i>yan</i> (ground) with vinegar	120g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to first steam *Xuan Shen* (Radix Scrophulariae) and *Bei Mu* (Bulbus Fritillariae), and calcine and grind *Mu Li* (Concha Ostreae) with vinegar. Then, grind all of the ingredients into powder, mix with honey, and form into pills. Take 9g of pills with boiled water twice daily.

CHINESE THERAPEUTIC ACTIONS

1. Reduces scrofula
2. Nourishes yin
3. Dissolves phlegm and softens hardness

CLINICAL MANIFESTATIONS

Hardness and nodules: hard lumps or nodules anterior or posterior to the ear or on the neck; dry mouth and throat; and a bitter taste in the mouth.

CLINICAL APPLICATIONS

Goiter, scrofula, hyperthyroidism, thyroiditis, acute simple lymphadenitis, parotitis, and hyperplasia of mammary glands.

EXPLANATION

Xiao Luo Wan (Reduce Scrofula Pill) treats lumps and nodules around the ears and the neck. Such nodules or

Xiāo Luǒ Wán (Reduce Scrofula Pill)

Xiao Luo Wan (Reduce Scrofula Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Hardness and nodules	Lumps, hardness, and nodules around the ears and neck	<ul style="list-style-type: none">• Reduces scrofula• Nourishes yin• Dissolves phlegm and softens hardness	<ul style="list-style-type: none">• <i>Xuan Shen</i> (Radix Scrophulariae) nourishes yin and guides fire downward.• <i>Bei Mu</i> (Bulbus Fritillariae) dissolves phlegm and reduces swelling.• <i>Mu Li</i> (Concha Ostreae) softens hardness and disperses nodules.

hardness is often caused by inflammation of the lymph nodes or enlargement of the thyroid glands. Patients may or may not have any subjective symptoms or complaints.

Although this formula contains only three herbs, it is very effective. *Xuan Shen* (Radix Scrophulariae) nourishes yin and guides fire downward. *Bei Mu* (Bulbus Fritillariae) dissolves phlegm and reduces swelling. *Mu Li* (Concha Ostreae) softens hardness and disperses nodules. When combined together, these three herbs treat various hardness and nodules, from early to late stages.

MODIFICATIONS

- With excess phlegm and fire, increase the dose of *Bei Mu* (Bulbus Fritillariae), and add *Gua Lou* (Fructus Trichosanthis), *Qing Dai* (Indigo Naturalis), and *Ge Qiao* (Concha Meretricis seu Cyclinae).
- With anger, restlessness, and irritability, add *Zhi Zi* (Fructus Gardeniae), *Huang Lian* (Rhizoma Coptidis), and *Huang Qin* (Radix Scutellariae).
- With Liver qi stagnation, add *Chai Hu* (Radix Bupleuri), *Xiang Fu* (Rhizoma Cyperi), and *Qing Pi* (Pericarpium Citri Reticulatae Viride).
- With yin-deficient fire, add *Di Gu Pi* (Cortex Lycii), *Mu Dan Pi* (Cortex Moutan), and *Zhi Mu* (Rhizoma Anemarrhenae).
- For enlarged thyroid gland, add *Kun Bu* (Thallus Eckloniae), *Hai Zao* (Sargassum), and *Xia Ku Cao* (Spica Prunellae).
- For swellings that are large and hard, increase the dose of *Mu Li* (Concha Ostreae), and add *Kun Bu* (Thallus Eckloniae), *Hai Zao* (Sargassum,) and *Xia Ku Cao* (Spica Prunellae).

CAUTIONS / CONTRAINDICATIONS

Xiao Luo Wan should be used with caution in patients with Spleen deficiency and loose stools.

CLINICAL STUDIES AND RESEARCH

1. **Parotitis:** One study reported improvement in all 406 patients with acute infectious parotitis using oral and topical applications of herbs. *Xiao Luo Wan* was used orally, and *Qing Dai* (Indigo Naturalis) was applied topically to the affected area. Of 290 patients who had unilateral parotitis, the study reported complete recovery in 186 cases, significant recovery in 96 cases, and improvement in 8 cases. Of 116 patients with bilateral parotitis, the study reported complete recovery in 68 cases, significant recovery in 36 cases, and improvement in 12 cases.¹
2. **Hyperplasia of mammary glands:** One study reported 99.42% effectiveness using *Xiao Luo Wan* plus *Xiao Yao San* (Rambling Powder) to treat 118 patients with unilateral or bilateral hyperplasia of mammary glands. Of 118 patients, the study reported complete recovery in 78 cases, improvement in 34 cases, and no effect in 6 cases.²

AUTHORS' COMMENTS

Xiao Luo Wan is the representative formula for treating various types of hardness and nodules. Although this formula is literally called “Reduce Scrofula Pill,” it may be used for many other types of hardness and nodules. Clinical applications include scrofula, goiter, hyperthyroidism, thyroiditis, lymphadenitis, parotitis, and hyperplasia of mammary glands.

For the purpose of dissolving nodules, calcined *Mu Li* (Concha Ostreae) should be used instead of the unprocessed form.

<i>Huang Qin</i> (Radix Scutellariae), <i>chao</i> (dry-fried) with liquor	9g
<i>Huang Lian</i> (Rhizoma Coptidis)	9g
<i>Long Dan</i> (Radix et Rhizoma Gentianae)	9g
<i>Lian Qiao</i> (Fructus Forsythiae)	9g
<i>Zhi Mu</i> (Rhizoma Anemarrhenae), <i>jin</i> (soaked) in liquor	15g
<i>Huang Bo</i> (Cortex Phellodendri Chinensis), <i>chao</i> (dry-fried) with liquor	15g
<i>Tian Hua Fen</i> (Radix Trichosanthis)	15g
<i>Chai Hu</i> (Radix Bupleuri)	1.5g
<i>Sheng Ma</i> (Rhizoma Cimicifugae)	1.5g
<i>Ge Gen</i> (Radix Puerariae Lobatae)	9g
<i>Zhi Gan Cao</i> (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle)	15g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to first soak all of the ingredients in water for half a day, then cook until the liquid is reduced by 50%. Take the strained decoction while warm.

CHINESE THERAPEUTIC ACTIONS

1. Disperses stagnation and softens hardness
2. Reduces swelling and drains pus

CLINICAL MANIFESTATIONS

Suppurative sores, ulcerations, and swellings that remain hard after discharge of pus and abscess.

CLINICAL APPLICATIONS

Lymphadenitis, hyperthyroidism, goiter, carbuncles, and furuncles.

EXPLANATION

San Zhong Kui Jian Tang (Disperse the Swelling and Break the Hardness Decoction) treats nodules, swelling, and hardness on various parts of the body, especially below the ears, under the cheeks, around the shoulders, and

beneath the armpits. It contains many herbs that drain swelling and pus, and disperse hardness and stagnation.

Hai Zao (Sargassum), *Kun Bu* (Thallus Eckloniae) and *Jie Geng* (Radix Platycodonis) eliminate phlegm to soften hardness and disperse nodules. *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae) move the blood and eliminate blood stasis to break the hardness. Because these two herbs are rather potent, *Bai Shao* (Radix Paeoniae Alba) and *Dang Gui Wei* (Extremities Radix Angelicae Sinensis) are added to nourish blood and moderate their effect. *Huang Qin* (Radix Scutellariae), *Huang Lian* (Rhizoma Coptidis), and *Long Dan* (Radix et Rhizoma Gentianae) clear damp-heat from the upper, middle and lower *jiao*. *Lian Qiao* (Fructus Forsythiae) clears heat and eliminates toxins. Since these bitter and cold herbs are drying in nature, *Zhi Mu* (Rhizoma Anemarrhenae), *Huang Bo* (Cortex Phellodendri Chinensis) and *Tian Hua Fen* (Radix Trichosanthis) are used to clear deficiency heat and protect yin and fluids. *Chai Hu* (Radix Bupleuri), *Sheng Ma* (Rhizoma Cimicifugae) and *Ge Gen* (Radix Puerariae Lobatae) activate qi circulation, and

<i>Sheng Ma</i> (Rhizoma Cimicifugae)	1.8g

This formula clears heat, eliminates toxins, softens hardness, and disperses stagnations. It treats nodules, swellings and hardness along the hand *shaoyang* or foot *yangming* channels, such as regions below the ears, around the shoulders, and beneath the armpits.

These two formulas have identical names, and very similar compositions and functions.

- *San Zhong Kui Jian Tang* (Disperse the Swelling and Break the Hardness Decoction) from *Wan Bing Hui Chun* (Restoration of Health from the Myriad Diseases) uses *Hai Zao* (Sargassum) and *Kun Bu* (Thallus Eckloniae) as chief herbs, and therefore, has stronger effect to soften hardness and disperse nodules.
- *San Zhong Kui Jian Tang* (Disperse the Swelling and Break the Hardness Decoction) from *Lan Shi Mi Cang* (Secrets from the Orchid Chamber) contains larger doses of *Huang Qin* (Radix Scutellariae) and *Long Dan* (Radix et Rhizoma Gentianae), and thus, has better function to clear heat and eliminate toxins.

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grate equal proportions of all of the ingredients and prepare as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi and blood
2. Activates qi and blood circulation
3. Disperses stagnation and drains pus

CLINICAL MANIFESTATIONS

Nodules and hardness due to qi, blood, and phlegm stagnation: nodules and hardness in various parts of the body, such as the neck, breast, and abdominal region.

CLINICAL APPLICATIONS

Breast cancer, fibrocystic disease, goiter, and inflammation of the lymph glands.

EXPLANATION

Shi Liu Wei Liu Qi Yin (Sixteen-Ingredient Decoction to Flow Qi) is one of the best formulas for dispersing nodules and softening hardness. These nodules and lumps may be caused by inflammation of the lymph glands, goiter, tumor, sores, or abscess of unknown origin.

This formula focuses on treating both the underlying deficiencies (qi and blood) and the stagnations (qi, blood, and phlegm). *Ren Shen* (Radix et Rhizoma Ginseng), *Huang*

AUTHORS' COMMENTS

According to Dr. Chang Wei-Yen, prostate enlargement can be treated by combining *Shi Liu Wei Liu Qi Yin* with *Zhen Ren Huo Ming Yin* (True Man's Decoction to Revitalize Life) and *San Zhong Kui Jian Tang* (Disperse the Swelling and Break the Hardness Decoction).

Tòu Nóng Sǎn (Discharge Pus Powder)

透膿散

透脓散

Pinyin Name: *Tou Nong San*

Literal Name: Discharge Pus Powder

Original Source: *Wai Ke Zheng Zong* (True Lineage of External Medicine) by Chen Shi-Gong in 1617

COMPOSITION

<i>Huang Qi</i> (Radix Astragali)	12g
<i>Dang Gui</i> (Radix Angelicae Sinensis)	6g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	9g
<i>Chuan Shan Jia</i> (Squama Manis), <i>chao</i> (dry-fried)	3g
<i>Zao Jiao Ci</i> (Spina Gleditsiae)	4.5g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 2 large bowls of water until the liquid is reduced by 50%. Take the decoction with a cup of grain-based liquor.

CHINESE THERAPEUTIC ACTIONS

1. Drains toxins
2. Breaks and dispels pus

CLINICAL MANIFESTATIONS

Abscesses and sores accompanied by swelling and pain with underlying qi deficiency: diffused presentation of abscesses and sores with swelling, burning sensations, pain, and formation of pus without ulceration.

CLINICAL APPLICATIONS

Abscesses, sores, carbuncles, and boils.

EXPLANATION

Tou Nong San (Discharge Pus Powder) treats abscesses and sores accompanied by swelling and pain with underlying qi deficiency. In this condition, pus has already formed inside, and has begun to cause swelling, inflammation, and pain. However, because of qi deficiency, the body is unable to dispel the toxins or drain the pus. The abscesses and sores stay diffused and stagnant inside the tissues.

This formula contains *Huang Qi* (Radix Astragali) to tonify qi and drain toxins. *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong) nourish the blood, activate blood circulation and relieve pain. *Chuan Shan Jia* (Squama Manis) and *Zao Jiao Ci* (Spina Gleditsiae) soften hardness and drain pus and abscesses. A small amount of grain-based liquor activates the blood and enhances the overall effect of the formula.

The source text states to cook the ingredients with 3 large bowls of water until the liquid is reduced to 1 bowl. If the disease is in the upper part of the body, take 1 bowl of hot grain-based liquor before the decoction. If the disease is in the lower part of the body, take the decoction first, followed by 1 bowl of hot, grain-based liquor. If the disease is in the middle part of the body, take the decoction with half a bowl of hot, grain-based liquor.

Tuo Li Tou Nong Tang (Drain the Interior and Discharge Pus Decoction) supports the righteous qi, dispels pathogenic factors, drains the interior, and discharges pus. Clinically, it is used to treat all kinds of abscesses with qi and blood deficiencies, in which the lesions and ulcerations do not heal, and continue to expand in size and depth.

Tou Nong San and *Tuo Li Tou Nong Tang* (Drain the Interior and Discharge Pus Decoction) both treat abscesses and sores in individuals with underlying deficiency.

- Tou Nong San* focuses primarily on draining toxins, dispelling pus, and eliminating abscesses, and secondarily on benefiting qi and nourishing the blood.
- Tuo Li Tou Nong Tang* emphasizes tonifying and supporting righteous qi, with a secondary focus on draining the interior and discharging pus.

Pái Nóng Sǎn (Drain the Pus Powder)

排膿散
排脓散

Pinyin Name: *Pai Nong San*

Literal Name: Drain the Pus Powder

Alternate Names: *Pai Nung San*, Pus-Expelling Powder, Platycodon and Chih-shih Formula

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-jing in the Eastern Han Dynasty

COMPOSITION

<i>Zhi Shi</i> (Fructus Aurantii Immaturus)	16 pieces
<i>Jie Geng</i> (Radix Platycodonis)	1.5g
<i>Bai Shao</i> (Radix Paeoniae Alba)	4.5g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind all of the ingredients into a fine powder. Mix one egg yolk with an equal portion of the herb powder, and take this mixture one time daily with warm water.

CHINESE THERAPEUTIC ACTIONS

- 1. Dispels pus and eliminates toxins
- 2. Reduces nodules and disperses stagnation

CLINICAL MANIFESTATIONS

Abscesses and sores: carbuncles, furuncles, cellulitis, boils, and other conditions characterized by formation of pus, abscess, and discharge.

CLINICAL APPLICATIONS

Carbuncles, furuncles, boils, sores, lymphadenitis, tonsillitis, otitis media, and mastitis.

EXPLANATION

Pai Nong San (Drain the Pus Powder) is designed to treat heat and toxins attacking various parts of the body. While the early stage of heat and toxins is in the form of nodules

and hardness, the mid- to late-stages are often characterized by the formation of abscess and discharge of pus.

This formula contains herbs that dispel pus, eliminate toxins, reduce nodules, and disperse stagnation. *Zhi Shi* (Fructus Aurantii Immaturus), one of the strongest herbs for breaking up stagnant qi and activating qi circulation, reduces the size of the nodules. *Jie Geng* (Radix Platycodonis) is an excellent herb for draining and dispelling pus. Because heat and toxins may consume the blood, *Bai Shao* (Radix Paeoniae Alba) and egg yolk are added to nourish the body.

MODIFICATIONS

- For nodules without ulceration, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Lian Qiao* (Fructus Forsythiae).
- For nodules with ulceration, add *Huang Qi* (Radix Astragali) and *Dang Gui* (Radix Angelicae Sinensis).
- With redness, warmth, swelling, and pain, add *Huang Lian* (Rhizoma Coptidis) and *Zhi Zi* (Fructus Gardeniae).
- For carbuncles and furuncles, add *Zhen Ren Huo Ming Yin* (True Man's Decoction to Revitalize Life).
- For sores and cellulitis, add *Tuo Li Xiao Du Yin* (Drain the Interior and Detoxify Decoction).

COMPOSITION

<i>Ren Shen</i> (Radix et Rhizoma Ginseng)	6g
<i>Huang Qi</i> (Radix Astragali), <i>mi zhi</i> (fried with honey)	6g
<i>Dang Gui</i> (Radix Angelicae Sinensis), <i>xi</i> (washed) with liquor	6g
<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	3g
<i>Bai Zhi</i> (Radix Angelicae Dahuricae)	3g
<i>Rou Gui</i> (Cortex Cinnamomi)	3g
<i>Fang Feng</i> (Radix Saposhnikoviae)	3g
<i>Jie Geng</i> (Radix Platycodonis)	3g
<i>Bo He</i> (Herba Menthae)	3g
<i>Hou Po</i> (Cortex Magnoliae Officinalis), <i>chao</i> (dry-fried) with ginger juice	3g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	3g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind all of the ingredients into powder, and take 6g of the powder with grain-based liquor or a decoction made from *Mu Xiang* (Radix Aucklandiae). This formula may also be prepared as a decoction by cooking the herbs with water or grain-based liquor.

CHINESE THERAPEUTIC ACTIONS

1. Activates qi and blood circulation
2. Harmonizes the Stomach and tonifies qi and blood
3. Clears heat and eliminates toxins

CLINICAL MANIFESTATIONS

Suppurative diseases with heat and toxins and underlying deficiencies: hardness and nodules with pus and discharge.

CLINICAL APPLICATIONS

Carbuncles, furuncles, sores, boils, hemorrhoids, suppurative mastitis, suppurative otitis media, and lymphadenitis.

EXPLANATION

Qian Jin Nei Tuo San (Drain the Interior Powder Worthy of a Thousand Gold) contains herbs that clear heat and eliminate toxins while tonifying the underlying qi and blood deficiencies. While early-stage heat-toxin accumulation is characterized by nodules and hardness, mid- to late-stage is characterized by the presence of pus and discharge. In the early stage, herbs that disperse the nodule and soften the hardness are used. In mid- to late-stage,

herbs that expedite the drainage of pus and facilitate the healing process are helpful.

Ren Shen (Radix et Rhizoma Ginseng) and *Huang Qi* (Radix Astragali) tonify qi and facilitate the generation of new tissues. *Dang Gui* (Radix Angelicae Sinensis) and *Chuan Xiong* (Rhizoma Chuanxiong) tonify and activate the blood. *Bai Zhi* (Radix Angelicae Dahuricae) and *Rou Gui* (Cortex Cinnamomi) have a dispersing property to promote pus drainage. *Fang Feng* (Radix Saposhnikoviae) disperses toxins, while *Jie Geng* (Radix Platycodonis) dispels phlegm. *Bo He* (Herba Menthae) clears heat and eliminates toxins. *Hou Po* (Cortex Magnoliae Officinalis) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) harmonize the middle *jiao* and minimize injury to the Stomach.

MODIFICATIONS

- With inability to eat due to swelling and pain, add *Sha Ren* (Fructus Amomi) and *Xiang Fu* (Rhizoma Cyperi).
- With severe pain, add *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- With constipation, add *Da Huang* (Radix et Rhizoma Rhei) and *Zhi Qiao* (Fructus Aurantii).
- With dysuria, add *Mai Dong* (Radix Ophiopogonis), *Che Qian Zi* (Semen Plantaginis), *Mu Tong* (Caulis Akebiae), and *Deng Xin Cao* (Medulla Junci).
- With cough, add *Ban Xia* (Rhizoma Pinelliae), *Chen Pi* (Pericarpium Citri Reticulatae), and *Ku Xing Ren* (Semen Armeniacae Amarum).

CAUTIONS / CONTRAINDICATIONS

- Avoid the consumption of alcohol while taking this formula.

AUTHORS’ COMMENTS

According to the source text, this formula is “worthy of a thousand gold.” It reduces abscesses and sores in their early stage, drains pus in their middle stage, and helps to resolve the necrosed tissues in their late stage.

<i>Jie Geng</i> (Radix Platycodonis)	1.5g
<i>Bai Zhi</i> (Radix Angelicae Dahuricae)	1.5g
<i>Zao Jiao Ci</i> (Spina Gleditsiae)	1.5g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients in 2 cups of water until the liquid is reduced to 80%. Take the warm, strained decoction after meals.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi and blood
2. Reduces swelling, drains pus, and promotes generation of new tissues

CLINICAL MANIFESTATIONS

Suppurative disorders in individuals with qi and blood deficiencies: nodules and hardness with or without discharge of pus and abscess, generalized deficiency, and weakness.

CLINICAL APPLICATIONS

Carbuncles, bed sores, pus, abscesses, lymphadenitis, otitis media, chronic osteomyelitis, and conjunctivitis.

EXPLANATION

Tuo Li Xiao Du Yin (Drain the Interior and Detoxify Decoction) treats various types of suppurative disorders with underlying qi and blood deficiencies. It contains herbs to reduce swelling and drain pus to treat abscesses and sores. It also contains herbs to tonify qi, nourish blood and promote generation of new tissues.

Ren Shen (Radix et Rhizoma Ginseng), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Fu Ling* (Poria), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) tonify qi, following the concept of *Si Jun Zi Tang* (Four-Gentlemen Decoction). *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), and *Chuan Xiong* (Rhizoma Chuanxiong) tonify the blood, following the original concept of *Si Wu Tang* (Four-Substance Decoction). *Huang Qi* (Radix Astragali), in addition to tonifying qi, can promote generation of new tissues, thereby facilitating recovery. *Jin Yin Hua* (Flos Lonicerae Japonicae) clears heat, eliminates toxins, and treats all types of suppurative disorders. *Jie Geng* (Radix Platycodonis), *Bai Zhi* (Radix Angelicae Dahuricae), and *Zao Jiao Ci* (Spina Gleditsiae) drain pus and eliminate toxins.

MODIFICATIONS

- For ulcerations with constant discharge of pus, add *Ge Gen* (Radix Puerariae Lobatae) and *Huang Lian* (Rhizoma Coptidis).
- With swelling and pain accompanied by fever, add *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity).
- With severe pain, add *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- For cellulitis with swelling and pain, add *Pai Nong San* (Drain the Pus Powder).
- For itching, add *Chan Tui* (Periostracum Cicadae) and *Wu Shao She* (Zaocys).

<i>Zao Jiao Ci</i> (Fructus Gleditsiae)	3g
<i>Jin Yin Hua</i> (Flos Lonicerae Japonicae)	9g
<i>Chen Pi</i> (Pericarpium Citri Reticulatae)	9g

The source text states to cook the ingredients with equal portions of water and grain-based liquor until the liquid is reduced to 70%. Take the warm, strained decoction after meals if the affected area is located on the upper parts of the body, and on an empty stomach before meals if the affected area is located on the lower parts of the body. After the first two decoctions, the remaining decoctions utilize water only to cook the herbs.

This formula tonifies qi and blood, reduces swelling and pus, and promotes generation of new tissues. Clinically, it treats various abscesses and sores that do not heal after 6-7 days.

The principal and related formulas have the same names but are derived from different sources. They have similar functions to treat suppurative disorders in individuals with qi and blood deficiencies.

- *Tuo Li Xiao Du Yin* from *Yi Fang Ji Jie* (Analytical Collection of Medical Formulas) by Wang Ang in 1682 has a stronger effect to tonify qi and blood, and thus can better address the underlying deficiencies.
- *Tuo Li Xiao Du Yin* from *Wan Bing Hui Chun* (Restoration of Health from the Myriad Diseases) by Gong Ting-Xian in 1587 has a better function to regulate qi circulation and resolve nodules and hardness.

<i>Chuan Xiong</i> (Rhizoma Chuanxiong)	1.5g [5g]
<i>Huang Qi</i> (Radix Astragali), <i>chao</i> (dry-fried) with salted water	3g [10g]
<i>Rou Gui</i> (Cortex Cinnamomi)	1.5g [5g]
<i>Mai Dong</i> (Radix Ophiopogonis)	3g [10g]
<i>Yuan Zhi</i> (Radix Polygalae), <i>chao</i> (dry-fried)	1.5g [5g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients with 3 slices of *Sheng Jiang* (Rhizoma Zingiberis Recens) and 1 piece of *Da Zao* (Fructus Jujubae) in 2 large bowls of water until the liquid is reduced to 80%. Take the decoction between meals. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Tonifies qi and blood
2. Nourishes yin
3. Promotes generation of flesh

CLINICAL MANIFESTATIONS

Late-stage abscesses and sores with qi and blood deficiencies: localized pain at the affected area, lethargy, lack of desire to speak, disturbed sleep, spontaneous perspiration, intermittent or persistent fever, dry mouth, pale tongue with a thin coating, and a fine, weak pulse.

CLINICAL APPLICATIONS

Chronic abscesses and sores.

EXPLANATION

Nei Bu Huang Qi Tang (Tonify the Interior Decoction with Astragalus) is designed to treat late-stage abscesses and sores that have perforated and ulcerated, but do not heal because of underlying qi and blood deficiencies. Abscesses and sores are accompanied by localized pain.

Spontaneous perspiration indicates qi deficiency, disturbed sleep suggests blood deficiency, and lethargy and lack of desire to speak reflect Spleen and Stomach deficiencies. Furthermore, intermittent or persistent fever and dry mouth indicate deficiency-heat rising with yin damage.

Ren Shen (Radix et Rhizoma Ginseng), *Fu Ling* (Poria), and *Zhi Gan Cao* (Radix et Rhizoma Glycyrrhizae Praeparata cum Melle) tonify qi. *Dang Gui* (Radix Angelicae Sinensis), *Bai Shao* (Radix Paeoniae Alba), *Shu Di Huang* (Radix Rehmanniae Praeparata), and *Chuan Xiong* (Rhizoma Chuanxiong) tonify the blood. *Huang Qi* (Radix Astragali) and *Rou Gui* (Cortex Cinnamomi) tonify qi, warm yang, and promote regeneration of flesh. *Mai Dong* (Radix Ophiopogonis) nourishes yin and body fluids. *Yuan Zhi* (Radix Polygalae) stabilizes the *shen* (spirit).

MODIFICATIONS

- For abscesses and sores with severe pain, add *Yan Hu Suo* (Rhizoma Corydalis), *Ru Xiang* (Gummi Olibanum), and *Mo Yao* (Myrrha).
- For hardened abscesses and sores, add *Chuan Shan Jia* (Squama Manis) and *Zao Jiao Ci* (Spina Gleditsiae).

CAUTIONS / CONTRAINDICATIONS

Nei Bu Huang Qi Tang treats late-stage abscesses and sores with qi and blood deficiencies. It is contraindicated for early-stage abscesses and sores characterized by heat toxins.

Yáng Hé Tāng (Yang-Heartening Decoction)

陽和湯

阳和汤

Pinyin Name: Yang He Tang
Literal Name: Yang-Heartening Decoction
Original Source: *Wai Ke Zheng Zhi Quan Sheng Ji* (Complete Collection of Patterns and Treatments in External Medicine) by Wang Wei-De in 1740

COMPOSITION

<i>Shu Di Huang</i> (Radix Rehmanniae Praeparata)	30g
<i>Lu Jiao Jiao</i> (Colla Cornus Cervi)	9g
<i>Pao Jiang</i> (Rhizoma Zingiberis Praeparatum), <i>tan</i> (charred to ash)	1.5g
<i>Rou Gui</i> (Cortex Cinnamomi), <i>yan</i> (ground) into powder	3g
<i>Ma Huang</i> (Herba Ephedrae)	1.5g
<i>Bai Jie Zi</i> (Semen Sinapis)	6g
<i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae)	3g

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to prepare the ingredients as a decoction.

CHINESE THERAPEUTIC ACTIONS

1. Warms yang and tonifies the blood
2. Disperses cold and eliminates stagnation

CLINICAL MANIFESTATIONS

Yin-type (deep-rooted) sores due to yang deficiency and interior cold stagnation: general swelling, soreness, and pain without local heat sensation on the body and extremities, no change of skin color, no thirst, pale white tongue coating, and a deep, fine pulse. This formula may be applied for cellulitis, gangrene of the fingers and toes, multiple abscesses, subcutaneous nodules, and arthroncus of the knee.

Yáng Hé Tāng (Yang-Heartening Decoction)

CLINICAL APPLICATIONS

Cellulitis, gangrene, frostbite, multiple abscesses, mastitis, cystic hyperplasia of the breast, endometriosis, oophoritic cyst, Raynaud's disease, peripheral neuritis, thromboangiitis obliterans, tuberculosis of the lung and bone, chronic bronchitis, osteomyelitis, inflammation and pain, prolapse of lumbar intervertebral disk, sciatica, and rheumatoid arthritis.

EXPLANATION

Yang He Tang (Yang-Heartening Decoction) treats *yin*-type (deep-rooted) sores due to yang deficiency and interior cold stagnation. Deficiency of yang may lead to formation of interior cold, which binds to the bones, muscles, tendons, vessels, or joints. Because of yang deficiency and cold excess, there is an absence of warm or heat sensations. Since the abscesses and sores are deeper in the tissues, there is no change of skin color. Lastly, *yin*-type (deep-rooted) sores are usually harder to treat since they are anchored deep into the tissues.

This formula contains *Shu Di Huang* (Radix Rehmanniae Praeparata) to warm and nourish the blood. *Lu Jiao Jiao* (Colla Cornus Cervi) tonifies *jing* (essence) and strengthens bones and tendons. *Pao Jiang* (Rhizoma Zingiberis Praeparatum) and *Rou Gui* (Cortex Cinnamomi) warm the body, tonify the yang, and disperse cold accumulation. A small amount of *Ma Huang* (Herba Ephedrae) opens the skin pores to help disperse the interior cold through the superficial level. *Bai Jie Zi* (Semen Sinapis) warms the interior and disperses phlegm and cold. It also prevents the warm tonic herbs from creating stagnation in the body. *Gan Cao* (Radix et Rhizoma Glycyrrhizae) eliminates toxins and harmonizes all of the herbs in the formula.

Indeed, this formula both tonifies the body and disperses the cold stagnation.

MODIFICATIONS

- With more cold, add *Fu Zi* (Radix Aconiti Lateralis Praeparata).
- With more qi deficiency, add *Dang Shen* (Radix Codonopsis) and *Huang Qi* (Radix Astragali).
- With damp and cold accumulation, add *Xi Xin* (Radix et Rhizoma Asari).

CAUTIONS / CONTRAINDICATIONS

- *Yang He Tang* is contraindicated in the following cases: *yang*-type sores that affect only the superficial parts of the body, and are characterized by redness, swelling, burning sensations, and pain; *yin*-type (deep-rooted) sores that have already perforated and ulcerated; and chronic ulceration with heat.
- Once the sores are perforated and ulcerated, *Ma Huang* (Herba Ephedrae) should be removed from this formula to prevent damage to qi and blood.

CLINICAL STUDIES AND RESEARCH

1. **Frostbite:** One study reported good results using modified *Yang He Tang* to treat 30 patients with frostbite. In addition to the base formula, modifications were made by adding *Ban Zhi Lian* (Herba Scutellariae Barbatae) for open wounds with discharge, and *Huang Qi* (Radix Astragali) for chronic illness. Most patients recovered within 3-6 packs of herbs, with some needing up to 15 packs.¹
2. **Thromboangiitis obliterans:** Use of modified *Yang He Tang* in decoction daily was associated with complete

Yang He Tang (Yang-Heartening Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Yin-type (deep-rooted) sores	<ul style="list-style-type: none"> • Sores with swelling, soreness, and pain without local heat sensation on the body and extremities, and no change in skin color: stagnation of cold and phlegm with underlying yang and blood deficiencies • Pale, white tongue coating and a deep, fine pulse: presence of deficiency and excess conditions 	<ul style="list-style-type: none"> • Warms the yang and tonifies blood • Disperses cold and eliminates stagnation 	<ul style="list-style-type: none"> • <i>Shu Di Huang</i> (Radix Rehmanniae Praeparata) warms and nourishes the blood. • <i>Lu Jiao Jiao</i> (Colla Cornus Cervi) tonifies <i>jing</i> (essence) and strengthens bones and tendons. • <i>Pao Jiang</i> (Rhizoma Zingiberis Praeparatum) and <i>Rou Gui</i> (Cortex Cinnamomi) warm the body, tonify yang, and disperse cold accumulation. • <i>Ma Huang</i> (Herba Ephedrae) opens the skin pores to help disperse the interior cold. • <i>Bai Jie Zi</i> (Semen Sinapis) warms the interior and disperses phlegm and cold. • <i>Gan Cao</i> (Radix et Rhizoma Glycyrrhizae) eliminates toxins and harmonizes all of the herbs in the formula.

Yáng Hé Tāng (Yang-Heartening Decoction)

recovery in 12 cases and improvement in 8 cases of thromboangiitis obliterans. The herbal treatment contained *Yang He Tang* plus *Dang Gui* (Radix Angelicae Sinensis) and *Dan Shen* (Radix et Rhizoma Salviae Miltiorrhizae). *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Xuan Shen* (Radix Scrophulariae) were added for heat; *Dang Shen* (Radix Codonopsis), *Huang Qi* (Radix Astragali), *Ba Ji Tian* (Radix Morindae Officinalis), and *Yin Yang Huo* (Herba Epimedii) were added for chronic cases.²

3. **Raynaud's disease:** One study reported good results for treating Raynaud's disease using *Yang He Tang* and *Si Ni San* (Frigid Extremities Powder). Additional modifications were made as necessary. Of 30 patients (28 female and 2 male), the study reported complete recovery in 21 cases, significant improvement in 8 cases, and no effect in 1 case.³
4. **Peripheral neuritis:** One study reported 90.4% effectiveness using modified *Yang He Tang* to treat 63 patients with peripheral neuritis. The herbal treatment contained *Yang He Tang* plus *Dang Gui* (Radix Angelicae Sinensis) and *Huang Qi* (Radix Astragali) as the base formula. Additional modifications included *Cang Zhu* (Rhizoma Atractylodis) for damp; *Ji Xue Teng* (Caulis Spatholobi) for blood stagnation; *Quan Xie* (Scorpio) and *Wu Gong* (Scolopendra) for wind and phlegm obstructing the channels and collaterals. Of 63 patients, the study reported complete recovery in 43 cases, improvement in 14 cases, and no effect in 6 cases.⁴
5. **Sciatica:** One hundred and sixty-eight patients with sciatica were treated with complete recovery in 130 cases, improvement in 28 cases, and no effect in 10 cases. The herbal treatment contained *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Shu Di Huang* (Radix Rehmanniae Praeparata), *Lu Jiao Jiao* (Colla Cornus Cervi), *Fang Ji* (Radix Stephaniae Tetrandrae), *Xi Xin* (Radix et Rhizoma Asari), *Hong Hua* (Flos Carthami), *Wu Shao She* (Zaocys), and others. The treatment protocol was to cook the herbs in water, and drink the decoction in two equally-divided doses. In addition, the herb residue was placed inside a cloth bag and applied topically to the affected area at bedtime. The duration was 10 days per course of treatment.⁵
6. **Mastitis:** One study reported effective treatment for all 21 patients with yin-type mastitis using modified *Yang He Tang*. The base herbal formula contained *Yang He Tang* plus *Zao Jiao Ci* (Spina Gleditsiae), *Huang Qi* (Radix Astragali) and processed *Chuan Shan Jia* (Squama Manis). Modifications included the addition of *Fu Zi* (Radix Aconiti Lateralis Praeparata) for yang qi deficiency; *Gou Qi Zi* (Fructus Lycii) and *Dang Gui* (Radix Angelicae Sinensis) for Liver and Kidney deficiencies; and *Quan Xie* (Scorpio) and *Wu Gong* (Scolopendra)

for prolonged swelling and hardness without resolution. Of 21 patients, the study reported complete recovery in 15 cases and improvement in 6 cases. The duration of treatment ranged from 12-60 days, with an average of 32 days.⁶

7. **Cystic hyperplasia of the breast:** One study reported 88.7% effectiveness using modified *Yang He Tang* to treat cystic hyperplasia of the breast. Of 62 cases, 38 had complete recovery, 17 had significant improvement, and 7 had no effect. The herbal treatment contained *Yang He Tang* as the base formula, with the addition of *Chai Hu* (Radix Bupleuri) and *Qing Pi* (Pericarpium Citri Reticulatae Viride) for qi stagnation; *Mu Li* (Concha Ostreae) and *Zhe Bei Mu* (Bulbus Fritillariae Thunbergii) for phlegm stagnation; *San Leng* (Rhizoma Sparganii) and *E Zhu* (Rhizoma Curcumae) for blood stagnation; *Wang Bu Liu Xing* (Semen Vaccariae) and *Chuan Shan Jia* (Squama Manis) for obstructed flow of breast milk; *Dang Gui* (Radix Angelicae Sinensis) and *Tao Ren* (Semen Persicae) for infertility; and other herbs as necessary. For women who have cystic hyperplasia of the breast within one month after labor, *Yang He Tang* was modified by removing *Shu Di Huang* (Radix Rehmanniae Praeparata) and *Ma Huang* (Herba Ephedrae), doubling the dose of *Rou Gui* (Cortex Cinnamomi), and adding *Chuan Xiong* (Rhizoma Chuanxiong), *Xiang Fu* (Rhizoma Cyperi) and *Ze Lan* (Herba Lycopi).⁷
8. **Endometriosis:** Modified *Yang He Tang* was used to treat 27 patients with endometriosis characterized by blood stagnation, cold obstruction in the Liver channel, and deficiencies of Kidney yang, *jing* (essence), and blood. The herbal treatment contained *Yang He Tang* plus *Fu Zi* (Radix Aconiti Lateralis Praeparata), *Chuan Shan Jia* (Squama Manis), *Bai Zhu* (Rhizoma Atractylodis Macrocephalae), *Dang Gui* (Radix Angelicae Sinensis), *Wu Ling Zhi* (Faeces Troglodyteri), *Xi Xin* (Radix et Rhizoma Asari), and *Wu Zhu Yu* (Fructus Evodiae). Of 27 patients, the study reported complete recovery in 19 cases, significant improvement in 4 cases, moderate improvement in 3 cases, and no response in 1 case.⁸
9. **Oophoritic cyst:** One study reported good results using modified *Yang He Tang* to treat 26 patients with unilateral oophoritic cyst up to 10 cm in diameter in size. The herbal formula used *Yang He Tang* as the base formula, with the elimination of *Gan Jiang* (Rhizoma Zingiberis) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and the addition of *Tao Ren* (Semen Persicae), *Hai Zao* (Sargassum), and *E Zhu* (Rhizoma Curcumae). Other herbs were added as necessary. Of 26 patients, the study reported complete recovery in 23 cases, improvement in 2 cases, and no effect in 1 case. The duration of treatment ranged from 5-36 packs of herbs.⁹

Yáng Hé Tāng (Yang-Heartening Decoction)

10. Inflammation and pain: *Yang He Tang* has been shown in many studies to effectively treat inflammation and pain affecting many parts of the body. According to one study, neck pain in 64 patients was treated with 92.2% effectiveness using *Yang He Tang* plus *Gui Zhi* (Ramulus Cinnamomi), *Ge Gen* (Radix Puerariae Lobatae), *Sang Zhi* (Ramulus Mori) and others as needed.¹⁰ According to another study, shoulder pain in 220 patients was treated at 95% effectiveness using *Yang He Tang* plus *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), *Bai Shao* (Radix Paeoniae Alba), *Jin Qian Bai Hua She* (Bungarus Parvus), and others.¹¹ Lastly, 60 patients with chronic lower back pain were treated with good results using modified *Yang He Tang*.¹²

11. Prolapse of lumbar intervertebral disk: Use of modified *Yang He Tang* was associated with marked success in treating prolapse of a lumbar intervertebral disk. Of 210 patients, the study reported complete recovery in 148 cases, significant improvement in 28 cases, moderate improvement in 16 cases, and no effect in 18 cases. The overall effectiveness was 91.4%. Most patients responded within 1 month. The herbal formula contained *Yang He Tang* plus *Tu Bie Chong* (Eupolyphaga seu Steleophaga), *Huang Lian* (Rhizoma Coptidis) and *Wu Gong* (Scolopendra) as the base formula. Furthermore, modifications were made by adding processed *Ru Xiang* (Gummi Olibanum), processed *Mo Yao* (Myrrha) and *Di Long* (Pheretima) for severe pain; *Wei Ling Xian* (Radix et Rhizoma Clematidis), *Niu Xi* (Radix Achyranthis Bidentatae), and *Xu Duan* (Radix Dipsaci) for severe lower back pain; *Mu Gua* (Fructus Chaenomelis) and *Du Huo* (Radix Angelicae Pubescentis) for severe leg pain; *Fu Zi* (Radix Aconiti Lateralis Praeparata) for cold; *Cang Zhu* (Rhizoma Atractylodis) and *Fu Ling* (Poria) for dampness; and *Du Zhong* (Cortex Eucommiae) and *Sang Ji Sheng* (Herba Taxilli) for Kidney deficiency.¹³

12. Osteomyelitis: Use of *Yang He Tang* has been shown in several studies to effectively treat osteomyelitis. According to one study, use of modified *Yang He Tang* was associated with 95% effectiveness in treating 560 patients with osteomyelitis characterized by yin deficiency and blood stagnation.¹⁴ Another study reported 100% effectiveness using modified *Yang He Tang* to treat osteomyelitis characterized by yang deficiency with cold accumulation.¹⁵ Lastly, suppurative and chronic osteomyelitis have also been treated with good results using this formula.^{16,17}

13. Pain from metastatic carcinoma of bone: Use of modified *Yang He Tang* was effective in relieving pain associated with metastatic carcinoma of bone. The herbal formula contained *Shu Di Huang* (Radix Rehmanniae Praeparata) 30g, *Rou Gui* (Cortex Cinnamomi) 3g, *Pao Huang* (Rhizoma Zingiberis Praeparatum) 3g, *Ma Huang*

(Herba Ephedrae) 3g, *Lu Jiao Shuang* (Cornu Cervi Degelatinatum) 10g, *Bai Jie Zi* (Semen Sinapis) 6g, *Fu Zi* (Radix Aconiti Lateralis Praeparata) 6g, and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) 5g. The herbs were given in decoction daily, for 1 week per course of treatment.¹⁸

The source text states to cook the herbs in a solution comprised of equal portions of water and grain-based liquor.

This formula tonifies qi, drains the interior, harmonizes the blood, and reduces abscesses and sores. It treats half-yin and half-yang type of abscesses and sores, that seem to perforate but actually do not. The affected area has diffused swelling with a pale red color, mild pain, absence of warmth at the affected area, and qi deficiency signs.

Yang He Tang and *Zhong He Tang* (Middle-Heartening Decoction) both tonify qi and blood to treat abscesses and sores.

- *Yang He Tang* warms yang, tonifies the blood, dissolves phlegm, and dispels cold. It is used to treat yin-type (deep-rooted) sores caused by yang deficiency and interior cold stagnation.
- *Zhong He Tang* tonifies qi, drains the interior, and reduces abscesses and sores. It is used to treat half-yin and half-yang abscesses and sores with underlying qi deficiency.

Yáng Hé Tāng (Yang-Heartening Decoction)

AUTHORS' COMMENTS

Yang He Tang treats *yin*-type (deep-rooted) sores due to yang deficiency and interior cold stagnation. This formula has a large dose of *Shu Di Huang* (Radix Rehmanniae Praeparata) to tonify yin and nourish the blood. *Ma Huang* (Herba Ephedrae), however, must be used in a small dose (as specified in this formula) to facilitate the ulceration of *yin*-type (deep-rooted) sores. The combination of these two herbs also provides mutual checks and balances. The dispersing nature of *Ma Huang* (Herba Ephedrae) prevents the heavy nature of *Shu Di Huang* (Radix Rehmanniae Praeparata) from creating stagnation; and the heavy nature of *Shu Di Huang* (Radix Rehmanniae Praeparata) prevents the dispersing nature of *Ma Huang* (Herba Ephedrae) from damaging yin and body fluids.

Xiǎo Jīn Dān (Minor Gold Special Pill)

小金丹

Pinyin Name: *Xiao Jin Dan*

Literal Name: Minor Gold Special Pill

Original Source: *Wai Ke Zheng Zhi Quan Sheng Ji* (Complete Collection of Patterns and Treatments in External Medicine) by Wang Wei-De in 1740

COMPOSITION

<i>Zhi Cao Wu</i> (Radix Aconiti Kusnezoffii Praeparata)	[150g]
<i>Wu Ling Zhi</i> (Faeces Troglodyteri)	[150g]
<i>Ru Xiang</i> (Gummi Olibanum), oil removed	[75g]
<i>Mo Yao</i> (Myrrh), oil removed	[75g]
<i>Dang Gui Shen</i> (Corpus Radix Angelicae Sinensis), <i>chao</i> (dry-fried) with liquor	[75g]
<i>Di Long</i> (Pheretima)	[150g]
<i>She Xiang</i> (Moschus)	[30g]
<i>Feng Xiang Zhi</i> (Resina Liquidambaris)	[150g]
<i>Mu Bie Zi</i> (Semen Momordicae), oil removed	[150g]
<i>Mo Tan</i> (Chinese ink cake)	[12g]

Note: *She Xiang* (Moschus) is derived from an endangered animal, and is rarely used as a medicinal substance today. Its discussion here is included primarily for academic purposes, to reflect the historical use of this substance in

its original formulation. Most herbal products today have removed it completely, or replaced it with substitutes with similar functions.

Xiǎo Jīn Dān (Minor Gold Special Pill)

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into a fine powder, mix it evenly with *Nuo Mi* (*Oryza Glutinosa*) [36g], and form into 250 pills. The pills should resemble *Qian Shi* (*Semen Euryales*) in size. Take one pill with aged, grain-based liquor and cover the body with blankets to promote sweating.

Today, this formula is prepared by grinding *She Xiang* (*Moschus*) separately from the rest of the ingredients, then mixing the powders together. Combine 100g of the herbal powder and 25g of starch to form pills. Take 2-5 pills twice daily. Reduce the dose for children.

CHINESE THERAPEUTIC ACTIONS

- 1. Dissolves phlegm and dispels dampness
- 2. Dispels stagnation and opens the channels and collaterals

CLINICAL MANIFESTATIONS

Yin-type (deep-rooted) sores due to obstruction by cold, dampness, phlegm, and blood stasis: multiple abscesses, subcutaneous nodules, scrofula, mammary “rock,” buboes, cellulitis, and others. The affected area in these conditions is characterized by swelling, hardening, and pain. There is usually no change in skin color in the early stages.

CLINICAL APPLICATIONS

Multiple abscesses, subcutaneous nodules, scrofula, mammary “rock,” buboes, cellulitis, and other abscesses and sores.

EXPLANATION

Xiao Jin Dan (Minor Gold Special Pill) is formulated to treat *yin*-type (deep-rooted) sores due to obstruction by cold, dampness, phlegm, and blood stasis. The treatment strategies are to warm, unblock, dissolve, and disperse nodules and hardness.

Zhi Cao Wu (*Radix Aconiti Kusnezoffii Praeparata*) dispels wind and dampness, warms the channels and collaterals, and dispels cold. *Wu Ling Zhi* (*Faeces Trogopteri*), *Ru Xiang* (*Gummi Olibanum*), and *Mo Yao* (*Myrrha*) activate the blood, dispel blood stasis, reduce swelling, and relieve pain. *Dang Gui Shen* (*Corpus Radix Angelicae Sinensis*) tonifies the blood. *Di Long* (*Pheretima*) opens the channels and collaterals. *She Xiang* (*Moschus*) unblocks the channels and collaterals to disperse nodules. *Feng Xiang Zhi* (*Resina Liquidambaris*) regulates qi and blood to dissolve carbuncles and furuncles. *Mu Bie Zi* (*Semen Momordicae*) dispels phlegm and toxins to disperse swelling and nodules. *Mo Tan* (Chinese ink cake) reduces swelling and dissolves phlegm. *Nuo Mi* (*Oryza Glutinosa*)

Xiao Jin Dan (Minor Gold Special Pill)

Diagnosis	Signs and Symptoms	Treatment	Herbs
<i>Yin</i> -type (deep-rooted) sores	Deep-rooted nodules and hardness with swelling, hardening and pain: obstruction by cold, dampness, phlegm and blood	<ul style="list-style-type: none">• Dissolves phlegm and dispels dampness• Dispels stagnation and opens the channels and collaterals	<ul style="list-style-type: none">• <i>Zhi Cao Wu</i> (<i>Radix Aconiti Kusnezoffii Praeparata</i>) dispels wind and dampness, warms the channels and collaterals, and dispels cold.• <i>Wu Ling Zhi</i> (<i>Faeces Trogopteri</i>), <i>Ru Xiang</i> (<i>Gummi Olibanum</i>) and <i>Mo Yao</i> (<i>Myrrha</i>) activate the blood, dispel blood stasis, reduce swelling, and relieve pain.• <i>Dang Gui Shen</i> (<i>Corpus Radix Angelicae Sinensis</i>) tonifies the blood.• <i>Di Long</i> (<i>Pheretima</i>) opens the channels and collaterals.• <i>She Xiang</i> (<i>Moschus</i>) unblocks the channels and collaterals to disperse nodules.• <i>Feng Xiang Zhi</i> (<i>Resina Liquidambaris</i>) regulates qi and blood to dissolve carbuncles and furuncles.• <i>Mu Bie Zi</i> (<i>Semen Momordicae</i>) dispels phlegm and toxins to disperse swelling and nodules.• <i>Mo Tan</i> (Chinese ink cake) reduces swelling and dissolves phlegm.

Xiǎo Jīn Dān (Minor Gold Special Pill)

nourishes the Stomach. Grain-based liquor potentiates the formula by increasing its distribution to the affected area of the body.

CAUTIONS / CONTRAINDICATIONS

- *Xiao Jin Dan* should be used with caution in individuals with underlying deficiency, as it has strong effects.
- This formula is contraindicated during pregnancy.

AUTHORS' COMMENTS

Yang He Tang (Yang-Heartening Decoction) and *Xiao Jin Dan* both treat yin-type (deep-rooted) sores.

- *Yang He Tang* addresses sores characterized by both excess and deficiency. However, it is more specific for yang and blood deficiencies, giving rise to cold invasion.
- *Xiao Jin Dan* treats sores characterized by excess factors, such as cold, dampness, and phlegm.

Section 2

内痈疡剂

— Internal Abscesses and Sores

Wěi Jīng Tāng (Reed Decoction)

葦莖湯

苇茎汤

Pinyin Name: *Wei Jing Tang*

Literal Name: Reed Decoction

Original Source: *Bei Ji Qian Jin Yao Fang* (Thousands of Golden Prescriptions for Emergencies) by Sun Si-Miao in Tang Dynasty

COMPOSITION

Wei Jing (Herba Phragmitis), *qie* (sliced)

2 cups [30g]

Dong Gua Zi (Semen Benincasae)

0.5 cup [24g]

Yi Yi Ren (Semen Coicis)

0.5 cup [30g]

Tao Ren (Semen Persicae)

30 pieces [9g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to first cook 2 cups [30g] of *Wei Jing* (Herba Phragmitis) in 20 cups of water until it is reduced to 5 cups. Add the other ingredients, and further reduce the decoction from 5 to 2 cups. Take 1 cup of decoction per dose to induce vomiting of pus and abscesses.

CHINESE THERAPEUTIC ACTIONS

1. Clears the Lung and dissolves phlegm
2. Disperses stagnation and drains pus

CLINICAL MANIFESTATIONS

Lung abscess: coughing, foul-smelling yellow sputum with pus and blood, dull pain in the chest, squamous, dry skin; red tongue body with a yellow, greasy tongue coating, and a slippery, rapid pulse.

CLINICAL APPLICATIONS

Pulmonary abscesses, pneumonia, and bronchitis.

EXPLANATION

Wei Jing Tang (Reed Decoction) treats lung abscess with stagnation of heat, toxins, and phlegm. Stagnation in the Lung affects Lung qi circulation, causing coughing and chest pain. Stagnation of heat, toxins, and phlegm also damages the Lung, resulting in foul-smelling yellow

sputum with pus and blood. Squamous, dry skin suggests malnourishment of the skin due to lung abscess and obstructed qi and blood circulation.

This formula has *Wei Jing* (Herba Phragmitis) to clear the Lung and dispel heat. *Dong Gua Zi* (Semen Benincasae) and *Yi Yi Ren* (Semen Coicis) clear heat, dissolve phlegm, dispel dampness, and drain pus. *Tao Ren* (Semen Persicae) activates the blood and breaks up blood stagnation.

MODIFICATIONS

- With cough, sputum, and chest congestion, add *Ting Li Zi* (Semen Descurainiae seu Lepidii).
- With lingering heat accompanied by cough and profuse sputum, add *Si Gua Luo* (Retinervus Luffae Fructus) and *Gua Lou Pi* (Pericarpium Trichosanthis).
- With cough and dyspnea due to pneumonia, combine with *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction).
- For lung abscess that has not yet turned into pus, add *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Yu Xing Cao* (Herba Houttuyniae).
- For lung abscess with a profuse amount of pus, add *Jie Geng* (Radix Platycodonis), *Gan Cao* (Radix et Rhizoma Glycyrrhizae), and *Bei Mu* (Bulbus Fritillariae).

Wei Jing Tang (Reed Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Lung abscess	<ul style="list-style-type: none">• Coughing and chest pain: stagnation in the Lung with reversed flow of Lung qi• Foul-smelling yellow sputum with pus and blood: heat, toxins and phlegm damaging the Lung• Red tongue with a yellow, greasy tongue coating, a slippery, rapid pulse: heat and phlegm in the interior	<ul style="list-style-type: none">• Clears the Lung and dissolves phlegm• Disperses stagnation and drains pus	<ul style="list-style-type: none">• <i>Wei Jing</i> (Herba Phragmitis) clears the Lung, dispels heat, eliminates phlegm, and drains abscesses.• <i>Dong Gua Zi</i> (Semen Benincasae) and <i>Yi Yi Ren</i> (Semen Coicis) clear heat, dissolve phlegm, dispel dampness, and drain pus.• <i>Tao Ren</i> (Semen Persicae) activates the blood and breaks up blood stagnation.

CLINICAL STUDIES AND RESEARCH

1. **Pulmonary abscesses:** An integrative treatment using drugs and *Wei Jing Tang* (Reed Decoction) was associated with a marked effect in treating pulmonary abscesses. Of 110 patients, the study reported complete recovery in 68 cases, improvement in 29 cases, and no effect in 13 cases.¹ According to another study, complete recovery was reported in 24 of 26 patients with pulmonary abscesses using *Wei Jing Tang*, *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), and intravenous administration of penicillin.²
2. **Pneumonia:** *Wei Jing Tang* has been shown to effectively treat many different types of pneumonia, including but not limited to lobar pneumonia, lobular pneumonia, bronchopneumonia, and mycoplasmal pneumonia.³

3. **Bronchitis:** *Wei Jing Tang* has been shown to successfully treat bronchitis in children,⁴ suppurative bronchitis,⁵ and chronic bronchitis.⁶

AUTHORS' COMMENTS

It is safe to use *Wei Jing Tang* at various stages of lung abscess, either before or after the formation of pus.

Dà Huáng Mǔ Dān Tāng (Rhubarb and Moutan Decoction)

大黃牡丹湯
大黃牡丹汤

Pinyin Name: *Da Huang Mu Dan Tang*

Literal Name: Rhubarb and Moutan Decoction

Alternate Names: *Ta Huang Mu Tan Pi Tang*, *Da Huang Mu Dan Pi Tang*, Rhubarb and Moutan Combination

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

<i>Da Huang</i> (Radix et Rhizoma Rhei)	12g [18g]
<i>Mang Xiao</i> (Natrii Sulfas)	0.3 cup [9g]
<i>Tao Ren</i> (Semen Persicae)	50 pieces [12g]
<i>Mu Dan Pi</i> (Cortex Moutan)	3g [9g]
<i>Dong Gua Zi</i> (Semen Benincasae)	0.5 cup [30g]

Dà Huáng Mǔ Dān Tāng (Rhubarb and Moutan Decoction)

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to cook the ingredients, except *Mang Xiao* (Natrii Sulfas), with 6 cups [1,200 mL] of water until the liquid is reduced to 1 cup [200 mL]. Discard the herb residue, add *Mang Xiao* (Natrii Sulfas) to the strained decoction, bring to a quick boil, and take the decoction immediately. Today, the decoction may be prepared using the doses suggested in brackets.

CHINESE THERAPEUTIC ACTIONS

1. Drains heat and breaks up stagnation
2. Disperses nodules and reduces swellings

CLINICAL MANIFESTATIONS

Early onset of intestinal abscess: swelling and distention of the abdomen; abdominal pain that is worse with palpation (pain resembles that of *lin zheng* [dysuria syndrome], but urination is normal); abdominal pain that decreases when the right leg is flexed, but increases when the right leg and hip are extended; fever; perspiration; aversion to cold; and a thin, greasy, yellow tongue coating.

CLINICAL APPLICATIONS

Acute appendicitis, uncomplicated appendicitis, ruptured appendicitis with peritonitis, chronic appendicitis, peri-appendicular abscess, pelvic inflammatory disease, acute cholecystitis, ulcerative colitis, chronic prostatitis, suppurative tonsillitis, mesenteric lymphadenitis, colitis, ulcerative colitis, hemorrhoids, rectal prolapse, and incarcerated internal hemorrhoids.

EXPLANATION

Da Huang Mu Dan Tang (Rhubarb and Moutan Decoction) treats early-stage intestinal abscess caused by accumulation of damp-heat and stagnation of qi and blood in the Intestines. Because stagnation of qi and blood in the Intestines may cause disharmony between the *ying* (nutritive) and *wei* (defensive) levels, fever, perspiration,

and aversion to cold may occur. The thin, greasy, yellow tongue coating signifies damp-heat in the interior.

This formula consists of cold downward draining, damp-heat clearing, and blood-activating herbs. *Da Huang* (Radix et Rhizoma Rhei) quickly purges damp-heat and disperses stagnation. *Mang Xiao* (Natrii Sulfas) softens nodules and reduces swellings. *Tao Ren* (Semen Persicae) and *Mu Dan Pi* (Cortex Moutan) activate blood circulation and cool the blood. *Dong Gua Zi* (Semen Benincasae) clears damp-heat and drains pus from the Intestines.

MODIFICATIONS

- With severe abdominal pain, add *Chuan Lian Zi* (Fructus Toosendan), *Yan Hu Suo* (Rhizoma Corydalis), *Ru Xiang* (Gummi Olibanum) and *Mo Yao* (Myrrha).
- With abdominal fullness, add *Zhi Shi* (Fructus Aurantii Immaturus), *Hou Po* (Cortex Magnoliae Officinalis), and *Bing Lang* (Semen Arecae).
- With high fever, add *Huang Lian* (Rhizoma Coptidis) and *Shi Gao* (Gypsum Fibrosum).
- With palpable mass in the lower abdomen, add *Dang Gui* (Radix Angelicae Sinensis), *Chi Shao* (Radix Paeoniae Rubra), and *Zi Hua Di Ding* (Herba Violae).
- Prior to the formation of pus or ulceration, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Pu Gong Ying* (Herba Taraxaci), *Bai Jiang Cao* (Herba cum Radice Patriniae), *Lian Qiao* (Fructus Forsythiae), *Chi Shao* (Radix Paeoniae Rubra), and *Da Xue Teng* (Caulis Sargentodoxae).
- With a feeling of incomplete evacuation of the stools caused by yin deficiency, add *Xuan Shen* (Radix Scrophulariae) and *Di Huang* (Radix Rehmanniae).
- For intestinal abscess without pus, add *Zao Jiao Ci* (Spina Gleditsiae) and *Bai Zhi* (Radix Angelicae Dahuricae).
- For intestinal abscess with pus, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Pu Gong Ying* (Herba Taraxaci), and *Bai Hua She She Cao* (Herba Hedyotis).

Da Huang Mu Dan Tang (Rhubarb and Moutan Decoction)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Early onset of intestinal abscess	<ul style="list-style-type: none"> • Swelling and distention of the abdomen, abdominal pain that worsens with palpation: damp-heat accumulation and qi and blood stagnation in the Intestines • Fever, perspiration, and aversion to cold: disharmony between the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels • Greasy, yellow tongue coating: damp-heat 	<ul style="list-style-type: none"> • Drains heat and breaks up stagnation • Disperses nodules and reduces swellings 	<ul style="list-style-type: none"> • <i>Da Huang</i> (Radix et Rhizoma Rhei) quickly purges damp-heat and disperses stagnation. • <i>Mang Xiao</i> (Natrii Sulfas) softens nodules and reduces swellings. • <i>Tao Ren</i> (Semen Persicae) and <i>Mu Dan Pi</i> (Cortex Moutan) activate blood circulation and cool the blood. • <i>Dong Gua Zi</i> (Semen Benincasae) clears Intestinal damp-heat and drains pus.

Dà Huáng Mǔ Dān Tāng (Rhubarb and Moutan Decoction)

- For appendicitis, add *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), *Dang Gui* (Radix Angelicae Sinensis), and *Zhi Qiao* (Fructus Aurantii).

CAUTIONS / CONTRAINDICATIONS

- Intestinal abscesses are generally classified as either damp-heat or damp-cold. Patients with intestinal abscesses caused by damp-cold should **not** take this formula.
- *Da Huang Mu Dan Tang* is not suitable for pregnant women, elderly patients, or individuals with general weakness or deficiency.
- When preparing this formula in decoction, *Da Huang* (Radix et Rhizoma Rhei) does not need to be post-decocted as the emphasis is to clear damp-heat, not to drain or purge downwards. *Mang Xiao* (Natrii Sulfas) should be dissolved in the decoction immediately before serving.

PHARMACOLOGICAL EFFECTS

1. **Antibacterial:** According to *in vitro* studies, *Da Huang Mu Dan Tang* has a potent inhibitory effect against *Staphylococcus* species, and a moderate inhibitory effect against *E. coli*.¹
2. **Anti-inflammatory:** Both the formula and its ingredients have been shown to reduce inflammation and swelling.²
3. **Gastrointestinal:** Administration of *Da Huang Mu Dan Tang* was associated with a stimulatory effect on the gastrointestinal tract; it was shown to increase the intestinal peristalsis and contraction of the appendix.^{3,4}
4. **Antioxidant:** One study evaluated several Chinese herbal formulas and found *Da Huang Mu Dan Tang* to have the strongest scavenging activity against three types of free radicals: 1,1-diphenyl-2-picrylhydrazyl (DPPH), superoxide anion radical (O₂⁻) and hydroxyl radical (OH[•]). The study suggested that use of *Da Huang Mu Dan Tang* may play a role in treating cerebral ischemia and brain damage, because these disorders are associated with highly reactive oxygen-derived free radicals.⁵

CLINICAL STUDIES AND RESEARCH

1. **Acute appendicitis:** Modified *Da Huang Mu Dan Tang* was used with excellent results to treat 224 patients with acute appendicitis. The study included 121 male and 103 female patients, between 7-84 years of age. Out of 224 cases, the study reported complete recovery in 206 cases, and ineffectiveness in 18 cases. The herbal formula was modified as follows: *Chuan Lian Zi* (Fructus Toosendan) and *Chi Shao* (Radix Paeoniae Rubra) were added for stagnation and accumulation; *Jin Yin Hua* (Flos Lonicerae Japonicae) and *Yi Yi Ren* (Semen Coicis) were added for damp-heat; *Huang Lian* (Rhizoma Coptidis) and *Bai Jiang Cao* (Herba cum Radice Patriniae) were added for

heat and toxins; *Huang Lian* (Rhizoma Coptidis) and *Hu Zhang* (Rhizoma et Radix Polygoni Cuspidati) for toxic sores; and *Chuan Shan Jia* (Squama Manis) and *Chi Shao* (Radix Paeoniae Rubra) for damp-heat masses.⁶

2. **Chronic appendicitis:** One study reported 99% effectiveness using modified *Da Huang Mu Dan Tang* to treat 150 patients with appendicitis.⁷ Another study reported 89.5% effectiveness using *Da Huang Mu Dan Tang* plus *Bai Jiang Cao* (Herba cum Radice Patriniae) to treat 200 patients with appendicitis.⁸
3. **Ruptured appendicitis with peritonitis:** Modified *Da Huang Mu Dan Tang* and antibiotic drugs were successfully used together to treat 123 patients with ruptured appendicitis and peritonitis. The herbal formula used *Da Huang Mu Dan Tang* plus *Jin Yin Hua* (Flos Lonicerae Japonicae), *Chuan Lian Zi* (Fructus Toosendan), and *Tao Ren* (Semen Persicae) as the base formula, with the addition of *Shi Gao* (Gypsum Fibrosum) and *Tian Hua Fen* (Radix Trichosanthis) for high fever; *Zhu Ru* (Caulis Bambusae in Taenia) and *Lu Gen* (Rhizoma Phragmitis) for nausea and vomiting; *Ru Xiang* (Gummi Olibanum), *Mo Yao* (Myrrha), and *Yan Hu Suo* (Rhizoma Corydalis) for severe pain; and *Bing Pian* (Borneolum Syntheticum) and *Mang Xiao* (Natrii Sulfas) for abscess and swelling in the appendix area. Out of 123 patients, the study reported complete recovery in 75 cases, marked improvement in 44 cases, and no effect in 4 cases.⁹
4. **Periappendicular abscess:** Administration of modified *Da Huang Mu Dan Tang* along with antibiotic drugs showed good success in treating periappendicular abscess. The herbal formula used *Da Huang Mu Dan Tang* as the base formula, and added *Yan Hu Suo* (Rhizoma Corydalis) and *Chi Shao* (Radix Paeoniae Rubra) for stagnation and accumulation; and *Jin Yin Hua* (Flos Lonicerae Japonicae), *Zhi Zi* (Fructus Gardeniae), and *Pu Gong Ying* (Herba Taraxaci) for excess heat. In addition, patients also received intravenous antibiotics and fluids. Out of 36 cases, the study reported complete recovery in 28 cases, improvement in 7 cases, and no effect in 1 case.¹⁰
5. **Pelvic inflammation:** Fifty-three patients with pelvic inflammation were treated with marked success using modified *Da Huang Mu Dan Tang* plus antibiotic drugs. The herbal formula contained *Da Huang* (Radix et Rhizoma Rhei), *Mu Dan Pi* (Cortex Moutan), *Tao Ren* (Semen Persicae), *Dong Gua Zi* (Semen Benincasae), *Jin Yin Hua* (Flos Lonicerae Japonicae), *Lian Qiao* (Fructus Forsythiae), *Huang Bo* (Cortex Phellodendri Chinensis), *Pu Gong Ying* (Herba Taraxaci), *Di Huang* (Radix Rehmanniae), *Bai Jiang Cao* (Herba cum Radice Patriniae) and *Gan Cao* (Radix et Rhizoma Glycyrrhizae). Out of 53 patients, the study reported complete recovery in 50 cases and improvement in 3 cases.¹¹

Dà Huáng Mǔ Dān Tāng (Rhubarb and Moutan Decoction)

6. **Acute cholecystitis:** Eighty-eight patients with acute cholecystitis (3 hours to 5 days) were treated with *Da Huang Mu Dan Tang* with good success. Most patients had resolution of symptoms and signs within 36 hours. Those who did not respond were referred out for emergency treatment. Out of 88 patients, the study reported complete recovery in 57 cases, marked improvement in 22 cases, and no effect in 9 cases.¹²
7. **Ulcerative colitis:** *Da Huang Mu Dan Tang* effectively treated ulcerative colitis in one study. The treatment protocol was to instill the decoction rectally twice daily for one month per course of treatment. Out of 30 patients, the study reported complete recovery in 9 cases, marked improvement in 16 cases, and no effect in 5 cases. The overall effectiveness was 80.3%.¹³
8. **Chronic prostatitis:** Rectal instillation of modified *Da Huang Mu Dan Tang* was effective in treating patients with chronic prostatitis. In addition to the formula, *Bian Xu* (Herba Polygoni Avicularis) and *Qu Mai* (Herba Dianthi) were added for frequent and painful urination; *Chuan Lian Zi* (Fructus Toosendan) and *Yan Hu Suo* (Rhizoma Corydalis) were added for testicular pain; *Du Zhong* (Cortex Eucommiae) and *Xu Duan* (Radix Dipsaci) were added for lower abdominal pain; *Chuan Shan Jia* (Squama Manis) and *E Zhu* (Rhizoma Curcumae) were added for hardness and nodules of the prostate; and *Pu Gong Ying* (Herba Taraxaci) and *Mo Han Lian* (Herba Ecliptae) were added for presence of white or red blood cells in the seminal fluids. The treatment protocol was to cook the herbs in water, and instill the solution in the rectum one time daily for seven days per course of treatment, for a total of 1-8 courses. Out of 60 patients, the study reported complete recovery in 47 cases, and marked improvement in 13 cases.¹⁴
9. **Suppurative tonsillitis:** Modified *Da Huang Mu Dan Tang* was used with good success in treating suppurative tonsillitis in 50 young children. The herbal treatment used *Da Huang Mu Dan Tang* plus *Lian Qiao* (Fructus Forsythiae), *Huang Lian* (Rhizoma Coptidis), *Jin Yin Hua* (Flos Lonicerae Japonicae), and *Gan Cao* (Radix et Rhizoma Glycyrrhizae) as the base formula. Furthermore, it added *Gou Teng* (Ramulus Uncariae cum Uncis) and *Quan Xie* (Scorpio) for seizures and epilepsy; *Mu Xiang* (Radix Aucklandiae) and *Yan Hu Suo* (Rhizoma Corydalis) for abdominal pain; and *Chuan Shan Jia* (Squama Manis) and *Xia Ku Cao* (Spica Prunellae) for submandibular lymphadenitis. The duration of treatment ranged from 4 to 12 packs of herbs. The study reported complete recovery in all 50 patients.¹⁵
10. **Incarcerated internal hemorrhoids:** One study reported good results using modified *Da Huang Mu Dan Tang*

to treat incarcerated internal hemorrhoids. The herbal formula contained *Da Huang* (Radix et Rhizoma Rhei) 30g, *Mu Dan Pi* (Cortex Moutan) 15g, *Tao Ren* (Semen Persicae) 10g, *Dong Gua Zi* (Semen Benincasae) 30g, *Mang Xiao* (Natrii Sulfas) 9g, *Pu Gong Ying* (Herba Taraxaci) 30g, *Hong Hua* (Flos Carthami) 10g, *Di Yu* (Radix Sanguisorbae) 12g, and *Zhi Shi* (Fructus Aurantii Immaturus) 15g. The treatment protocol was to cook the herbs in water twice, and mix the two resultant decoctions together, and administer the liquid in two equally-divided doses, twice daily. In addition to oral therapy, patients were also advised to take sitz bath twice daily using an herbal solution made by cooking 30g of *Da Huang* (Radix et Rhizoma Rhei) and 15g of *Hua Jiao* (Pericarpium Zanthoxyli) in 2,000 mL of water for 5 minutes. Of 30 patients, the study reported recovery in 12 cases within 24 hours, 16 cases after 48 hours, and 2 cases after 72 hours. The average time to recovery was 1.67 days.¹⁶

The source text states to prepare the ingredients as a decoction. *Qing Chang Yin* (Clear the Intestines Drink) activates the blood, eliminates toxins, nourishes yin, and purges fire. Its main indication is for treating abscesses in the large intestine.

AUTHORS' COMMENTS

Da Huang Mu Dan Tang has been used successfully to treat acute and/or uncomplicated appendicitis. However, the use of this formula alone is **not** appropriate for ruptured appendix with peritonitis or other complications. These cases are medical emergencies that are best treated in hospitals.

Yì Yī Fù Zǐ Bǎi Jiàng Sǎn

(Coicis, Prepared Aconite, and Patrinia Powder)

薏苡附子敗醬散
薏苡附子敗醬散

Pinyin Name: Yi Yi Fu Zi Bai Jiang San

Literal Name: Coicis, Prepared Aconite, and Patrinia Powder

Original Source: *Jin Gui Yao Lue* (Essentials from the Golden Cabinet) by Zhang Zhong-Jing in the Eastern Han Dynasty

COMPOSITION

Yi Yi Ren (Semen Coicis)

[30g]

Bai Jiang Cao (Herba cum Radice Patriniae)

[15g]

Fu Zi (Radix Aconiti Lateralis Praeparata)

[6g]

DOSAGE / PREPARATION / ADMINISTRATION

The source text states to grind the ingredients into powder. Cook 1 large spoonful [6-9g] of the powder with 2 cups [400 mL] of water until the liquid is reduced by half. Take the decoction immediately.

CHINESE THERAPEUTIC ACTIONS

Drains pus and reduces swelling

CLINICAL MANIFESTATIONS

Intestinal abscess with pus: absence of fever, squamous, dry skin; abdominal swelling that feels soft with the application of pressure, and a rapid pulse.

CLINICAL APPLICATIONS

Appendicitis and pelvic inflammatory disease.

EXPLANATION

Yi Yi Fu Zi Bai Jiang San (Coicis, Prepared Aconite, and Patrinia Powder) treats intestinal abscess with pus formation characterized by interlocking of interior cold, dampness, and blood stasis. A rapid pulse without fever suggests interior abscess and pus. The abdomen feels soft upon palpation since there is no constipation. Squamous, dry skin is the result of lack of nourishment.

This formula contains a large dose of *Yi Yi Ren* (Semen Coicis) to resolve dampness and reduce swelling. *Bai*

Yi Yi Fu Zi Bai Jiang San

(Coicis, Prepared Aconite, and Patrinia Powder)

Yi Yi Fu Zi Bai Jiang San (Coicis, Prepared Aconite, and Patrinia Powder)

Diagnosis	Signs and Symptoms	Treatment	Herbs
Intestinal abscess with pus	Abdominal swelling that feels soft with the application of pressure, absence of fever and a rapid pulse; interlocking of interior cold, dampness, and blood stasis	Drains pus and reduces swelling	<ul style="list-style-type: none"> • <i>Yi Yi Ren</i> (Semen Coicis) drains pus and reduces swelling. • <i>Bai Jiang Cao</i> (Herba cum Radice Patriniae) clears heat, reduces abscesses, drains pus and disperses blood stasis. • <i>Fu Zi</i> (Radix Aconiti Lateralis Praeparata) activates yang and qi, and disperses cold and damp stagnation.

Jiang Cao (Herba cum Radice Patriniae) clears heat, reduces abscesses, drains pus and disperses blood stasis. A small dose of *Fu Zi* (Radix Aconiti Lateralis Praeparata) is used to disperse cold and damp stagnation and activate the yang and qi. The hot property of *Fu Zi* (Radix Aconiti Lateralis Praeparata) balances the cold property of *Bai Jiang Cao* (Herba cum Radice Patriniae) and prevents damages to the middle *jiao*.

MODIFICATIONS

- For late-stage intestinal abscess with heat and toxins and yang qi deficiency manifesting in abdominal mass, add *Tao Ren* (Semen Persicae) and *Mu Dan Pi* (Cortex Moutan).
- With Spleen qi deficiency, add *Dang Shen* (Radix Codonopsis) and *Fu Ling* (Poria).
- With regional burning pain, add *Huang Qin* (Radix Scutellariae) and increase the dose of *Bai Jiang Cao* (Herba cum Radice Patriniae).

CLINICAL STUDIES AND RESEARCH

1. **Appendicitis:** *Yi Yi Fu Zi Bai Jiang San* has been shown to effectively treat both acute and chronic appendicitis. According to one study of 25 patients with acute or chronic appendicitis, use of modified *Yi Yi Fu Zi Bai Jiang San* was associated with complete recovery in 21 cases, significant improvement in 2 cases, and no effect in 2 cases.¹ According to another study, use of modified *Yi Yi Fu Zi Bai Jiang San* in 93 patients with chronic appendicitis was associated with complete recovery in 78 cases, improvement in 11 cases, and no effect in 4 cases (who were subsequently treated with surgery).²
2. **Pelvic inflammatory disease:** One study reported 94.6% effectiveness using modified *Yi Yi Fu Zi Bai Jiang San* to treat 56 patients with pelvic inflammatory disease. The herbal formula contained *Yi Yi Ren* (Semen Coicis) 30g, *Bai Jiang Cao* (Herba cum Radice Patriniae) 30g, *Yi Mu Cao* (Herba Leonuri) 30g, processed *Xiang Fu* (Rhizoma

Cyperi) 15g, *Bai Shao* (Radix Paeoniae Alba) 15g, *Fu Zi* (Radix Aconiti Lateralis Praeparata) 10g, *Dang Gui* (Radix Angelicae Sinensis) 6g, *Hu Po* (Succinum) 1g, and *Chuan Shan Jia* (Squama Manis) 1g. *Hu Po* (Succinum) and *Chuan Shan Jia* (Squama Manis) were not cooked, but ingested in powder form with the herbal decoction. These two herbs were not used during menstruation. Additional modifications were made if necessary. The treatment protocol was to administer the herbs in decoction for 4 weeks per course of treatment, for 1-3 courses total. Of 56 patients, the study reported complete recovery in 31 cases, significant improvement in 12 cases, moderate improvement in 10 cases, and no effect in 3 cases.³

RELATED FORMULA

Yi Yi Ren Tang (Coicis Decoction)

薏苡仁湯
薏苡仁汤

Pinyin Name: *Yi Yi Ren Tang*

Literal Name: Coicis Decoction

Original Source: *Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments) by Wang Ken-Tang in 1602

<i>Yi Yi Ren</i> (Semen Coicis)	9g
<i>Gua Lou Zi</i> (Semen Trichosanthis)	9g
<i>Mu Dan Pi</i> (Cortex Moutan)	6g
<i>Tao Ren</i> (Semen Persicae)	6g

The source text states to cook the ingredients with 3 large bowls of water until the liquid is reduced to 1 bowl. Take the decoction any time during the day.

Yi Yi Ren Tang (Coicis Decoction) resolves dampness, moistens the Intestines, activates the blood, and relieves pain. It is commonly used to treat early-stage intestinal abscesses characterized by damp accumulation and blood stagnation, with symptoms such as abdominal fullness and pain, poor appetite, and dysuria. It may also be used

Yi Yi Fù Zǐ Bǎi Jiàng Sǎn

(Coicis, Prepared Aconite, and Patrinia Powder)

for abdominal pain associated with menstruation, or for postpartum women whose pain is characterized by damp and blood stagnation.

AUTHORS' COMMENTS

There are two formulas called *Yi Yi Ren Tang* (Coicis Decoction) discussed in this text. Though they have identical names, their compositions and clinical applications are different, and must not be confused with each others.

- *Yi Yi Ren Tang* (Coicis Decoction), from *Zhang Shi Yi Tong* (Comprehensive Medicine According to Master Zhang) by Zhang Lu-Xuan in 1695, dispels wind-dampness from the exterior to treat *bi zheng* (painful obstruction syndrome).
- *Yi Yi Ren Tang* (Coicis Decoction), from *Zheng Zhi Zhun Sheng* (Standards of Patterns and Treatments) by Wang Ken-Tang in 1602, dispels dampness from the Intestines to treat intestinal abscess.

Da Huang Mu Dan Tang (Rhubarb and Moutan Decoction) and *Yi Yi Fu Zi Bai Jiang San* are two formulas commonly used to treat early stage of intestinal abscesses without underlying deficiencies.

- *Da Huang Mu Dan Tang* is a bitter and cold formula that has functions to drain downwards, clear heat, disperse blood stagnation and reduce swelling. It is a stronger formula that is more suitable for intestinal abscesses characterized by damp-heat with qi and blood stagnation.
- *Yi Yi Fu Zi Bai Jiang San* resolves dampness and moistens the intestines. It has moderate potency and is more appropriate for intestinal abscesses characterized by dampness.

Chapter 22 — Summary

— Formulas that Treat Abscesses and Sores

SECTION 1: EXTERNAL ABSCESSES AND SORES

Name	Similarities	Differences
Xian Fang Huo Ming Yin (Sublime Formula for Sustaining Life)		Reduces swelling, break the hardness, activates blood circulation, stops pain
Niu Bang Jie Ji Tang (Arctium Decoction to Release the Muscle Layer)	Clear heat, eliminate toxins, release the exterior	Cools the blood, nourishes yin, reduces swelling
Jing Fang Bai Du San (Schizonepeta and Saposhnikovia Powder to Overcome Pathogenic Influences)		Strongly releases the exterior, regulates qi and blood circulation
Wu Wei Xiao Du Yin (Five-Ingredient Decoction to Eliminate Toxins)		Disperses external carbuncles and furuncles
Shi Wei Bai Du Tang (Ten-Ingredient Decoction to Overcome Pathogenic Influences)	Clear heat, eliminate toxins	Treats suppurative skin disorders
Si Miao Yong An Tang (Four-Valiant Decoction for Well-Being)		Treats gangrene with heat, fire and toxins
Zi Cao Gen Mu Li Tang (Arnebia and Oyster Shell Decoction)		Treats malignant sores and abscesses
Xi Huang Wan (Cattle Gallstone Pill)		Treats various abscesses and sores, such as breast cancer, buboes, scrofula
Hai Zao Yu Hu Tang (Sargassum Decoction for the Jade Flask)		Treats goiter affecting the neck
Xiao Luo Wan (Reduce Scrofula Pill)	Dissolve phlegm, soften hardness, disperse nodules	Treats hardness and nodules around the ears and neck
San Zhong Kui Jian Tang (Disperse the Swelling and Break the Hardness Decoction)		Treats hardness and nodules, especially around the ears, cheeks, and shoulders
Shi Liu Wei Liu Qi Yin (Sixteen-Ingredient Decoction to Flow Qi)		Treats hardness and nodules, especially in the neck, breast and abdominal regions
Tou Nong San (Discharge Pus Powder)		Tonifies qi
Pai Nong San (Drain the Pus Powder)		Tonifies the blood
Qian Jin Nei Tuo San (Drain the Interior Powder Worthy of a Thousand Gold)	Tonify deficiencies, drain pus from abscesses and sores	Tonifies qi and blood
Tuo Li Xiao Du Yin (Drain the Interior and Detoxify Decoction)		Strongly tonifies qi and blood
Nei Bu Huang Qi Tang (Tonify the Interior Decoction with Astragalus)		Tonifies qi and blood, nourishes yin
Yang He Tang (Yang-Heartening Decoction)	Warm yang, dispel cold, treat yin (deep-rooted) abscesses and sores	Warms yang, tonifies the blood
Xiao Jin Dan (Minor Gold Special Pill)		Dispels dampness and phlegm, opens the channels and collaterals

Chapter 22 — Summary

Xian Fang Huo Ming Yin (Sublime Formula for Sustaining Life), **Niu Bang Jie Ji Tang** (Arctium Decoction to Release the Muscle Layer) and **Jing Fang Bai Du San** (Schizonepeta and Saposhnikovia Powder to Overcome Pathogenic Influences) have similar functions to release the exterior, clear heat, and eliminate toxins.

- **Xian Fang Huo Ming Yin** treats early onset of abscesses and sores characterized by accumulation of heat and toxins at the exterior with stagnation of qi and blood.
- **Niu Bang Jie Ji Tang** treats abscesses and sores in the head and facial regions due to wind-heat. It releases wind, clears heat, cools the blood, and reduces swelling.
- **Jing Fang Bai Du San** strongly releases the exterior to treat sores and abscesses with exterior symptoms, such as fever, aversion to cold, and absence of sweating.

Wu Wei Xiao Du Yin (Five-Ingredient Decoction to Eliminate Toxins), **Shi Wei Bai Du Tang** (Ten-Ingredient Decoction to Overcome Pathogenic Influences), **Si Miao Yong An Tang** (Four-Valiant Decoction for Well-Being), and **Zi Cao Gen Mu Li Tang** (Arnebia and Oyster Shell Decoction) clear heat and eliminate toxins to treat various conditions with abscesses and sores.

- **Wu Wei Xiao Du Yin** treats carbuncles, furuncles, and other types of epithelial inflammation.
- **Shi Wei Bai Du Tang** treats various types of suppurative skin disorders at the exterior.
- **Si Miao Yong An Tang** treats gangrene of the extremities with local swelling and pus formation.
- **Zi Cao Gen Mu Li Tang** treats malignant abscesses, sores, and ulcers.

Xi Huang Wan (Cattle Gallstone Pill), **Hai Zao Yu Hu Tang** (Sargassum Decoction for the Jade Flask), **Xiao Luo Wan** (Reduce Scrofula Pill), **San Zhong Kui Jian Tang** (Disperse the Swelling and Break the Hardness Decoction), and **Shi Liu Wei Liu Qi Yin** (Sixteen-Ingredient Decoction to Flow Qi) have similar functions to dissolve phlegm, soften hardness, and disperse nodules.

- **Xi Huang Wan** treats various types of abscesses and nodules, such as lymph edema, lymphadenitis, breast cancer, buboes, scrofula, subcutaneous nodules, and multiple abscesses.
- **Hai Zao Yu Hu Tang** treats enlarged thyroid glands in goiter and hyperthyroidism.
- **Xiao Luo Wan** was originally designed to treat scrofula, but may also be used for goiter, thyroiditis, lymphadenitis, parotitis, and hyperplasia of the mammary glands.
- **San Zhong Kui Jian Tang** treats hardness and nodules throughout the body, but is especially effective for areas below the ears and around the shoulders. Clinical applications include lymphadenitis, hyperthyroidism, goiter, carbuncles, and furuncles.
- **Shi Liu Wei Liu Qi Yin** treats hardness and nodules throughout the body, but is especially effective for neck, breast and abdominal regions. Clinical applications include breast cancer, fibrocystic disease, goiter, and inflammation of the lymph glands.

Tou Nong San (Discharge Pus Powder), **Pai Nong San** (Drain the Pus Powder), **Qian Jin Nei Tuo San** (Drain the Interior Powder Worthy of a Thousand Gold), **Tuo Li Xiao Du Yin** (Drain the Interior and Detoxify Decoction), and **Nei Bu Huang Qi Tang** (Tonify the Interior Decoction with Astragalus), all treat mid-to-late stages of abscesses and sores, when affected individuals begin to show more underlying deficiencies.

- **Tou Nong San** tonifies qi and enhances pustulation. It is effective in the middle or late stage of abscesses and sores, in which there is a proliferation of pus in the interior with qi deficiency.
- **Pai Nong San** nourishes the blood, drains pus, and reduces nodules. It is used to treat middle or late stage of abscesses and sores with blood deficiency.
- **Qian Jin Nei Tuo San** tonifies qi and blood and promotes the generation of flesh. It is used to treat late stage of abscesses and sores with qi and blood deficiencies.
- **Tuo Li Xiao Du Yin** tonifies qi and blood, strengthens the Spleen and Stomach, and drains pus and swellings. It is used to treat late stage of abscesses and sores with severe qi and blood deficiencies.
- **Nei Bu Huang Qi Tang** tonifies qi and blood, nourishes yin, and promotes generation of flesh. It is especially applicable in the late stage of abscesses and sores with generalized weakness and deficiency.

Chapter 22 — Summary

Yang He Tang (Yang-Heartening Decoction) and **Xiao Jin Dan** (Minor Gold Special Pill) have similar effects to warm yang, dispel cold, and drain pus from abscesses and sores. These two formulas are most effective for *yin*-type (deep-rooted) abscesses and sores with yang deficiency and cold accumulation.

- **Yang He Tang** focuses primarily on warming yang and tonifying the blood to treat *yin* (deep-rooted) abscesses and sores.
- **Xiao Jin Dan**, on the other hand, works by dispelling dampness and phlegm, dispersing cold, and warming the channels and collaterals to treat *yin* (deep-rooted) abscesses and sores.

SECTION 2: INTERNAL ABSCESES AND SORES

Name	Similarities	Differences
Wei Jing Tang (Reed Decoction)		Treats lung abscesses
Da Huang Mu Dan Tang (Rhubarb and Moutan Decoction)	Resolve internal abscesses and sores	Treats intestinal abscesses
Yi Yi Fu Zi Bai Jiang San (Coicis, Prepared Aconite, and Patrinia Powder)		Treats intestinal abscesses with pus

Wei Jing Tang (Reed Decoction) clears heat, eliminates toxins, and drains pus. It treats lung abscesses with stagnation of blood, heat, toxins, and phlegm.

Da Huang Mu Dan Tang (Rhubarb and Moutan Decoction) purges stagnant heat and eliminates toxins. It is excellent for treating early onset of intestinal abscesses.

Yi Yi Fu Zi Bai Jiang San (Coicis, Prepared Aconite, and Patrinia Powder) strongly drains pus and reduces swellings. It treats intestinal abscesses with pus formation.

吴尚先 Wú Shàng-Xián

吴尚先 Wú Shàng-Xián, 1806 – 1886.

吴尚先 Wú Shàng-Xián

Wu Shang-Xian specialized in treating both local and systemic disorders via topical applications of herbs. His exploration of topical approaches was motivated by his concern for patients who could not or would not take herbs by oral ingestion, and by his desire to minimize the side effects associated with oral use. In many years of research, Wu explored many different routes of administration, such as oral inhalation, nasal inhalation, topical application, and ophthalmic instillation. He also developed many different dosage forms for medicines, including creams, ointments, plasters, inhalation solutions, and more. Because of his unique treatment methods and uncommon success, he literally treated 4,000 to 5,000 patients per month, and 50,000 to 60,000 patients per year. Wu's style of medicine introduced new options for treatment, and influenced generations of physicians and herbalists, shaping the practice of medicine to this day.

| 9. 梅核气 <i>mei he qi</i> (plum-pit qi) | |

1. 奔豚 **BEN TUN (RUNNING PIGLET)**

- *Xuan Fu Dai Zhe Shi Tang* (Inula and Hematite Decoction), 851
- *Hei Xi Dan* (Lead Special Pill), 492

2. 崩漏 **BENG LOU (FLOODING AND SPOTTING)** Kidney deficiency

- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645
- Spleen deficiency
- *Gu Chong Tang* (Stabilize Chong [Thoroughfare Channel] Decoction), 803
 - *Sheng Mai San* (Generate the Pulse Powder), 554

3. 痹证 **BI ZHENG (PAINFUL OBSTRUCTION SYNDROME)**

Xing bi (mobile painful obstruction)

- *Gui Zhi Shao Yao Zhi Mu Tang* (Cinnamon Twig, Peony, and Anemarrhena Decoction), 1186

Zhuo bi (fixed painful obstruction)

- *Yi Yi Ren Tang* (Coicis Decoction), 1173

Re bi (heat painful obstruction)

- *Bai Hu Jia Gui Zhi Tang* (White Tiger plus Cinnamon Twig Decoction), 323

Xue bi (blood painful obstruction)

- *Shen Tong Zhu Yu Tang* (Drive Out Blood Stasis from a Painful Body Decoction), 893

Wan bi (stubborn painful obstruction)

- *Da Huo Luo Dan* (Major Invigorate the Collaterals Special Pill), 1179
- *Xiao Huo Luo Dan* (Minor Invigorate the Collaterals Special Pill), 1177

- *Shen Tong Zhu Yu Tang* (Drive Out Blood Stasis from a Painful Body Decoction), 893

Wei bi (atrophic painful obstruction)

- *San Bi Tang* (Three-Painful Obstruction Decoction), 1167

- *Huang Qi Gui Zhi Wu Wu Tang* (Astragalus and Cinnamon Twig Five-Substance Decoction), 500

Zhou bi (generalized painful obstruction)

- *Juan Bi Tang* (Remove Painful Obstruction Decoction), 1158
- *Shang Zhong Xia Tong Yong Tong Feng Wan* (Upper, Middle, and Lower General Use Pill for Wind-Pain), 1175

4. 癫狂 **DIAN KUANG (MANIA AND WITHDRAWAL)** Qi and blood deficiencies

- *Yang Xin Tang* (Nourish the Heart Decoction), 735

Phlegm stagnation

- *Di Tan Tang* (Scour Phlegm Decoction), 1212
- *Gun Tan Wan* (Vaporize Phlegm Pill), 1238

Fire and phlegm disturbing the Heart

- *San Sheng San* (Three-Sage Powder), 1312
- *Sheng Tie Luo Yin* (Iron Filings Decoction), 711
- *Kong Xian Dan* (Control Mucus Special Pill), 182

With *shen* (spirit) disturbance

- *Ding Zhi Wan* (Settle the Emotions Pill), 723

5. 霍乱 **HUO LUAN (SUDDEN TURMOIL DISORDER)** Cold

- *Huo Xiang Zheng Qi San* (Agastache Powder to Rectify the Qi), 1079

Appendix 1 — Cross-reference Based on Traditional Chinese Medicine Diagnosis

- *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle), 463

Heat

- *Can Shi Tang* (Silkworm Droppings Decoction), 1101
- *Xing Jun San* (Troop-Marching Powder), 756

6. 脚气 JIAO QI (LEG QI)

- *Ji Ming San* (Powder to Take at Cock's Crow), 1183

7. 积聚 JI JU (ACCUMULATION)

Liver qi stagnation

- *Zuo Jin Wan* (Left Metal Pill), 389
- *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction), 731

Food and phlegm stagnation

- *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction), 827
- *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum), 531

Qi and blood stagnation

- *Wu Ji San* (Five-Accumulation Powder), 301
- *Shi Xiao San* (Sudden Smile Powder), 911
- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885
- *Bie Jia Jian Wan* (Soft-Shell Turtle Shell Pill), 935
- *Da Huang Zhe Chong Wan* (Rhubarb and Eupolyphaga Pill), 937

8. 淋证 LIN ZHENG (DYSURIA SYNDROME)

Re lin (heat dysuria)

- *Ba Zheng San* (Eight-Herb Powder for Rectification), 1103

Qi lin (qi dysuria)

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Xue lin (bloody dysuria)

- *Xiao Ji Yin Zi* (Cirsium Decoction), 946
- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

Gao lin (cloudy dysuria)

- *Bi Xie Fen Qing Yin* (Dioscorea Hypoglauca Decoction to Separate the Clear), 1140
- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627

Lao lin (fatigue dysuria)

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542
- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

9. 梅核气 MEI HE QI (PLUM-PIT QI)

- *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction), 827
- *Er Chen Tang* (Two-Cured Decoction), 1209

10. 痿证 WEI ZHENG (ATROPHY SYNDROME)

Damp-heat

- *Er Miao San* (Two-Marvel Powder), 1188

Blood stasis blocking channels and collaterals

- *Sheng Yu Tang* (Sage-Like Healing Decoction), 567

Lung heat with damaged body fluids

- *Qing Zao Jiu Fei Tang* (Eliminate Dryness and Rescue the Lung Decoction), 1029
- *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction), 1047

Spleen and Stomach deficiency and cold

- *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), 535
- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

- *Qiong Yu Gao* (Beautiful Jade Paste), 1041

Liver and Kidney deficiencies

- *Hu Qian Wan* (Hidden Tiger Pill), 651

11. 五心热 WU XIN RE (FIVE-CENTER HEAT)

Yin deficiency

- *Qing Gu San* (Cool the Bones Powder), 418

Blood deficiency

- *Si Wu Tang* (Four-Substance Decoction), 562 and *Di Gu Pi* (Cortex Lycii)

Deficiency heat in the ying (nutritive) level

- *Qing Hao Bie Jia Tang* (Artemisia Annua and Soft-Shell Turtle Shell Decoction), 412

Stagnant fire with blocked circulation of yang qi

- *Sheng Yang San Huo Tang* (Raise the Yang and Disperse the Fire Decoction), 858

12. 消渴 XIAO KE (WASTING AND THIRSTING)

Upper jiao

- *Bai Hu Jia Ren Shen Tang* (White Tiger plus Ginseng Decoction), 325
- *Yu Quan Wan* (Jade Spring Pill), 1052
- *Yu Ye Tang* (Jade Fluid Decoction), 1049

Middle jiao

- *Yu Nu Jian* (Jade Woman Decoction), 398
- *Bai Hu Jia Ren Shen Tang* (White Tiger plus Ginseng Decoction), 325

Lower jiao

- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627

Appendix 1 — Cross-reference Based on Traditional Chinese Medicine Diagnosis

- *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet), 668

13. 胸痹 *XIONG BI* (PAINFUL OBSTRUCTION OF THE CHEST)

Cold stagnation in the Heart channel

- *Dang Gui Si Ni Tang* (Tangkuai Decoction for Frigid Extremities), 494
- *Su He Xiang Wan* (Liquid Styrax Pill), 758

Heat and fire

- *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction), 1235

Qi stagnation

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238
- *Si Ni San* (Frigid Extremities Powder), 233
- *Xiao Yao San* (Rambling Powder), 247

Blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879
- *Dan Shen Yin* (Salvia Decoction), 917

Phlegm stagnation

- *Gua Lou Xie Bai Ban Xia Tang* (Trichosanthes Fruit, Chinese Chive, and Pinellia Decoction), 832
- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213
- *Su He Xiang Wan* (Liquid Styrax Pill), 758

Heart qi deficiency

- *Bao Yuan Tang* (Preserve the Basal Decoction), 525
- *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction), 731

Heart yin deficiency

- *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart), 725
- *Suan Zao Ren Tang* (Sour Jujube Decoction), 722
- *Zhi Gan Cao Tang* (Honey-Fried Licorice Decoction), 589

Heart yang deficiency

- *Shen Fu Tang* (Ginseng and Prepared Aconite Decoction), 489

14. 虚劳 *XU LAO* (DEFICIENCY AND DEBILITATION)

Qi deficiency

- *Si Jun Zi Tang* (Four-Gentlemen Decoction), 522
- *Liu Jun Zi Tang* (Six-Gentlemen Decoction), 527
- *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), 535
- *Bu Fei Tang* (Tonify the Lung Decoction), 560

Blood deficiency

- *Si Wu Tang* (Four-Substance Decoction), 562

- *Dang Gui Bu Xue Tang* (Tangkuai Decoction to Tonify the Blood), 580

- *Gui Pi Tang* (Restore the Spleen Decoction), 583

Yin deficiency

- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627
- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645
- *Yi Guan Jian* (Linking Decoction), 657

Yang deficiency

- *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet), 668
- *You Gui Wan* (Restore the Right [Kidney] Pill), 678
- *Huan Shao Dan* (Return to Youth Pill), 681

15. 血瘀 *XUE YU* (BLOOD STASIS)

In the head region

- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction), 877

In the upper jiao

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

In the middle jiao

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885

In the lower jiao

- *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction), 889

Blocking the channels and collaterals

- *Shen Tong Zhu Yu Tang* (Drive Out Blood Stasis from a Painful Body Decoction), 893
- *Huo Luo Xiao Ling Dan* (Fantastically Effective Pill to Invigorate the Collaterals), 914

Blocking the blood vessels

- *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571 and *Yang He Tang* (Yang-Heartening Decoction), 1370

16. 脏燥 *ZANG ZAO* (RESTLESS ORGAN)

- *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction), 731

17. 中风 *ZHONG FENG* (WIND STROKE)

Affecting the channels and collaterals

- *Da Qin Jiao Tang* (Major Gentiana Macrophylla Decoction), 988
- *Qian Zheng San* (Lead to Symmetry Powder), 977
- *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction), 999

Affecting the zang fu organs: bi zheng (closed disorder)

- *Zhi Bao Dan* (Greatest Treasure Special Pill), 749

Appendix 1 — Cross-reference Based on Traditional Chinese Medicine Diagnosis

- *Su He Xiang Wan* (Liquid Styrax Pill), 758
- *Di Tan Tang* (Scour Phlegm Decoction), 1212

Affecting the *zang fu* organs: *tuo zheng* (abandoned syndrome)

- *Shen Fu Tang* (Ginseng and Prepared Aconite Decoction), 489

- *Di Huang Yin Zi* (Rehmannia Decoction), 693

Sequelae

- *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction), 905
- *Di Huang Yin Zi* (Rehmannia Decoction), 693
- *Qian Zheng San* (Lead to Symmetry Powder), 977

1. ABDOMINAL PAIN

Cold

- *Liang Fu Wan* (Galangal and Cyperus Pill), 841
- *Da Huang Fu Zi Tang* (Rhubarb and Prepared Aconite Decoction), 166

Heat

- *Da Cheng Qi Tang* (Major Order the Qi Decoction), 152
- *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction), 158

Deficiency and cold

- *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction), 471
- *Da Jian Zhong Tang* (Major Construct the Middle Decoction), 480
- *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle), 463

Qi stagnation

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238
- *Si Ni San* (Frigid Extremities Powder), 233

Blood stagnation

- *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction), 889

Food stagnation

- *Bao He Wan* (Preserve Harmony Pill), 1266
- *Zhi Shi Dao Zhi Wan* (Immature Bitter Orange Pill to Guide Out Stagnation), 1270

Parasites

- *Wu Mei Wan* (Mume Pill), 1292

2. ACID REFLUX

Heat

- *Zuo Jin Wan* (Left Metal Pill), 389

Cold

- *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum), 531

3. ACNE

- *Qing Shang Fang Feng Tang* (Clear the Upper and Guard the Wind Decoction), 349
- *Huang Lian Shang Qing Wan* (Coptis Pill to Clear the Upper), 347
- *Jing Jie Lian Qiao Tang* (Schizonepeta and Forsythia Decoction), 120
- *Shi Wei Bai Du Tang* (Ten-Ingredient Decoction to Overcome Pathogenic Influences), 1341
- *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins), 1337

4. ADRENOCORTICAL INSUFFICIENCY (ADDISON'S DISEASE)

Qi deficiency

- *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction), 609

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Blood deficiency

- *Si Wu Tang* (Four-Substance Decoction), 562

Spleen and Kidney yang deficiencies

- *You Gui Wan* (Restore the Right [Kidney] Pill), 678
- *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle), 463

Liver and Kidney yin deficiencies

- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627
- *Da Bu Yin Wan* (Great Tonify the Yin Pill), 649

5. ALDOSTERONISM, PRIMARY

Damp-heat

- *Er Miao San* (Two-Marvel Powder), 1188

Spleen and Stomach deficiencies

- *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), 535

Liver and Kidney deficiencies

- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627

6. ALLERGY

- *Xin Yi San* (Magnolia Flower Powder), 84
- *Cang Er Zi San* (Xanthium Powder), 82
- *Xiao Feng San* (Eliminate Wind Powder), 967

7. ALOPECIA

- *Qi Bao Mei Ran Dan* (Seven-Treasure Special Pill for Beautiful Whiskers), 690
- *Shou Wu Pian* (Polygonum Pill), 692

8. AMENORRHEA

Kidney deficiency

- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645

Spleen deficiency

- *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), 535

Qi and blood stagnation

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885
- *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction), 889

Blood stagnation with cold

- *Wen Jing Tang* (Warm the Channels Decoction), 919

9. ANEMIA, APLASTIC

Heat in *ying* (nutritive) and *xue* (blood) levels

- *Xi Jiao Di Huang Tang* (Rhinoceros Horn and Rehmannia Decoction), 333
- *Qing Ying Tang* (Clear the Nutritive Level Decoction), 330

Qi and blood deficiencies

- *Sheng Yu Tang* (Sage-Like Healing Decoction), 567

Spleen and Kidney yang deficiencies

- *You Gui Wan* (Restore the Right [Kidney] Pill), 678

Liver and Kidney yin deficiencies

- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645 and *Er Zhi Wan* (Two-Ultimate Pill), 654

10. ANEMIA, HEMOLYTIC

Damp-heat in the interior

- *Yin Chen Hao Tang* (Artemisia Scoparia Decoction), 1086

Qi and blood deficiencies

- *Gui Pi Tang* (Restore the Spleen Decoction), 583

Spleen and Kidney deficiencies

- *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction), 609

Qi and blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

11. ANEMIA, IRON DEFICIENCY

Liver blood deficiency

- *Si Wu Tang* (Four-Substance Decoction), 562 and *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood), 580

Heart and Spleen deficiencies

- *Si Wu Tang* (Four-Substance Decoction), 562 and *Gui Pi Tang* (Restore the Spleen Decoction), 583

Spleen and Stomach deficiencies

- *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum), 531

Spleen and Kidney deficiencies

- *You Gui Wan* (Restore the Right [Kidney] Pill), 678

Blood stagnation

- *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571

12. ANGINA

Cold stagnation in the Heart channel

- *Dang Gui Si Ni Tang* (Tangkuei Decoction for Frigid Extremities), 494

Qi stagnation

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238

Phlegm stagnation

- *Gua Lou Xie Bai Ban Xia Tang* (Trichosanthes Fruit, Chinese Chive, and Pinellia Decoction), 832

Blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Heart qi deficiency

- *Bao Yuan Tang* (Preserve the Basal Decoction), 525
- *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction), 731

Heart yin deficiency

- *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart), 725

Heart yang deficiency

- *Shen Fu Tang* (Ginseng and Prepared Aconite Decoction), 489

13. ANOREXIA

- *Bao He Wan* (Preserve Harmony Pill), 1266
- *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum), 531
- *Fei Er Wan* (Fat Child Pill), 1296

14. APHONIA

- *Xiang Sheng Po Di San* (Loud Sound Powder for a Broken Flute), 388
- *Bei Mu Gua Lou San* (Fritillaria and Trichosanthes Fruit Powder), 1240

15. APPENDICITIS

- *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction), 1378
- *Da Cheng Qi Tang* (Major Order the Qi Decoction), 152

16. ARRHYTHMIA

Heart qi deficiency

- *Sheng Mai San* (Generate the Pulse Powder), 554

Heart yin deficiency

- *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart), 725

Heart and Spleen deficiencies

- *Gui Pi Tang* (Restore the Spleen Decoction), 583

Liver and Kidney yin deficiencies

- *Yi Guan Jian* (Linking Decoction), 657 and *Suan Zao Ren Tang* (Sour Jujube Decoction), 722

Spleen and Kidney yang deficiencies

- *Li Zhong Tang* (Regulate the Middle Decoction), 462 and *Zhen Wu Tang* (True Warrior Decoction), 1135

Heart and Gallbladder deficiencies

- *Ding Zhi Wan* (Settle the Emotions Pill), 723

Heart yang deficiency

- *Gui Zhi Jia Long Gu Mu Li Tang* (Cinnamon Twig Decoction plus Dragon Bone and Oyster Shell), 798

Water and yin (invisible phlegm) accumulation affecting the Heart

- *Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction), 1131

Blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

17. ARTHRITIS

General

- *Juan Bi Tang* (Remove Painful Obstruction Decoction), 1158
- *San Bi Tang* (Three-Painful Obstruction Decoction), 1167
- *Shang Zhong Xia Tong Yong Tong Feng Wan* (Upper, Middle, and Lower General Use Pill for Wind-Pain), 1175

Neck

- *Ge Gen Tang* (Kudzu Decoction), 59
- *Er Zhu Tang* (Two-Atractylodes Decoction), 1195

Shoulder

- *Ge Gen Tang* (Kudzu Decoction), 59
- *Wu Yao Shun Qi San* (Lindera Powder to Smooth the Flow of Qi), 990

Back

- *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction), 1161
- *Huan Shao Dan* (Return to Youth Pill), 681

Limbs

- *Shu Jing Huo Xue Tang* (Relax the Channels and Invigorate the Blood Decoction), 1169
- *Shu Jin Li An San* (Relax the Tendons and Instill Peace Powder), 1171

Joints

- *Dang Gui Nian Tong Tang* (Tangkuei Decoction to Lift the Pain), 1191
- *Ma Xing Yi Gan Tang* (Ephedra, Apricot Kernel, Coicis, and Licorice Decoction), 43
- *Yi Yi Ren Tang* (Coicis Decoction), 1173
- *Yue Bi Jia Zhu Tang* (Maid servant from Yue Decoction plus Atractylodes), 102
- *Gui Zhi Shao Yao Zhi Mu Tang* (Cinnamon Twig, Peony, and Anemarrhena Decoction), 1186

18. ASCITES

- *Shi Zao Tang* (Ten-Jujube Decoction), 181
- *Zhou Che Wan* (Vessel and Vehicle Pill), 184
- *Shu Zao Yin Zi* (Spread and Unblock Decoction), 185

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

19. ASTHMA

Cold

- *She Gan Ma Huang Tang* (Belamcanda and Ephedra Decoction), 80
- *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction), 74
- *Su Zi Jiang Qi Tang* (Perilla Fruit Decoction for Directing Qi Downward), 842

Heat

- *Ding Chuan Tang* (Arrest Wheezing Decoction), 845
- *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction), 96
- *San Zi Yang Qin Tang* (Three-Seed Decoction to Nourish One's Parents), 1245

Lung deficiency

- *Yu Ping Feng San* (Jade Windscreen Powder), 773

Spleen deficiency

- *Liu Jun Zi Tang* (Six-Gentlemen Decoction), 527
- *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), 535

Kidney deficiency

- *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet), 668
- *Du Qi Wan* (Capital Qi Pill), 644
- *Ren Shen Ge Jie San* (Ginseng and Gecko Powder), 557

20. ATHEROSCLEROSIS

Phlegm obstruction

- *Dao Tan Tang* (Guide Out Phlegm Decoction), 1211
- *Gua Lou Xie Bai Ban Xia Tang* (Trichosanthes Fruit, Chinese Chive, and Pinellia Decoction), 832

Qi and blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879
- *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571
- *Dan Shen Yin* (Salvia Decoction), 917

Liver and Kidney deficiencies

- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627
- *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet), 668

21. BEDWETTING

Lung and Spleen qi deficiencies

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Heart and Kidney disharmony

- *Sang Piao Xiao San* (Mantis Egg-Case Powder), 792

Damp-heat

- *Ba Zheng San* (Eight-Herb Powder for Rectification), 1103

Blood stagnation

- *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction), 889

22. BEHCET'S DISEASE

Damp-heat

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Yin-deficient heat

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

Spleen and Kidney yang deficiencies

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542 and *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet), 668

23. BELL'S PALSY

Wind-cold affecting the channels and collaterals

- *Xiao Xu Ming Tang* (Minor Prolong Life Decoction), 983

Wind-heat affecting the channels and collaterals

- *Da Qin Jiao Tang* (Major Gentiana Macrophylla Decoction), 988

Wind-damp obstructing the channels and collaterals

- *Qian Zheng San* (Lead to Symmetry Powder), 977

Qi deficiency and blood stagnation

- *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction), 905

24. BLEEDING

Hemoptysis

- *Sang Xing Tang* (Mulberry Leaf and Apricot Kernel Decoction), 1027
- *Xie Bai San* (Drain the White Powder), 383
- *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal), 1036

Epistaxis

- *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction), 89
- *Yu Nu Jian* (Jade Woman Decoction), 398
- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Gum bleeding

- *Qing Wei San* (Clear the Stomach Powder), 393 and *San Huang Xie Xin Tang* (Three-Yellow Decoction to Sedate the Epigastrium), 359
- *Yu Nu Jian* (Jade Woman Decoction), 398

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Hematemesis

- *San Huang Xie Xin Tang* (Three-Yellow Decoction to Sedate the Epigastrium), 359 and *Shi Hui San* (Ten Partially-Charred Substances Powder), 939
- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Hematochezia

- *Huang Tu Tang* (Yellow Earth Decoction), 948
- *Huai Hua San* (Sophora Japonica Flower Powder), 944

Hematuria

- *Xiao Ji Yin Zi* (Cirsium Decoction), 946
- *Dao Chi San* (Guide Out the Red Powder), 365

Subcutaneous bleeding

- *Shi Hui San* (Ten Partially-Charred Substances Powder), 939
- *Gui Pi Tang* (Restore the Spleen Decoction), 583

25. BREAST ABSCESS

- *Yi Yi Ren Tang* (Coicis Decoction), 1383
- *Pai Nong San* (Drain the Pus Powder), 1364
- *Shi Liu Wei Liu Qi Yin* (Sixteen-Ingredient Decoction to Flow Qi), 1360
- *Tuo Li Xiao Du Yin* (Drain the Interior and Detoxify Decoction), 1367
- *Xian Fang Huo Ming Yin* (Sublime Formula for Sustaining Life), 1325

26. BRONCHIECTASIS

Wind-heat affecting the Lung

- *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction), 89

Liver fire affecting the Lung

- *Xie Bai San* (Drain the White Powder), 383

Phlegm and heat affecting the Lung

- *Wei Jing Tang* (Reed Decoction), 1377 and *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction), 1235

Yin deficiency and dryness affecting the Lung

- *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal), 1036
- *Mai Men Dong Tang* (Ophiopogonis Decoction), 1043

27. BRONCHITIS

Damp and phlegm

- *Er Chen Tang* (Two-Cured Decoction), 1209 and *San Zi Yang Qin Tang* (Three-Seed Decoction to Nourish One's Parents), 1245

Cold phlegm in the Lung

- *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction), 74

Wind and phlegm affecting the Lung

- *Zhi Sou San* (Stop Coughing Powder), 116

Hot phlegm in the Lung

- *Qing Qi Hua Tan Wan* (Clear the Qi and Transform Phlegm Pill), 1222

Lung qi deficiency

- *Bu Fei Tang* (Tonify the Lung Decoction), 560

Lung and Spleen qi deficiencies

- *Liu Jun Zi Tang* (Six-Gentlemen Decoction), 527

Spleen and Kidney yang deficiencies

- *Si Jun Zi Tang* (Four-Gentlemen Decoction), 522 and *Du Qi Wan* (Capital Qi Pill), 644

28. CANCER (COLON AND RECTUM)

Damp-heat

- *Qing Chang Yin* (Clear the Intestines Drink), 1381 and *Huai Hua San* (Sophora Japonica Flower Powder), 944

Spleen and Kidney yang deficiencies

- *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle), 463 and *Si Shen Wan* (Four-Miracle Pill), 784

Qi and blood deficiencies

- *Ba Zhen Tang* (Eight-Treasure Decoction), 604 and *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood), 580

Liver and Kidney yin deficiencies

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

29. CANCER (ESOPHAGUS)

Qi and phlegm stagnation

- *Xuan Fu Dai Zhe Shi Tang* (Inula and Hematite Decoction), 851

Heat and toxins damaging yin

- *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction), 1047
- *Mai Men Dong Tang* (Ophiopogonis Decoction), 1043

Qi and blood deficiencies

- *Ba Zhen Tang* (Eight-Treasure Decoction), 604

30. CANCER (LIVER)

Spleen qi deficiency

- *Liu Jun Zi Tang* (Six-Gentlemen Decoction), 527

Qi and blood stagnation

- *Xiao Yao San* (Rambling Powder), 247 and *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Blood stagnation with accumulation of dampness, heat and toxins

- *Yin Chen Hao Tang* (Artemisia Scoparia Decoction), 1086 and *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885

Heat and toxins damaging yin

- *Xi Jiao Di Huang Tang* (Rhinoceros Horn and Rehmannia Decoction), 333

Liver and Kidney yin deficiencies

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

31. CANCER (LUNG)

Qi and blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

Accumulation of dampness, phlegm and toxins

- *Dao Tan Tang* (Guide Out Phlegm Decoction), 1211
- *Ting Li Da Zao Xie Fei Tang* (Descurainia and Jujube Decoction to Drain the Lung), 384

Lung and Spleen qi deficiencies

- *Liu Jun Zi Tang* (Six-Gentlemen Decoction), 527
- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Lung and Kidney yin deficiencies

- *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal), 1036
- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627

Qi and yin deficiencies

- *Sheng Mai San* (Generate the Pulse Powder), 554

32. CANCER (PANCREAS)

Liver and Stomach disharmony

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238 and *Xuan Fu Dai Zhe Shi Tang* (Inula and Hematite Decoction), 851

Qi and blood stagnation

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885

Qi and blood deficiencies

- *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction), 609

Yin-deficient heat

- *Yi Guan Jian* (Linking Decoction), 657 and *Gan Lu Yin* (Sweet Dew Decoction), 401

33. CANCER (STOMACH)

Liver and Stomach disharmony

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238 and *Xuan Fu Dai Zhe Shi Tang* (Inula and Hematite Decoction), 851

Stomach heat

- *Qing Wei San* (Clear the Stomach Powder), 393

Food and phlegm stagnation

- *Hai Zao Yu Hu Tang* (Sargassum Decoction for the Jade Flask), 1352

- *Bao He Wan* (Preserve Harmony Pill), 1266

Blood and phlegm stagnation

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885

Spleen and Stomach deficiency and cold

- *Huang Qi Jian Zhong Tang* (Astragalus Decoction to Construct the Middle), 475

Qi and blood deficiencies

- *Ba Zhen Tang* (Eight-Treasure Decoction), 604

34. CARBUNCLES

- *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins), 1337

- *Shi Wei Bai Du Tang* (Ten-Ingredient Decoction to Overcome Pathogenic Influences), 1341

- *Tou Nong San* (Discharge Pus Powder), 1362

- *Niu Bang Jie Ji Tang* (Arctium Decoction to Release the Muscle Layer), 1332

- *Xian Fang Huo Ming Yin* (Sublime Formula for Sustaining Life), 1325

35. CARDIOMYOPATHY, DILATED

Heart toxins

- *Yin Qiao San* (Honeysuckle and Forsythia Powder), 92

Blood stagnation with Heart qi deficiency

- *Sheng Yu Tang* (Sage-Like Healing Decoction), 567 and *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571

Yang deficiency with water accumulation

- *Zhen Wu Tang* (True Warrior Decoction), 1135

36. CEREBRAL EMBOLISM

Wind, phlegm and fire rising

- *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction), 1004

Qi deficiency with blood stagnation

- *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction), 905

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Liver wind rising with phlegm obstructing sensory orifices

- *Su He Xiang Wan* (Liquid Styra Pill), 758

37. CEREBRAL HEMORRHAGE

Affecting the channels and collaterals

- *Da Qin Jiao Tang* (Major Gentiana Macrophylla Decoction), 988
- *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction), 999

Affecting the *zang fu* organs – *bi zheng* (closed disorder)

- *Zhi Bao Dan* (Greatest Treasure Special Pill), 749
- *Su He Xiang Wan* (Liquid Styra Pill), 758

Affecting the *zang fu* organs – *tuo zheng* (abandoned syndrome)

- *Shen Fu Tang* (Ginseng and Prepared Aconite Decoction), 489 and *Sheng Mai San* (Generate the Pulse Powder), 554

38. CEREBRAL INFARCTION

Wind, phlegm and fire rising

- *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction), 1004

Qi deficiency with blood stagnation

- *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction), 905

Liver wind rising with yin deficiency

- *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction), 999

Wind attacking the channels and collaterals

- *Da Qin Jiao Tang* (Major Gentiana Macrophylla Decoction), 988

Liver wind rising with phlegm obstructing sensory orifices

- *Su He Xiang Wan* (Liquid Styra Pill), 758 and *Di Tan Tang* (Scour Phlegm Decoction), 1212

39. CEREBROVASCULAR DISEASE

Liver wind rising with Liver and Kidney yin deficiencies

- *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction), 1004

Wind and phlegm rising with Liver and Kidney yin deficiencies

- *Su He Xiang Wan* (Liquid Styra Pill), 758
- *Di Tan Tang* (Scour Phlegm Decoction), 1212

Qi deficiency with blood stagnation blocking the channels and collaterals

- *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction), 905

40. CHEMOTHERAPY, SUPPORT FOR

- *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction), 609
- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542
- *Ba Zhen Tang* (Eight-Treasure Decoction), 604

41. CHEST PAIN

Qi stagnation

- *Si Ni San* (Frigid Extremities Powder), 233

Blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

Cold stagnation

- *Si Ni Tang* (Frigid Extremities Decoction), 486

Heat and phlegm obstruction

- *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction), 1235
- *Gua Lou Xie Bai Ban Xia Tang* (Trichosanthes Fruit, Chinese Chive, and Pinellia Decoction), 832

42. CHOLECYSTITIS

Liver and Gallbladder qi stagnation

- *Xiao Chai Hu Tang* (Minor Bupleurum Decoction), 206
- *Da Chai Hu Tang* (Major Bupleurum Decoction), 283

Liver and Gallbladder blood stagnation

- *Fu Yuan Huo Xue Tang* (Revive Health by Invigorating the Blood Decoction), 897
- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885

Liver and Gallbladder damp-heat

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Heat and toxins in the Liver

- *Yin Chen Hao Tang* (Artemisia Scoparia Decoction), 1086 and *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), 341

43. CHOLELITHIASIS

Liver and Gallbladder qi stagnation

- *Da Chai Hu Tang* (Major Bupleurum Decoction), 283

Liver and Gallbladder blood stagnation

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885

Liver and Gallbladder damp-heat

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Heat and toxins in the Liver

- *Yin Chen Hao Tang* (Artemisia Scoparia Decoction), 1086 and *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), 341

44. COLITIS, ULCERATIVE

Damp-heat accumulation

- *Bai Tou Weng Tang* (Pulsatilla Decoction), 408

Spleen deficiency with dampness

- *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), 535
- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Spleen and Kidney yang deficiencies

- *Si Shen Wan* (Four-Miracle Pill), 784

Liver qi stagnation and Spleen deficiency

- *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea), 257

Blood stagnation

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885

45. COMA

Bi zheng (closed disorder)

- *Zhi Bao Dan* (Greatest Treasure Special Pill), 749
- *Zi Xue* (Purple Snow), 752
- *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone), 746
- *Ling Jiao Gou Teng Tang* (Antelope Horn and Uncaria Decoction), 993
- *Su He Xiang Wan* (Liquid Styrax Pill), 758

Tuo zheng (abandoned syndrome)

- *Sheng Mai San* (Generate the Pulse Powder), 554
- *Shen Fu Tang* (Ginseng and Prepared Aconite Decoction), 489
- *Di Huang Yin Zi* (Rehmannia Decoction), 693

46. COMMON COLD

Wind-cold

- *Cong Chi Tang* (Scallion and Prepared Soybean Decoction), 112
- *Jing Fang Bai Du San* (Schizonepeta and Saposhnikovia Powder to Overcome Pathogenic Influences), 1334
- *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness), 1156
- *Xing Su San* (Apricot Kernel and Perilla Leaf Powder), 1025

Wind-heat

- *Yin Qiao San* (Honeysuckle and Forsythia Powder), 92
- *Xiang Ru San* (Mosla Powder), 436

- *Sang Xing Tang* (Mulberry Leaf and Apricot Kernel Decoction), 1027

Summer-heat

- *Xin Jia Xiang Ru Yin* (Newly-Augmented Mosla Decoction), 439

Exterior wind with interior deficiency

- *Shen Su Yin* (Ginseng and Perilla Leaf Decoction), 128
- *Bai Du San* (Overcome Pathogenic Influences Powder), 124
- *Cong Bai Qi Wei Yin* (Scallion Decoction with Seven Ingredients), 135
- *Jia Jian Wei Rui Tang* (Modified Polygonatum Odorum Decoction), 137

47. CONGESTIVE HEART FAILURE

Heart and Lung qi deficiencies with phlegm and blood stagnation

- *Sheng Yu Tang* (Sage-Like Healing Decoction), 567 and *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction), 1235

Heart and Kidney yang deficiencies with phlegm accumulation

- *Shen Fu Tang* (Ginseng and Prepared Aconite Decoction), 489 and *Ting Li Da Zao Xie Fei Tang* (Descurainia and Jujube Decoction to Drain the Lung), 384

Heart and Kidney yang deficiencies with water accumulation

- *Zhen Wu Tang* (True Warrior Decoction), 1135 and *Wu Ling San* (Five-Ingredient Powder with Poria), 1109

48. CONJUNCTIVITIS

- *Xi Gan Ming Mu San* (Wash the Liver and Brighten the Eyes Powder), 381
- *Yue Bi Jia Zhu Tang* (Maid-servant from Yue Decoction plus Atractylodes), 102
- *San Huang Xie Xin Tang* (Three-Yellow Decoction to Sedate the Epigastrium), 359
- *Qing Shang Fang Feng Tang* (Clear the Upper and Guard the Wind Decoction), 349
- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

49. CONSTIPATION

Excess

- *Da Cheng Qi Tang* (Major Order the Qi Decoction), 152
- *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction), 158
- *Tiao Wei Cheng Qi Tang* (Regulate the Stomach and Order the Qi Decoction), 160
- *Da Huang Fu Zi Tang* (Rhubarb and Prepared Aconite Decoction), 166

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Deficiency

- *Ma Zi Ren Wan* (Hemp Seed Pill), 174
- *Run Chang Wan* (Moisten the Intestines Pill), 177
- *Ji Chuan Jian* (Benefit the River [Flow] Decoction), 179
- *Zeng Ye Tang* (Increase the Fluids Decoction), 1054

50. CONVULSIONS

Exterior wind

- *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness), 1156

Liver wind rising with heat

- *Ling Jiao Gou Teng Tang* (Antelope Horn and Uncaria Decoction), 993

Liver yang and wind rising

- *Zeng Ye Cheng Qi Tang* (Increase the Fluids and Order the Qi Decoction), 190

Yin deficiency with Liver wind rising

- *San Jia Fu Mai Tang* (Three-Shell Decoction to Restore the Pulse), 1011

Wind and phlegm affecting the channels and collaterals

- *Di Tan Tang* (Scour Phlegm Decoction), 1212

Heat in ying (nutritive) level

- *Qing Ying Tang* (Clear the Nutritive Level Decoction), 330

Blood stagnation

- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction), 877

Qi and blood deficiencies

- *Ba Zhen Tang* (Eight-Treasure Decoction), 604

Wind and toxins attacking the channels and collaterals

- *Yu Zhen San* (True Jade Powder), 981
- *Wu Hu Zhui Feng San* (Five-Tiger Powder to Pursue Wind), 982

51. CORONARY ARTERY DISEASE

Yang qi obstruction

- *Gua Lou Xie Bai Ban Xia Tang* (Trichosanthes Fruit, Chinese Chive, and Pinellia Decoction), 832

Blood stagnation

- *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571
- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

Qi and yin deficiencies

- *Sheng Mai San* (Generate the Pulse Powder), 554

52. COUGH

Wind-cold

- *Xing Su San* (Apricot Kernel and Perilla Leaf Powder), 1025

- *San Ao Tang* (Three-Unbinding Decoction), 43

- *Jin Fei Cao San* (Inula Powder), 49

Wind-heat

- *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction), 89

- *Ning Sou Wan* (Quiet the Cough Pill), 113

Dry-heat

- *Sang Xing Tang* (Mulberry Leaf and Apricot Kernel Decoction), 1027

- *Zhi Sou San* (Stop Coughing Powder), 116

Heat and fire

- *Liang Ge San* (Cool the Diaphragm Powder), 351

Phlegm in the Lung

- *Er Chen Tang* (Two-Cured Decoction), 1209

- *San Zi Yang Qin Tang* (Three-Seed Decoction to Nourish One's Parents), 1245

Lung deficiency

- *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction), 1047

- *Ren Shen Ge Jie San* (Ginseng and Gecko Powder), 557

Lung heat

- *Dun Sou San* (Long-Bout Cough Powder), 115

53. CROHN'S DISEASE

Damp-cold affecting the Spleen

- *Wei Ling Tang* (Calm the Stomach and Poria Decoction), 1113

Damp-heat affecting the Spleen and Stomach

- *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction), 295

Toxic heat affecting the Intestines

- *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins), 1337 and *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction), 158

Blood stagnation affecting the Intestines

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

Spleen deficiency with qi sinking downwards

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

54. CYSTITIS

- *Ba Zheng San* (Eight-Herb Powder for Rectification), 1103

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

55. DEAFNESS

- *Ci Zhu Wan* (Magnetite and Cinnabar Pill), 714

- *Er Long Zuo Ci Wan* (Pill for Deafness that Is Kind to the Left [Kidney]), 633

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction), 877
- *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill), 640

56. DELIRIUM

- *Chai Hu Jia Long Gu Mu Li Tang* (Bupleurum plus Dragon Bone and Oyster Shell Decoction), 715
- *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone), 746
- *Zi Xue* (Purple Snow), 752
- *Xi Jiao Di Huang Tang* (Rhinoceros Horn and Rehmannia Decoction), 333

57. DEMENTIA

Spleen and Kidney deficiencies

- *Huan Shao Dan* (Return to Youth Pill), 681

Liver and Kidney yin deficiencies

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

Blood stagnation

- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction), 877

58. DEPRESSION

Liver qi stagnation

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238
- *Yue Ju Wan* (Escape Restraint Pill), 822
- *Xiao Yao San* (Rambling Powder), 247

Liver heat and fire rising

- *Jia Wei Xiao Yao San* (Augmented Rambling Powder), 254
- *Zuo Jin Wan* (Left Metal Pill), 389

Qi and phlegm stagnation

- *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction), 827
- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213

Blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

Deficiency

- *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction), 731
- *Gui Pi Tang* (Restore the Spleen Decoction), 583
- *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart), 725
- *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill), 640

59. DERMATITIS

Heat and toxins affecting the skin

- *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins), 1337

Damp-cold blocking the channels and collaterals

- *Yang He Tang* (Yang-Heartening Decoction), 1370

Dampness and phlegm blocking the channels and collaterals

- *Er Miao San* (Two-Marvel Powder), 1188

Qi and blood deficiencies

- *Ba Zhen Tang* (Eight-Treasure Decoction), 604

Spleen and Kidney yang deficiencies

- *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet), 668

Liver and Kidney yin deficiencies

- *Mai Wei Di Huang Wan* (Ophiopogonis, Schisandra and Rehmannia Pill), 642

60. DIABETES INSIPIDUS

Lung and Stomach yin deficiencies

- *Bai Hu Jia Ren Shen Tang* (White Tiger plus Ginseng Decoction), 325

Lung and Kidney yin deficiencies

- *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction), 1047

Qi and body fluid deficiencies

- *Sheng Mai San* (Generate the Pulse Powder), 554

Kidney yin deficiency

- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627

Kidney yin and yang deficiencies

- *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet), 668

61. DIABETES MELLITUS

Yin deficiency with dryness and heat

- *Xiao Ke Fang* (Wasting and Thirsting Formula), 1051

Qi and yin deficiencies

- *Sheng Mai San* (Generate the Pulse Powder), 554

Stomach heat

- *Yu Nu Jian* (Jade Woman Decoction), 398

Kidney yin deficiency

- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627

Kidney yin and yang deficiencies

- *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet), 668

Qi and blood stagnation

- *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

62. DIARRHEA

Damp-cold from the exterior

- *Huo Xiang Zheng Qi San* (Agastache Powder to Rectify the Qi), 1079
- *Ping Wei San* (Calm the Stomach Powder), 1068

Damp-heat from the exterior

- *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction), 295
- *Xin Jia Xiang Ru Yin* (Newly-Augmented Mosla Decoction), 439
- *Liu Yi San* (Six-to-One Powder), 441

Food stagnation

- *Bao He Wan* (Preserve Harmony Pill), 1266

Liver overacting on the Spleen and Stomach

- *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea), 257

Spleen and Stomach deficiencies

- *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), 535
- *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle), 463
- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Kidney yang deficiency

- *Si Shen Wan* (Four-Miracle Pill), 784

63. DIPHTHERIA

- *Liu Shen Wan* (Six-Miracle Pill), 363
- *Yang Yin Qing Fei Tang* (Nourish the Yin and Clear the Lung Decoction), 1033

64. DISSEMINATED INTRAVASCULAR COAGULATION (DIC)

Heat in *ying* (nutritive) and *xue* (blood) level

- *Xi Jiao Di Huang Tang* (Rhinceros Horn and Rehmannia Decoction), 333

Blood stagnation in the channels and collaterals

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

Blood stagnation with yin deficiency

- *Sheng Yu Tang* (Sage-Like Healing Decoction), 567

Blood stagnation with yang deficiency

- *Hui Yang Jiu Ji Tang* (Restore and Revive the Yang Decoction), 490

65. DIZZINESS

Liver wind rising

- *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction), 1004
- *Da Ding Feng Zhu* (Major Arrest Wind Pearl), 1009

Liver fire rising

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371
- *Dang Gui Long Hui Wan* (Tangkuei, Gentiana, and Aloe Pill), 379

Phlegm accumulation

- *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction), 1247
- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213

Blood stagnation

- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction), 877
- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

Qi and blood deficiencies

- *Gui Pi Tang* (Restore the Spleen Decoction), 583
- *Ba Zhen Tang* (Eight-Treasure Decoction), 604
- *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction), 609

Kidney deficiency

- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645
- *You Gui Wan* (Restore the Right [Kidney] Pill), 678

66. DYSENTERY

Damp-heat

- *Shao Yao Tang* (Peony Decoction), 402
- *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction), 295
- *Bai Tou Weng Tang* (Pulsatilla Decoction), 408

Damp-cold

- *Wei Ling Tang* (Calm the Stomach and Poria Decoction), 1113
- *Bu Huan Jin Zheng Qi San* (Rectify the Qi Powder Worth More than Gold), 1075

Deficiency and cold

- *Li Zhong Tang* (Regulate the Middle Decoction), 462
- *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle), 463
- *Tao Hua Tang* (Peach Blossom Decoction), 787
- *Zhen Ren Yang Zang Tang* (True Man's Decoction for Nourishing the Organs), 781

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

67. DYSMENORRHEA

Qi and blood deficiencies

- *Huang Qi Jian Zhong Tang* (Astragalus Decoction to Construct the Middle), 475 with *Dang Gui* (*Radix Angelicae Sinensis*) and *Dang Shen* (*Radix Codonopsis*)

Qi and blood stagnation

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885
- *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction), 889

Blood stagnation with cold

- *Wen Jing Tang* (Warm the Channels Decoction), 919

68. DYSURIA

Re lin (heat dysuria)

- *Ba Zheng San* (Eight-Herb Powder for Rectification), 1103

Qi lin (qi dysuria)

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Xue lin (bloody dysuria)

- *Xiao Ji Yin Zi* (*Cirsium* Decoction), 946
- *Zhi Bai Di Huang Wan* (*Anemarrhena*, *Phellodendron*, and *Rehmannia* Pill), 636

Gao lin (cloudy dysuria)

- *Bi Xie Fen Qing Yin* (*Dioscorea Hypoglauca* Decoction to Separate the Clear), 1140
- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with *Rehmannia*), 627

Lao lin (fatigue dysuria)

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542
- *Zhi Bai Di Huang Wan* (*Anemarrhena*, *Phellodendron*, and *Rehmannia* Pill), 636

69. ECZEMA

- *Xiao Feng San* (Eliminate Wind Powder), 967
- *Wen Qing Yin* (Warming and Clearing Decoction), 575
- *Dang Gui Yin Zi* (*Tangkuei* Decoction), 970
- *Qing Shang Fang Feng Tang* (Clear the Upper and Guard the Wind Decoction), 349

70. EDEMA

Wind affecting the Lung

- *Yue Bi Jia Zhu Tang* (Maid-servant from Yue Decoction plus *Atractylodes*), 102

Heart yang deficiency

- *Zhen Wu Tang* (True Warrior Decoction), 1135

Water accumulation in the Urinary Bladder

- *Wu Ling San* (Five-Ingredient Powder with *Poria*), 1109
- *Wei Ling Tang* (Calm the Stomach and *Poria* Decoction), 1113

Kidney yang deficiency

- *Ji Sheng Shen Qi Wan* (Kidney Qi Pill from Formulas that Aid the Living), 675

Spleen yang deficiency

- *Shen Ling Bai Zhu San* (*Ginseng*, *Poria*, and *Atractylodes Macrocephala* Powder), 535
- *Shi Pi San* (Bolster the Spleen Powder), 1138

Spleen deficiency and damp accumulation

- *Wu Pi San* (Five-Peel Powder), 1121

71. EMPHYSEMA

Phlegm and heat in the Lung

- *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (*Ephedra*, *Apricot Kernel*, *Licorice*, and *Gypsum* Decoction), 96 and *Qing Qi Hua Tan Wan* (Clear the Qi and Transform Phlegm Pill), 1222
- *She Gan Ma Huang Tang* (*Belamcanda* and *Ephedra* Decoction), 80

Exterior cold and interior yin (invisible phlegm)

- *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction), 74

Phlegm and blood stasis in the interior

- *Ting Li Da Zao Xie Fei Tang* (*Descurainia* and *Jujube* Decoction to Drain the Lung), 384 and *Tao Hong Si Wu Tang* (Four-Substance Decoction with *Safflower* and *Peach Pit*), 571

Lung and Kidney deficiencies

- *Ren Shen Hu Tao Tang* (*Ginseng* and *Walnut* Decoction), 559
- *Ren Shen Ge Jie San* (*Ginseng* and *Gecko* Powder), 557 and *Bu Fei Tang* (Tonify the Lung Decoction), 560

Water accumulation and yang deficiency

- *Zhen Wu Tang* (True Warrior Decoction), 1135 and *Wu Ling San* (Five-Ingredient Powder with *Poria*), 1109

72. ENDOCARDITIS, INFECTIVE

Wind-heat

- *Yin Qiao San* (*Honeysuckle* and *Forsythia* Powder), 92

Heat in qi (energy) level

- *Bai Hu Tang* (White Tiger Decoction), 321

Heat in ying (nutritive) level

- *Qing Ying Tang* (Clear the Nutritive Level Decoction), 330

Zheng (upright) qi deficiency

- *Zhu Ye Shi Gao Tang* (*Bamboo Leaves* and *Gypsum* Decoction), 326

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

73. ENDOMETRIOSIS

- *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction), 889
- *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill), 928
- *Shi Xiao San* (Sudden Smile Powder), 911

74. ENTERITIS

- *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction), 295
- *Huo Xiang Zheng Qi San* (Agastache Powder to Rectify the Qi), 1079
- *Bai Tou Weng Tang* (Pulsatilla Decoction), 408
- *Shao Yao Tang* (Peony Decoction), 402
- *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea), 257

75. ENURESIS

Lung and Spleen qi deficiencies

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Heart and Kidney disharmony

- *Sang Piao Xiao San* (Mantis Egg-Case Powder), 792

Damp-heat

- *Ba Zheng San* (Eight-Herb Powder for Rectification), 1103

Blood stagnation

- *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction), 889

76. EPIGASTRIC PAIN

Stomach cold

- *Liang Fu Wan* (Galangal and Cyperus Pill), 841
- *Xiang Su San* (Cyperus and Perilla Leaf Powder), 67
- *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium), 261

Food stagnation

- *Bao He Wan* (Preserve Harmony Pill), 1266

Liver overacting on the Spleen and Stomach

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238

Stomach heat

- *Zuo Jin Wan* (Left Metal Pill), 389

Blood stagnation

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885
- *Shi Xiao San* (Sudden Smile Powder), 911 and *Dan Shen Yin* (Salvia Decoction), 917

Spleen and Stomach deficiency and cold

- *Huang Qi Jian Zhong Tang* (Astragalus Decoction to Construct the Middle), 475

- *Da Jian Zhong Tang* (Major Construct the Middle Decoction), 480

Spleen and Stomach yin deficiencies

- *Zhu Ye Shi Gao Tang* (Bamboo Leaves and Gypsum Decoction), 326 and *Mai Men Dong Tang* (Ophiopogonis Decoction), 1043

77. ERYSIPELAS

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371
- *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), 341
- *Shi Wei Bai Du Tang* (Ten-Ingredient Decoction to Overcome Pathogenic Influences), 1341
- *Pu Ji Xiao Du Yin* (Universal Benefit Decoction to Eliminate Toxin), 355

78. FEVER

Exterior condition

- *Jing Fang Bai Du San* (Schizonepeta and Saposhnikovia Powder to Overcome Pathogenic Influences), 1334
- *Yin Qiao San* (Honeysuckle and Forsythia Powder), 92

Lung heat

- *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction), 96

Stomach heat

- *Bai Hu Tang* (White Tiger Decoction), 321

Liver heat

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Gallbladder heat

- *Da Chai Hu Tang* (Major Bupleurum Decoction), 283

Yin-deficient heat

- *Qing Gu San* (Cool the Bones Powder), 418
- *Da Bu Yin Wan* (Great Tonify the Yin Pill), 649
- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

Qi and blood deficiencies

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542
- *Gui Pi Tang* (Restore the Spleen Decoction), 583
- *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood), 580

Stagnant heat in the Liver channel

- *Jia Wei Xiao Yao San* (Augmented Rambling Powder), 254
- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Blood stagnation in the interior

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

79. FORGETFULNESS

Heart and Spleen deficiencies

- *Gui Pi Tang* (Restore the Spleen Decoction), 583

Kidney jing (essence) deficiency

- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627

Phlegm accumulation

- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213
- *Dao Tan Tang* (Guide Out Phlegm Decoction), 1211

Liver qi stagnation

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238

80. FRECKLES

- *Dang Gui Shao Yao San* (Tangkuei and Peony Powder), 594 with *Yi Yi Ren* (Semen Coicis)
- *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill), 928 with *Yi Yi Ren* (Semen Coicis)

81. FROSTBITE

- *Gui Zhi Tang* (Cinnamon Twig Decoction), 51
- *Dang Gui Si Ni Tang* (Tangkuei Decoction for Frigid Extremities), 494

82. FURUNCLES

- *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins), 1337
- *Shi Wei Bai Du Tang* (Ten-Ingredient Decoction to Overcome Pathogenic Influences), 1341
- *Niu Bang Jie Ji Tang* (Arctium Decoction to Release the Muscle Layer), 1332
- *Xian Fang Huo Ming Yin* (Sublime Formula for Sustaining Life), 1325

83. GASTRECTASIS

- *Li Zhong Wan* (Regulate the Middle Pill), 459
- *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle), 463

84. GASTRITIS, CHRONIC

Liver and Stomach disharmony

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238

Spleen and Stomach deficiencies

- *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum), 531

Stomach yin deficiency

- *Mai Men Dong Tang* (Ophiopogonis Decoction), 1043

Blood stagnation

- *Shi Xiao San* (Sudden Smile Powder), 911 and *Dan Shen Yin* (Salvia Decoction), 917

Liver and Stomach damp-heat

- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213 and *Zuo Jin Wan* (Left Metal Pill), 389

85. GASTROENTERITIS

Damp accumulation

- *Ping Wei San* (Calm the Stomach Powder), 1068

Stomach cold with heat in the chest

- *Huang Lian Tang* (Coptis Decoction), 271

Exterior wind-cold with interior dampness

- *Huo Xiang Zheng Qi San* (Agastache Powder to Rectify the Qi), 1079

86. GASTROPTOSIS

Spleen deficiency with qi sinking downward

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Liver overacting on the Stomach

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238

87. GINGIVITIS

- *Bai Hu Tang* (White Tiger Decoction), 321
- *Yu Nu Jian* (Jade Woman Decoction), 398
- *Gan Lu Yin* (Sweet Dew Decoction), 401
- *Qing Wei San* (Clear the Stomach Powder), 393

88. GLAUCOMA

- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627
- *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia), 672
- *Ming Mu Di Huang Wan* (Improve Vision Pill with Rehmannia), 633
- *Zi Shen Ming Mu Tang* (Nourish the Kidney to Brighten the Eyes Decoction), 664

89. GLOMERULONEPHRITIS, ACUTE

Wind and water accumulation

- *Yue Bi Jia Zhu Tang* (Maid-servant from Yue Decoction plus Atractylodes), 102

Water and dampness accumulation

- *Wei Ling Tang* (Calm the Stomach and Poria Decoction), 1113

Damp-heat in the interior

- *Shu Zao Yin Zi* (Spread and Unblock Decoction), 185

Damp-heat in the Urinary Bladder

- *Xiao Ji Yin Zi* (Cirsium Decoction), 946

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

90. GLOMERULONEPHRITIS, CHRONIC

Spleen deficiency with dampness

- *Fang Ji Huang Qi Tang* (Stephania and Astragalus Decoction), 1118

Kidney qi deficiency

- *Ji Sheng Shen Qi Wan* (Kidney Qi Pill from Formulas that Aid the Living), 675

Liver and Kidney yin deficiencies

- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627

Damp-heat accumulation

- *San Ren Tang* (Three-Nut Decoction), 1092

91. GOITER

- *Hai Zao Yu Hu Tang* (Sargassum Decoction for the Jade Flask), 1352
- *Dao Tan Tang* (Guide Out Phlegm Decoction), 1211
- *Xiao Luo Wan* (Reduce Scrofula Pill), 1355

94. HALITOSIS

- *Qing Wei San* (Clear the Stomach Powder), 393
- *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium), 261
- *Gan Cao Xie Xin Tang* (Licorice Decoction to Drain the Epigastrium), 269

95. HEADACHE

Wind-cold

- *Chuan Xiong Cha Tiao San* (Ligusticum Chuanxiong Powder to be Taken with Green Tea), 973
- *Wu Zhu Yu Tang* (Evodia Decoction), 467

Wind-heat

- *Huang Lian Shang Qing Wan* (Coptis Pill to Clear the Upper), 347

Wind-damp

- *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness), 1156

Liver yang rising

- *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction), 1004

Kidney deficiency

- *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill), 640

Qi and blood deficiencies

- *Ba Zhen Tang* (Eight-Treasure Decoction), 604

Phlegm obstruction

- *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction), 1247

Blood stasis

- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction), 877
- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

96. HEAT STROKE

Bi zheng (closed disorder)

- *Bai Hu Tang* (White Tiger Decoction), 321

Tuo zheng (abandoned syndrome)

- *Sheng Mai San* (Generate the Pulse Powder), 554

Unconsciousness

- *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone), 746
- *Zhi Bao Dan* (Greatest Treasure Special Pill), 749
- *Zi Xue Dan* (Purple Snow Pill), 752

Liver wind rising

- *San Jia Fu Mai Tang* (Three-Shell Decoction to Restore the Pulse), 1011

97. HEMIPLEGIA

- *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction), 905
- *Qian Zheng San* (Lead to Symmetry Powder), 977

98. HEMORRHOIDS

- *Yi Zi Tang* (Yi Word Decoction), 164
- *Qing Chang Tang* (Clear the Intestines Decoction), 165

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

- *Huai Hua San* (Sophora Japonica Flower Powder), 944
- *Huai Jiao Wan* (Sophora Japonica Fruit Pill), 946

99. HEPATITIS

Damp-heat in the Liver

- *Xiao Chai Hu Tang* (Minor Bupleurum Decoction), 206
- *Da Chai Hu Tang* (Major Bupleurum Decoction), 283

Damp-heat in the Liver and Gallbladder

- *Yin Chen Hao Tang* (Artemisia Scoparia Decoction), 1086
- *Yin Chen Wu Ling San* (Artemisia Scoparia and Five-Ingredient Powder with Poria), 1090

Liver qi stagnation

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238

Liver yin deficiency

- *Yi Guan Jian* (Linking Decoction), 657

100. HEPATO-CIRRHOSIS

Qi stagnation

- *Xiao Chai Hu Tang* (Minor Bupleurum Decoction), 206 and *Jia Wei Xiao Yao San* (Augmented Rambling Powder), 254

Qi stagnation and dampness accumulation

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238 and *Ping Wei San* (Calm the Stomach Powder), 1068

Water and dampness accumulation

- *Wei Ling Tang* (Calm the Stomach and Poria Decoction), 1113
- *Shi Pi San* (Bolster the Spleen Powder), 1138

Liver and Spleen blood stagnation

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885
- *Bie Jia Jian Wan* (Soft-Shelled Turtle Shell Pill), 935

Spleen and Kidney yang deficiencies

- *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle), 463 and *Wu Ling San* (Five-Ingredient Powder with Poria), 1109

Liver and Kidney yin deficiencies

- *Yi Guan Jian* (Linking Decoction), 657 and *Zhu Ling Tang* (Polyporus Decoction), 1115

101. HERNIAL PAIN

Deficiency and cold

- *Nuan Gan Jian* (Warm the Liver Decoction), 838

Damp-cold

- *Wu Ling San* (Five-Ingredient Powder with Poria), 1109

Damp and phlegm accumulation

- *Ju He Wan* (Tangerine Seed Pill), 833

Liver qi stagnation

- *Tian Tai Wu Yao San* (Top-Quality Lindera Powder), 835

Heat and phlegm accumulation

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371 and *Ju He Wan* (Tangerine Seed Pill), 833

102. HERPES

Wind-heat (oral)

- *Yin Qiao San* (Honeysuckle and Forsythia Powder), 92

Damp-heat (genital)

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Qi and blood stagnation (neuralgia)

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238
- *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571

103. HICCUPS

- *Ju Pi Zhu Ru Tang* (Tangerine Peel and Bamboo Shaving Decoction), 854
- *Ding Xiang Shi Di Tang* (Clove and Persimmon Calyx Decoction), 856

104. HYPERCORTISOLISM

Damp-heat in the Liver and Gallbladder

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Liver and Kidney yin deficiencies

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

Yin and yang deficiencies

- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645 and *You Gui Wan* (Restore the Right [Kidney] Pill), 678

105. HYPERLIPIDEMIA

Phlegm accumulation

- *Dao Tan Tang* (Guide Out Phlegm Decoction), 1211

Stomach heat

- *Bao He Wan* (Preserve Harmony Pill), 1266 and *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction), 158

Qi and blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

Liver qi stagnation

- *Xiao Yao San* (Rambling Powder), 247

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Liver and Kidney yin deficiencies

- *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill), 640

Spleen and Kidney yang deficiencies

- *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle), 463

106. HYPERSOMNIA

Phlegm accumulation

- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213

Spleen qi deficiency

- *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum), 531

Yang qi deficiency

- *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle), 463

Blood stagnation

- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction), 877

107. HYPERTENSION, PRIMARY

Liver yang rising

- *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction), 1004

Liver heat and fire rising

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Wind and phlegm rising

- *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction), 1247

Liver and Kidney yin deficiencies

- *Yi Guan Jian* (Linking Decoction), 657
- *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill), 640

Yin and yang deficiencies

- *Er Xian Tang* (Two-Immortal Decoction), 684

Blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

108. HYPERTHYROIDISM

Liver fire rising

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371
- *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction), 999

Qi stagnation and phlegm accumulation

- *Xiao Yao San* (Rambling Powder), 247 and *Er Chen Tang* (Two-Cured Decoction), 1209

Heart and Liver yin deficiencies

- *Yi Guan Jian* (Linking Decoction), 657

Heart and Kidney yin deficiencies

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

Liver and Kidney yin deficiencies with yang rising

- *San Jia Fu Mai Tang* (Three-Shell Decoction to Restore the Pulse), 1011

Qi and yin deficiencies

- *Sheng Mai San* (Generate the Pulse Powder), 554

109. HYPOCHONDRIAC PAIN

Liver qi stagnation

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238
- *Jin Ling Zi San* (Melia Toosendan Powder), 825
- *Zuo Jin Wan* (Left Metal Pill), 389

Blood stasis

- *Fu Yuan Huo Xue Tang* (Revive Health by Invigorating the Blood Decoction), 897
- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879
- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885

Damp-heat in the Liver and Gallbladder

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Liver yin deficiency

- *Yi Guan Jian* (Linking Decoction), 657

110. HYPOTENSION

Qi deficiency

- *Si Jun Zi Tang* (Four-Gentlemen Decoction), 522
- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Blood deficiency

- *Dang Gui Shao Yao San* (Tangkuei and Peony Powder), 594

Qi and blood deficiencies

- *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction), 609

Yang deficiency

- *Zhen Wu Tang* (True Warrior Decoction), 1135
- *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia), 672

111. HYPOTHYROIDISM

Spleen qi deficiency

- *Si Jun Zi Tang* (Four-Gentlemen Decoction), 522

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Spleen and Kidney yang deficiencies

- *Si Jun Zi Tang* (Four-Gentlemen Decoction), 522 and *Ji Sheng Shen Qi Wan* (Kidney Qi Pill from Formulas that Aid the Living), 675

Heart and Kidney yang deficiencies

- *Ji Sheng Shen Qi Wan* (Kidney Qi Pill from Formulas that Aid the Living), 675 and *Bao Yuan Tang* (Preserve the Basal Decoction), 525

Yang qi deficiency

- *Si Ni Jia Ren Shen Tang* (Frigid Extremities Decoction plus Ginseng), 488
- *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet), 668

112. HYSTEROMYOMA

- *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill), 928
- *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction), 889

113. IMPETIGO

- *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), 341
- *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins), 1337

114. IMPOTENCE

Ming men (life gate) fire deficiency

- *You Gui Wan* (Restore the Right [Kidney] Pill), 678

Heart and Spleen deficiencies

- *Gui Pi Tang* (Restore the Spleen Decoction), 583

Liver qi stagnation

- *Xiao Yao San* (Rambling Powder), 247

Damp-heat

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

115. INDIGESTION

Food stagnation

- *Bao He Wan* (Preserve Harmony Pill), 1266
- *Ping Wei San* (Calm the Stomach Powder), 1068

Qi stagnation

- *Yue Ju Wan* (Escape Restraint Pill), 822

Spleen and Stomach deficiencies

- *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum), 531
- *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), 535

Liver overacting on the Spleen and Stomach

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238
- *Zuo Jin Wan* (Left Metal Pill), 389

116. INFECTION (UPPER RESPIRATORY TRACT)

Wind-cold

- *Jing Fang Bai Du San* (Schizonepeta and Saposhnikovia Powder to Overcome Pathogenic Influences), 1334
- *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness), 1156
- *Xing Su San* (Apricot Kernel and Perilla Leaf Powder), 1025

Wind-heat

- *Yin Qiao San* (Honeysuckle and Forsythia Powder), 92

Summer-heat

- *Xin Jia Xiang Ru Yin* (Newly-Augmented Mosla Decoction), 439

Exterior cold and interior heat

- *Shuang Jie Tong Sheng San* (Double Relieve Powder that Sagely Unblocks), 294

With interior deficiency

- *Shen Su Yin* (Ginseng and Perilla Leaf Decoction), 128
- *Jia Jian Wei Rui Tang* (Modified Polygonatum Odoratum Decoction), 137

117. INFERTILITY, FEMALE

Kidney deficiency

- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645
- *You Gui Wan* (Restore the Right [Kidney] Pill), 678

Deficiency and cold

- *Ai Fu Nuan Gong Wan* (Mugwort and Cyperus Pill for Warming the Womb), 923

Qi and blood stagnation

- *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction), 889

118. INFERTILITY, MALE

Kidney deficiency

- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645
- *You Gui Wan* (Restore the Right [Kidney] Pill), 678
- *Huan Shao Dan* (Return to Youth Pill), 681

Liver qi stagnation

- *Ju He Wan* (Tangerine Seed Pill), 833
- *Tian Tai Wu Yao San* (Top-Quality Lindera Powder), 835

119. INFLUENZA

Wind-cold

- *Cong Chi Tang* (Scallion and Prepared Soybean Decoction), 112
- *Jing Fang Bai Du San* (Schizonepeta and Saposhnikovia Powder to Overcome Pathogenic Influences), 1334
- *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness), 1156

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Wind-heat

- *Yin Qiao San* (Honeysuckle and Forsythia Powder), 92
- *Sang Xing Tang* (Mulberry Leaf and Apricot Kernel Decoction), 1027
- *Xin Jia Xiang Ru Yin* (Newly-Augmented Mosla Decoction), 439

Exterior wind with interior deficiency

- *Shen Su Yin* (Ginseng and Perilla Leaf Decoction), 128
- *Bai Du San* (Overcome Pathogenic Influences Powder), 124
- *Jia Jian Wei Rui Tang* (Modified Polygonatum Odorum Decoction), 137

Heart and Gallbladder qi deficiencies

- *Ding Zhi Wan* (Settle the Emotions Pill), 723
- *Suan Zao Ren Tang* (Sour Jujube Decoction), 722

121. INTESTINAL ABSCESS

Early stage of abscesses

- *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction), 1378

Middle stage of abscesses

- *Xian Fang Huo Ming Yin* (Sublime Formula for Sustaining Life), 1325 and *Da Huang Mu Dan Tang* (Rhubarb and Moutan Decoction), 1378

Late stage of abscesses

- *Fu Fang Da Cheng Qi Tang* (Revised Major Order the Qi Decoction), 155

122. INTESTINAL OBSTRUCTION

- *Da Cheng Qi Tang* (Major Order the Qi Decoction), 152

- *Da Xian Xiong Tang* (Major Sinking into the Chest Decoction), 161
- *Da Chai Hu Tang* (Major Bupleurum Decoction), 283

123. IRRITABLE BOWEL SYNDROME

Liver qi stagnation with Spleen deficiency

- *Tong Xie Yao Fang* (Important Formula for Painful Diarrhea), 257

Yin and fluids deficiencies in the Intestines

- *Yi Guan Jian* (Linking Decoction), 657

Damp-heat obstruction

- *Ban Xia Xie Xin Tang* (Pinellia Decoction to Drain the Epigastrium), 261

Damp-cold obstruction

- *Hou Po Wen Zhong Tang* (Magnolia Bark Decoction for Warming the Middle), 840

Spleen qi deficiency

- *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), 535

Spleen and Kidney yang deficiencies

- *Si Shen Wan* (Four-Miracle Pill), 784

124. JAUNDICE

Damp-heat

- *Yin Chen Hao Tang* (Artemisia Scoparia Decoction), 1086
- *Yin Chen Wu Ling San* (Artemisia Scoparia and Five-Ingredient Powder with Poria), 1090
- *Gan Lu Xiao Du Dan* (Sweet Dew Special Pill to Eliminate Toxins), 1096
- *Da Chai Hu Tang* (Major Bupleurum Decoction), 283

Damp-cold

- *Yin Chen Si Ni Tang* (Artemisia Scoparia Decoction for Frigid Extremities), 1089

Liver blood stagnation

- *Bie Jia Jian Wan* (Soft-Shelled Turtle Shell Pill), 935

Qi and blood deficiencies

- *Xiao Jian Zhong Tang* (Minor Construct the Middle Decoction), 471

125. KYPHOSIS

- *Yu Zhen San* (True Jade Powder), 981
- *Wu Hu Zhui Feng San* (Five-Tiger Powder to Pursue Wind), 982

126. LARYNGITIS

- *Yin Qiao San* (Honeysuckle and Forsythia Powder), 92
- *Xiang Sheng Po Di San* (Loud Sound Powder for a Broken Flute), 388
- *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction), 827

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

127. LEUKEMIA

Heat and toxins

- *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), 341 and *Qing Ying Tang* (Clear the Nutritive Level Decoction), 330

Yin-deficient fire

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636 and *Er Zhi Wan* (Two-Ultimate Pill), 654

Damp-heat accumulation and blood stagnation

- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213 and *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571

Damp-heat in the interior

- *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction), 295

Heat and toxins

- *Qing Ying Tang* (Clear the Nutritive Level Decoction), 330 and *Xi Jiao Di Huang Tang* (Rhinoceros Horn and Rehmannia Decoction), 333

Blood stagnation

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885

Qi and blood deficiencies

- *Ba Zhen Tang* (Eight-Treasure Decoction), 604

129. LEUKEMIA, LYMPHOCYTIC

Blood stagnation

- *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571

Qi and yin deficiencies

- *Si Jun Zi Tang* (Four-Gentlemen Decoction), 522 and *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction), 1047

130. LEUKOPENIA

Qi and blood deficiencies

- *Gui Pi Tang* (Restore the Spleen Decoction), 583
- *Ba Zhen Tang* (Eight-Treasure Decoction), 604

Spleen and Kidney deficiencies

- *Huang Qi Jian Zhong Tang* (Astragalus Decoction to Construct the Middle), 475 and *You Gui Wan* (Restore the Right [Kidney] Pill), 678

Qi and yin deficiencies

- *Sheng Mai San* (Generate the Pulse Powder), 554

Liver and Kidney yin deficiencies

- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627

131. LEUKORRHEA

Damp-heat

- *Er Miao San* (Two-Marvel Powder), 1188
- *Ba Wei Dai Xia Fang* (Eight-Ingredient Formula for Leukorrhea), 810

Yin-deficient fire

- *Gu Jing Wan* (Stabilize the Menses Pill), 802

Liver qi stagnation

- *Xiao Yao San* (Rambling Powder), 247
- *Jia Wei Xiao Yao San* (Augmented Rambling Powder), 254

Spleen qi deficiency and Liver qi stagnation

- *Wan Dai Tang* (End Discharge Decoction), 806

132. LOSS OF VOICE

Exterior

- *San Ao Tang* (Three-Unbinding Decoction), 43
- *Xing Su San* (Apricot Kernel and Perilla Leaf Powder), 1025
- *Xiang Sheng Po Di San* (Loud Sound Powder for a Broken Flute), 388
- *Sang Xing Tang* (Mulberry Leaf and Apricot Kernel Decoction), 1027

Interior

- *Qing Zao Jiu Fei Tang* (Eliminate Dryness and Rescue the Lung Decoction), 1029
- *Mai Wei Di Huang Wan* (Ophiopogonis, Schisandra and Rehmannia Pill), 642

133. LOW BACK PAIN

Damp-cold

- *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction), 1161

Damp-heat

- *Er Miao San* (Two-Marvel Powder), 1188

Blood stagnation

- *Shen Tong Zhu Yu Tang* (Drive Out Blood Stasis from a Painful Body Decoction), 893

Kidney deficiency

- *You Gui Wan* (Restore the Right [Kidney] Pill), 678
- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645
- *Huan Shao Dan* (Return to Youth Pill), 681

134. LUNG ABSCESS

Early stage of abscesses

- *Yin Qiao San* (Honeysuckle and Forsythia Powder), 92

Middle stage of abscesses

- *Wei Jing Tang* (Reed Decoction), 1377

Late stage of abscesses

- *Jie Geng Tang* (Platycodon Decoction), 1230 and *Wei Jing Tang* (Reed Decoction), 1377

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Recovery stage of abscesses

- *Qing Zao Jiu Fei Tang* (Eliminate Dryness and Rescue the Lung Decoction), 1029
- *Zhu Ye Shi Gao Tang* (Bamboo Leaves and Gypsum Decoction), 326

135. LUNG ATROPHY

- *Zhu Ye Shi Gao Tang* (Bamboo Leaves and Gypsum Decoction), 326
- *Mai Men Dong Tang* (Ophiopogonis Decoction), 1043
- *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal), 1036

136. LUNG DISTENTION

Phlegm accumulation in the Lung

- *Su Zi Jiang Qi Tang* (Perilla Fruit Decoction for Directing Qi Downward), 842
- *San Zi Yang Qin Tang* (Three-Seed Decoction to Nourish One's Parents), 1245

Heat and phlegm in the Lung

- *Di Tan Tang* (Scour Phlegm Decoction), 1212

Cold and phlegm in the Lung

- *Xiao Qing Long Tang* (Minor Bluegreen Dragon Decoction), 74

Phlegm blocking sensory orifices

- *Di Tan Tang* (Scour Phlegm Decoction), 1212
- *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone), 746
- *Zhi Bao Dan* (Greatest Treasure Special Pill), 749

Lung and Kidney deficiencies

- *Ren Shen Ge Jie San* (Ginseng and Gecko Powder), 557
- *Bu Fei Tang* (Tonify the Lung Decoction), 560

137. LYMPHADENITIS

- *Pu Ji Xiao Du Yin* (Universal Benefit Decoction to Eliminate Toxin), 355
- *Xiao Luo Wan* (Reduce Scrofula Pill), 1355

138. LYMPHOMA

Toxic heat

- *Qing Wen Bai Du Yin* (Clear Epidemics and Overcome Pathogenic Influences Decoction), 337

Cold and phlegm obstruction

- *Yang He Tang* (Yang-Heartening Decoction), 1370

Heat and phlegm obstruction

- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213 and *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571

Blood stagnation and phlegm obstruction

- *Er Chen Tang* (Two-Cured Decoction), 1209 and *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571

Liver and Kidney yin deficiencies

- *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill), 640

Qi and blood deficiencies

- *Ba Zhen Tang* (Eight-Treasure Decoction), 604 and *Xiao Luo Wan* (Reduce Scrofula Pill), 1355

139. MACULAE AND PAPULES

- *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), 341
- *Qing Wen Bai Du Yin* (Clear Epidemics and Overcome Pathogenic Influences Decoction), 337
- *Qing Ying Tang* (Clear the Nutritive Level Decoction), 330
- *Xi Jiao Di Huang Tang* (Rhinoceros Horn and Rehmannia Decoction), 333

140. MALARIA

- *Xiao Chai Hu Tang* (Minor Bupleurum Decoction), 206
- *Bai Hu Jia Gui Zhi Tang* (White Tiger plus Cinnamon Twig Decoction), 323
- *Chai Hu Gui Zhi Gan Jiang Tang* (Bupleurum, Cinnamon Twig, and Ginger Decoction), 304
- *Bie Jia Jian Wan* (Soft-Shelled Turtle Shell Pill), 935
- *Bu Huan Jin Zheng Qi San* (Rectify the Qi Powder Worth More than Gold), 1075

141. MANIA

Qi and blood deficiencies

- *Yang Xin Tang* (Nourish the Heart Decoction), 735

Phlegm stagnation

- *Di Tan Tang* (Scour Phlegm Decoction), 1212
- *Gun Tan Wan* (Vaporize Phlegm Pill), 1238

Fire and phlegm disturbing the Heart

- *San Sheng San* (Three-Sage Powder), 1312
- *Sheng Tie Luo Yin* (Iron Filings Decoction), 711
- *Kong Xian Dan* (Control Mucus Special Pill), 182

With *shen* (spirit) disturbance

- *Ding Zhi Wan* (Settle the Emotions Pill), 723

142. MASTITIS

- *Shi Liu Wei Liu Qi Yin* (Sixteen-Ingredient Decoction to Flow Qi), 1360
- *Tou Nong San* (Discharge Pus Powder), 1362 and *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins), 1337

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

143. MENIERE'S DISEASE

- *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction), 1004
- *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction), 1247

144. MENOPAUSE

Kidney yin deficiency

- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627
- *Yi Guan Jian* (Linking Decoction), 657

Kidney yang deficiency

- *You Gui Wan* (Restore the Right [Kidney] Pill), 678
- *Er Xian Tang* (Two-Immortal Decoction), 684

Yin-deficient heat

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

Kidney jing (essence) deficiency

- *Gui Lu Er Xian Jiao* (Tortoise Shell and Deer Antler Syrup), 687

145. MENSTRUATION, EARLY

Qi deficiency

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542
- *Ju Yuan Jian* (Lift the Source Decoction), 548
- *Gui Pi Tang* (Restore the Spleen Decoction), 583

Liver qi stagnation with heat

- *Jia Wei Xiao Yao San* (Augmented Rambling Powder), 254
- *Xiao Yao San* (Rambling Powder), 247

Blood stagnation

- *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571

146. MENSTRUATION, IRREGULAR

Spleen deficiency

- *Gui Pi Tang* (Restore the Spleen Decoction), 583

Liver qi stagnation

- *Xiao Yao San* (Rambling Powder), 247

147. MENSTRUATION, LATE

Blood deficiency

- *Ren Shen Yang Ying Tang* (Ginseng Decoction to Nourish the Nutritive Qi), 615

Cold

- *Wen Jing Tang* (Warm the Channels Decoction), 919

Damp and phlegm accumulation

- *Er Chen Tang* (Two-Cured Decoction), 1209 with *Chuan Xiong* (Rhizoma Chuanxiong) and *Dang Gui* (Radix Angelicae Sinensis)

Blood stagnation

- *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571

148. MENSTRUATION, PROLONGED

Qi deficiency

- *Gui Pi Tang* (Restore the Spleen Decoction), 583

Blood heat

- *Gu Jing Wan* (Stabilize the Menses Pill), 802

149. MIGRAINE

Wind-cold attacking the head

- *Chuan Xiong Cha Tiao San* (Ligusticum Chuanxiong Powder to be Taken with Green Tea), 973
- *Huang Lian Shang Qing Wan* (Coptis Pill to Clear the Upper), 347

Liver fire rising

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Dampness and phlegm attacking the head

- *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction), 1247

Blood stagnation blocking the channels and collaterals

- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction), 877

150. MOTION SICKNESS

Nausea and vomiting due to reversed flow of Stomach qi

- *Ju Pi Zhu Ru Tang* (Tangerine Peel and Bamboo Shaving Decoction), 854

Qi and blood deficiencies

- *Gui Pi Tang* (Restore the Spleen Decoction), 583

Dampness and phlegm obstructing the middle jiao

- *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction), 1247

151. MYASTHENIA GRAVIS

Spleen deficiency with qi sinking downwards

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Spleen deficiency with ying (nutritive) qi insufficiency

- *Gui Pi Tang* (Restore the Spleen Decoction), 583

Spleen and Kidney yang deficiencies

- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645

Qi deficiency and blood stagnation

- *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction), 905

Damp-heat obstructing the channels and collaterals

- *Er Miao San* (Two-Marvel Powder), 1188

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

152. MYOCARDIAL INFARCTION

Blood stagnation with qi and yin deficiencies

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879 and *Sheng Mai San* (Generate the Pulse Powder), 554

Cold stagnation with yang and qi deficiencies

- *Shen Fu Tang* (Ginseng and Prepared Aconite Decoction), 489 and *Zhi Shi Xie Bai Gui Zhi Tang* (Immature Bitter Orange, Chinese Chive, and Cinnamon Twig Decoction), 831

153. NAUSEA

Exterior condition

- *Huo Xiang Zheng Qi San* (Agastache Powder to Rectify the Qi), 1079
- *Xin Jia Xiang Ru Yin* (Newly-Augmented Mosla Decoction), 439

Stomach cold

- *Li Zhong Tang* (Regulate the Middle Decoction), 462
- *Li Zhong Wan* (Regulate the Middle Pill), 459

Stomach heat

- *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction), 158
- *Zhu Ye Shi Gao Tang* (Bamboo Leaves and Gypsum Decoction), 326

Phlegm obstruction

- *Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction), 1131
- *Xuan Fu Dai Zhe Shi Tang* (Inula and Hematite Decoction), 851
- *Dao Tan Tang* (Guide Out Phlegm Decoction), 1211

Food stagnation

- *Bao He Wan* (Preserve Harmony Pill), 1266

Blood stagnation

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885

Spleen and Stomach deficiency and cold

- *Li Zhong Wan* (Regulate the Middle Pill), 459
- *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum), 531

Stomach yin deficiency

- *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction), 1047
- *Mai Men Dong Tang* (Ophiopogonis Decoction), 1043

Liver overacting on the Spleen and Stomach

- *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction), 827
- *Zuo Jin Wan* (Left Metal Pill), 389

154. NEPHROTIC SYNDROME

Wind and water accumulation

- *Yue Bi Tang* (Maid servant from Yue Decoction), 101 and *Wu Pi San* (Five-Peel Powder), 1121
- *Yue Bi Jia Zhu Tang* (Maid servant from Yue Decoction plus Atractylodes), 102

Damp-heat

- *Bi Xie Fen Qing Yin* (Dioscorea Hypoglauca Decoction to Separate the Clear), 1140

Liver and Kidney yin deficiencies

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

Spleen and Kidney yang deficiencies

- *Zhen Wu Tang* (True Warrior Decoction), 1135 and *Shi Pi San* (Bolster the Spleen Powder), 1138

Qi and yin deficiencies

- *Mai Wei Di Huang Wan* (Ophiopogonis, Schisandra and Rehmannia Pill), 642

Blood stagnation with water accumulation

- *Dang Gui Shao Yao San* (Tangkuei and Peony Powder), 594 and *Wu Pi San* (Five-Peel Powder), 1121
- *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill), 928 and *Wu Pi San* (Five-Peel Powder), 1121

155. NEURASTHENIA

Liver qi stagnation

- *Xiao Yao San* (Rambling Powder), 247

Liver qi stagnation with heat and fire

- *Jia Wei Xiao Yao San* (Augmented Rambling Powder), 254

Liver fire rising with shen (spirit) disturbance

- *Chai Hu Jia Long Gu Mu Li Tang* (Bupleurum plus Dragon Bone and Oyster Shell Decoction), 715

Shen (spirit) disturbance due to phlegm and heat

- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213

Yin-deficient fire

- *Zhu Sha An Shen Wan* (Cinnabar Pill to Tranquelize the Spirit), 710

Heart and Spleen deficiencies

- *Gui Pi Tang* (Restore the Spleen Decoction), 583

Heart and Kidney disharmony

- *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart), 725

156. NEUROPATHY

- *Chuan Xiong Cha Tiao San* (Ligusticum Chuanxiong Powder to be Taken with Green Tea), 973
- *Shu Jing Huo Xue Tang* (Relax the Channels and Invigorate the Blood Decoction), 1169

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

- *Shu Jin Li An San* (Relax the Tendons and Instill Peace Powder), 1171
- *Shen Tong Zhu Yu Tang* (Drive Out Blood Stasis from a Painful Body Decoction), 893
- *Tao He Cheng Qi Tang* (Peach Pit Decoction to Order the Qi), 873

157. NEURITIS

Wind-cold affecting the channels and collaterals

- *Xiao Xu Ming Tang* (Minor Prolong Life Decoction), 983

Wind-heat affecting the channels and collaterals

- *Da Qin Jiao Tang* (Major Gentiana Macrophylla Decoction), 988

Wind-damp obstructing the channels and collaterals

- *Qian Zheng San* (Lead to Symmetry Powder), 977

Qi deficiency and blood stagnation

- *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction), 905

158. NEUROSIS

Liver qi stagnation

- *Xiao Yao San* (Rambling Powder), 247
- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238
- *Yi Gan San* (Restrain the Liver Powder), 245

Liver qi stagnation with heat

- *Jia Wei Xiao Yao San* (Augmented Rambling Powder), 254

Liver qi stagnation with *shen* (spirit) disturbance

- *Chai Hu Jia Long Gu Mu Li Tang* (Bupleurum plus Dragon Bone and Oyster Shell Decoction), 715

159. NOCTURIA

- *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet), 668
- *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia), 672
- *Suo Quan Wan* (Shut the Sluice Pill), 795

160. NUMBNESS

Qi deficiency

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542
- *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction), 905

Blood deficiency

- *Si Wu Tang* (Four-Substance Decoction), 562
- *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood), 580

Wind-damp blocking channels and collaterals

- *Juan Bi Tang* (Remove Painful Obstruction Decoction), 1158
- *San Miao Wan* (Three-Marvel Pill), 1190 and *Si Wu Tang* (Four-Substance Decoction), 562

Phlegm blocking channels and collaterals

- *Qian Zheng San* (Lead to Symmetry Powder), 977
- *Kong Xian Dan* (Control Mucus Special Pill), 182
- *Er Chen Tang* (Two-Cured Decoction), 1209

161. OBESITY

Stomach heat

- *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction), 158 and *Bao He Wan* (Preserve Harmony Pill), 1266
- *Fang Feng Tong Sheng San* (Saposhnikovia Powder that Sagely Unblocks), 291

Spleen deficiency with dampness accumulation

- *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), 535 and *Fang Ji Huang Qi Tang* (Stephania and Astragalus Decoction), 1118

Damp and phlegm accumulation

- *Dao Tan Tang* (Guide Out Phlegm Decoction), 1211

Spleen and Kidney yang deficiencies

- *Zhen Wu Tang* (True Warrior Decoction), 1135 and *Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction), 1131

Qi and blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879 and *Shi Xiao San* (Sudden Smile Powder), 911

162. OSTEOARTHRITIS

Blood stagnation

- *Shen Tong Zhu Yu Tang* (Drive Out Blood Stasis from a Painful Body Decoction), 893

Kidney deficiency

- *San Bi Tang* (Three-Painful Obstruction Decoction), 1167

Damp-heat

- *Si Miao Wan* (Four-Marvel Pill), 1190

163. OSTEOPOROSIS

Kidney yin deficiency

- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645

Kidney yang deficiency

- *You Gui Wan* (Restore the Right [Kidney] Pill), 678

Kidney *jing* (essence) deficiency

- *Gui Lu Er Xian Jiao* (Tortoise Shell and Deer Antler Syrup), 687

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Spleen qi deficiency

- *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), 535

164. OTITIS MEDIA

- *Shi Wei Bai Du Tang* (Ten-Ingredient Decoction to Overcome Pathogenic Influences), 1341
- *Qian Jin Nei Tuo San* (Drain the Interior Powder Worthy of a Thousand Gold), 1365
- *Pai Nong San* (Drain the Pus Powder), 1364
- *Tuo Li Xiao Du Yin* (Drain the Interior and Detoxify Decoction), 1367
- *Jing Jie Lian Qiao Tang* (Schizonepeta and Forsythia Decoction), 120

165. PALPITATIONS

Heart and Gallbladder deficiencies

- *Ding Zhi Wan* (Settle the Emotions Pill), 723
- *Zhi Gan Cao Tang* (Honey-Fried Licorice Decoction), 589

Heart and Spleen deficiencies

- *Gui Pi Tang* (Restore the Spleen Decoction), 583
- *Zhi Gan Cao Tang* (Honey-Fried Licorice Decoction), 589

Heart yin deficiency

- *Tian Wang Bu Xin Dan* (Emperor of Heaven's Special Pill to Tonify the Heart), 725

Heart yang deficiency

- *Gui Zhi Jia Long Gu Mu Li Tang* (Cinnamon Twig Decoction plus Dragon Bone and Oyster Shell), 798

Water accumulation

- *Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction), 1131

Blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

166. PANCREATITIS

Liver qi stagnation

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238
- *Xiao Chai Hu Tang* (Minor Bupleurum Decoction), 206

Excess heat in the Spleen and Stomach

- *Da Cheng Qi Tang* (Major Order the Qi Decoction), 152

Liver and Gallbladder damp-heat

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Qi and yin deficiencies

- *Zeng Ye Cheng Qi Tang* (Increase the Fluids and Order the Qi Decoction), 190

Blood stagnation

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885

167. PARASITIC INFESTATION

- *Lian Mei An Hui Tang* (Picrorhiza and Mume Decoction to Calm Roundworms), 1295
- *Li Zhong An Hui Tang* (Regulate the Middle and Calm Roundworms Decoction), 1295
- *Hua Chong Wan* (Dissolve Parasites Pill), 1300
- *Wu Mei Wan* (Mume Pill), 1292
- *Fa Mu Wan* (Quell Wood Pill), 1302

168. PARKINSON'S DISEASE

Yin deficiency with Liver wind rising

- *Da Ding Feng Zhu* (Major Arrest Wind Pearl), 1009

Blood deficiency with Liver wind rising

- *Si Wu Tang* (Four-Substance Decoction), 562 and *Zhi Jing San* (Stop Spasms Powder), 979

Liver wind and yang rising

- *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction), 1004

Liver wind rising with hot phlegm

- *Dao Tan Tang* (Guide Out Phlegm Decoction), 1211

Wind and phlegm blocking the channels and collaterals

- *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction), 1247 and *Qian Zheng San* (Lead to Symmetry Powder), 977

Blood stagnation in the head

- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction), 877

Kidney jing (essence) deficiency

- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645

169. PAROTITIS

- *Yin Qiao San* (Honeysuckle and Forsythia Powder), 92
- *Jing Fang Bai Du San* (Schizonepeta and Saposhnikovia Powder to Overcome Pathogenic Influences), 1334
- *Pu Ji Xiao Du Yin* (Universal Benefit Decoction to Eliminate Toxin), 355
- *Qing Xin Li Ge Tang* (Clear the Epigastrium and Benefit the Diaphragm Decoction), 386

170. PELVIC INFLAMMATORY DISEASE

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371
- *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill), 928

171. PEPTIC ULCER

Liver and Stomach disharmony

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238

Liver and Stomach heat

- *Zuo Jin Wan* (Left Metal Pill), 389

Spleen and Stomach deficiency and cold

- *Huang Qi Jian Zhong Tang* (Astragalus Decoction to Construct the Middle), 475 and *Li Zhong Tang* (Regulate the Middle Decoction), 462

Stomach yin deficiency

- *Yi Guan Jian* (Linking Decoction), 657

Blood stagnation

- *Shi Xiao San* (Sudden Smile Powder), 911 and *Dan Shen Yin* (Salvia Decoction), 917

172. PERICARDITIS

Yin (invisible phlegm) accumulation

- *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction), 1235

Yin (invisible phlegm) accumulation with yin deficiency

- *Xie Bai San* (Drain the White Powder), 383 and *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal), 1036

Yin (invisible phlegm) accumulation with yang deficiency

- *Ting Li Da Zao Xie Fei Tang* (Descurainia and Jujube Decoction to Drain the Lung), 384 and *Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction), 1131

Blood stagnation and zheng (upright) qi deficiency

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885 and *Dang Gui Bu Xue Tang* (Tangkuei Decoction to Tonify the Blood), 580

173. PERSPIRATION

Spontaneous sweating

- *Gui Zhi Tang* (Cinnamon Twig Decoction), 51
- *Yu Ping Feng San* (Jade Windscreen Powder), 773
- *Mu Li San* (Oyster Shell Powder), 776

Night sweating

- *Gui Pi Tang* (Restore the Spleen Decoction), 583
- *Dang Gui Liu Huang Tang* (Tangkuei and Six-Yellow Decoction), 420
- *Mu Li San* (Oyster Shell Powder), 776

174. PHEOCHROMOCYTOMA

Liver yang rising

- *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction), 1004

Liver and Kidney yin deficiencies

- *Yi Guan Jian* (Linking Decoction), 657

Phlegm accumulation

- *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction), 1247

Yin and yang deficiencies

- *Er Xian Tang* (Two-Immortal Decoction), 684

175. PLEURITIS

- *Chai Hu Xian Xiong Tang* (Bupleurum Decoction for Sinking into the Chest), 1237

- *Xiao Xian Xiong Tang* (Minor Sinking into the Chest Decoction), 1235

- *Da Qing Long Tang* (Major Bluegreen Dragon Decoction), 45

- *Ting Li Da Zao Xie Fei Tang* (Descurainia and Jujube Decoction to Drain the Lung), 384

176. PNEUMONIA

Wind-heat affecting the Lung

- *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction), 89

- *San Ao Tang* (Three-Unbinding Decoction), 43

Lung heat

- *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction), 96

- *Wei Jing Tang* (Reed Decoction), 1377

Heat and phlegm affecting the Lung

- *Chai Hu Xian Xiong Tang* (Bupleurum Decoction for Sinking into the Chest), 1237

Heat obstructing sensory orifices

- *Qing Ying Tang* (Clear the Nutritive Level Decoction), 330

- *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone), 746

- *Zhi Bao Dan* (Greatest Treasure Special Pill), 749

177. PNEUMOTHORAX

Exterior wind-cold and Lung qi deficiency

- *Xiang Su San* (Cyperus and Perilla Leaf Powder), 67

Heat and phlegm

- *Chai Hu Xian Xiong Tang* (Bupleurum Decoction for Sinking into the Chest), 1237

Spleen deficiency with phlegm accumulation

- *Si Jun Zi Tang* (Four-Gentlemen Decoction), 522

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Qi, blood and phlegm stagnation

- *Si Mo Tang* (Four Milled-Herbs Decoction), 849 and *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

Yang deficiency in the chest

- *Zhi Shi Xie Bai Gui Zhi Tang* (Immature Bitter Orange, Chinese Chive, and Cinnamon Twig Decoction), 831

Liver and Lung qi stagnation, with upper excess and lower deficiency

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238 and *Su Zi Jiang Qi Tang* (Perilla Fruit Decoction for Directing Qi Downward), 842

178. POISONING, ALCOHOL

- *Ge Hua Jie Cheng San* (Pueraria Flower Powder for Detoxification and Awakening), 1084
- *Di Huang Yin Zi* (Rehmannia Decoction), 693
- *Xiao Yao San* (Rambling Powder), 247

179. PREGNANCY

Abdominal pain, with

- *Dang Gui Shao Yao San* (Tangkuei and Peony Powder), 594
- *Jiao Ai Tang* (Ass-Hide Gelatin and Mugwort Decoction), 950
- *Xiao Yao San* (Rambling Powder), 247 with *Zi Su Geng* (Caulis Perillae) and *Chen Pi* (Pericarpium Citri Reticulatae)

Breech presentation of the fetus

- *Ba Zhen Tang* (Eight-Treasure Decoction), 604 with *Huang Qi* (Radix Astragali), *Xu Duan* (Radix Dipsaci) and *Zhi Qiao* (Fructus Aurantii)

Cough, with

- *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal), 1036
- *Liu Jun Zi Tang* (Six-Gentlemen Decoction), 527

Ectopic pregnancy, to terminate

- *Gong Wai Yun Fang* (Ectopic Pregnancy Formula), 917

Edema and generalized swelling, with

- *Wu Ling San* (Five-Ingredient Powder with Poria), 1109

Irritability, with

- *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill), 640
- *Ba Zhen Tang* (Eight-Treasure Decoction), 604
- *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction), 1247

Miscarriage, prevention of

- *Bao Chan Wu You Fang* (Preserve Pregnancy and Care-Free Decoction), 621

- *Tai Shan Pan Shi San* (Powder that Gives the Stability of Mount Tai), 618

Nausea and vomiting, with

- *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum), 531
- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213
- *Ju Pi Zhu Ru Tang* (Tangerine Peel and Bamboo Shaving Decoction), 854

Restless fetus, with

- *Bao Chan Wu You Fang* (Preserve Pregnancy and Care-Free Decoction), 621
- *Dang Gui Shao Yao San* (Tangkuei and Peony Powder), 594

Seizures and epilepsy, with

- *Ling Jiao Gou Teng Tang* (Antelope Horn and Uncaria Decoction), 993
- *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction), 1247 and *An Gong Niu Huang Wan* (Calm the Palace Pill with Cattle Gallstone), 746

Uterine bleeding, with

- *Gui Zhi Fu Ling Wan* (Cinnamon Twig and Poria Pill), 928
- *Bao Chan Wu You Fang* (Preserve Pregnancy and Care-Free Decoction), 621

180. PREGNANCY, POSTPARTUM CARE

Blood stagnation (retention of lochia)

- *Sheng Hua Tang* (Generation and Transformation Decoction), 925

Qi and blood deficiencies

- *Ba Zhen Tang* (Eight-Treasure Decoction), 604

Lactation, insufficient

- *Tong Ru Wan* (Unblock the Breast Pill), 927

Lactation, excessive

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542 with *Qian Shi* (Semen Euryales) and *Wu Wei Zi* (Fructus Schisandrae Chinensis)
- *Jia Wei Xiao Yao San* (Augmented Rambling Powder), 254 with *Mu Li* (Concha Ostreae) and *Xia Ku Cao* (Spica Prunellae)

Lactation, termination of

- *Mai Ya* (Fructus Hordei Germinatus) 60g

181. PREMENSTRUAL SYNDROME (PMS)

Edema and swelling

- *Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction), 1131

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Breast distention and pain

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238
- *Si Wu Tang* (Four-Substance Decoction), 562 and *Er Chen Tang* (Two-Cured Decoction), 1209

Emotional instability

- *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction), 731
- *Xiao Yao San* (Rambling Powder), 247
- *Jia Wei Xiao Yao San* (Augmented Rambling Powder), 254
- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213

Stomatitis

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636
- *Liang Ge San* (Cool the Diaphragm Powder), 351

182. PROSTATITIS

Damp-heat

- *Ba Zheng San* (Eight-Herb Powder for Rectification), 1103
- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Dampness

- *Bi Xie Fen Qing Yin* (Dioscorea Hypoglauca Decoction to Separate the Clear), 1140

Kidney yang deficiency

- *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia), 672

183. PSORIASIS

- *Dang Gui Yin Zi* (Tangkuei Decoction), 970
- *Shi Wei Bai Du Tang* (Ten-Ingredient Decoction to Overcome Pathogenic Influences), 1341
- *Wu Wei Xiao Du Yin* (Five-Ingredient Decoction to Eliminate Toxins), 1337

184. PURPURA, ALLERGIC

Heat and toxins

- *Xi Jiao Di Huang Tang* (Rhinoceros Horn and Rehmannia Decoction), 333 and *Si Sheng Wan* (Four-Fresh Pill), 942

Yin-deficient fire

- *Yu Nu Jian* (Jade Woman Decoction), 398

Damp-heat in the interior

- *Xiao Ji Yin Zi* (Cirsium Decoction), 946

Qi deficiency with aimless movement of blood

- *Gui Pi Tang* (Restore the Spleen Decoction), 583 and *Bao Yuan Tang* (Preserve the Basal Decoction), 525

Blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

185. PURPURA, THROMBOCYTOPENIC

Qi deficiency with aimless movement of blood

- *Gui Pi Tang* (Restore the Spleen Decoction), 583 and *Bao Yuan Tang* (Preserve the Basal Decoction), 525

Heat in the blood causing reckless movement of blood

- *Xi Jiao Di Huang Tang* (Rhinoceros Horn and Rehmannia Decoction), 333
- *Qing Ying Tang* (Clear the Nutritive Level Decoction), 330

Yin-deficient fire

- *Yu Nu Jian* (Jade Woman Decoction), 398

Blood stagnation

- *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571

186. PYELONEPHRITIS

Damp-heat

- *Ba Zheng San* (Eight-Herb Powder for Rectification), 1103

Damp-heat in the Liver and Gallbladder

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Heat and toxins

- *Xiao Ji Yin Zi* (Cirsium Decoction), 946

Lung and Stomach heat

- *Bai Hu Tang* (White Tiger Decoction), 321 and *Qing Fei Yin* (Clear the Lung Drink), 1224

Yin-deficient fire

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

Qi and blood stagnation with damp-heat accumulation

- *Wu Lin San* (Five-Ingredient Powder for Painful Urinary Dysfunction), 1107

187. RADIATION, SUPPORT FOR

- *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction), 609
- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542
- *Ba Zhen Tang* (Eight-Treasure Decoction), 604

188. RASH

- *Xiao Feng San* (Eliminate Wind Powder), 967
- *Wen Qing Yin* (Warming and Clearing Decoction), 575
- *Dang Gui Yin Zi* (Tangkuei Decoction), 970
- *Qing Shang Fang Feng Tang* (Clear the Upper and Guard the Wind Decoction), 349

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

189. RAYNAUD'S SYNDROME

Yin and cold stagnation

- *Dang Gui Si Ni Tang* (Tangkuei Decoction for Frigid Extremities), 494

Blood stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879
- *Shen Tong Zhu Yu Tang* (Drive Out Blood Stasis from a Painful Body Decoction), 893

Blood stagnation with heat

- *Si Miao Yong An Tang* (Four-Valiant Decoction for Well-Being), 1344

190. RECTAL PROLAPSE

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542
- *Yi Zi Tang* (Yi Word Decoction), 164

191. REFLUX ESOPHAGITIS

Reversed flow of Stomach qi

- *Xuan Fu Dai Zhe Shi Tang* (Inula and Hematite Decoction), 851

Liver overacting on the Spleen and Stomach

- *Chai Hu Shu Gan San* (Bupleurum Powder to Spread the Liver), 238
- *Zuo Jin Wan* (Left Metal Pill), 389

Stomach yin deficiency

- *Mai Men Dong Tang* (Ophiopogonis Decoction), 1043

Spleen and Stomach deficiency and cold

- *Si Jun Zi Tang* (Four-Gentlemen Decoction), 522

192. RENAL FAILURE

Spleen yang deficiency

- *Fu Zi Li Zhong Wan* (Prepared Aconite Pill to Regulate the Middle), 463 and *Wu Ling San* (Five-Ingredient Powder with Poria), 1109

Kidney yang deficiency

- *Ji Sheng Shen Qi Wan* (Kidney Qi Pill from Formulas that Aid the Living), 675 and *Zhen Wu Tang* (True Warrior Decoction), 1135

Liver and Kidney yin deficiencies

- *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill), 640

Yin and yang deficiencies

- *Ji Sheng Shen Qi Wan* (Kidney Qi Pill from Formulas that Aid the Living), 675

193. RESTLESS FETUS

- *Bao Chan Wu You Fang* (Preserve Pregnancy and Care-Free Decoction), 621

- *Tai Shan Pan Shi San* (Powder that Gives the Stability of Mount Tai), 618

- *Dang Gui Shao Yao San* (Tangkuei and Peony Powder), 594

194. RETINITIS

- *Ci Zhu Wan* (Magnetite and Cinnabar Pill), 714
- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627
- *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill), 640
- *Ming Mu Di Huang Wan* (Improve Vision Pill with Rehmannia), 633
- *Zi Shen Ming Mu Tang* (Nourish the Kidney to Brighten the Eyes Decoction), 664

195. RHEUMATOID ARTHRITIS

Wind-cold-damp obstruction

- *Juan Bi Tang* (Remove Painful Obstruction Decoction), 1158

Heat obstruction

- *Bai Hu Jia Gui Zhi Tang* (White Tiger plus Cinnamon Twig Decoction), 323

Blood stagnation and phlegm obstruction

- *Xiao Huo Luo Dan* (Minor Invigorate the Collaterals Special Pill), 1177

Liver and Kidney deficiencies

- *Hu Qian Wan* (Hidden Tiger Pill), 651

Yin-deficient heat

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

Kidney yang deficiency

- *Jin Gui Shen Qi Wan* (Kidney Qi Pill from the Golden Cabinet), 668

196. RHINITIS

Wind-cold

- *Xin Yi San* (Magnolia Flower Powder), 84

Wind-heat

- *Cang Er Zi San* (Xanthium Powder), 82

Damp-heat

- *Qing Bi Tang* (Clear the Nose Decoction), 86

Lung heat

- *Xin Yi Qing Fei Yin* (Magnolia Decoction to Clear the Lung), 122

Spleen qi deficiency

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

197. ROSACEA

- *Si Wu Tang* (Four-Substance Decoction), 562
- *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571
- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction), 877

198. SCHIZOPHRENIA

Heart and Spleen deficiencies

- *Yang Xin Tang* (Nourish the Heart Decoction), 735
- *Gan Mai Da Zao Tang* (Licorice, Wheat, and Jujube Decoction), 731

Qi and phlegm stagnation

- *Dao Tan Tang* (Guide Out Phlegm Decoction), 1211

Liver fire rising

- *Dang Gui Long Hui Wan* (Tangkuei, Gentiana, and Aloe Pill), 379

Shen (spirit) disturbance

- *Chai Hu Jia Long Gu Mu Li Tang* (Bupleurum plus Dragon Bone and Oyster Shell Decoction), 715

199. SCIATICA

- *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction), 1161
- *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness), 1156

200. SCLERODERMA

Wind-damp obstruction

- *Du Huo Ji Sheng Tang* (Angelica Pubescens and Taxillus Decoction), 1161
- *Qiang Huo Sheng Shi Tang* (Notopterygium Decoction to Overcome Dampness), 1156

Spleen and Kidney yang deficiencies

- *Yang He Tang* (Yang-Heartening Decoction), 1370
- *Shen Fu Tang* (Ginseng and Prepared Aconite Decoction), 489

Qi deficiency with blood stagnation

- *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction), 905

201. SEIZURES AND EPILEPSY

Liver wind rising with phlegm

- *Ding Xian Wan* (Arrest Seizures Pill), 1251
- *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction), 1004

Liver fire rising with phlegm

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371
- *Di Tan Tang* (Scour Phlegm Decoction), 1212

Heat and phlegm rising

- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213

Deficiency

- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645

202. SINUSITIS

Wind-cold

- *Xin Yi San* (Magnolia Flower Powder), 84

Wind-heat

- *Cang Er Zi San* (Xanthium Powder), 82

Damp-heat

- *Qing Bi Tang* (Clear the Nose Decoction), 86

Lung heat

- *Xin Yi Qing Fei Yin* (Magnolia Decoction to Clear the Lung), 122

Spleen qi deficiency

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

203. SPERMATORRHEA

Kidney yin deficiency

- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645
- *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627

Kidney yang deficiency

- *You Gui Wan* (Restore the Right [Kidney] Pill), 678
- *Ba Wei Di Huang Wan* (Eight-Ingredient Pill with Rehmannia), 672

Kidney jing (essence) deficiency

- *Jin Suo Gu Jing Wan* (Metal Lock Pill to Stabilize the Essence), 789
- *Shui Lu Er Xian Dan* (Water and Earth Two Immortals Special Pill), 790

Yin-deficient fire

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636
- *Ding Zhi Wan* (Settle the Emotions Pill), 723

Liver fire

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Damp-heat in the interior

- *Bi Xie Fen Qing Yin* (Dioscorea Hypoglauca Decoction to Separate the Clear), 1140

204. STOMATITIS

Heart and Spleen heat

- *Xie Huang San* (Drain the Yellow Powder), 396 and *Dao Chi San* (Guide Out the Red Powder), 365

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Lung and Stomach heat

- *Liang Ge San* (Cool the Diaphragm Powder), 351 and *Qing Wei San* (Clear the Stomach Powder), 393
- *Gan Lu Yin* (Sweet Dew Decoction), 401

Yin-deficient fire

- *Zhi Bai Di Huang Wan* (Anemarrhena, Phellodendron, and Rehmannia Pill), 636

205. SYSTEMIC LUPUS ERYTHEMATOSUS

Toxic heat

- *Qing Wen Bai Du Yin* (Clear Epidemics and Overcome Pathogenic Influences Decoction), 337

Heart and Spleen deficiencies

- *Gui Pi Tang* (Restore the Spleen Decoction), 583

Qi and yin deficiencies

- *Sheng Mai San* (Generate the Pulse Powder), 554

Spleen and Kidney deficiencies

- *Zhen Wu Tang* (True Warrior Decoction), 1135

Spleen deficiency with Liver excess

- *Xiao Yao San* (Rambling Powder), 247

206. TESTITIS

- *Ju He Wan* (Tangerine Seed Pill), 833
- *Tian Tai Wu Yao San* (Top-Quality Lindera Powder), 835

207. TETANUS

- *Yu Zhen San* (True Jade Powder), 981
- *Zhi Jing San* (Stop Spasms Powder), 979
- *Wu Hu Zhui Feng San* (Five-Tiger Powder to Pursue Wind), 982

208. THIRST

- *Mai Men Dong Tang* (Ophiopogonis Decoction), 1043
- *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction), 1047
- *Zeng Ye Tang* (Increase the Fluids Decoction), 1054

209. THYROIDITIS

Liver and Gallbladder damp-heat

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Yin-deficient fire

- *Qing Gu San* (Cool the Bones Powder), 418

Phlegm accumulation

- *Hai Zao Yu Hu Tang* (Sargassum Decoction for the Jade Flask), 1352

Spleen yang deficiency

- *Shi Pi San* (Bolster the Spleen Powder), 1138

210. TIDAL FEVER

- *Da Bu Yin Wan* (Great Tonify the Yin Pill), 649
- *Qing Gu San* (Cool the Bones Powder), 418
- *Qing Hao Bie Jia Tang* (Artemisia Annua and Soft-Shelled Turtle Shell Decoction), 412

211. TINNITUS

Qi and yang deficiencies

- *Yi Qi Cong Ming Tang* (Augment the Qi and Increase Acuity Decoction), 551
- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Yin and blood deficiencies

- *Ba Zhen Tang* (Eight-Treasure Decoction), 604
- *Ren Shen Yang Ying Tang* (Ginseng Decoction to Nourish the Nutritive Qi), 615

Liver and Kidney deficiencies

- *Er Long Zuo Ci Wan* (Pill for Deafness that Is Kind to the Left [Kidney]), 633
- *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill), 640

Phlegm stagnation

- *Di Tan Tang* (Scour Phlegm Decoction), 1212
- *Gun Tan Wan* (Vaporize Phlegm Pill), 1238

Liver fire

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

212. TONSILLITIS

- *Yin Qiao San* (Honeysuckle and Forsythia Powder), 92
- *Qing Xin Li Ge Tang* (Clear the Epigastrium and Benefit the Diaphragm Decoction), 386
- *Chai Hu Qing Gan Tang* (Bupleurum Decoction to Clear the Liver), 243
- *Ban Xia Hou Po Tang* (Pinellia and Magnolia Bark Decoction), 827

213. TOOTHACHE

- *Qing Wei San* (Clear the Stomach Powder), 393
- *Huang Lian Jie Du Tang* (Coptis Decoction to Relieve Toxicity), 341
- *Gan Lu Yin* (Sweet Dew Decoction), 401
- *Tiao Wei Cheng Qi Tang* (Regulate the Stomach and Order the Qi Decoction), 160

214. TRACHEOBRONCHITIS

Wind-cold affecting the Lung

- *Xing Su San* (Apricot Kernel and Perilla Leaf Powder), 1025
- *Jin Fei Cao San* (Inula Powder), 49

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

Wind-heat affecting the Lung

- *Sang Ju Yin* (Mulberry Leaf and Chrysanthemum Decoction), 89
- *Liu Yi San* (Six-to-One Powder), 441

Dryness affecting the Lung

- *Sang Xing Tang* (Mulberry Leaf and Apricot Kernel Decoction), 1027

Wind and phlegm affecting the Lung

- *Zhi Sou San* (Stop Coughing Powder), 116

Phlegm and heat affecting the Lung

- *Qing Qi Hua Tan Wan* (Clear the Qi and Transform Phlegm Pill), 1222
- *Er Chen Tang* (Two-Cured Decoction), 1209 and *San Zi Yang Qin Tang* (Three-Seed Decoction to Nourish One's Parents), 1245

215. TRACHEITIS

- *Ma Huang Xing Ren Gan Cao Shi Gao Tang* (Ephedra, Apricot Kernel, Licorice, and Gypsum Decoction), 96
- *Qing Qi Hua Tan Wan* (Clear the Qi and Transform Phlegm Pill), 1222
- *Bei Mu Gua Lou San* (Fritillaria and Trichosanthes Fruit Powder), 1240

216. TRANSIENT ISCHEMIC ATTACK (TIA)

Liver yang rising with Liver and Kidney yin deficiencies

- *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction), 999

Qi deficiency with blood stagnation

- *Bu Yang Huan Wu Tang* (Tonify the Yang to Restore Five Decoction), 905

Blood stagnation with phlegm obstruction

- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213 and *Tao Hong Si Wu Tang* (Four-Substance Decoction with Safflower and Peach Pit), 571

217. TRAUMA

- *Fu Yuan Huo Xue Tang* (Revive Health by Invigorating the Blood Decoction), 897
- *Zheng Gu Zi Jin Dan* (Purple and Gold Pill for Righteous Bones), 901
- *Shen Tong Zhu Yu Tang* (Drive Out Blood Stasis from a Painful Body Decoction), 893
- *Qi Li San* (Seven-Thousandths of a Tael Powder), 903
- *Tao He Cheng Qi Tang* (Peach Pit Decoction to Order the Qi), 873

218. TREMOR

Liver and Kidney deficiencies

- *Da Bu Yin Wan* (Great Tonify the Yin Pill), 649 and *Liu Wei Di Huang Wan* (Six-Ingredient Pill with Rehmannia), 627

Qi and blood deficiencies

- *Ba Zhen Tang* (Eight-Treasure Decoction), 604 and *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction), 1004

Liver wind rising with phlegm and heat accumulation

- *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction), 1004 and *Dao Tan Tang* (Guide Out Phlegm Decoction), 1211

219. TRIGEMINAL NEURALGIA

Wind-cold affecting the channels and collaterals

- *Chuan Xiong Cha Tiao San* (Ligusticum Chuanxiong Powder to be Taken with Green Tea), 973

Wind-heat affecting the channels and collaterals

- *Shi Gao Tang* (Gypsum Decoction), 299 with *Chuan Xiong* (Rhizoma Chuanxiong) and *Bai Zhi* (Radix Angelicae Dahuricae)

Wind and phlegm blocking the channels and collaterals

- *Dao Tan Tang* (Guide Out Phlegm Decoction), 1211 with *Chuan Xiong* (Rhizoma Chuanxiong) and *Xi Xin* (Radix et Rhizoma Asari)

Stomach fire rising

- *Qing Wei San* (Clear the Stomach Powder), 393

Liver and Gallbladder fire rising

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

Yin deficiency with fire rising

- *Zhen Gan Xi Feng Tang* (Sedate the Liver and Extinguish Wind Decoction), 999

Blood stagnation

- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction), 877

220. TUBERCULOSIS (INTESTINE)

Yin-deficient heat

- *Qing Gu San* (Cool the Bones Powder), 418

Damp-heat

- *Ge Gen Huang Qin Huang Lian Tang* (Kudzu, Coptis, and Scutellaria Decoction), 295

Spleen and Stomach deficiencies

- *Shen Ling Bai Zhu San* (Ginseng, Poria, and Atractylodes Macrocephala Powder), 535

Kidney yang deficiencies

- *Si Shen Wan* (Four-Miracle Pill), 784

Qi and blood stagnation

- *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction), 889

221. TUBERCULOSIS (LUNG)

Lung yin deficiency

- *Yue Hua Wan* (Moonlight Pill), 1040

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

- *Mai Men Dong Tang* (Ophiopogonis Decoction), 1043
- *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction), 1047

Yin-deficient fire

- *Bai He Gu Jin Tang* (Lily Bulb Decoction to Preserve the Metal), 1036
- *Qing Gu San* (Cool the Bones Powder), 418
- *Qin Jiao Bie Jia San* (Gentiana Macrophylla and Soft-Shell Turtle Shell Powder), 416

Qi and yin deficiencies

- *Sheng Mai San* (Generate the Pulse Powder), 554

222. TUBERCULOSIS (PERITONEUM)

Yangming heat

- *Da Cheng Qi Tang* (Major Order the Qi Decoction), 152

Qi and yin deficiencies

- *Si Jun Zi Tang* (Four-Gentlemen Decoction), 522 and *Qing Gu San* (Cool the Bones Powder), 418

Blood and phlegm stagnation

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

223. URETHRITIS

- *Ba Zheng San* (Eight-Herb Powder for Rectification), 1103
- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

224. URINARY INCONTINENCE

Lung and Spleen qi deficiencies

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Heart and Kidney disharmony

- *Sang Piao Xiao San* (Mantis Egg-Case Powder), 792

Damp-heat

- *Ba Zheng San* (Eight-Herb Powder for Rectification), 1103

Blood stagnation

- *Shao Fu Zhu Yu Tang* (Drive Out Blood Stasis in the Lower Abdomen Decoction), 889

225. URINARY TRACT INFECTION

Damp-heat in the lower jiao

- *Ba Zheng San* (Eight-Herb Powder for Rectification), 1103

Liver and Gallbladder heat

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

226. UROSCHEIS

Damp-heat

- *Ba Zheng San* (Eight-Herb Powder for Rectification), 1103

- *Dao Chi San* (Guide Out the Red Powder), 365

Lung heat

- *Qing Fei Yin* (Clear the Lung Drink), 1224

Spleen deficiency

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

Kidney deficiency

- *Ji Sheng Shen Qi Wan* (Kidney Qi Pill from Formulas that Aid the Living), 675

227. UTERINE PROLAPSE

- *Bu Zhong Yi Qi Tang* (Tonify the Middle and Augment the Qi Decoction), 542

228. VASCULAR DEMENTIA

Phlegm misting the Heart and disturbing the *shen* (spirit)

- *Dao Tan Tang* (Guide Out Phlegm Decoction), 1211

Phlegm blocking the sensory orifices

- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction), 877

Heart qi deficiency

- *Ren Shen Yang Ying Tang* (Ginseng Decoction to Nourish the Nutritive Qi), 615

229. VERTIGO

Liver wind rising

- *Tian Ma Gou Teng Yin* (Gastrodia and Uncaria Decoction), 1004

- *Da Ding Feng Zhu* (Major Arrest Wind Pearl), 1009

Liver fire rising

- *Long Dan Xie Gan Tang* (Gentiana Decoction to Drain the Liver), 371

- *Dang Gui Long Hui Wan* (Tangkuei, Gentiana, and Aloe Pill), 379

Phlegm accumulation

- *Ban Xia Bai Zhu Tian Ma Tang* (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction), 1247

- *Wen Dan Tang* (Warm the Gallbladder Decoction), 1213

Blood stagnation

- *Tong Qiao Huo Xue Tang* (Unblock the Orifices and Invigorate the Blood Decoction), 877

- *Xue Fu Zhu Yu Tang* (Drive Out Stasis in the Mansion of Blood Decoction), 879

Qi and blood deficiencies

- *Gui Pi Tang* (Restore the Spleen Decoction), 583

Appendix 2 — Cross-reference Based on Western Medicine Diagnosis

- *Ba Zhen Tang* (Eight-Treasure Decoction), 604
- *Shi Quan Da Bu Tang* (All-Inclusive Great Tonifying Decoction), 609

Kidney deficiency

- *Zuo Gui Wan* (Restore the Left [Kidney] Pill), 645
- *You Gui Wan* (Restore the Right [Kidney] Pill), 678

230. VISION, BLURRED

Deficiency

- *Ming Mu Di Huang Wan* (Improve Vision Pill with Rehmannia), 633
- *Qi Ju Di Huang Wan* (Lycium Fruit, Chrysanthemum, and Rehmannia Pill), 640
- *Zi Shen Ming Mu Tang* (Nourish the Kidney to Brighten the Eyes Decoction), 664

Excess

- *Xi Gan Ming Mu San* (Wash the Liver and Brighten the Eyes Powder), 381

231. VOMITING

Exterior condition

- *Huo Xiang Zheng Qi San* (Agastache Powder to Rectify the Qi), 1079
- *Xin Jia Xiang Ru Yin* (Newly-Augmented Mosla Decoction), 439

Stomach cold

- *Li Zhong Tang* (Regulate the Middle Decoction), 462
- *Li Zhong Wan* (Regulate the Middle Pill), 459

Stomach heat

- *Xiao Cheng Qi Tang* (Minor Order the Qi Decoction), 158
- *Zhu Ye Shi Gao Tang* (Bamboo Leaves and Gypsum Decoction), 326

Phlegm obstruction

- *Ling Gui Zhu Gan Tang* (Poria, Cinnamon Twig, Atractylodes Macrocephala, and Licorice Decoction), 1131
- *Xuan Fu Dai Zhe Shi Tang* (Inula and Hematite Decoction), 851
- *Dao Tan Tang* (Guide Out Phlegm Decoction), 1211

Food stagnation

- *Bao He Wan* (Preserve Harmony Pill), 1266

Blood stagnation

- *Ge Xia Zhu Yu Tang* (Drive Out Blood Stasis Below the Diaphragm Decoction), 885

Spleen and Stomach deficiency and cold

- *Li Zhong Wan* (Regulate the Middle Pill), 459
- *Xiang Sha Liu Jun Zi Tang* (Six-Gentlemen Decoction with Aucklandia and Amomum), 531

Stomach yin deficiency

- *Sha Shen Mai Dong Tang* (Glehnia and Ophiopogonis Decoction), 1047

Uterine bleeding	<ul style="list-style-type: none"> • <i>Gui Zhi Fu Ling Wan</i> (Cinnamon Twig and Poria Pill), 928 • <i>Bao Chan Wu You Fang</i> (Preserve Pregnancy and Care-Free Decoction), 621

Appendix 4

— Formulas Offering Beneficial Effects for Postpartum Care

The following formulas have been shown to offer beneficial effects for postpartum care. However, these formulas should be used only under supervision of a qualified healthcare professional, and only when the benefits of using the herbs outweigh the risks.

Symptoms	Formulas
Blood stagnation (retention of lochia)	• <i>Sheng Hua Tang</i> (Generation and Transformation Decoction), 925
Qi and blood deficiencies	• <i>Ba Zhen Tang</i> (Eight-Treasure Decoction), 604
Lactation, insufficient	• <i>Tong Ru Wan</i> (Unblock the Breast Pill), 927
Lactation, excessive	• <i>Bu Zhong Yi Qi Tang</i> (Tonify the Middle and Augment the Qi Decoction), 542 with <i>Qian Shi</i> (Semen Euryales) and <i>Wu Wei Zi</i> (Fructus Schisandrae Chinensis) • <i>Jia Wei Xiao Yao San</i> (Augmented Rambling Powder), 254 with <i>Mu Li</i> (Concha Ostreae) and <i>Xia Ku Cao</i> (Spica Prunellae)
Lactation, termination of	• <i>Mai Ya</i> (Fructus Hordei Germinatus) 60g

Appendix 5

— Cautions / Contraindications for the Use of Formulas During Pregnancy

The following formulas have a recognized potential to endanger or cause harm to a fetus during pregnancy, thus possibly causing birth defects or miscarriages. As a general rule, formulas with potent effects to regulate qi, move blood, or drain downward should be avoided during pregnancy. These formulas are **contraindicated**, or if absolutely necessary, used with **caution** in treatment of pregnant women. Please note that this is not a comprehensive list - additional information is listed in each formula monograph.

<i>An Gong Niu Huang Wan</i> (Calm the Palace Pill with Cattle Gallstone)	746
<i>Ba Wei Di Huang Wan</i> (Eight-Ingredient Pill with Rehmannia)	672
<i>Ba Zheng San</i> (Eight-Herb Powder for Rectification)	1103
<i>Bao He Wan</i> (Preserve Harmony Pill)	1266
<i>Ci Zhu Wan</i> (Magnetite and Cinnabar Pill)	714
<i>Da Cheng Qi Tang</i> (Major Order the Qi Decoction)	152
<i>Da Huang Mu Dan Tang</i> (Rhubarb and Moutan Decoction)	1378
<i>Da Huang Zhe Chong Wan</i> (Rhubarb and Eupolyphaga Pill)	937
<i>Da Jian Zhong Tang</i> (Major Construct the Middle Decoction)	480
<i>Da Xian Xiong Tang</i> (Major Sinking into the Chest Decoction)	161
<i>Dang Gui Long Hui Wan</i> (Tangkuei, Gentiana, and Aloe Pill)	379
<i>Du Huo Ji Sheng Tang</i> (Angelica Pubescens and Taxillus Decoction)	1161
<i>Fang Feng Tong Sheng San</i> (Saposhnikovia Powder that Sagely Unblocks)	291
<i>Fu Yuan Huo Xue Tang</i> (Revive Health by Invigorating the Blood Decoction)	897
<i>Fu Zi Li Zhong Wan</i> (Prepared Aconite Pill to Regulate the Middle)	463
<i>Ge Xia Zhu Yu Tang</i> (Drive Out Blood Stasis Below the Diaphragm Decoction)	885
<i>Gong Wai Yun Fang</i> (Ectopic Pregnancy Formula)	917
<i>Gun Tan Wan</i> (Vaporize Phlegm Pill)	1238
<i>Guo Qi Yin</i> (Delayed Menstruation Decoction)	578
<i>Hei Xi Dan</i> (Lead Special Pill)	492
<i>Hua Chong Wan</i> (Dissolve Parasites Pill)	1300
<i>Huo Luo Xiao Ling Dan</i> (Fantastically Effective Pill to Invigorate the Collaterals)	914
<i>Ji Ming San</i> (Powder to Take at Cock's Crow)	1183
<i>Jia Wei Xiao Yao San</i> (Augmented Rambling Powder)	254
<i>Jin Gui Shen Qi Wan</i> (Kidney Qi Pill from the Golden Cabinet)	668
<i>Jin Ling Zi San</i> (Melia Toosendan Powder)	825
<i>Li Zhong Wan</i> (Regulate the Middle Pill)	459
<i>Liang Ge San</i> (Cool the Diaphragm Powder)	351

Appendix 5 — Cautions / Contraindications for the Use of Formulas During Pregnancy

<i>Liu Shen Wan</i> (Six-Miracle Pill)	363
<i>Liu Yi San</i> (Six-to-One Powder)	441
<i>Ma Huang Fu Zi Xi Xin Tang</i> (Ephedra, Asarum, and Prepared Aconite Decoction)	132
<i>Ma Zi Ren Wan</i> (Hemp Seed Pill)	174
<i>Mu Xiang Bing Lang Wan</i> (Aucklandia and Betel Nut Pill)	1272
<i>Ping Wei San</i> (Calm the Stomach Powder)	1068
<i>Qi Li San</i> (Seven-Thousandths of a Tael Powder)	903
<i>Qian Zheng San</i> (Lead to Symmetry Powder)	977
<i>Qing Qi Hua Tan Wan</i> (Clear the Qi and Transform Phlegm Pill)	1222
<i>Run Chang Wan</i> (Moisten the Intestines Pill)	177
<i>San Huang Xie Xin Tang</i> (Three-Yellow Decoction to Sedate the Epigastrium)	359
<i>San Wu Bei Ji Wan</i> (Three-Substance Pill for Emergencies)	171
<i>Shao Fu Zhu Yu Tang</i> (Drive Out Blood Stasis in the Lower Abdomen Decoction)	889
<i>Shen Ling Bai Zhu San</i> (Ginseng, Poria, and Atractylodes Macrocephala Powder)	535
<i>Shen Tong Zhu Yu Tang</i> (Drive Out Blood Stasis from a Painful Body Decoction)	893
<i>Sheng Hua Tang</i> (Generation and Transformation Decoction)	925
<i>Shi Xiao San</i> (Sudden Smile Powder)	911
<i>Shi Zao Tang</i> (Ten-Jujube Decoction)	181
<i>Su He Xiang Wan</i> (Liquid Styrax Pill)	758
<i>Tao He Cheng Qi Tang</i> (Peach Pit Decoction to Order the Qi)	873
<i>Tao Hong Si Wu Tang</i> (Four-Substance Decoction with Safflower and Peach Pit)	571
<i>Wu Mei Wan</i> (Mume Pill)	1292
<i>Wu Yao Shun Qi San</i> (Lindera Powder to Smooth the Flow of Qi)	990
<i>Xi Huang Wan</i> (Cattle Gallstone Pill)	1350
<i>Xiao Huo Luo Dan</i> (Minor Invigorate the Collaterals Special Pill)	1177
<i>Xiao Jin Dan</i> (Minor Gold Special Pill)	1374
<i>Xiao Yao San</i> (Rambling Powder)	247
<i>Xing Jun San</i> (Troop-Marching Powder)	756
<i>Xue Fu Zhu Yu Tang</i> (Drive Out Stasis in the Mansion of Blood Decoction)	879
<i>Yin Chen Hao Tang</i> (Artemisia Scoparia Decoction)	1086
<i>Yu Zhen San</i> (True Jade Powder)	981
<i>Zhi Bao Dan</i> (Greatest Treasure Special Pill)	749
<i>Zhi Shi Dao Zhi Wan</i> (Immature Bitter Orange Pill to Guide Out Stagnation)	1270
<i>Zhou Che Wan</i> (Vessel and Vehicle Pill)	184
<i>Zhu Sha An Shen Wan</i> (Cinnabar Pill to Tranquilize the Spirit)	710
<i>Zi Jin Ding</i> (Purple Gold Special Pill)	760
<i>Zi Xue</i> (Purple Snow)	752
<i>Zuo Jin Wan</i> (Left Metal Pill)	389

Appendix 6

— Dosing Guidelines

DOSING

The dosages listed in this text refer to the daily dose for an adult of average height and weight, when using dehydrated herbs. However, the actual prescribed dosage will vary significantly, based not only on the characteristics of the illness and overall condition of the patient, but also on his or her size and age. Generally speaking, single herbs used individually require higher dosages, while herbs used as part of an herbal formula are chosen in smaller amounts. Treatment of an acute condition necessitates higher dosages, and treatment of a mild condition, smaller dosages. One must also consider the constitution of the patient. Those who are basically healthy and strong may tolerate larger doses, while weak and/or deficient patients will need a smaller dose.

Recommended ingestion levels must be adjusted to reflect variations in age and body weight. The principle behind the *Age-to-Dose Dosing Guidelines* is based on assessment of the maturity of the internal organs and their capacity to metabolize, utilize and eliminate herbs. This highly-detailed chart is especially useful for infants and younger children. The recommendations are taken from *Zhong Cao Yao* (Chinese Herbal Medicine), published by the Nanjing College of Traditional Chinese Medicine.

The principle behind the *Weight-to-Dose Dosing Guidelines* is based on the effective concentration of the herbal medicine once it is distributed throughout different areas of the body. This dosing strategy is especially useful for patients whose body weight falls outside of the normal range. All calculations are based on Clark's Rule in *Pharmaceutical Calculations*, written by Mitchell Stoklosa and Howard Ansel.

These charts provide herbal practitioners a handy reference for dosing those patients who fall outside the definition of an "average adult." It is important to remember, however, that the charts serve only as guidelines--not as absolute rules. One must always remember to treat each patient as a unique individual, not as a statistic on a chart!

Appendix 6 — Dosing Guidelines

AGE-TO-DOSE DOSING GUIDELINE

Age	Recommended Daily Dosage
0 – 1 month	1/18 - 1/14 of adult dose
1 – 6 month	1/14 - 1/7 of adult dose
6 – 12 month	1/7 - 1/5 of adult dose
1 – 2 years	1/5 - 1/4 of adult dose
2 – 4 years	1/4 - 1/3 of adult dose
4 – 6 years	1/3 - 2/5 of adult dose
6 – 9 years	2/5 - 1/2 of adult dose
9 – 14 years	1/2 - 2/3 of adult dose
14 – 18 years	2/3 - full adult dose
18 – 60 years	adult dose
60 years and over	3/4 or less of adult dose

WEIGHT-TO-DOSE DOSING GUIDELINE

Weight	Recommended Daily Dosage
30 – 40 lbs	20% - 27% of adult dose
40 – 50 lbs	27% - 33% of adult dose
50 – 60 lbs	33% - 40% of adult dose
60 – 70 lbs	40% - 47% of adult dose
70 – 80 lbs	47% - 53% of adult dose
80 – 100 lbs	53% - 67% of adult dose
100 – 120 lbs	67% - 80% of adult dose
120 – 150 lbs	80% - 100% of adult dose
150 lbs	adult dose
150 – 200 lbs	100% - 133% of adult dose
200 – 250 lbs	133% - 167% of adult dose
250 – 300 lbs	167% - 200% of adult dose

Appendix 7

— Weights and Measures: Chinese, British and Metric Systems

CHINESE SYSTEM

1. Measure of Weight

- 1 *jin* (斤) = 16 *liang* (两)
- 1 *liang* (两) = 10 *qian* (钱)
- 1 *qian* (钱) = 10 *fen* (分)
- 1 *fen* (分) = 10 *li* (厘)

2. Measure of Volume

- 1 *shi* (石) = 10 *dou* (斗)
- 1 *dou* (斗) = 10 *sheng* (升)
- 1 *sheng* (升) = 10 *he* (合)
- 1 *he* (合) = 10 *shao* (勺)

BRITISH SYSTEM

1. Measure of Weight (Apothecary)

- 20 grains = 1 scruple
- 3 scruples (60 grains) = 1 drachm or dram
- 8 drachms (480 grains) = 1 ounce
- 12 ounces (5760 grains) = 1 pound

2. Measure of Weight (Avoirdupois)

- 437½ or 437.5 grains = 1 ounce
- 16 ounces (7,000 grains) = 1 pound

3. Measure of Volume (Apothecary)

- 60 minims = 1 fluidrachm or fluidram
- 8 fluidrachms (480 minims) = 1 fluidounce
- 16 fluidounces = 1 pint
- 2 pints (32 fluidounces) = 1 quart
- 4 quarts (8 pints) = 1 gallon

METRIC SYSTEM

1. Measure of Weight

- 1 kilogram (kg) = 1,000.000 grams
 - 1 hectogram (hg) = 100.000 grams
 - 1 dekagram (dag) = 10.000 grams
 - 1 gram (g or gm) = 1.000 gram
 - 1 decigram (dg) = 0.100 gram
 - 1 centigram (cg) = 0.010 gram
 - 1 milligram (mg) = 0.001 gram
 - 1 microgram (µg or mcg) = 0.000,001 gram
-
- 1 gram (g or gm) = 0.001 kilogram
 - = 0.010 hectogram
 - = 0.100 dekagram
 - = 10 decigrams
 - = 100 centigrams
 - = 1,000 milligrams
 - = 1,000,000 micrograms

2. Measure of Volume

- 1 kiloliter (kL) = 1,000.000 liters
 - 1 hectoliter (hL) = 100.000 liters
 - 1 dekaliter (daL) = 10.000 liters
 - 1 liter (L) = 1.000 liter
 - 1 deciliter (dL) = 0.100 liter
 - 1 centiliter (cL) = 0.010 liter
 - 1 milliliter (mL) = 0.001 liter
 - 1 microliter (µL) = 0.000,001 liter
-
- 1 liter = 0.001 kiloliter
 - = 0.010 hectoliter
 - = 0.100 dekaliter
 - = 10 deciliters
 - = 100 centiliters
 - = 1,000 milliliters
 - = 1,000,000 microliters

Appendix 7 — Weights and Measures: Chinese, British and Metric Systems

METRIC SYSTEM

Multiples and Submultiples		Prefix	Symbols
1,000,000,000,000	(10 ¹²)	<i>tera-</i>	T
1,000,000,000	(10 ⁹)	<i>giga-</i>	G
1,000,000	(10 ⁶)	<i>mega-</i>	M
1,000	(10 ³)	<i>kilo-</i>	k
100	(10 ²)	<i>hecto-</i>	h
10	(10)	<i>deka-</i>	da
0.1	(10 ⁻¹)	<i>deci-</i>	d
0.01	(10 ⁻²)	<i>centi-</i>	c
0.001	(10 ⁻³)	<i>milli-</i>	m
0.000,001	(10 ⁻⁶)	<i>micro-</i>	μ or mc
0.000,000,001	(10 ⁻⁹)	<i>nano-</i>	n
0.000,000,000,001	(10 ⁻¹²)	<i>pico-</i>	p
0.000,000,000,000,001	(10 ⁻¹⁵)	<i>femto-</i>	f
0.000,000,000,000,000,001	(10 ⁻¹⁸)	<i>atto-</i>	a

CONVERSIONS

Weight Conversion (Chinese Units : Metric : Avoirdupois)

Chinese Units	Grams	Ounces
1 <i>jin</i>	500	17.87
1 <i>liang</i>	31.25	1.116875
1 <i>qian</i>	3.125	0.111688
1 <i>fen</i>	0.3125	0.011169
1 <i>li</i>	0.03125	0.001117

Volume Conversion (Chinese Units : Metric : Apothecary)

Chinese Units	Liter	Fluid Ounces
1 <i>sheng</i>	1	33.815

Note: Chinese units of weights and measures vary from dynasty to dynasty. Therefore, the conversion of Chinese units to another system is not always simple or straight forward. For additional information, please see pages 22 to 23.

Appendix 8

— Convention on International Trade in Endangered Species (CITES)

Trade in herbs and animals listed in Appendix I of Convention on International Trade in Endangered Species (CITES) is strictly prohibited. The discussion of these substances in this text is included only to offer 1) the accurate history of their critically important usage in traditional herbal medicine, and 2) models for appropriate usage of effective substitute substances and alternatives. The information should not be interpreted as condoning illegal use of these endangered species. Additional and updated information may be obtain from www.cites.org.

Endangered Species	Status	Alternatives
<i>Chuan Shan Jia</i> (Squama Manis)	Appendix II	<i>Wang Bu Liu Xing</i> (Semen Vaccariae)
<i>Hu Gu</i> (Os Tigris)	Appendix I	<i>Zhu Gu</i> (Os Porcus)
<i>She Xiang</i> (Moschus)	Appendix I/II	<i>Bing Pian</i> (Borneolum Syntheticum) or <i>Su He Xiang</i> (Styrax)
<i>Xi Jiao</i> (Cornu Rhinoceri)	Appendix I	<i>Shui Niu Jiao</i> (Cornu Bubali)
<i>Xiong Dan</i> (Fel Ursi)	Appendix I	<i>Niu Dan</i> (Fel Bovis)

Appendix 9

— Cross-reference of Single Herb Names

Pinyin Names	Pharmaceutical Names	Chinese Names
<i>A Wei</i>	Resina Ferulae	阿魏
<i>Ai Di Cha</i>	Herba Ardisiae Japonicae	矮地茶
<i>Ai Ye</i>	Folium Artemisiae Argyi	艾叶
<i>Ai Ye Tan</i>	Folium Artemisiae Argyi Carbonisatum	艾叶炭
<i>An Xi Xiang</i>	Benzoinum	安息香
<i>Ba Dou</i>	Semen Crotonis	巴豆
<i>Ba Dou Shuang</i>	Semen Crotonis Pulveratum	巴豆霜
<i>Ba Ji Tian</i>	Radix Morindae Officinalis	巴戟天
<i>Ba Jiao Feng</i>	Radix Alangii	八角枫
<i>Ba Jiao Hui Xiang</i>	Fructus Anisi Stellati	八角茴香
<i>Ba Li Ma</i>	Fructus Rhododendri	八里麻
<i>Ba Qia</i>	Rhizoma Smilacis Chinae	菝葜
<i>Bai Bian Dou</i>	Semen Lablab Album	白扁豆
<i>Bai Bu</i>	Radix Stemonae	百部
<i>Bai Fan</i>	Alumen	白矾
<i>Bai Fu Ling</i>	Poria Alba	白茯苓
<i>Bai Fu Zi</i>	Rhizoma Typhonii	白附子
<i>Bai Guo</i>	Semen Ginkgo	白果
<i>Bai He</i>	Bulbus Lilii	百合
<i>Bai Hua She She Cao</i>	Herba Hedyotis	白花蛇舌草
<i>Bai Ji</i>	Rhizoma Bletillae	白及
<i>Bai Jiang Cao</i>	Herba cum Radice Patriniae	败酱草
<i>Bai Lian</i>	Radix Ampelopsis	白蔹
<i>Bai Long Chuan Hua Tou</i>	Radix Clerodendron Paniculatum	白龙船花头
<i>Bai Mao Gen</i>	Rhizoma Imperatae	白茅根
<i>Bai Mao Hua</i>	Flos Imperatae	白茅花
<i>Bai Mu Er</i>	Fructificatio Tremellae Fuciformis	白木耳
<i>Bai Mu Tong</i>	Caulis Akebiae Trifoliatae	白木通
<i>Bai Qian</i>	Rhizoma et Radix Cynanchi Stauntonii	白前
<i>Bai Qu Cai</i>	Herba Chelidonii	白屈菜
<i>Bai Shao</i>	Radix Paeoniae Alba	白芍
<i>Bai Tou Weng</i>	Radix Pulsatillae	白头翁
<i>Bai Tou Weng Jing</i>	Caulis Pulsatillae	白头翁茎
<i>Bai Tou Weng Ye</i>	Folium Pulsatillae	白头翁叶
<i>Bai Wei</i>	Radix et Rhizoma Cynanchi Atrati	白薇
<i>Bai Xian Pi</i>	Cortex Dictamni	白鲜皮

Appendix 9 — Cross-reference of Single Herb Names

Pinyin Names	Pharmaceutical Names	Chinese Names
<i>Bai Zhi</i>	Radix Angelicae Dahuricae	白芷
<i>Bai Zhu</i>	Rhizoma Atractylodis Macrocephalae	白术
<i>Bai Zi Ren</i>	Semen Platycladi	柏子仁
<i>Ban Bian Lian</i>	Herba Lobeliae Chinensis	半边莲
<i>Ban Lan Gen</i>	Radix Isatidis	板蓝根
<i>Ban Mao</i>	Mylabris	斑蝥
<i>Ban Xia</i>	Rhizoma Pinelliae	半夏
<i>Ban Xia Qu</i>	Rhizoma Pinelliae Massa Fermentata	半夏曲
<i>Ban Zhi Lian</i>	Herba Scutellariae Barbatae	半枝莲
<i>Bao Ma Zi Pi</i>	Cortex Syringae Amurensis	暴马子皮
<i>Bei Chai Hu</i>	Radix Bupleurum Chinensis	北柴胡
<i>Bei Dou Gen</i>	Rhizoma Menispermis	北豆根
<i>Bei Mu</i>	Bulbus Fritillariae	贝母
<i>Bei Sha Shen</i>	Radix Glehniae	北沙参
<i>Bei Ting Li Zi</i>	Semen Lepidii	北葶苈子
<i>Bi Bo</i>	Fructus Piperis Longi	荜茇
<i>Bi Cheng Qie</i>	Fructus Litseae	荜澄茄
<i>Bi Ma Zi</i>	Semen Ricini	蓖麻子
<i>Bi Zi Cao</i>	Herba Pogonanthi Crinita	笔仔草
<i>Bian Dou Hua</i>	Flos Lablab Album	扁豆花
<i>Bian Dou Yi</i>	Pericarpium Lablab Album	扁豆衣
<i>Bian Xu</i>	Herba Polygoni Avicularis	篇蓄
<i>Bie Jia</i>	Carapax Trionycis	鳖甲
<i>Bie Jia Jiao</i>	Gelatinum Carapax Trionycis	鳖甲胶
<i>Bing Lang</i>	Semen Arecae	槟榔
<i>Bing Pian</i>	Borneolum Syntheticum	冰片
<i>Bo He</i>	Herba Menthae	薄荷
<i>Bo He Nao</i>	Mentholum	薄荷脑
<i>Bo Luo Hui</i>	Herba Macleayae	博落回
<i>Bu Gu Zhi</i>	Fructus Psoraleae	补骨脂
<i>Can Sha</i>	Faeces Bombycis	蚕砂
<i>Cang Er Cao</i>	Herba Xanthii	苍耳草
<i>Cang Er Gen</i>	Radix Xanthii	苍耳根
<i>Cang Er Zi</i>	Fructus Xanthii	苍耳子
<i>Cang Zhu</i>	Rhizoma Atractylodis	苍术
<i>Cao Dou Kou</i>	Semen Alpiniae Katsumadai	草豆蔻
<i>Cao Guo</i>	Fructus Tsaoako	草果
<i>Cao Wu</i>	Radix Aconiti Kusnezoffii	草乌
<i>Cao Wu Ye</i>	Folium Aconiti Kusnezoffii	草乌叶
<i>Ce Bai Ye</i>	Cacumen Platycladi	侧柏叶
<i>Ce Bai Ye Tan</i>	Cacumen Platycladi Carbonisatum	侧柏叶炭

Appendix 9 — Cross-reference of Single Herb Names

Pinyin Names	Pharmaceutical Names	Chinese Names
<i>Cha Chi Huang</i>	Herba Stellariae Aquaticae	茶匙黄
<i>Cha Ye</i>	Folium Camelliae	茶叶
<i>Chai Hu</i>	Radix Bupleuri	柴胡
<i>Chan Su</i>	Venenum Bufonis	蟾酥
<i>Chan Tui</i>	Periostracum Cicadae	蝉蜕
<i>Chang Shan</i>	Radix Dichroae	常山
<i>Chang Zui Lao Guan Cao</i>	Herba Erodii	长嘴老鹳草
<i>Chao Gua Lou Zi</i>	Semen Trichosanthis Tostum	炒瓜蒌子
<i>Che Qian Cao</i>	Herba Plantaginis	车前草
<i>Che Qian Zi</i>	Semen Plantaginis	车前子
<i>Chen Pi</i>	Pericarpium Citri Reticulatae	陈皮
<i>Chen Xiang</i>	Lignum Aquilariae Resinatum	沉香
<i>Chi Fu Ling</i>	Poria Rubra	赤茯苓
<i>Chi Shao</i>	Radix Paeoniae Rubra	赤芍
<i>Chi Shi Zhi</i>	Halloysitum Rubrum	赤石脂
<i>Chi Xiao Dou</i>	Semen Phaseoli	赤小豆
<i>Chong Bai La</i>	Cera Chinensis	虫白蜡
<i>Chong Lou</i>	Rhizoma Paridis	重楼
<i>Chong Wei Zi</i>	Fructus Leonuri	茺蔚子
<i>Chou Wu Tong</i>	Folium Clerodendri Trichotomi	臭梧桐
<i>Chu Chong Ju</i>	Flos Pyrethri	除虫菊
<i>Chu Shi Zi</i>	Fructus Broussonetiae	楮实子
<i>Chuan Bei Mu</i>	Bulbus Fritillariae Cirrhosae	川贝母
<i>Chuan Lian Zi</i>	Fructus Toosendan	川楝子
<i>Chuan Mu Tong</i>	Caulis Clematidis Armandii	川木通
<i>Chuan Mu Xiang</i>	Radix Vladimirieae	川木香
<i>Chuan Niu Xi</i>	Radix Cyathulae	川牛膝
<i>Chuan Shan Jia</i>	Squama Manis	穿山甲
<i>Chuan Shan Long</i>	Rhizoma Dioscoreae Nipponicae	穿山龙
<i>Chuan She Gan</i>	Rhizoma Iridis Tectori	川射干
<i>Chuan Wu</i>	Radix Aconiti	川乌
<i>Chuan Xin Lian</i>	Herba Andrographis	穿心莲
<i>Chuan Xiong</i>	Rhizoma Chuanxiong	川芎
<i>Chui Pen Cao</i>	Herba Sedi	垂盆草
<i>Chun Gen</i>	Radix Ailanthi	椿根
<i>Chun Pi</i>	Cortex Ailanthi	椿皮
<i>Ci Shi</i>	Magnetitum	磁石
<i>Ci Wu Jia</i>	Radix et Rhizoma seu Caulis Acanthopanax Senticosi	刺五加
<i>Cong</i>	Herba Allii Fistulosi	葱
<i>Cong Bai</i>	Bulbus Allii Fistulosi	葱白
<i>Da Ding Huang</i>	Caulis Euonymi	大疗瘻

Appendix 9 — Cross-reference of Single Herb Names

Pinyin Names	Pharmaceutical Names	Chinese Names
<i>Da Dou Huang Juan</i>	<i>Semen Glycines Germinatum</i>	大豆黄卷
<i>Da Feng Zi</i>	<i>Semen Hydnocarpi</i>	大风子
<i>Da Fu Pi</i>	<i>Pericarpium Arecae</i>	大腹皮
<i>Da Huang</i>	<i>Radix et Rhizoma Rhei</i>	大黄
<i>Da Huang Tan</i>	<i>Radix et Rhizoma Rhei Carbonisatus</i>	大黄炭
<i>Da Ji</i>	<i>Radix Euphorbiae seu Knoxiae</i>	大戟
<i>Da Ji</i>	<i>Herba Cirsii Japonici</i>	大蓟
<i>Da Ji Gen</i>	<i>Radix Cirsii Japonici</i>	大蓟根
<i>Da Ji Tan</i>	<i>Herba Cirsii Japonici Carbonisatum</i>	大蓟炭
<i>Da Ji Ye</i>	<i>Folium Cirsii Japonici</i>	大蓟叶

<i>Ping Bei Mu</i>	Bulbus Fritillariae Ussuriensis	平贝母
<i>Po Bu Zi Ye</i>	Folium Cordia Dichotoma	破布子叶
<i>Po Xiao</i>	Sal Glauberis	朴硝
<i>Pu Gong Ying</i>	Herba Taraxaci	蒲公英
<i>Pu Huang</i>	Pollen Typhae	蒲黄
<i>Pu Huang Tan</i>	Pollen Typhae Carbonisatum	蒲黄炭
<i>Pu Tao Zi</i>	Semen Vitis Viniferae	葡萄子
<i>Pu Yin</i>	Radix Wikstroemia Indica	埔银
<i>Qi Dai</i>	Corda Umbilicalis Hominis	脐带
<i>Qi She</i>	Agkistrodon	蕲蛇
<i>Qi Ye Lian</i>	Radix Schefflerae	七叶莲
<i>Qian Cao</i>	Radix et Rhizoma Rubiae	茜草
<i>Qian Cao Tan</i>	Radix et Rhizoma Rubiae Carbonisatus	茜草炭
<i>Qian Ceng Ta</i>	Herba Lycopodii Serrati	千层塔
<i>Qian Dan</i>	Minium	铅丹
<i>Qian Hu</i>	Radix Peucedani	前胡
<i>Qian Jin Zi</i>	Semen Euphorbiae	千金子
<i>Qian Jin Zi Shuang</i>	Semen Euphorbiae Pulveratum	千金子霜
<i>Qian Li Guang</i>	Herba Senecionis Scandens	千里光
<i>Qian Nian Jian</i>	Rhizoma Homalomenae	千年健
<i>Qian Niu Zi</i>	Semen Pharbitidis	牵牛子
<i>Qian Shi</i>	Semen Euryales	芡实
<i>Qiang Huo</i>	Rhizoma et Radix Notopterygii	羌活
<i>Qiao Mai</i>	Semen Fagopyri Esculenti	荞麦
<i>Qin Jiao</i>	Radix Gentianae Macrophyllae	秦艽
<i>Qin Pi</i>	Cortex Fraxini	秦皮

Appendix 9 — Cross-reference of Single Herb Names

Pinyin Names	Pharmaceutical Names	Chinese Names
<i>Qing Dai</i>	Indigo Naturalis	青黛
<i>Qing Fen</i>	Calomelas	轻粉
<i>Qing Feng Teng</i>	Caulis Sinomenii	青风藤
<i>Qing Ge Qiao</i>	Concha Cyclinae	青蛤壳
<i>Qing Guo</i>	Fructus Canarii	青果
<i>Qing Guo Gen</i>	Radix Canarii	青果根
<i>Qing Hao</i>	Herba Artemisiae Annuae	青蒿
<i>Qing Ma Zi</i>	Semen Abutili	苘麻子
<i>Qing Meng Shi</i>	Lapis Chloriti	青礞石
<i>Qing Mu Xiang</i>	Radix Aristolochiae	青木香
<i>Qing Niu Jiao Fen</i>	Cornus Bovis	青牛角粉
<i>Qing Pi</i>	Pericarpium Citri Reticulatae Viride	青皮
<i>Qing Xiang Zi</i>	Semen Celosiae	青箱子
<i>Qing Ye Dan</i>	Herba Swertiae Mileensis	青叶胆
<i>Qu Mai</i>	Herba Dianthi	瞿麦
<i>Quan Shen</i>	Rhizoma Bistortae	拳参
<i>Quan Xie</i>	Scorpio	全蝎
<i>Ren Dong Cao</i>	Herba Lonicerae Japonicae	忍冬草
<i>Ren Dong Teng</i>	Caulis Lonicerae Japonicae	忍冬藤
<i>Ren Gong Niu Huang</i>	Calculus Bovis Artifactus	人工牛黄
<i>Ren Shen</i>	Radix et Rhizoma Ginseng	人参
<i>Ren Shen Ye</i>	Folium Ginseng	人参叶
<i>Ren Zhong Bai</i>	Urinae Hominis Sedimen	人中白
<i>Rou Cong Rong</i>	Herba Cistanches	肉苁蓉
<i>Rou Dou Gen</i>	Radix Myristicae	肉豆根
<i>Rou Dou Kou</i>	Semen Myristicae	肉豆蔻
<i>Rou Gui</i>	Cortex Cinnamomi	肉桂
<i>Ru Xiang</i>	Gummi Olibanum	乳香
<i>Rui Ren</i>	Nux Prinsepiae	蕤仁
<i>San Bai Cao</i>	Herba Saururi	三白草
<i>San Leng</i>	Rhizoma Sparganii	三棱
<i>San Qi</i>	Radix et Rhizoma Notoginseng	三七
<i>San Qi Ye</i>	Folium Notoginseng	三七叶
<i>Sang Bai Pi</i>	Cortex Mori	桑白皮
<i>Sang Ji Sheng</i>	Herba Taxilli	桑寄生
<i>Sang Piao Xiao</i>	Ootheca Mantidis	桑螵蛸
<i>Sang Shen</i>	Fructus Mori	桑椹
<i>Sang Ye</i>	Folium Mori	桑叶
<i>Sang Zhi</i>	Ramulus Mori	桑枝
<i>Sha Ji</i>	Fructus Hippophae	沙棘
<i>Sha Ren</i>	Fructus Amomi	砂仁

Appendix 9 — Cross-reference of Single Herb Names

Pinyin Names	Pharmaceutical Names	Chinese Names
<i>Sha Ren Ke</i>	<i>Pericarpium Amomi</i>	砂仁壳
<i>Sha Shen</i>	<i>Radix Glehniae seu Adenophorae</i>	沙参
<i>Sha Yuan Zi</i>	<i>Semen Astragali Complanati</i>	沙苑子
<i>Shan Ci Gu</i>	<i>Pseudobulbus Cremastrae seu Pleiones</i>	山慈姑
<i>Shan Dou Gen</i>	<i>Radix et Rhizoma Sophorae Tonkinensis</i>	山豆根
<i>Shan Geng Cai</i>	<i>Herba Lobeliae Sessilifoliae</i>	山梗菜
<i>Shan Ma Ti</i>	<i>Radix Rauvolfiae Hainanensis</i>	山马蹄
<i>Shan Mai Dong</i>	<i>Radix Liriope</i>	山麦冬
<i>Shan Nai</i>	<i>Rhizoma Kaempferiae</i>	山柰
<i>Shan Pu Tao</i>	<i>Radix Vitis Amurensis</i>	山葡萄

<i>Shi Gao</i>	<i>Gypsum Fibrosum</i>	石膏
<i>Shi Hu</i>	<i>Caulis Dendrobii</i>	石斛
<i>Shi Jue Ming</i>	<i>Concha Halitidis</i>	石决明
<i>Shi Jun Zi</i>	<i>Fructus Quisqualis</i>	使君子
<i>Shi Lian Zi</i>	<i>Herba Sinocrassulae Indicae</i>	石莲子
<i>Shi Liu Gen Pi</i>	<i>Cortex Radix Granati</i>	石榴根皮
<i>Shi Liu Guo</i>	<i>Fructus Granati</i>	石榴果
<i>Shi Liu Pi</i>	<i>Pericarpium Granati</i>	石榴皮
<i>Shi Liu Pi Tan</i>	<i>Pericarpium Granati Carbonisatum</i>	石榴皮炭

Appendix 9 — Cross-reference of Single Herb Names

Pinyin Names	Pharmaceutical Names	Chinese Names
Shi Luo	Fructus Anethum Graveolens	荜萝
Shi Nan Teng	Ramulus Piper	石南藤
Shi Nan Ye	Folium Photiniae	石南叶
Shi Suan	Bulbus Lycoris	石蒜
Shi Wei	Folium Pyrrosiae	石韦
Shi Xian Tao	Pseudobulbus Pholidotae Chinensis	石仙桃
Shou Wu Teng	Caulis Polygoni Multiflori	首乌藤
Shu Di Huang	Radix Rehmanniae Praeparata	熟地黄
Shu Hua Sha Shen	Radix Adenophorae Remotiflora	疏花沙参
Shu Qi	Folium Dichroae	蜀漆
Shu Wei Huang	Herba Rostellulariae	鼠尾黄
Shuang Liu Huang	Herba Vernoniae Patulae	双柳黄
Shui Ban Xia	Rhizoma Typhonii Flagelliformis	水半夏
Shui Ding Xiang	Herba Ludwigiae Prostratae	水丁香
Shui Fei Ji	Fructus Silybi	水飞蓟
Shui Hong Hua Zi	Fructus Polygoni Orientalis	水缸花子
Shui Niu Jiao	Cornu Bubali	水牛角
Shui Yin	Hydrargyrum	水银
Shui Zhi	Hirudo	水蛭
Si Chuan Da Jin Qian Cao	Herba Lysimachia Christinae	四川大金钱草
Si Gua Luo	Retinervus Luffae Fructus	丝瓜络
Song Guo	Fructus Pini	松果
Song Hua Fen	Pollen Pini	松花粉
Song Jie	Lignum Pini Nodi	松节
Song Luo	Herba Usneae	松萝
Song Ye	Folium Pini	松叶
Su He Xiang	Styrax	苏合香
Su Mu	Lignum Sappan	苏木
Suan Zao Ren	Semen Ziziphi Spinosae	酸枣仁
Suo Luo Zi	Semen Aesculi	娑罗子
Suo Yang	Herba Cynomorii	锁阳
Tai Zi Shen	Radix Pseudostellariae	太子参
Tan Xiang	Lignum Santali Albi	檀香
Tao Ren	Semen Persicae	桃仁
Teng Huang	Resina Garciniae	藤黄
Tian Dong	Radix Asparagi	天冬
Tian Hua Fen	Radix Trichosanthis	天花粉
Tian Kui Zi	Radix Semiaquilegiae	天葵子
Tian Ma	Rhizoma Gastrodiae	天麻
Tian Nan Xing	Rhizoma Arisaematis	天南星
Tian Ran Bing Pian	Borneolum	天然冰片

Appendix 9 — Cross-reference of Single Herb Names

Pinyin Names	Pharmaceutical Names	Chinese Names
<i>Tian Shan Xue Lian</i>	Herba Saussureae Involucratae	天山雪莲
<i>Tian Xian Teng</i>	Herba Aristolochiae	天仙藤
<i>Tian Xian Zi</i>	Semen Hyoscyami	天仙子
<i>Tian Zhu Huang</i>	Concretio Silicea Bambusae	天竺黄
<i>Tian Zhu Zi</i>	Fructus Nandinae Domesticae	天竹子
<i>Ting Li Zi</i>	Semen Descurainiae seu Lepidii	葶苈子
<i>Tong Bian</i>	Infantis Urina	童便
<i>Tong Cao</i>	Medulla Tetrapanacis	通草
<i>Tou Gu Cao</i>	Caulis Impatiensis	透骨草
<i>Tu Bei Mu</i>	Rhizoma Bolbostematis	土贝母
<i>Tu Bie Chong</i>	Eupolyphaga seu Steleophaga	土鳖虫
<i>Tu Fu Ling</i>	Rhizoma Smilacis Glabrae	土茯苓
<i>Tu Jing Jie</i>	Herba Chenopodii	土荆芥
<i>Tu Jing Pi</i>	Cortex Pseudolaricis	土荆皮
<i>Tu Mu Xiang</i>	Radix Inulae	土木香
<i>Tu Niu Xi</i>	Radix Achyranthis Longifoliae	土牛膝
<i>Tu Rou Gui</i>	Cortex Cinnamomum Burmannium	土肉桂
<i>Tu Si Zi</i>	Semen Cuscutae	菟丝子
<i>Tu Xi Xin</i>	Herba Asari Forbesii	土细辛
<i>Wa Leng Zi</i>	Concha Arcae	瓦楞子
<i>Wa Song</i>	Herba Orostachyis Fimbriati	瓦松
<i>Wan Dian Jin</i>	Radix Ilicis Asprellae	万点金
<i>Wan Nian Qing</i>	Rhizoma et Herba Rohdea	万年青
<i>Wang Bu Liu Xing</i>	Semen Vaccariae	王不留行
<i>Wei Ling Cai</i>	Herba Potentillae Chinensis	委陵菜
<i>Wei Ling Xian</i>	Radix et Rhizoma Clematidis	威灵仙
<i>Wen Ge Qiao</i>	Concha Meretricis	文蛤壳
<i>Wu Bei Zi</i>	Galla Chinensis	五倍子
<i>Wu Gong</i>	Scolopendra	蜈蚣
<i>Wu Jia Pi</i>	Cortex Acanthopanax	五加皮
<i>Wu Jiu</i>	Cortex Radix Sapii	乌桕
<i>Wu Ling Zhi</i>	Faeces Troglodyteri seu Pteromi	五灵脂
<i>Wu Long Cha</i>	Folium Camellia Fermentata	乌龙茶
<i>Wu Mei</i>	Fructus Mume	乌梅
<i>Wu Ming Yi</i>	Pyrolusitum	无名异
<i>Wu Shao She</i>	Zaocys	乌梢蛇
<i>Wu Teng</i>	Ramulus Linderae	乌藤
<i>Wu Tian</i>	Radix et Folium Vitis Quinatae	乌甜
<i>Wu Tong Zi</i>	Semen Firmianae	梧桐子
<i>Wu Wei Zi</i>	Fructus Schisandrae Chinensis	五味子
<i>Wu Yao</i>	Radix Linderae	乌药

Appendix 9 — Cross-reference of Single Herb Names

Pinyin Names	Pharmaceutical Names	Chinese Names
Wu Ye Mu Tong	Caulis Quinata	五叶木通
Wu Yi	Fructus Ulmi Praeparatus	芫荑
Wu Zhu Yu	Fructus Evodiae	吴茱萸
Xi Gua	Fructus Citrulli	西瓜
Xi Gua Cui Pi	Exocarpium Citrulli	西瓜翠皮
Xi Gua Pi	Pericarpium Citrulli	西瓜皮
Xi Gua Shuang	Mirabilitum Praeparatum	西瓜霜
Xi He Liu	Cacumen Tamaricis	西合柳
Xi Hong Hua	Stigma Croci	西红花
Xi Huang	Calculus Bovis	犀黄
Xi Jiao	Cornu Rhinoceri	犀角
Xi Qing Guo	Fructus Chebulae Immaturus	西青果
Xi Shu	Camptotheca	喜树
Xi Xian Cao	Herba Siegesbeckiae	豨薟草
Xi Xin	Radix et Rhizoma Asari	细辛
Xi Yang Shen	Radix Panacis Quinquefolii	西洋参
Xia Ku Cao	Spica Prunellae	夏枯草
Xia Ku Hua	Flos Prunellae	夏枯花
Xia Tian Wu	Rhizoma Corydalis Decumbentis	夏天无
Xian Di Huang	Radix Rehmanniae Recens	鲜地黄
Xian Feng Cao	Herba Bidentis	咸丰草
Xian He Cao	Herba Agrimoniae	仙鹤草
Xian Mao	Rhizoma Curculiginis	仙茅
Xiang Fu	Rhizoma Cyperi	香附
Xiang Jia Pi	Cortex Periplocae	香加皮
Xiang Ru	Herba Moslae	香薷
Xiang Si Cao	Herba Eupatorii Formosani	相思草
Xiang Si Zi	Semen Abrus Precatoris	相思子
Xiang Yuan	Fructus Citri	香橼
Xiao Hui Xiang	Fructus Foeniculi	小茴香
Xiao Ji	Herba Cirsii	小蓟
Xiao Jin Ying	Fructus Rosae Cymosae	小金樱
Xiao Mai	Fructus Triticis	小麦
Xiao Tong Cao	Medulla Stachyuri seu Helwingiae	小通草
Xiao Ye Lian	Fructus Podophylli	小叶莲
Xie Bai	Bulbus Allii Macrostemonis	韭白
Xie Cao	Radix et Rhizoma Valerianae	缬草
Xin Yi	Flos Magnoliae	辛夷
Xing Ren Shu Pi	Cortex Pruni Armeniacae	杏仁树皮
Xiong Dan	Fel Ursi	熊胆
Xiong Huang	Realgar	雄黄

Appendix 9 — Cross-reference of Single Herb Names

Pinyin Names	Pharmaceutical Names	Chinese Names
<i>Xu Chang Qing</i>	Radix et Rhizoma Cynanchi Paniculati	徐长卿
<i>Xu Duan</i>	Radix Dipsaci	续断
<i>Xuan Diao Zi Jing</i>	Ramulus Rubi	悬钩子茎
<i>Xuan Fu Hua</i>	Flos Inulae	旋覆花
<i>Xuan Ming Fen</i>	Natrii Sulfas Exsiccatus	玄明粉
<i>Xuan Shen</i>	Radix Scrophulariae	玄参
<i>Xue Jie</i>	Sanguis Draconis	血竭
<i>Xue Shang Yi Zhi Hao</i>	Radix Aconiti Brachypodi	雷上一枝蒿
<i>Xue Yu Tan</i>	Crinis Carbonisatus	血余炭
<i>Xun Gu Feng</i>	Herba Aristolochiae Mollissimae	寻骨风
<i>Ya Dan Zi</i>	Fructus Bruceae	鸦胆子
<i>Ya Hu Nu</i>	Herba Cissampelotis	亚乎奴
<i>Ya Ma Zi</i>	Semen Lini	亚麻子
<i>Ya She Huang</i>	Herba Lippiae	鸭舌黄
<i>Ya Zhi Cao</i>	Herba Commelinae	鸭跖草
<i>Yan Hu Suo</i>	Rhizoma Corydalis	延胡索
<i>Yang Dan</i>	Fel Capra seu Ovis	羊胆
<i>Yang Jiao Ao</i>	Fructus Strophanthi	羊角拗
<i>Yang Jin Hua</i>	Flos Daturae	洋金花
<i>Yang Qi Shi</i>	Actinolitum	阳起石
<i>Yang Ti</i>	Radix Rumicis Japonici	羊蹄
<i>Ye Ju Hua</i>	Flos Chrysanthemi Indici	野菊花
<i>Ye Ming Sha</i>	Faeces Vespertilionis Murini	夜明砂
<i>Ye Ying Pi</i>	Pericarpium Prunus Pseudocerasus	野樱皮
<i>Yi Bei Mu</i>	Bulbus Fritillariae Pallidiflorae	伊贝母
<i>Yi Mu Cao</i>	Herba Leonuri	益母草
<i>Yi Tang</i>	Maltosum	饴糖
<i>Yi Tiao Gen</i>	Radix Moghaniae	一条根
<i>Yi Wu Gen</i>	Radix Elaeagni	宜梧根
<i>Yi Ye Qiu</i>	Radix Securinegae Suffruticosae	一叶萩
<i>Yi Yi Gen</i>	Radix Coicis	薏苡根
<i>Yi Yi Ren</i>	Semen Coicis	薏苡仁
<i>Yi Zhi</i>	Fructus Alpiniae Oxyphyllae	益智
<i>Yi Zhi Xiang</i>	Herba Vernoniae Cinereae	一枝香
<i>Yin Bo</i>	Silver foil	银箔
<i>Yin Chai Hu</i>	Radix Stellariae	银柴胡
<i>Yin Chen</i>	Herba Artemisiae Scopariae	茵陈
<i>Yin Xing Ye</i>	Folium Ginkgo	银杏叶
<i>Yin Yang Huo</i>	Herba Epimedii	淫羊藿
<i>Yin Yu</i>	Caulis et Folium Skimmiae	茵芋
<i>Ying Su Ke</i>	Pericarpium Papaveris	罂粟壳

Appendix 9 — Cross-reference of Single Herb Names

Pinyin Names	Pharmaceutical Names	Chinese Names
<i>You Chong Zhu</i>	Blattela	油虫珠
<i>Yu Gan Zi</i>	Fructus Phyllanthi	余甘子
<i>Yu Jin</i>	Radix Curcumae	郁金
<i>Yu Li Ren</i>	Semen Pruni	郁李仁
<i>Yu Mi Xu</i>	Stigma Maydis	玉米须
<i>Yu Teng</i>	Radix seu Herba Derridis Trifoliatae	鱼藤
<i>Yu Xing Cao</i>	Herba Houttuyniae	鱼腥草
<i>Yu Yu Liang</i>	Limonitum	禹余粮
<i>Yu Zhi Zi</i>	Fructus Akebiae	预知子
<i>Yu Zhou Lou Lu</i>	Radix Echinopsis	禹州漏芦
<i>Yu Zhu</i>	Rhizoma Polygonati Odorati	玉竹
<i>Yuan Hua</i>	Flos Genkwa	芫花
<i>Yuan Zhi</i>	Radix Polygalae	远志
<i>Yue Ji Hua</i>	Flos Rosae Chinensis	月季花
<i>Yun Zhi</i>	Coriolus	云芝
<i>Zang Chang Pu</i>	Rhizoma Acori Calami	藏菖蒲
<i>Zao Jiao</i>	Fructus Gleditsiae	皂角
<i>Zao Jiao Ci</i>	Spina Gleditsiae	皂角刺
<i>Ze Lan</i>	Herba Lycopi	泽兰
<i>Ze Qi</i>	Herba Euphorbiae Helioscopiae	泽漆
<i>Ze Xie</i>	Rhizoma Alismatis	泽泻
<i>Zhang Mu Xiang</i>	Radix Inulae Racemosae	藏木香
<i>Zhang Nao</i>	Camphora	樟脑
<i>Zhang Ya Cai</i>	Herba Swertiae	獐牙菜
<i>Zhao Shan Bai</i>	Folium Rhododendri Micranthi	照山白
<i>Zhe Bei Mu</i>	Bulbus Fritillariae Thunbergii	浙贝母
<i>Zhe Shi</i>	Haematitum	赭石
<i>Zhen Zhu</i>	Margarita	珍珠
<i>Zhen Zhu Mu</i>	Concha Margaritiferae	珍珠母
<i>Zhi Cao Wu</i>	Radix Aconiti Kusnezoffii Praeparata	制草乌
<i>Zhi Chuan Wu</i>	Radix Aconiti Praeparata	制川乌
<i>Zhi Gan Cao</i>	Radix et Rhizoma Glycyrrhizae Praeparata cum Melle	炙甘草
<i>Zhi He Shou Wu</i>	Radix Polygoni Multiflori Praeparata cum Succo Glycines Sojae	炙何首乌
<i>Zhi Hong Qi</i>	Radix Hedysari Praeparata cum Melle	炙红芪
<i>Zhi Huang Qi</i>	Radix Astragali Praeparata cum Melle	炙黄芪
<i>Zhi Ju Zi</i>	Fructus Hoveniae	枳椇子
<i>Zhi Ma Huang</i>	Herba Ephedrae Praeparata	炙麻黄
<i>Zhi Mu</i>	Rhizoma Anemarrhenae	知母
<i>Zhi Qiao</i>	Fructus Aurantii	枳壳
<i>Zhi Qiao Tan</i>	Fructus Aurantii Carbonisatum	枳壳炭

Appendix 9 — Cross-reference of Single Herb Names

Pinyin Names	Pharmaceutical Names	Chinese Names
Zhi Shi	Fructus Aurantii Immaturus	枳实
Zhi Xie Mu Zi	Semen Holarrhena Antidysentericae	止泻木子
Zhi Zi	Fructus Gardeniae	栀子
Zhi Zi Pi	Pericarpium Gardeniae	栀子皮
Zhi Zi Ren	Semen Gardeniae	栀子仁
Zhong Jie Feng	Herba Sarcandrae	肿节风
Zhong Ru Shi	Stalactitum	钟乳石
Zhu Dan	Fel Porcus	猪胆
Zhu Dan Fen	Pulvis Fellis Suis	猪胆粉
Zhu Fan Hua Tou	Rhizoma Mirabilidis	煮饭花头
Zhu Gu	Os Porcus	猪骨
Zhu Jie Shen	Rhizoma Panacis Japonici	竹节参
Zhu Li	Succus Bambusae	竹沥
Zhu Ling	Polyporus	猪苓
Zhu Ru	Caulis Bambusae in Taenia	竹茹
Zhu Sha	Cinnabaris	朱砂
Zhu Sha Gen	Radix Ardisiae Crenatae	朱砂根
Zhu Ya Zao	Fructus Gleditsiae Abnormalis	猪牙皂
Zhu Ye	Herba Phyllostachys	竹叶
Zhu Zi Cao	Herba Euphorbiae Thymifoliae	珠子草
Zhu Zi Shen	Rhizoma Panacis Majoris	珠子参
Zi Bei Tian Kui	Herba Semiaquilegiae	紫背天葵
Zi Cao	Radix Arnebiae	紫草
Zi He Che	Placenta Hominis	紫河车
Zi Hua Di Ding	Herba Viola	紫花地丁
Zi Jin Pi	Radix Tripterygii Hypoglauci	紫金皮
Zi Ran Tong	Pyritum	自然铜
Zi Shi Ying	Fluoritum	紫石英
Zi Su Geng	Caulis Perillae	紫苏梗
Zi Su Ye	Folium Perillae	紫苏叶
Zi Su Zi	Fructus Perillae	紫苏子
Zi Wan	Radix et Rhizoma Asteris	紫苑
Zi Zhu	Folium Callicarpae	紫珠
Zong Lu	Petiolus Trachycarpi	棕榈
Zong Lu Zi	Fructus Trachycarpi	棕榈子
Zou Ma Tai	Rhizoma Ardisiae	走马胎
Zu Shi Ma	Cortex Daphnes	祖师麻

Appendix 10

— Cross-reference of Herbal Formula Names

Pinyin Names (Literal Names)	Chinese Names
<i>Ai Fu Nuan Gong Wan</i> (Mugwort and Cyperus Pill for Warming the Womb)	艾附暖宫丸
<i>An Gong Niu Huang Wan</i> (Calm the Palace Pill with Cattle Gallstone)	安宫牛黄丸
<i>An Shen Tang</i> (Tranquilize the Spirit Decoction)	安神汤
<i>An Zhong San</i> (Calm the Middle Powder)	安中散
<i>Ba Wei Dai Xia Fang</i> (Eight-Ingredient Formula for Leukorrhea)	八味带下方
<i>Ba Wei Di Huang Wan</i> (Eight-Ingredient Pill with Rehmannia)	八味地黄丸
<i>Ba Zhen Tang</i> (Eight-Treasure Decoction)	八珍汤
<i>Ba Zheng San</i> (Eight-Herb Powder for Rectification)	八正散
<i>Bai Du San</i> (Overcome Pathogenic Influences Powder)	败毒散
<i>Bai Du Tang</i> (Overcome Pathogenic Influences Decoction)	败毒汤
<i>Bai He Gu Jin Tang</i> (Lily Bulb Decoction to Preserve the Metal)	百合固金汤
<i>Bai Hu Jia Cang Zhu Tang</i> (White Tiger plus Atractylodes Decoction)	白虎加苍术汤
<i>Bai Hu Jia Gui Zhi Tang</i> (White Tiger plus Cinnamon Twig Decoction)	白虎加桂枝汤
<i>Bai Hu Jia Ren Shen Tang</i> (White Tiger plus Ginseng Decoction)	白虎加人参汤
<i>Bai Hu Tang</i> (White Tiger Decoction)	白虎汤
<i>Bai Mao Gen Tang</i> (Imperata Decoction)	白茅根汤
<i>Bai Tong Tang</i> (White Penetrating Decoction)	白通汤
<i>Bai Tou Weng Jia Gan Cao E Jiao Tang</i> (Pulsatilla Decoction plus Licorice and Ass-Hide Gelatin)	白头翁加甘草 阿胶汤
<i>Bai Tou Weng Tang</i> (Pulsatilla Decoction)	白头翁汤
<i>Bai Zi Yang Xin Wan</i> (Biota Seed Pill to Nourish the Heart)	柏子养心丸
<i>Ban Xia Bai Zhu Tian Ma Tang</i> (Pinellia, Atractylodes Macrocephala, and Gastrodia Decoction)	半夏白术天麻汤
<i>Ban Xia Hou Po Tang</i> (Pinellia and Magnolia Bark Decoction)	半夏厚朴汤
<i>Ban Xia Xie Xin Tang</i> (Pinellia Decoction to Drain the Epigastrium)	半夏泻心汤
<i>Bao Chan Wu You Fang</i> (Preserve Pregnancy and Care-Free Decoction)	保产无忧方
<i>Bao He Wan</i> (Preserve Harmony Pill)	保和丸
<i>Bao Yuan Tang</i> (Preserve the Basal Decoction)	保元汤
<i>Bei Mu Gua Lou San</i> (Fritillaria and Trichosanthes Fruit Powder)	贝母瓜蒌散
<i>Bi Xie Fen Qing Yin</i> (Dioscorea Hypoglauca Decoction to Separate the Clear)	萆薢分清饮
<i>Bi Yu San</i> (Jasper Powder)	碧玉散
<i>Bie Jia Jian Wan</i> (Soft-Shelled Turtle Shell Pill)	鳖甲煎丸
<i>Bu Dai Wan</i> (Cloth Sack Pill)	布袋丸
<i>Bu Fei E Jiao Tang</i> (Tonify the Lung Decoction with Ass-Hide Gelatin)	补肺阿胶汤
<i>Bu Fei Tang</i> (Tonify the Lung Decoction)	补肺汤
<i>Bu Gu Wan</i> (Tonify the Bone Pill)	补骨丸

Appendix 10 — Cross-reference of Herbal Formula Names

Pinyin Names (Literal Names)	Chinese Names
<i>Bu Huan Jin Zheng Qi San</i> (Rectify the Qi Powder Worth More than Gold)	不换金正气散
<i>Bu Shen Tang</i> (Tonify the Kidney Decoction)	补肾汤
<i>Bu Shen Wan</i> (Tonify the Kidney Pill)	补肾丸
<i>Bu Yang Huan Wu Tang</i> (Tonify the Yang to Restore Five Decoction)	补阳还五汤
<i>Bu Zhong Yi Qi Tang</i> (Tonify the Middle and Augment the Qi Decoction)	补中益气汤
<i>Can Shi Tang</i> (Silkworm Droppings Decoction)	蚕矢汤
<i>Cang Er Zi San</i> (Xanthium Powder)	苍耳子散
<i>Cang Lin San</i> (Old Rice Granary Powder)	仓廩散
<i>Chai Ge Jie Ji Tang</i> (Bupleurum and Kudzu Decoction to Release the Muscle Layer)	柴葛解肌汤
<i>Chai Hu An Shen Tang</i> (Bupleurum Decoction to Tranquilize the Spirit)	柴胡安神汤
<i>Chai Hu Da Yuan Yin</i> (Bupleurum Decoction to Reach the Membrane Source)	柴胡达原饮
<i>Chai Hu Gui Zhi Gan Jiang Tang</i> (Bupleurum, Cinnamon Twig, and Ginger Decoction)	柴胡桂枝乾姜汤
<i>Chai Hu Gui Zhi Tang</i> (Bupleurum and Cinnamon Twig Decoction)	柴胡桂枝汤
<i>Chai Hu Jia Long Gu Mu Li Tang</i> (Bupleurum plus Dragon Bone and Oyster Shell Decoction)	柴胡加龙骨牡蛎汤
<i>Chai Hu Jie Du Tang</i> (Bupleurum Decoction to Relieve Toxicity)	柴胡解毒汤
<i>Chai Hu Qing Gan Tang</i> (Bupleurum Decoction to Clear the Liver)	柴胡清肝汤
<i>Chai Hu Shu Gan San</i> (Bupleurum Powder to Spread the Liver)	柴胡疏肝散
<i>Chai Hu Tang</i> (Bupleurum Decoction)	柴胡汤
<i>Chai Hu Xian Xiong Tang</i> (Bupleurum Decoction for Sinking into the Chest)	柴胡陷胸汤
<i>Chai Hu Zhi Jie Tang</i> (Bupleurum, Bitter Orange, and Platycodon Decoction)	柴胡枳桔汤
<i>Chai Ling Tang</i> (Bupleurum and Poria Decoction)	柴苓汤
<i>Chai Ping Tang</i> (Bupleurum and Calm the Stomach Decoction)	柴平汤
<i>Chai Xian Tang</i> (Bupleurum Decoction to Raise the Sunken)	柴陷汤
<i>Chan Su Wan</i> (Toad Venum Pill)	蟾酥丸
<i>Cheng Qi Yang Ying Tang</i> (Order the Qi and Nourish the Nutritive Qi Decoction)	承气养营汤
<i>Chi Shi Zhi Yu Yu Liang Tang</i> (Halloysitum and Limonite Decoction)	赤石脂禹余粮汤
<i>Chuan Xiong Cha Tiao San</i> (Ligusticum Chuanxiong Powder to be Taken with Green Tea)	川芎茶调散
<i>Ci Zhu Wan</i> (Magnetite and Cinnabar Pill)	磁朱丸
<i>Cong Bai Qi Wei Yin</i> (Scallion Decoction with Seven Ingredients)	葱白七味饮
<i>Cong Chi Jie Geng Tang</i> (Scallion, Prepared Soybean, and Platycodon Decoction)	葱豉桔梗汤
<i>Cong Chi Tang</i> (Scallion and Prepared Soybean Decoction)	葱豉汤
<i>Cui Sheng Tang</i> (Birth-Hastening Decoction)	催生汤
<i>Da An Wan</i> (Great Tranquility Pill)	大安丸
<i>Da Bu Tang</i> (Great Tonifying Decoction)	大补汤
<i>Da Bu Yin Wan</i> (Great Tonify the Yin Pill)	大补阴丸
<i>Da Chai Hu Tang</i> (Major Bupleurum Decoction)	大柴胡汤
<i>Da Cheng Qi Tang</i> (Major Order the Qi Decoction)	大承气汤
<i>Da Ding Feng Zhu</i> (Major Arrest Wind Pearl)	大定风珠

Appendix 10 — Cross-reference of Herbal Formula Names

Pinyin Names (Literal Names)	Chinese Names
<i>Da Fang Feng Tang</i> (Major Saposhnikovia Decoction)	大防风汤
<i>Da Huang Fu Zi Tang</i> (Rhubarb and Prepared Aconite Decoction)	大黄附子汤
<i>Da Huang Mu Dan Tang</i> (Rhubarb and Moutan Decoction)	大黄牡丹汤
<i>Da Huang Zhe Chong Wan</i> (Rhubarb and Eupolyphaga Pill)	大黄蟅虫丸
<i>Da Huo Luo Dan</i> (Major Invigorate the Collaterals Special Pill)	大活络丹
<i>Da Jian Zhong Tang</i> (Major Construct the Middle Decoction)	大建中汤
<i>Da Qiang Huo Tang</i> (Major Notopterygium Decoction)	大羌活汤
<i>Da Qin Jiao Tang</i> (Major Gentiana Macrophylla Decoction)	大秦芎汤
<i>Da Qing Long Tang</i> (Major Bluegreen Dragon Decoction)	大青龙汤
<i>Da Xian Xiong Tang</i> (Major Sinking into the Chest Decoction)	大陷胸汤
<i>Da Xian Xiong Wan</i> (Major Sinking into the Chest Pill)	大陷胸丸
<i>Da Yuan Yin</i> (Reach the Membrane Source Decoction)	达原饮
<i>Dan Shen Yin</i> (Salvia Decoction)	丹参饮
<i>Dang Gui Bu Xue Tang</i> (Tangkuei Decoction to Tonify the Blood)	当归补血汤
<i>Dang Gui Jian Zhong Tang</i> (Tangkuei Decoction to Construct the Middle)	当归建中汤
<i>Dang Gui Liu Huang Tang</i> (Tangkuei and Six-Yellow Decoction)	当归六黄汤
<i>Dang Gui Long Hui Wan</i> (Tangkuei, Gentiana, and Aloe Pill)	当归龙荟丸
<i>Dang Gui Nian Tong Tang</i> (Tangkuei Decoction to Lift the Pain)	当归拈痛汤
<i>Dang Gui San</i> (Tangkuei Powder)	当归散
<i>Dang Gui Shao Yao San</i> (Tangkuei and Peony Powder)	当归芍药散
<i>Dang Gui Si Ni Jia Wu Zhu Yu Sheng Jiang Tang</i> (Tangkuei Decoction for Frigid Extremities plus Evodia and Fresh Ginger)	当归四逆加吴茱萸生姜汤
<i>Dang Gui Si Ni Tang</i> (Tangkuei Decoction for Frigid Extremities)	当归四逆汤
<i>Dang Gui Yin Zi</i> (Tangkuei Decoction)	当归饮子
<i>Dao Chi San</i> (Guide Out the Red Powder)	导赤散

<i>Zuo Gui Wan</i> (Restore the Left [Kidney] Pill)	左归丸
<i>Zuo Gui Yin</i> (Restore the Left [Kidney] Decoction)	左归饮
<i>Zuo Jin Wan</i> (Left Metal Pill)	左金丸

Appendix 11

— Tables of Famous Doctors

Table 1. Famous Doctors – in Chapter Order

Chapters	Names
Part I. Overview	黄帝 Huang Di (Yellow Emperor), dates unknown.
Part II. Formula Monographs	神农 Shen Nong (Divine Husbandman), dates unknown.
1. Exterior-Releasing Formulas	张仲景 Zhang Zhong-Jing, also known as 张机 Zhang Ji, 150-219 CE.
2. Downward Draining Formulas	张景岳 Zhang Jing-Yue, also known as 张介宾 Zhang Jie-Bin, 1563-1640.
3. Harmonizing Formulas	吴有性 Wu You-Xing, also known as 吴又可 Wu You-Ke, 1580's-1660's.
4. Exterior- and Interior-Releasing Formulas	刘完素 Liu Yuan-Su, 1120-1200.
5. Heat-Clearing Formulas	叶桂 Ye Gui, also known as 叶天士 Ye Tian-Shi, 1666-1745.
6. Summer-Heat Dispelling Formulas	吴塘 Wu Tang, also known as 吴鞠通 Wu Ju-Tong, 1758-1836.
7. Interior-Warming Formulas	王叔和 Wang Shu-He, third century.
8. Tonic Formulas	钱乙 Qian Yi, 1032-1113.
9. Shen-Calming Formulas	扁鹊 Bian Que, also known as 秦越人 Qin Yue-Ren, 407-310 BCE.
10. Orifice-Opening Formulas	华佗 Hua Tuo, 110-207 CE.
11. Astringent Formulas	傅山 Fu Shan, also known as 傅青主 Fu Qing-Zhu, 1607-1684.
12. Qi-Regulating Formulas	李时珍 Li Shi-Zhen, 1518-1593.
13. Blood-Regulating Formulas	王清任 Wang Qing-Ren, 1768-1831.
14. Wind-Expelling Formulas	王焘 Wang Tao, 670-755.
15. Dryness-Relieving Formulas	陶弘景 Tao Hong-Jing, 456-536.
16. Damp-Dispelling Formulas	王肯堂 Wang Ken-Tang, 1549-1613.
17. Wind-Damp Dispelling Formulas	孙思邈 Sun Si-Miao, 581-682.
18. Phlegm-Dispelling Formulas	朱震亨 Zhu Zhen-Heng, also known as 朱丹溪 Zhu Dan-Xi, 1281-1358.
19. Reducing Guiding and Dissolving Formulas	李杲 Li Gao, also known as 李东垣 Li Dong-Heng, 1180-1251.
20. Antiparasitic Formulas	葛洪 Ge Hong, 284-364.
21. Emetic Formulas	张从正 Zhang Cong-Zheng, also known as 张子和 Zhang Zi-He, 1151-1231.
22. Formulas that Treat Abscesses and Sores	龚廷贤 Gong Ting-Xian, 1522-1619.
Part III. Additional Resources	吴尚先 Wu Shang-Xian, 1806-1886.

Appendix 11 — Tables of Famous Doctors

Table 2. Famous Doctors – According to Chronology of Chinese Dynasties

Dynasties & Kingdoms		Year	Names
Xia Period 夏		2100-1600 BCE	黄帝 Huang Di (Yellow Emperor), dates unknown.
Shang Period 商		1600-1100 BCE	神农 Shen Nong (Divine Husbandman), dates unknown.
Zhou Period 周	Western Zhou Period 西周	1100-771 BCE	扁鹊 Bian Que, also known as 秦越人 Qin Yue-Ren, 407-310 BCE.
	Eastern Period 东周	770-256 BCE	
	Spring and Autumn Period 春秋	770-476 BCE	
	Warring States 战国	475-221 BCE	
Qin Dynasty 秦		221-207 BCE	
Han Dynasty 汉	Western Han 西汉	206 BCE- 24	华佗 Hua Tuo, 110-207 CE.
	Eastern Han 东汉	25-220	张仲景 Zhang Zhong-jing, also known as 张机 Zhang Ji, 150-219 CE.
Three Kingdoms 三国	Wei 魏	220-265	王叔和 Wang Shu-He, third century.
	Shu 蜀	221-263	
	Wu 吴	222-280	
Western Jin Dynasty 西晋		265-316	葛洪 Ge Hong, 284-364.
Eastern Jin Dynasty 东晋		317-420	
Northern and Southern Dynasties 南北朝	Southern 南朝	420-589	陶弘景 Tao Hong-jing, 456-536.
	Northern 北朝	386-581	
Sui Dynasty 隋		581-618	孙思邈 Sun Si-Miao, 581-682.
Tang Dynasty 唐		618-907	王焘 Wang Tao, 670-755.
Five Dynasties 五代	Later Liang 后梁	907-923	
	Later Tang 后唐	923-936	
	Later Jin 后晋	936-947	
	Later Han 后汉	947-950	
	Later Zhou 后周	951-960	
Song Dynasty 宋	Northern Song 北宋	960-1127	
	Southern Song 南宋	1127-1279	

Appendix 11 — Tables of Famous Doctors

Dynasties & Kingdoms	Year	Names
Liao Dynasty 辽	916-1125	钱乙 Qian Yi, 1032-1113.
Jin Dynasty 金	1115-1234	刘完素 Liu Yuan-Su, 1120-1200. 张从正 Zhang Cong-Zheng, also known as 张子和 Zhang Zi-He, 1151-1231. 李杲 Li Gao, also known as 李东垣 Li Dong-Heng, 1180-1251.
Yuan Dynasty 元	1271-1368	朱震亨 Zhu Zhen-Heng, also known as 朱丹溪 Zhu Dan-Xi, 1281-1358.
Ming Dynasty 明	1368-1644	李时珍 Li Shi-Zhen, 1518-1593. 龚廷贤 Gong Ting-Xian, 1522-1619. 王肯堂 Wang Ken-Tang, 1549-1613. 张景岳 Zhang Jing-Yue, also known as 张介宾 Zhang Jie-Bin, 1563-1640. 吴有性 Wu You-Xing, also known as 吴又可 Wu You-Ke, 1580's-1660's. 傅山 Fu Shan, also known as 傅青主 Fu Qing-Zhu, 1607-1684.
Qing Dynasty 清	1644-1911	叶桂 Ye Gui, also known as 叶天士 Ye Tian-Shi, 1666-1745. 吴塘 Wu Tang, also known as 吴鞠通 Wu Ju-Tong, 1758-1836. 王清任 Wang Qing-Ren, 1768-1831. 吴尚先 Wu Shang-Xian, 1806-1886.
Republic of China 中华民国	1911-Present Day	
People's Republic of China 中华人民共和国	1949-Present Day	

Appendix 11 — Tables of Famous Doctors

Table 3. Famous Doctors – in Alphabetic Order

Names	Chapters
扁鹊 Bian Que, also known as 秦越人 Qin Yue-Ren, 407-310 BCE.	9. Shen-Calming Formulas
傅山 Fu Shan, also known as 傅青主 Fu Qing-Zhu, 1607-1684.	11. Astringent Formulas
葛洪 Ge Hong, 284-364.	20. Antiparasitic Formulas
龚廷贤 Gong Ting-Xian, 1522-1619.	22. Formulas that Treat Abscesses and Sores
华佗 Hua Tuo, 110-207 CE.	10. Orifice-Opening Formulas
黄帝 Huang Di (Yellow Emperor), dates unknown.	Part I. Overview
李杲 Li Gao, also known as 李东垣 Li Dong-Heng, 1180-1251.	19. Reducing Guiding and Dissolving Formulas

Glossary

The first column consists of the terms used in the body of the text. Subsequent columns provide correlation to the Chinese characters, pinyin transliteration, previous translation by Wiseman and Feng, and finally, a definition of the term. When a Chinese term is important to the understanding of a theoretical or clinical concept, or when it is a term familiar to many students and practitioners of Chinese Herbal Medicine, that term is given in pinyin in the text, with an accompanying translation, if needed. However, for lesser-known terms, English translations have been used in the body of the text, with the glossary provided to assist interested individuals in making connections with the Chinese. The authors have carefully considered the translation of each term and have offered the clearest and most practical translation they could discover, based on the consideration of both the Chinese terminology and nuances of standard American English usage. In some cases, this differs slightly from translations offered by Wiseman and Feng, which we have included here for purposes of assisting readers already familiar with their work. These small differences in no way diminish our respect for and appreciation of the diligence with which our esteemed colleagues have worked to provide thorough, extensive and effective bridges in understanding via their work.

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
5 a.m. diarrhea	五更泄	<i>wu geng xie</i>	fifth-watch diarrhea	Characterized by early morning (approximately 5 a.m.) diarrhea, this is often caused by Kidney deficiency.
Accumulation	积聚	<i>ji ju</i>	accumulation and gathering	An inclusive term describing the accumulation of <i>ji</i> (yin substances) and <i>ju</i> (yang substances), that may occur in any organ. Clinical presentation differs, depending on the area(s) and organ(s) affected.
Ah shi point	阿是穴	<i>ah shi xue</i>	a-shi point	A type of acupuncture point having no fixed location or name, but corresponding to an underlying disorder. Stimulating an <i>ah shi</i> point elicits tenderness and pain.
Ao (simmer)	熬	<i>ao</i>		A method that slowly cooks the herbs using low heat, extracts active constituents, and removes excess water.
Ba gang bian zheng (eight principle differentiation)	八纲辨证	<i>ba gang bian zheng</i>	eight-principle pattern identification	A system of differential diagnosis based on patterns of imbalance or disharmony of the eight factors: exterior and interior location, cold and hot attributes, deficiency and excess states, and yin and yang qualities.
Ba hui (eight meeting) points	八会穴	<i>ba hui xue</i>	eight meeting points	A set of eight points corresponding to <i>zang</i> (solid organs), <i>fu</i> (hollow organs), qi, blood, tendons, vessels, bones and marrows.
Ban (blend)	拌	<i>ban</i>		To mix medicinal substances.
Bang (scrape)	镑	<i>bang</i>	flaking	A method used to process horn substances to obtain thin flakes. This method increases the surface area and enhances extraction of active ingredients.
Bei (stone-bake)	焙	<i>bei</i>	stone-baking	A method to indirectly dry the herbs without changing their color by placing the herbs on a heated stone.
Ben tun (running piglet)	奔豚	<i>ben tun</i>	running piglet	A sensation of qi rushing upwards from the lower abdomen to the chest, epigastrium and throat. There will generally be concurrent pain, discomfort, alternation of heat and cold, and palpitations.
Beng lou (flooding and spotting)	崩漏	<i>beng lou</i>	flooding and spotting	A condition that includes massive uterine bleeding at irregular intervals and incessant dripping of blood from the uterus.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
<i>Bi zheng</i> (closed disorder)	闭证	<i>bi zheng</i>	block pattern	Characterized by clenched jaws, tight fists, unconsciousness, a warm body and cold extremities; this generally occurs in wind stroke or febrile disorders, with heat attacking the <i>ying</i> (nutritive) and <i>xue</i> (blood) levels.
<i>Bi zheng</i> (painful obstruction syndrome)	痹证	<i>bi zheng</i>	impediment pattern	A pain condition characterized by stagnation and obstruction that may affect any tissue and/or organ.
Big pulse	大脉	<i>da mai</i>	big pulse	A broad pulse.
Blood	血	<i>xue</i>	blood	The red, viscous fluid in the body that comprises nutrients, body fluids and Kidney <i>jing</i> (essence).
Blood deficiency	血虚	<i>xue xu</i>	blood vacuity	Pale, lusterless face, pale lips, dizziness, vertigo, palpitations, insomnia, coldness and numbness of the extremities, and a fine, weak pulse illustrate this condition, caused by loss of blood, excessive thinking and worrying, the presence of parasites, or injury to the internal organs.
Blood desiccation	血枯	<i>xue ku</i>	blood desiccation	Following profuse loss of blood, a condition characterized by dizziness, a feeling of weightlessness of the extremities, and amenorrhea.
Blood stagnation/stasis	血瘀	<i>xue yu</i>	blood stasis	A condition characterized by obstructed blood flow, leading to dark purplish skin color, dried or scaly skin, pain at a fixed location, pain that intensifies with pressure, fullness and distention of the lower abdomen, amenorrhea, black, tarry stools, and a dark purple tongue with black spots. Blood stagnation/stasis may be caused by external injuries, menstrual irregularities, qi stagnation and cold stagnation. Blood stagnation refers to mild to moderate obstruction of blood circulation. Blood stasis refers to moderate to severe obstruction of blood circulation, possibly with clotting.
<i>Bo</i> (open)	擘	<i>bo</i>		To open the medicinal substances to allow maximum extraction of active ingredients.
Body fluids	津液	<i>jin ye</i>	fluids	An all-inclusive term that describes all the fluids in the body, including tears, saliva, sweat, blood and fluids that lubricate the joints.
Bound pulse	结脉	<i>jie mai</i>	bound pulse	A slow pulse with pulses at irregular intervals.
Bowl	盅	<i>zhong</i>		A traditional unit of measurement for volume. The exact unit varies depending on the place and time in history.
Breast abscess	乳痈	<i>ru yong</i>	mammary welling-abscess	A hard breast abscess accompanied by distention and pain, chills and fever, and obstructed flow of breast milk; this is generally caused by Liver qi stagnation, Stomach fire, or stasis of breast milk.
<i>Bu fa</i> (tonifying)	补法	<i>bu fa</i>	supplementation	A method of treatment that nourishes, enriches, supplements, and benefits qi, blood, yin, and yang in the <i>zang fu</i> organs.
<i>Chang feng</i> (intestinal wind)	肠风	<i>chang feng</i>	intestinal wind	A condition caused by wind attacking the intestines, leading to the presence of bright red blood in the stools.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
<i>Chao</i> (dry-fry)	炒	<i>chao</i>	stir-frying	Parching or tossing medicinal substances in a heated wok. This method increases the warmth of the herb, harmonizes and moderates therapeutic effects, and facilitates extraction of active constituents.
<i>Chao huang</i> (dry-fry to yellow)	炒黄	<i>chao huang</i>		Parching or tossing medicinal substances in a heated wok until they become yellow in color.
<i>Chao jiao</i> (dry-fry to burnt)	炒焦	<i>chao jiao</i>	scorch-frying	Parching or tossing at high temperature until the medicinal substances are burnt on the outside.
<i>Chao tan</i> (dry-fry to ash)	炒炭	<i>chao tan</i>	char-frying	Parching or tossing at high temperature until the medicinal substances turn into ash.
<i>Chen yao</i> (deputy herb)	臣药	<i>chen yao</i>	minister	The second of four guiding principles in herbal formulation: <i>Jun Chen Zuo Shi</i> (Chief, Deputy, Assistant, Envoy). This herb serves two main functions: 1) to reinforce the effect of <i>jun yao</i> (chief herb) to treat the key disease or symptom; and 2) to treat the associated or coexisting diseases or symptoms.
<i>Chi</i> position	尺	<i>chi</i>	cubit	The third (most proximal) position on the wrist for pulse diagnosis; it represents Kidney yang (right hand) and Kidney yin (left hand).
<i>Chong</i> (thoroughfare) channel	冲脉	<i>chong mai</i>	thoroughfare vessel	One of the eight extraordinary vessels which controls the twelve channels. Also known as the “sea of blood,” as it has functions related to blood and gynecology.
<i>Chong fu</i> (take drenched)	冲服	<i>chong fu</i>	take drenched	Infusing the medicinal substances into water, decoction or other liquid before ingestion.
<i>Chu</i> (pestle)	杵	<i>chu</i>		Using a club-shaped implement to pound or grind medicinal substances in a mortar. This method increases the surface area and enhances extraction of active ingredients.
Clumping	结	<i>jie</i>	bind	This describes the formation of a solid mass or masses from one or more substances, such as phlegm, heat or cold.
Cold	寒	<i>han</i>	cold	Cold is a yin pathogenic factor that attacks both the outside and inside of the body and is characterized by contraction and stagnation. Clinical presentation of cold includes chills, shivering, aversion to cold, cold extremities, pale face and lips, the presence of undigested food in the stools, and clear urine.
Collapse	厥	<i>jue</i>	reversal	A condition of sudden collapse and loss of consciousness that generally can be reversed. The causes of collapse include cold, heat, phlegm and dietary injury, among others.
Controlling sequence	相克	<i>xiang ke</i>	restraining	A concept of <i>wu xing</i> (five element) theory that describes the orderly sequence in which one element controls the growth of another.
<i>Cui</i> (quench)	淬	<i>cui</i>	calcining and quenching	Heating medicinal substances at high temperature until they turn red, followed by dipping them in cold water or vinegar. This method makes the substances brittle to facilitate pulverization.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Cun position	寸	<i>cun</i>	cun	The first (most distal) position on the wrist for pulse diagnosis; it represents the Lung (right hand) and the Heart (left hand).
Cuo (grate)	锉	<i>cuo</i>	grating	To reduce hard medicinal substances into small particles. This method increases the surface area and enhances extraction of active ingredients.
Cup	升	<i>sheng</i>		A traditional unit of measurement for both volume (approximately 200 mL) and weight (approximately 18-30g). Today, <i>sheng</i> has been standardized to 1,000 mL.
Da tou wen (swollen head epidemic)	大头瘟	<i>da tou wen</i>	massive head scourge	An epidemic disease characterized by redness and swelling of the face and sore throat, caused by wind, heat and toxins attacking the face and head.
Dai (girdle) channel	带脉	<i>dai mai</i>	girdling vessel	Another of the eight extraordinary vessels, this one serves to bind all of the channels together, and influences lower extremity function.
Damp	湿	<i>shi</i>	damp	Damp is a pathogenic factor that occurs mainly in the late summer or in places with high humidity. Dampness is characterized by heaviness and turbidity, which may lead to such symptoms as feeling heaviness in the head and extremities, general fatigue, and fullness in the chest and epigastrium. Dampness is also characterized by increased viscosity of substances and stagnation, such as in cases of abscesses, oozing ulcers, leukorrhea with foul discharge, and arthritis.
Damp rash	湿疹	<i>shi zhen</i>		Red eruption of the skin characterized by wind, dampness and heat.
Dao (pound)	捣	<i>dao</i>	crushing	To reduce medicinal substances into particles by crushing or grinding. This method increases the surface area and enhances extraction of active ingredients.
De qi (arrival of qi)	的气	<i>de qi</i>	obtaining qi	Qi sensation (numbness, pressure, swelling, warmth or other) that follows insertion and manipulation of acupuncture needles.
Debilitation	劳	<i>lao</i>	taxation	Generalized weakness resulting from persistent mental and physical wear and tear on the body.
Deep pulse	沉脉	<i>chen mai</i>	sunken pulse	A pulse that is distinct at the deep level.
Deficiency	虚	<i>xu</i>	vacuity	Deficiency refers to a state of insufficiency (such as deficiency of qi, blood, yin or yang), or decreased ability of the organ to carry out its normal physiological functioning (Spleen deficiency, Kidney deficiency, and so on). Deficiency occurs due to congenital deficiency, lack of nourishment, or long-term illness.
Deficient pulse	虚脉	<i>xu mai</i>	vacuous pulse	A soggy pulse that is also fine and forceless.
Dian kuang (mania and withdrawal)	癫狂	<i>dian kuang</i>	mania and withdrawal	An inclusive term for various types of mental illness. <i>Dian</i> (withdrawal) represents yin disorders: the individual is quiet and socially inactive. <i>Kuang</i> (mania) represents yang disorders: the individual is irritable, restless, and physically active.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Do not expose to heat	不见火	<i>bu jian huo</i>		To avoid direct or indirect contact with fire or high temperature.
Drooling phlegm	痰涎	<i>tan xian</i>	phlegm-drool	Characterized by profuse dripping of saliva in children; this is generally caused by wind-heat attacking the Spleen, resulting in its inability to properly process water.
Drum skin pulse	革脉	<i>ge mai</i>	drum skin pulse	A pulse that is string-like and empty in the middle.
Drum-like abdominal distention	鼓胀	<i>gu zhang</i>	drum distention	Characterized by severe fullness and distention, resulting in the abdomen resembling a drum; this may be caused by emotional constraint, inappropriate diet, excessive use of alcohol, or intestinal parasites.
Dryness	乾	<i>gan</i>	dry	Dryness is a pathogenic factor that invades the body in late autumn when there is a lack of moisture in the environment. Dryness consumes yin and body fluids, and may lead to clinical presentations such as dry and chapped skin, dryness of the mouth and throat, thirst, dry cough with little sputum, and so on.
Du (governing) channel	督脉	<i>du mai</i>	governing vessel	Confluence of all yang vessels, one of the eight extraordinary vessels, also known as the “sea of yang qi.” It influences brain and spinal column functioning.
Duan (calcine)	煨	<i>duan</i>	calcination	A preparation method to make medicinal substances crisp and brittle by burning them directly or indirectly in a container. This method is often reserved for minerals or shell-like substances to facilitate pulverization.
Dun (stew)	炖	<i>dun</i>	double-boiling	To boil slowly or with simmering heat.
Dysentery	痢疾	<i>li ji</i>	dysentery	A disorder characterized by abdominal pain, increased frequency but decreased volume of bowel movements, tenesmus, and the presence of undigested food, mucus, and blood in the stool.
Earth	土	<i>tu</i>	earth	Another of the five elements, earth corresponds to ripeness and late summer, to sweet flavors, transformation, and centeredness. The corresponding organ is the Spleen.
Epidemic toxin	疫毒	<i>yi du</i>	epidemic toxin	An epidemic pathogenic factor that attacks and affects the entire community, regardless of individual health and constitution.
Epilepsy	痫证	<i>xian zheng</i>	epilepsy pattern	Characterized by altered consciousness and muscle convulsions, this disorder occurs frequently in children because they have not yet gained fully-developed defenses against external pathogens. Factors commonly causing seizure include wind, heat, phlegm and inappropriate diet.
Excess	实	<i>shi</i>	repletion	Excess refers to the state of surplus or overload that creates a pathologic condition in the body, such as when there is excess heat, formation or accumulation of phlegm, or blood stagnation, among others. Excess conditions occur in the case of invasion of exogenous pathogenic factors or in disharmony of the internal organs.
Excess pulse	实脉	<i>shi mai</i>	replete pulse	A broad, large and forceful pulse upon arrival and departure.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Exterior	表	<i>biao</i>	exterior	The outside of the body, such as the skin, mouth, nose and nostrils. Pathogenic factors are often said to attack the exterior prior to invading the interior. The clinical presentation of an exterior syndrome includes headache, muscle aches and pain, nasal congestion, coughing and so on.
Exterior and interior	表里	<i>biao li</i>	exterior and interior	A term used to indicate differentiation between the exterior and interior parts of the body.
Faint pulse	微脉	<i>wei mai</i>	faint pulse	A pulse that is extremely fine, forceless, and indistinct.
Febrile diseases	热病	<i>re bing</i>	heat disease	A term that describes all externally-contracted diseases characterized by heat.
<i>Fen sui</i> (pulverize)	粉碎	<i>fen sui</i>		To reduce medicinal substances by crushing, beating, or grinding into powder. This method increases the surface area and enhances extraction of active ingredients.
<i>Feng lao bing</i> (wind consumption disease)	风劳病	<i>feng lao bing</i>	wind taxation disease	A yin-deficient heat syndrome characterized by tidal fever and steaming bones sensation, caused by maltreatment of an exterior condition leading to formation of heat in the interior damaging yin and blood.
<i>Feng shi</i> (wind-damp)	风湿	<i>feng shi</i>	wind-damp	A condition caused by invasion of wind-dampness, leading to pain and limited movements of the joints, muscles and bones.
<i>Feng shui</i> (wind water)	风水	<i>feng shui</i>	wind water	A condition caused by invasion of wind to the exterior parts of the body, leading to swelling and water accumulation.
Filth and fetidness	秽	<i>hui</i>	foulness	Terms used to describe things that are dirty, foul, or turbid, such as foods or pathogenic factors.
Fine pulse	细脉	<i>xi mai</i>	fine pulse	A small and well-defined pulse.
Fire	火	<i>huo</i>	fire	Fire is one of the five elements, associated with upward movement of energy, the sparkling flaring of fire, and summer. The corresponding organ is the Heart. In disease terminology, fire is a yang pathogenic factor representing a severe form of heat.
Firm pulse	牢脉	<i>lao mai</i>	firm pulse	A pulse that is deep and forceful.
Five elements	五行	<i>wu xing</i>	five phases	A theory which evaluates all things according to elements of water, wood, fire, earth and metal. The theory is also used to explain anatomy, physiology, and pathology of the human body, as well as treatment strategies.
Floating edema	浮肿	<i>fu zhong</i>	puffy swelling	A symptom characterized by fluid accumulation in superficial parts of the body. This is generally caused by Lung, Spleen or Kidney deficiency, and the consequent inability to properly regulate water metabolism pathways.
Focal distention	痞满	<i>pi man</i>	glomus fullness	Fullness, distention and oppression in the chest and abdomen, caused by food retention, phlegm stagnation, and/or damp-heat accumulation.
Fright and palpitations	惊悸	<i>jing ji</i>	fright palpitations	A condition of emotional instability and increased sensitivity to stimulus caused by Heart qi deficiency.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Frightened wind	惊风	<i>jing feng</i>	fright wind	Literally “frightened wind,” this describes seizures and convulsions in children. It is most common in children under the age of five, with incidence gradually decreasing with increased age. Clinical presentations include high fever, red eyes, convulsion, opisthotonos, clenched jaws, tight fists, eyes rolled upward, and urinary and bowel incontinence.
<i>Fu</i> (hollow organ)	腑	<i>fu</i>	bowel	The hollow organs of the body are the Small Intestine, Large Intestine, Gallbladder, Stomach and Urinary Bladder.
Gallbladder	胆	<i>dan</i>	gallbladder	Paired with the Liver, the Gallbladder stores bile and excretes it to the intestines to facilitate digestion.
<i>Gan ji</i> (infantile malnutrition)	疳疾	<i>gan ji</i>	gan disease	A disorder characterized by the inability of the Spleen and Stomach to properly transform and transport food. Generally occurring in children under five years of age, <i>gan ji</i> is characterized by a sallow facial appearance, weight loss, thin hair, poor appetite, abdominal distention, and irregular bowel movements.
<i>Gao lin</i> (cloudy dysuria)	膏淋	<i>gao lin</i>	unctuous strangury	A urinary tract disorder in which the urine has a milky or cloudy appearance, and may be slightly pink (an indication of bleeding). This is caused by damp-heat attacking the Urinary Bladder, leading to the bladder's inability to clear turbid substances.
Generating sequence	相生	<i>xiang sheng</i>	engendering	A concept of <i>wu xing</i> (five element) theory that describes the orderly sequence in which one element promotes the generation of another.
<i>Gu</i> (food) <i>qi</i>	谷气	<i>gu qi</i>		Qi that is derived from the ingestion and absorption of food.
<i>Guan</i> position	关	<i>guan</i>	bar	The second (middle) position on the wrist for pulse diagnosis represents the Spleen (right hand) and the Liver (left hand).
Half-body perspiration	半身汗	<i>ban shen han</i>		Half-body perspiration refers to sweating only on half of the body, such as the left or right side, or upper or lower half. This condition occurs because of obstruction of the channels and collaterals caused by wind-phlegm or wind-dampness. It may also be caused by disharmony of qi and blood, or of <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels.
<i>Han fa</i> (sweating)	汗法	<i>han fa</i>	diaphoresis	A method of treatment that induces a mild sweat by ventilating and dispersing Lung qi, and regulating and harmonizing the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels. Sweating is primarily used to expel pathogenic factors at the exterior (skin) level to treat common cold, influenza, the early stage of measles, acute edema (especially above the waist), abscesses and sores with fever and chills, dysentery with exterior signs and symptoms, and many others.
<i>He</i> (uniting) point	合穴	<i>he xue</i>	uniting point	Known as “uniting” or “sea” point, this point represents the flow of qi where it is vast and deep, near the elbows or knees.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
<i>He fa</i> (harmonizing)	和法	<i>he fa</i>	harmonization	A method of treatment that regulates and accords complicated patterns of disease that affect multiple parts of the body. Harmonizing is generally used to treat such disorders as <i>shaoyang</i> syndrome, <i>mo yuan</i> (membrane source) disorders, disharmony of the Liver and Spleen, concurrent presentation of heat in the Stomach and cold in the Intestines, irregularities of qi and blood, and disharmony of the nutritive and defensive levels.
<i>He xi feng</i> (crane's knee wind)	鹤膝风	<i>he xi feng</i>	crane's-knee wind	A condition in which the knees are swollen and enlarged, but the muscles above and below the knees are atrophied.
Heart	心	<i>xin</i>	heart	The Heart functions to control the blood channels and house the <i>shen</i> (spirit). It connects to the Small Intestine and opens to the tongue, and is associated with the fire element.
Heat	热	<i>re</i>	heat	Heat is a yang pathogenic factor that attacks both external and internal aspects of the body; it is characterized by the tendency to disperse outwards and to consume yin and fluids. Clinical presentations of heat include a wide variety of signs and symptoms, such as fever, inflammation, infection, bleeding, and others.
Heat in the blood	血热	<i>xue re</i>	blood heat	A condition characterized by nosebleeds, coughing of blood, and late-afternoon fever, because of heat affecting the <i>xue</i> (blood) level.
Hernial disorder	疝气	<i>shan qi</i>	mounting qi	Historically, this term covers a wide variety of disorders related to both internal and external genitalia, in men and women. More recently, it refers specifically to disorders of the male external genitalia (testicles and scrotum).
Hidden pulse	伏脉	<i>fu mai</i>	hidden pulse	A pulse that is distinct at the deep level, deeper than the deep pulse.
<i>Hong</i> (bake)	烘	<i>hong</i>		A method to directly dry the herbs at low temperature without charring it.
<i>Hou bi</i> (painful obstruction of the throat)	喉痹	<i>hou bi</i>	throat impediment	Redness, swelling and pain of the throat caused mainly by wind-cold at the exterior, or Liver or Lung fire in the interior.
<i>Hua</i> (dissolve)	化	<i>hua</i>	transform	To cause to pass into solution.
<i>Hui</i> (influential) point	会穴	<i>hui xue</i>	meeting point	Referred to as “meeting” or “influential” points, these eight points individually represent one of the following: <i>zang</i> , <i>fu</i> , qi, blood, tendons, channels, bones or marrow.
<i>Hun</i> (ethereal soul)	魂	<i>hun</i>	ethereal soul	Similar to the Western interpretation of “soul” or “spirit,” the <i>hun</i> functions to maintain mental and psychological health and well-being. It has been said that the Liver stores blood, and blood contains <i>hun</i> . Therefore, disorders of the <i>hun</i> are often secondary to the inability of the Liver to store blood; or, secondary to deficiency of Liver blood.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Insulting sequence	相侮	<i>xiang wu</i>	rebellion	A concept of <i>wu xing</i> (five element) theory that describes the situation in which an element normally controlled by another reverses the sequence and suppresses or reduces what is normally the controlling element.
Interior	里	<i>li</i>	interior	Internal aspects of the body, such as organs, bone marrow, and the <i>qi</i> (energy) and <i>xue</i> (blood) levels. Pathogenic factors may affect the interior of the body directly or indirectly (via the exterior). Clinical presentation of interior conditions varies significantly, depending on the area and/or organs affected.
Intermittent pulse	代脉	<i>dai mai</i>	intermittent pulse	A pulse interspersed with more relatively regular pauses.
Intestinal abscess	肠痈	<i>chang yong</i>	intestinal welling-abscess	Intestinal abscesses generally arise from inappropriate diet or emotional disturbances (excessive anger or worry), and are characterized by abdominal pain.
Irritability	烦	<i>fan</i>	vexation	A state of impatience, anger, annoyance, and increased sensitivity to stimulus.
<i>Jian</i> (decoct)	煎	<i>jian</i>	decoct, brew	To boil medicinal substances in water to extract their active ingredients.
<i>Jie xiong</i> (stag-nant chest)	结胸	<i>jie xiong</i>	chest bind	A condition caused by stagnation in the chest of pathogenic heat or cold with retention of fluid, phlegm or blood.
<i>Jin</i> (soak)	浸	<i>jin</i>	soaking, steeping	To infuse or steep medicinal substances in water or other fluids over a period of time.
<i>Jin</i> (thin body fluid)	津	<i>jin</i>	liquid	An inclusive term that describes body fluids of lesser density, such as tears, saliva and sweat.
<i>Jing</i> (clean)	净	<i>jing</i>		To remove unwanted or non-medicinal parts from medicinal substances.
<i>Jing</i> (essence)	精	<i>jing</i>	essence	The basic substance that makes up the human body and sustains the vital functions of the internal organs. Derived prenatally from one's parents, and postnatally from food, essence is stored in the Kidney.
<i>Jing</i> (river) point	经穴	<i>jing xue</i>	river point	Commonly referred to as either "traversing" or "river" points, these points suggest that the flow of <i>qi</i> at the fore-arms or lower legs has attained a large volume.
<i>Jing</i> (well) point	井穴	<i>jing xue</i>	well point	"Well" points represent the beginning of <i>qi</i> circulation within channels, at the most distal parts of the body, where <i>qi</i> flow is still small and shallow.
<i>Jueyin</i>	厥阴	<i>jue yin</i>	reverting yin	The last of six stages in the paradigm of yin and yang. This describes the degree of pathology of disease according to the <i>Shang Han Lun</i> (Discussion of Cold-Induced Disorders) text. It also identifies the level attributed to the Liver and Pericardium channels that travel throughout the body.
<i>Jun yao</i> (chief herb)	君药	<i>jun yao</i>	sovereign	The first of four guiding principles in herbal formulation: <i>Jun Chen Zuo Shi</i> (Chief, Deputy, Assistant, Envoy). It is the essential ingredient used at a large dosage to maximize the effect and treat the key disease or symptom.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Kidney	肾	shen	kidney	The Kidney controls growth, maturation, reproduction and aging. It produces marrow that forms the brain and spinal cord, and it promotes production of bones and blood. Furthermore, it dominates body fluids and receives qi from air via the Lung. Associated with the water element, the Kidney connects with the Urinary Bladder, opens to the ears, and houses the faculty of <i>zhi</i> (will power).
<i>Lao lin</i> (fatigue dysuria)	劳淋	lao lin	taxation strangury	A urinary tract disorder involving increased frequency of urination, especially with physical stress and exertion. Accompanying symptoms include fatigue, lower back and knee soreness and pain, with dribbling urine, but no pain during urination. This is caused when prolonged exertion leads to Spleen and Kidney exhaustion and inability to control the normal flow of water and urination.
Large Intestine	大肠	da chang	large intestine	Connected to the Small Intestine, the Large Intestine absorbs nutrients and water from food.
Large spoon	方寸匕	fang cun bi		A large spoon that contains approximately 6-9 grams of powdered herbs.
Leg <i>qi</i>	脚气	jiao qi	leg qi	A disorder of the leg(s) characterized by numbness, soreness, pain, weakness, possible swelling and cramps, and possible atrophy of leg muscles. Accompanying symptoms may include nausea, vomiting, dyspnea, incoherent speech, and palpitations. Generally caused by wind, damp, and toxins attacking the legs, it overlaps in symptomology with beriberi.
<i>Li feng</i> (dysenteric wind)	痢风	li feng		A condition of constitutional weakness and deficiency caused by chronic dysentery, in which wind attacks the legs leading to weakness, pain, paralysis, and inability to walk.
<i>Lin zheng</i> (dysuria syndrome)	淋证	lin zheng	strangury pattern	Dysuria syndrome refers to a condition of frequent and painful urination, abdominal pain, and/or pain radiating to the lower back.
<i>Liu jing bian zheng</i> (six stages differentiation)	六经辨证	liu jing bian zheng	six-channel pattern identification	A system of differential diagnosis based on identifying patterns of disharmony by relationship to the energetic stages <i>taiyang</i> , <i>yangming</i> , <i>shaoyang</i> , <i>taiyin</i> , <i>shaoyin</i> , and <i>jueyin</i> .
<i>Liu yin</i> (six exogenous factors)	六淫	liu yin	six excesses	The six exogenous climatic conditions that may cause illness when in excess, including wind, cold, summer-heat, dampness, dryness, and fire.
Liver	肝	gan	liver	The Liver stores blood, maintains proper flow of qi, and controls tendons. It connects to the Gallbladder, opens to the eyes, and is associated with the wood element.
Long pulse	长脉	chang mai	long pulse	A pulse that can be felt beyond the <i>cun</i> and <i>chi</i> positions.
Loss of qi with hemorrhage	气随血脱	qi sui xue tuo	qi deserting with the blood	A dangerous dynamic in which qi is lost because it flows out with the blood in severe bleeding.
Lower <i>jiao</i>	下焦	xia jiao	lower burner	The lower <i>jiao</i> represents the hypogastrium, and includes the functions of the Kidney and the Urinary Bladder.
Lung	肺	fei	lung	The Lung controls breathing and the flow of air, regulates water passages, and dominates the skin and hair. It connects with the Large Intestine, opens to the nose, and is associated with the metal element.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Lung abscess	肺癰	<i>fei yong</i>	pulmonary welling-abscess	A disorder characterized by cough, chest fullness, fever and chills, rapid pulse, dry throat without thirst, foul-smelling sputum, and profuse discharge of sputum. It is generally caused by wind-heat attacking the Lung.
<i>Luo</i> (connecting) point	络穴	<i>luo xue</i>	network point	Known as “connecting” or “vessel” points, these points assist communication between the yang external and yin internal channels. Fifteen points in all represent each of the twelve channels and one on each of the front, back and side of the trunk.
Malaria	疟疾	<i>nue ji</i>	malaria	An infectious disorder characterized by alternation of chills, fever and perspiration. This disorder occurs most frequently in summer and fall, and is diagnosed as wind, cold, summer-damp, and damp attacking the <i>ying</i> (nutritive) and <i>wei</i> (defensive) levels.
Mammary aggregation	乳癖	<i>ru pi</i>	mammary aggregation	A breast nodule of variable size, slightly mobile, not painful, not of cold or hot origin, does not cause a change in local skin color, nor erupt or cause ulceration. These form primarily because of Liver qi stagnation.
Mammary ‘rock’	乳岩	<i>ru yan</i>	mammary rock	Single or multiple breast nodules similar in size to jujubes, that do not cause pain, itching, redness or heat sensations, and may continue to grow in size. Most common in women past middle age, this is caused by emotional constraint and obstructed flow of Liver and Spleen qi.
<i>Man</i> (fullness)	满	<i>man</i>	fullness	<i>Man</i> (fullness) is the feeling of bloating and fullness in the epigastric and abdominal regions.
Metal	金	<i>jin</i>	metal	One of the five elements, metal has inward or contracting movement, represents autumn and harvest, and is associated with the Lung.
Middle <i>jiao</i>	中焦	<i>zhong jiao</i>	middle burner	The middle <i>jiao</i> represents the epigastrium, and includes the functions of the Spleen and Stomach.
<i>Ming men</i> (life gate)	命门	<i>ming men</i>	life gate	This is key to the overall vitality of the individual. A strong <i>ming men</i> (life gate) often indicates that an individual is in great health and will age slowly. A weak <i>ming men</i> is often evident in persons who look older than their actual age, and suffer from numerous age-related illnesses.
Moderate pulse	缓脉	<i>huan mai</i>	moderate pulse	A slow pulse with approximately three or more beats per respiration.
<i>Mo yuan</i> (membrane source)	膜原	<i>mo yuan</i>	membrane source	A term used in <i>wen bing</i> (warm disease) to describe a space situated midway between the exterior and the interior of the body where warm disease factors tend to settle.
<i>Mu</i> (collecting) point	募穴	<i>mu xue</i>	alarm point	Commonly referred to as “alarm” or “collecting” points, these twelve points individually represent where the qi of a specific internal organ passes on the chest and abdomen.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Mumps	痄腮	<i>zha sai</i>	mumps	An acute infectious disorder commonly seen in children. Clinical presentations include swelling and pain of the parotid glands, chills and fever, difficulty chewing, and discomfort of the entire body. Most common in winter and spring, it may occur in any season, and is caused by wind-heat (entering the body through the mouth and nose) that becomes blocked in the <i>shaoyang</i> channels.
Night perspiration	盗汗	<i>dao han</i>	night sweating	Night perspiration refers to sweating that occurs during sleep, and stops when one awakens. It is an indication of yin deficiency.
Over-acting sequence	相乘	<i>xiang cheng</i>	overwhelming	A concept of <i>wu xing</i> (five element) theory that describes a situation in which a controlling element suppresses or reduces the controlled element instead of controlling its growth or activity.
<i>Pao</i> (blast-fry)	炮	<i>pao</i>	blast-drying	To stir fry medicinal substances in an iron wok over intense fire until their surface becomes dark-brown, burnt, or cracked open.
Pericardium	心包	<i>xin bao</i>	pericardium	The Pericardium is the external covering of the Heart. It functions as the protective barrier of the Heart against pathological factors, and connects with the <i>San Jiao</i> .
Persistent, indeterminate hunger	嘈杂	<i>cao za</i>	clamoring stomach	An uncomfortable sensation that mimics pain yet is not painful, that mimics hunger yet the person is not hungry. This condition is usually caused by fire, phlegm accumulation, qi stagnation, or food retention.
Perspiration of the palms and soles	手足心汗	<i>shou zhu xin han</i>	sweating in the (heart of the) palms and soles	Profuse perspiration of the hands and feet is an indication of yin deficiency with heat. It is often caused by excessive thinking and worrying that leads to injuries of the Heart and Spleen.
Phlegm	痰	<i>tan</i>	phlegm	Phlegm is a by-product formed from water and damp stagnation. The presence of phlegm may obstruct healthy flow and cause illness throughout the body, damaging the Lung, Heart, Stomach, peripheral channels and collaterals, throat and skin.
<i>Pi</i> (distention)	痞	<i>pi</i>	glomus	<i>Pi</i> (distention) is the feeling of oppression, obstruction, and increased pressure in the chest and epigastric regions.
<i>Pi shui</i> (skin water)	皮水	<i>pi shui</i>	skin water	Severe and generalized edema due to Spleen deficiency and damp accumulation, with symptoms such as pitting edema and heaviness and pain of the body and limbs.
<i>Piao</i> (rinse)	漂	<i>piao</i>	long rinsing	To steep or soak medicinal substances with frequent change of water to remove dirt, odor or toxicity.
Plum-pit <i>qi</i>	梅核气	<i>mei he qi</i>	plum-pit qi	The feeling of having a foreign substance, such as a plum pit, obstructing the throat which cannot be expectorated or swallowed.
<i>Po</i> (break open)	破	<i>po</i>		To force open.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Po (corporeal soul)	魄	po	corporeal soul	A term that refers to basic human instinct and reaction, such as the ability to smell, taste, see, distinguish between cold and hot, and the ability of the newborn to nurse and feed. The main function of <i>po</i> , which resides in the Lung, is to maintain physical awareness in order to react and adapt to the external environment.
Post-decoct	后下	hou xia	add at end	A specific instruction when preparing a decoction, to add specific herbs near the end of the cooking process and then continue cooking the herbs for approximately 5 to 10 additional minutes.
Pre-decoct	先煎	xian jian	predecoct	Instruction to cook a certain herb or herbs first (usually for 30 minutes, but this varies) before adding the rest of the herbs to cook a decoction.
Profuse sweating	大汗	da han	great sweating	Profuse perspiration often leads to depletion of body fluids. It may occur because of excessive heat or yang collapse.
Qi	气	qi	qi	Qi represents the vital energy needed for proper functioning and existence of the organs and the body.
Qi (energy) level	气分	qi fen	qi aspect	Qi (energy) level refers to the second of four levels of febrile infections. Heat attacking the <i>qi</i> level may affect such organs as the Stomach, Lung, Intestines, Gallbladder and Spleen. Clinical presentations will vary depending on the organ(s) affected.
Qi and blood deficiency	气血两虚	qi xue liang xu	dual vacuity of qi and blood	Insufficiency of both qi and blood, which influences basic organ functions more strongly than insufficiency of either one alone.
Qi and blood stagnation	气滞血瘀	qi zhi xue yu	qi stagnation and blood stasis	Obstructed flow of both qi and blood.
Qi collapse	气陷	qi xian	qi fall	Severe insufficiency of qi results in collapse of vital functions.
Qi deficiency	气虚	qi xu	qi vacuity	A condition in which insufficient quantity of qi affects body or organ functions.
Qi deficiency bleeding	气虚失血	qi xu shi xue	qi vacuity bleeding	Bleeding caused by insufficiency of qi, and its consequent inability to properly guide the flow of blood.
Qi lin (qi dysuria)	气淋	qi lin	qi strangury	A urinary tract disorder characterized by obstructed urinary flow, lower abdominal distention and pain, and green-blue tongue color. It is caused by Liver stagnation leading to obstructed flow of qi and urine.
Qi qing (seven emotions)	七情	qi qing	seven affects	The seven emotional factors that may cause illness when out of balance, including joy, anger, melancholy, thought (over-thinking), grief, fear and fright.
Qi stagnation	气滞	qi zhi	qi stagnation	Obstructed qi flow in internal organs or peripheral channels and collaterals, caused by a variety of factors, including inappropriate diet, emotional disturbance, environmental factors, or external injuries.
Qi xue jin ye bian zheng (qi, blood, and body fluid differentiation)	气血津液辨证	qi xue jin ye bian zheng	qi, blood and fluids pattern identification	A system of differential diagnosis based on patterns of disharmony of qi, blood, and body fluids.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Qie (slice)	切	qie	cutting	To cut open. This method increases the surface area, creates standard portion weights and sizes, facilitates drying, and prolongs shelf life.
Qing fa (clearing)	清法	qing fa	clearing	A method of treatment that clears heat, purges fire and cools the blood to treat diseases characterized by warmth, heat, fire, and toxins.
Racing pulse	疾脉	ji mai	racing pulse	A fast pulse with seven or more beats per respiration.
Rapid pulse	数脉	shu mai	rapid pulse	A fast pulse with six or more beats per respiration.
Re bi (heat painful obstruction)	热痹	re bi	heat impediment	One type of <i>bi zheng</i> (painful obstruction syndrome) characterized by local redness, swelling, burning sensations and pain. The development of heat is often caused by prolonged obstruction of the channels and collaterals by wind, cold or damp.
Re jue (heat reversal)	热厥	re jue	heat reversal	A morbid condition in which excessive pathogenic heat leads to consumption of body fluids which impairs the normal circulation of yang qi and results in cold extremities.
Re lin (heat dysuria)	热淋	re lin	heat strangury	A urinary tract disorder characterized by frequent urination, painful and burning sensations upon urination, yellow urine, muscle cramps and pain in the lower abdomen, and a bitter taste in the mouth. This condition is caused by damp-heat attacking the lower <i>jiao</i> .
Rebellious qi	气逆	qi ni	qi counterflow	Rebellious qi is the flow of qi opposite of its normal or appropriate direction, such as the flow of Lung qi upwards, that leads to coughing.
Ren (conception) channel	任脉	ren mai	conception vessel	The confluence of all yin vessels, one of the eight extraordinary vessels. Also known as the “sea of yin qi,” it relates to urogenital, gynecological and obstetrical functions.
Restless fetus	胎动不安	tai dong bu an	stirring fetus	Constant downward movement of the fetus, abdominal pain, sore back, and perhaps bleeding, are generally caused by qi deficiency, blood deficiency, Kidney deficiency, heat in the blood, or external injuries.
Rock-like breast abscess	乳石痛	ru shi yong	rock-like mammary welling-abscess	A rock-hard breast abscess.
Rough pulse	涩脉	se mai	rough pulse	A pulse that does not flow smoothly.
Run (moisten)	润	run		To soak the herbs in water to soften the substances prior to slicing, or to ensure complete extraction prior to cooking in decoctions.
San Jiao	三焦	san jiao	triple burner	The <i>San Jiao</i> is not an anatomical organ, but a generalization of different sections of the body compartment. The <i>San Jiao</i> is divided into upper, middle and lower sectors.
San Jiao bian zheng (triple burner differentiation)	三焦辨证	san jiao bian zheng	triple burner pattern identification	A system of differential diagnosis based on locating patterns of disharmony in the upper <i>jiao</i> , middle <i>jiao</i> , or lower <i>jiao</i> .
Scallion-stalk pulse	芤脉	kou mai	scallion-stalk pulse	A large superficial pulse that feels empty in the middle upon pressure.
Scattered pulse	散脉	san mai	scattered pulse	A large superficial pulse without root.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Scoop	合子	he zi		A device used to measure herbs, such as <i>Dan Dou Chi</i> (Semen Sojae Praeparatum).
Seven emotions	七情	qi qing	seven affects	Joy, anger, melancholy, thought (over-thinking), grief, fear and fright. An excess of any of the seven emotions may create illness.
<i>Sha zhang</i> (acute filthy disease)	痧胀	sha zhang	sand distention	A disease contracted primarily via ingestion of filthy (raw, dirty or unclean) foods, leading to fever, chest oppression, abdominal distention, nausea, vomiting and diarrhea.
<i>Shang han</i> (cold damage)	伤寒	shang han	cold damage	A collective term for disorders caused by cold externally-contracted pathogens, diagnosed and treated via <i>Liu Jing Bian Zheng</i> (Six Stages Differentiation).
<i>Shang Han Lun</i> (Discussion of Cold-Induced Disorders)	伤寒论	shang han lun	on cold damage	A text written by Zhang Zhong-Jing in the Eastern Han dynasty that focuses on diagnosis and treatment of cold-induced disorders. The basic principles of diagnosis and treatment are based on <i>Liu Jing Bian Zheng</i> (Six Stages Differentiation).
<i>Shao</i> (burn)	烧	shao	burn	To treat the medicinal substances with heat or fire.
<i>Shaoyang</i>	少阳	shao yang	lesser yang	Third of six stages in the paradigm of yin and yang. This term identifies the degree of pathology of disease according to the <i>Shang Han Lun</i> (Discussion of Cold-Induced Disorders) text. It also describes the level attributed to the Gallbladder and <i>San Jiao</i> channels that travel throughout the body.
<i>Shaoyin</i>	少阴	shao yin	lesser yin	The fifth of six stages in the paradigm of yin and yang. This term describes the degree of pathology of disease according to the <i>Shang Han Lun</i> (Discussion of Cold-Induced Disorders) text. It also identifies the level attributed to the Heart and Kidney channels that travel throughout the body.
<i>Shen</i> (spirit)	神	shen	spirit	A term that refers to the entire presentation of the human being, including energy levels, the state of consciousness, and the ability to think and reason. Because it is housed in the Heart, disorders affecting the Heart may also lead to disturbance of the <i>shen</i> (spirit).
<i>Shi</i> (hardness)	实	shi	repletion	<i>Shi</i> (hardness) is the excess condition in which the dry hard stools are interlocked with heat, causing constipation and abdominal pain that intensifies with palpation.
<i>Shi lin</i> (stone dysuria)	石淋	shi lin	stone strangury	A urinary tract disorder characterized by lower abdominal tightness and pain, the presence of sandy particles (and possibly blood) in the urine, difficult and painful urination, or sudden termination of the stream of urine. This is caused by damp-heat attacking the lower <i>jiao</i> , drying fluids, and leading to the formation of stones.
<i>Shi yao</i> (envoy herb)	使药	shi yao	courier	The fourth of four guiding principles in herbal formulation: <i>Jun Chen Zuo Shi</i> (Chief, Deputy, Assistant, Envoy). This herb has two main functions: 1) it acts as a channel-guiding herb to direct the formula to the affected channels/areas of the body; and 2) it harmonizes all of the herbs within the formula. <i>Shi yao</i> (envoy herb) is usually used only in small doses.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
<i>Shi-re lin</i> (damp-heat dysuria)	湿热淋	<i>shi re lin</i>	damp-heat strangury	A urinary tract disorder characterized by frequent urination, painful and burning sensations upon urination, yellow urine, muscle cramps and pain in the lower abdomen, and a bitter taste in the mouth, all caused by damp-heat attacking the lower <i>jiao</i> . Other symptoms of damp-heat may include nausea, vomiting, constipation, a yellow, greasy tongue coating, and a slippery, rapid pulse.
Shivering perspiration	战汗	<i>zhan han</i>	shivering	Shivering perspiration is a phenomenon that occurs when the body fights against pathogenic factors. The prognosis is good if the patient has a normal temperature after perspiring. The prognosis is poor if the patient becomes fidgety and irritable after perspiring.
Short pulse	短脉	<i>duan mai</i>	short pulse	A pulse that can be felt only at <i>guan</i> position.
<i>Shu</i> (stream) point	输穴	<i>shu xue</i>	stream point	Commonly referred to as “stream” points, these are usually located near the wrists or ankles and suggest that the flow of <i>qi</i> is now of sufficient quantity to carry out these functions.
<i>Shu</i> (transport) point	俞穴	<i>shu xue</i>	transport point	Known as “associated points of the back,” or “transporting” points, these are twelve points on the upper and lower back where the <i>qi</i> of the internal organs passes. Each represents an organ.
<i>Shui fei</i> (refine with water)	水飞	<i>shui fei</i>	water-grinding	A technique to reduce medicinal substances into fine particles by repeatedly grinding them in water.
Skipping pulse	促脉	<i>cu mai</i>	skipping pulse	A relatively fast pulse that is broken up by regular pauses.
Slippery pulse	滑脉	<i>hua mai</i>	slippery pulse	A pulse that feels smooth and flowing.
Slow pulse	迟脉	<i>chi mai</i>	slow pulse	A pulse with three or less beats per respiration.
Small Intestine	小肠	<i>xiao chang</i>	small intestine	Connecting to the Stomach and Large Intestine, the Small Intestine absorbs nutrients from food.
Small pulse	小脉	<i>xiao mai</i>	small pulse	A fine and well-defined pulse. Same as fine pulse.
Small spoon	钱匕	<i>qian bi</i>		A small spoon that contains approximately 1.5-1.8 grams of powdered herbs.
Soggy pulse	濡脉	<i>ru mai</i>	soggy pulse	A pulse that is fine and floating.
Sores	疮疡	<i>chuang yang</i>	sore	An inclusive term for skin lesions, boils, ulcers, carbuncles and furuncles.
Spleen	脾	<i>pi</i>	spleen	The Spleen governs the transportation and transformation of food, controls blood, and dominates muscle. It connects with the Stomach, opens to the mouth, and represents the earth element.
Spontaneous sweating	自汗	<i>zi han</i>	spontaneous sweating	Spontaneous perspiration, especially after only mild physical activities, is an indication of <i>wei</i> (defensive) <i>qi</i> deficiency.
Steaming bones sensation	骨蒸	<i>gu zheng</i>	steaming bone	A Kidney disorder characterized by heat and steaming sensations originating from the bone marrow. Accompanying symptoms include bodily coldness in the mornings and warm sensations in the evenings, irritability, restlessness, disturbed sleep, red urine, low back pain, cold hands and feet, and warm palms and soles.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Stifling sensation	闷	<i>men</i>	oppression	An oppressive and congested feeling in the chest that leads to difficulties in breathing deeply.
Stirred pulse	动脉	<i>dong mai</i>	stirred pulse	A forceful rapid slippery pulse.
Stomach	胃	<i>wei</i>	stomach	Connecting to the mouth through the esophagus, the Stomach receives and decomposes food to facilitate digestion and absorption.
Sudden turmoil	霍乱	<i>huo luan</i>	sudden turmoil	An acute disorder characterized by sudden onset of nausea, vomiting, and chest and abdominal pain. Generally occurring in summer and fall, it is usually caused by inappropriate diet, leading to dysfunction of the stomach and intestines.
Summer heat	暑	<i>shu</i>	summerheat	Summer heat is a yang pathogenic factor that occurs only in the summer, and is comprised of both heat and damp characteristics, including upward direction and dispersion. Clinical presentations of summer heat include excessive perspiration, thirst, shortness of breath, fatigue, elevated body temperature, heavy sensations in the extremities, poor appetite, and a feeling of congestion in the chest.
Superficial pulse	浮脉	<i>fu mai</i>	floating pulse	A pulse that is more pronounced at the superficial level.
Supreme physician	太医	<i>tai yi</i>	supreme physician	Physicians that practice in the Imperial Palace to treat the royalties and their court members.
Surging pulse	洪脉	<i>hong mai</i>	surging pulse	A pulse that is broad, large and forceful at all three levels.
Sweaty head	头汗	<i>tou han</i>	sweating head	Head perspiration generally arises from heat affecting the upper and middle <i>jiaos</i> , possibly accompanied by irritability, thirst, a yellow tongue coating, and a rapid pulse.
<i>Taiyang</i>	太阳	<i>tai yang</i>	greater yang	First of six stages in the paradigm of yin and yang, identifying the degree of pathology of disease according to the <i>Shang Han Lun</i> (Discussion of Cold-Induced Disorders) text. It also names the level attributed to the Small Intestine and Urinary Bladder channels that travel throughout the body.
<i>Taiyin</i>	太阴	<i>tai yin</i>	greater yin	The fourth of six stages in the paradigm of yin and yang. This term describes the degree of pathology of disease according to the <i>Shang Han Lun</i> (Discussion of Cold-Induced Disorders) text. It also identifies the level attributed to the Spleen and Lung channels that travel throughout the body.
<i>Tan</i> (char to ash)	炭	<i>tan</i>		Charring at high temperature until the medicinal substances turn into ash. This method harmonizes and moderates therapeutic effects, reduces side effects, and potentiates the 'stop bleeding' properties of specific substances.
<i>Tan yin</i> (phlegm retention)	痰饮	<i>tan yin</i>	phlegm-rheum	Phlegm retention caused by accumulation of water and dampness, this may occur at various organs and tissues in the body, leading to different illnesses and clinical presentations.
Tight pulse	紧脉	<i>jin mai</i>	tight pulse	A pulse that is forceful and string-like.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
<i>Tong bi</i> (extremely painful obstruction)	痛痹	<i>tong bi</i>	painful impediment	One type of <i>bi zheng</i> (painful obstruction syndrome) characterized by cold. Similar to cold that is stationary and constricting, <i>tong bi</i> is distinguished by severe pain at a fixed location. This type of pain intensifies with exposure to cold, and is relieved by exposure to warmth.
Toxin	毒	<i>du</i>	toxin	A toxin is any substance that is potentially harmful to the body. ‘Toxin’ also describes a pathogenic factor that may cause illness either on the exterior or in the interior of the body. Clinical manifestations of toxicity include pus, abscesses, sores, ulcerations, swelling and inflammation.
<i>Tu fa</i> (vomiting)	吐法	<i>tu fa</i>	ejection	A method of treatment that induces emesis to eliminate phlegm, stagnant food, or toxic matters from the throat, chest and diaphragm, or epigastrium. Vomiting induces qi to move upwards and outwards to treat ingestion of poisonous substances, severe cases of food stagnation, sudden turmoil disorder with vomiting and diarrhea, mania and withdrawal caused by phlegm accumulation, and <i>zhong feng</i> (wind stroke) with phlegm accumulation.
<i>Tuo zheng</i> (abandoned syndrome)	脱证	<i>tuo zheng</i>	desertion pattern	Characterized by profuse sweating, cold extremities, open mouth and closed eyes, and urinary incontinence, this condition occurs when there is severe exhaustion of yin, yang, qi and blood.
Upper <i>jiao</i>	上焦	<i>shang jiao</i>	upper burner	The upper <i>jiao</i> represents the chest, and includes functions of the Heart and the Lung.
Urinary Bladder	膀胱	<i>pang guang</i>	bladder	The Urinary Bladder stores and excretes urine.
Uroschesis	癃闭	<i>long bi</i>	dribbling urinary block	A disorder in which there is little or no urination, brought about by any of the following: heat in the Urinary Bladder, Kidney yang deficiency, qi deficiency, qi stagnation, or body fluid deficiencies.
<i>Wan bi</i> (stubborn painful obstruction)	顽痹	<i>wan bi</i>	insensitive impediment	One type of <i>bi zheng</i> (painful obstruction syndrome) that generally occurs after chronic or repetitive injuries to the same areas, causing stiffness, numbness, and lack of mobility.
Warm epidemics	瘟疫	<i>wen yi</i>	warm epidemic	Contagious diseases characterized by heat, with clinical manifestations such as fever, headache, irritability, thirst, vomiting, and with or without sweating.
Water	水	<i>shui</i>	water	Water is one of the five elements, associated with winter, with the Kidney, downward movement, and the ability to store or accumulate.
Water and fluid stagnation	水液停滞	<i>shui ye ting zhi</i>		Obstructed flow of water and thick fluids in the body.
Weak pulse	弱脉	<i>ruo mai</i>	weak pulse	A deep and forceless pulse.
<i>Wei</i> (defensive) level	卫分	<i>wei fen</i>	defense aspect	The first of four levels affected by febrile infections. Heat attacking the <i>wei</i> (defensive) level is characterized by disorders of the Lung, with such symptoms as fever, headache, dry mouth, thirst, cough, and sore throat, and a red tongue, and superficial, rapid pulse.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
<i>Wei</i> (defensive) <i>qi</i>	卫气	<i>wei qi</i>	defense qi	A type of yang qi responsible for warming the exterior, nourishing the skin and muscles, circulating under the skin to prevent invasion by external pathogenic factors, and controlling the skin pores and perspiration. It is generated by the Spleen and Stomach from the essence of food, controlled by the Lung, and resides in the upper <i>jiao</i> .
<i>Wei</i> (roast)	煨	<i>wei</i>		To cook and parch by wrapping the herbs in wet cloth, paper, or mud, and heating this bundle in hot cinders until the coating has turned black or burned away. This method reduces toxicity or moderates the drastic actions of some herbs.
<i>Wei bi</i> (atrophic painful obstruction)	痿痹	<i>wei bi</i>	wilting impediment	One type of <i>bi zheng</i> (painful obstruction syndrome) caused by deficiency of the Liver and Kidney, with such presentations as atrophy, weakness and pain of the muscles and bones.
<i>Wei qi ying xue bian zheng</i> (defensive, qi, nutritive, blood differentiation)	卫气营血 辨证	<i>wei qi ying xue bian zheng</i>	four aspect pattern identification	A system of differential diagnosis based on patterns of disharmony found in the <i>wei</i> (defensive) level, <i>qi</i> (energy) level, <i>ying</i> (nutritive) level or <i>xue</i> (blood) level.
<i>Wei zheng</i> (atrophy) syndrome)	痿证	<i>wei zheng</i>	wilting pattern	A condition involving decreasing muscle mass and physical strength of the extremities, especially the legs; generally caused by the concurrent presence of excess and deficiency factors.
<i>Wen bing</i> (warm disease)	温病	<i>wen bing</i>	warm disease	Acute illnesses caused by externally contracted heat factors: diagnosed and treated based on <i>Wei Qi Ying Xue Bian Zheng</i> (Defensive, Qi, Nutritive, Blood Differentiation) and <i>San Jiao Bian Zheng</i> (Triple Burner Differentiation).
<i>Wen fa</i> (warming)	温法	<i>wen fa</i>	warming	A method of treatment that warms the interior, dispels cold, restores yang, and unblocks channels and collaterals. Warming is usually used to treat the presence of cold affecting the normal functions of <i>zang fu</i> organs, or stagnation of cold blocking the channels and collaterals.
Wheezing and dyspnea	哮喘	<i>xiao chuan</i>	wheezing and panting	A disorder characterized by wheezing, dyspnea and hurried respiration.
Wind	风	<i>feng</i>	wind	Wind is a pathogenic factor that attacks the body through the pores. Wind is a yang pathogenic factor characterized by upward, outward dispersion. Clinical presentation of exterior wind includes headache, nasal obstruction, sore throat, aversion to wind and sweating.
Wind rash	风疹	<i>feng zhen</i>	wind papules	An infectious skin disorder commonly seen during winter and spring in children under five years of age. Generally caused by wind-heat attack, it is characterized by itching, rashes and wheals of various sizes.
Wiry pulse	弦脉	<i>xian mai</i>	wiry pulse	A pulse that feels like a string of a musical instrument.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Wood	木	<i>mu</i>	wood	One of the five elements, wood represents the expansive energy of Spring, moving outward in all directions, and is associated with the Liver.
<i>Wu shu</i> (five transport) points	五输穴	<i>wu shu xue</i>	five transport points	Located below the knees and elbows, these points represent the growth of qi from small to large volume. Their name suggests images of the flow of water. It starts with only a small quantity in a <i>jing</i> (well), gushes out into a <i>ying</i> (spring), flows from shallow to deep as a <i>shu</i> (stream), traverses like a <i>jing</i> (river) through the continent, and finally unites with the <i>he</i> (sea).
<i>Wu xin re</i> (five-center heat)	五心热	<i>wu xin re</i>	vexing heat in the five hearts	A condition characterized by yin-deficient heat in which there is a warm sensation in the middle of the chest, palms and soles.
<i>Xi</i> (cleft) point	郄穴	<i>xi xue</i>	cleft point	“Accumulating” or “cleft” points represent the holes or crevices where circulating qi accumulates. There are a total of sixteen such points, one for each of the twelve regular channels, as well as the <i>yangqiao</i> , <i>yinqiao</i> , <i>yangwei</i> and <i>yinwei</i> channels.
<i>Xi</i> (wash)	洗	<i>xi</i>		To remove unwanted substances or odor with water.
<i>Xia fa</i> (draining downwards)	下法	<i>xia fa</i>	precipitation	A method of treatment that cleanses the Stomach and Intestines, induces defecation, and eliminates pathogenic accumulation from the body. This method is generally used to treat stagnant food, dry stools, cold accumulation, hot accumulation, blood stasis, phlegm stagnation, water stagnation, and parasitic infestation.
<i>Xiao fa</i> (reducing)	消法	<i>xiao fa</i>	dispersion	A method of treatment that dissolves and disperses hardness and nodules to treat accumulation and stagnation of various substances, such as food, qi, blood, phlegm, water, and parasites. Reducing may be used to treat a wide variety of illness due to various causes.
<i>Xiao ke</i> (wasting and thirsting)	消渴	<i>xiao ke</i>	dispersion-thirst	A pathological condition characterized by increased intake of water and food, increased frequency of urination, and decreased body weight.
<i>Xing bi</i> (mobile painful obstruction)	行痹	<i>xing bi</i>	moving impediment	One type of <i>bi zheng</i> (painful obstruction syndrome) caused by wind attacking the body. Similar to wind that is light and mobile, <i>xing bi</i> is characterized by pain in the upper body, specifically pain that travels from one area to another.
<i>Xiong bi</i> (pain- ful obstruction of the chest)	胸痹	<i>xiong bi</i>	chest impediment	Characterized by feelings of chest congestion, pain and discomfort, this condition is usually caused by factors such as cold excess, yang deficiency, or phlegm stagnation.
<i>Xuan yin</i> (pleural effusion)	悬饮	<i>xuan yin</i>	suspended rheum	Accumulation of <i>yin</i> (invisible phlegm) in the chest and hypochondrium causing pain with coughing, breathing, and rotation of the trunk.
<i>Xue</i> (blood) level	血分	<i>xue fen</i>	blood aspect	<i>Xue</i> (blood) level refers to the fourth level of febrile infections. Heat attacking the <i>xue</i> level is characterized by disorders of the Heart and Liver, with such symptoms as high fever, anger, mania, various types of bleeding, delirium, convulsions and clenched jaws.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
<i>Xue bi</i> (blood painful obstruction)	血痹	<i>xue bi</i>	blood impediment	One type of <i>bi zheng</i> (painful obstruction syndrome) that is related to blood. Dull pain may be caused by blood deficiency and the inability to nourish the tendons and bones. Sharp pain is often related to blood stagnation blocking the channels and collaterals.
<i>Xue lin</i> (bloody dysuria)	血淋	<i>xue lin</i>	blood strangury	A urinary tract disorder characterized by the presence of blood or blood clots in the urine, and burning sensations and pain during urination. Accompanying symptoms may include fatigue, back pain, a pale red tongue, and a fine, rapid pulse. This condition is caused by damp-heat attacking the lower <i>jiao</i> , leading to bleeding and obstructed flow of qi and urine.
Ya (press)	轧	<i>ya</i>		To push or squeeze into small particles. This methods increases the surface area and enhances extraction of active ingredients.
Yan (drown)	淹	<i>yan</i>		To soak or steep in water or other liquids.
Yan (grind)	研	<i>yan</i>	grinding	To reduce into small particles with a mortar and pestle. This methods increases the surface area and enhances extraction of active ingredients.
Yang	阳	<i>yang</i>	yang	Yang is the complement to and opposite of yin. Anatomically, it represents the upper, posterior and exterior parts of the body. Physiologically, it represents body functioning, such as the energy level, rate of metabolism, and state of awareness. Pathologically, it represents disharmony or imbalance of body organs.
Yang (melt)	烔	<i>yang</i>		To dissolve or disintegrate in water or other liquids.
Yangming	阳明	<i>yang ming</i>	yang brightness	Second of the six stages in the paradigm of yin and yang, this term describes the degree of pathology of disease according to the <i>Shang Han Lun</i> (Discussion of Cold-Induced Disorders) text. It also identifies the level given the Stomach and Large Intestine channels that travel throughout the body.
Yangqiao (movement) channel	阳跷脉	<i>yang qiao mai</i>	yang springing vessel	Of the eight extraordinary vessels, this one pairs with <i>yingqiao</i> to maintain proper sleep cycles and control movement and balance.
Yangwei (linking) channel	阳维脉	<i>yang wei mai</i>	yang linking vessel	Of the eight extraordinary vessels, this one dominates the exterior in cooperation with <i>yingwei</i> , to balance yin and yang in the four extremities.
Ye (thick body fluid)	液	<i>ye</i>	humor	An inclusive term that describes body fluids of higher density, such as the fluid that lubricates the joints and moistens the bone marrow.
Yi (intellect)	意	<i>yi</i>	intellect	The ability to think, study, memorize, focus, understand, and all other cognitive activities. It resides in the Spleen. Therefore, excessive use of <i>yi</i> may consume the Spleen, and deficiency of the Spleen may interfere with the optimal performance of <i>yi</i> (intellect).

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Yin	阴	yin	yin	Yin is the complement to and opposite of yang. Anatomically, it represents the lower, anterior and interior parts of the body. Physiologically, it represents the substances of the body, such as blood, sweat, saliva and body fluids. Pathologically, it represents the disharmony or imbalance of body organs.
Yin (invisible phlegm)	饮	yin	rheum	Yin (invisible phlegm) is the by-product formed from stagnation of water and dampness. Yin is the less viscous form of tan (phlegm).
Yin shui (yin edema)	阴水	yin shui	yin water	A type of edema caused by yang qi deficiency, with generalized deficiency and cold manifestations such as cold hands and feet and loose stools.
Ying (nutritive) level	营分	ying fen	construction aspect	The ying (nutritive) level refers to the third of four levels of febrile infections. Heat attacking the ying level is characterized by disorders of the Heart, with such symptoms as fever, thirst, irritability, delirium, red tongue and fine, rapid pulse.
Ying (nutritive) qi	营气	ying qi	construction qi	The qi produced by Spleen and Stomach and circulates within blood vessels to nourish the entire body.
Ying (spring) point	荣穴	ying xue	spring point	“Gushing” or “spring” points are located in distal parts of the body; their name suggests that qi has begun to flow in larger quantity.
Yinqiao (movement) channel	阴跷脉	yin qiao mai	yin springing vessel	Of the eight extraordinary vessels, this one pairs with yangqiao to maintain proper sleep cycles and control movement and balance.
Yinwei (linking) channel	阴维脉	yin wei mai	yin linking vessel	Another of the eight extraordinary vessels: in cooperation with yangwei, this one dominates the interior; to balance yin and yang in the four extremities.
Yuan (source) point	原穴	yuan xue	source point	Known as “source” points, these are locations to which the qi of the organs flows and is retained. There are twelve such points, each representing a channel and an organ.
Yuan (source) qi	原气	yuan qi	source qi	The most basic and most important qi in the body, yuan (source) qi is derived prenatally from the jing (essence) of one’s parents, and postnatally from the essence of food. It is distributed throughout the body to maintain health and well-being.
Zang (solid organ)	脏	zang	viscus	Solid organs of the body, including the Heart, Lung, Spleen, Liver and Kidney.
Zang du (solid organ toxin)	脏毒	zang du	visceral toxin	A condition caused by presence of toxin attacking the solid organ leading to dysentery with presence of dark black blood in the stools.
Zang fu	脏腑	zang fu	bowels and viscera	The general term for the five zang (solid) and six fu (hollow) organs.
Zang fu bian zheng (organ pattern differentiation)	脏腑辨证	zang fu bian zheng	organ pattern identification	A system of differential diagnosis based on patterns of disharmony of zang (solid) organs and fu (hollow) organs.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
<i>Zang zao</i> (restless organ)	脏躁	<i>zang zao</i>	visceral agitation	In middle-aged to geriatric women, this disorder is characterized by symptomology such as emotional instability, mental confusion, crying, episodes of extreme sadness or happiness, and increased sensitivity to stimulus.
<i>Zao</i> (dryness)	燥	<i>zao</i>	dryness	<i>Zao</i> (dryness) refers to the dry compacted stool, which feels hard upon abdominal palpation.
<i>Zha</i> (crush)	砸	<i>zha</i>		To reduce medicinal substances into particles by pounding. This method increases the surface area and enhances extraction of active ingredients.
<i>Zheng</i> (steam)	蒸	<i>zheng</i>	steam	A preparation method to heat the medicinal substances with steam. This method indirectly introduces heat and water to the herbs to alter the therapeutic effect or reducing toxicity.
<i>Zheng</i> (upright) <i>qi</i>	正气	<i>zheng qi</i>	right qi	A term that summarizes the positive strength generated by healthy functioning of the organs. In comparison to the pathogenic factors, <i>zheng</i> (upright) <i>qi</i> also represents one's immunity.
<i>Zhi</i> (fry with liquid)	炙	<i>zhi</i>	mix-frying	Stir-frying with liquid to improve effectiveness, enhance smell, or reduce side effects. Liquids used for frying include honey, grain-based liquor, vinegar, ginger juice, and salt water.
<i>Zhi</i> (prepared)	制	<i>zhi</i>	prepare	To process medicinal substances with different methods.
<i>Zhi</i> (will-power)	志	<i>zhi</i>	mind	A term that encompasses will-power and memory. Stored by the Kidney, <i>zhi</i> controls drive, determination, motivation, memory and will-power.
<i>Zhong</i> (central) <i>qi</i>	中气	<i>zhong qi</i>	center qi	The qi of the middle <i>jiao</i> represents the healthy functioning of the Spleen and Stomach to transport and transform food and nutrients.
<i>Zhong feng</i> (wind stroke)	中风	<i>zhong feng</i>	wind stroke	An acute disorder of semi- or un-consciousness, deviation of the eyes or mouth, hemiparalysis, and difficulty with speech. The cause of the illness is predominantly wind, but this may be accompanied by blood deficiency, phlegm, fire, or other pathogens.
<i>Zhong qi</i> (qi stroke)	中气	<i>zhong qi</i>	qi stroke	A condition characterized by stagnated or reversed flow of qi, caused by internal injuries, accumulation of dampness and phlegm, or imbalance of the seven emotions.
<i>Zhou bi</i> (generalized painful obstruction)	周痹	<i>zhou bi</i>	generalized impediment	One type of <i>bi zheng</i> (painful obstruction syndrome) characterized by generalized pain that also affects the bones and joints.
<i>Zhu</i> (boiling)	煮	<i>zhu</i>	boil	Cooking certain medicinal substances in boiling water or another medium to enhance the therapeutic effect or reduce toxicity.
<i>Zhuo bi</i> (fixed painful obstruction)	著痹	<i>zhuo bi</i>	fixed impediment	One type of <i>bi zheng</i> (painful obstruction syndrome) that often occurs when dampness affects specific, fixed areas. Similar to dampness that is heavy and sinking, <i>zhuo bi</i> is characterized by pain and swelling in the lower extremities.

Glossary

Terminology	Chinese	Pinyin	Wiseman & Feng	Definition
Zong (essential) qi	宗气	zong qi	ancestral qi	Zong (essential) qi is derived from air taken in by the Lung, and nutrients absorbed by the Spleen and Stomach. It functions to maintain proper ventilation of the Lung and circulation of the Heart.
Zuo yao (assistant herb)	佐药	zuo yao	assistant	The third of four guiding principles in herbal formulation: Jun Chen Zuo Shi (Chief, Deputy, Assistant, Envoy). This herb has three main functions: 1) it reinforces the effect of jun yao (chief herb) or chen yao (deputy herb) to treat the disease, or directly treats the secondary symptoms; 2) it counteracts the toxicity or minimizes the drastic effects of the jun yao (chief herb) or chen yao (deputy herb); and 3) it has an opposite effect as, but works in synergy with, the jun yao (chief herb) to treat the most serious and complex disorders.

About the Authors

John K. Chen, Ph.D., Pharm.D., O.M.D., L.Ac.

Dr. John Chen actively participates in education, research and the frontiers of contemporary application of herbal medicine. In addition to developing professional continuing education seminars and serving as a senior lecturer through the widely-respected Lotus Institute of Integrative Medicine, Dr. Chen speaks at seminars and conferences for universities and local, state, national and international educational and professional organizations. A professor at the University of Southern California School of Pharmacy and numerous colleges/universities of traditional Chinese medicine, Dr. Chen is also a member of the Herbal Medicine Committee for the American Association of Acupuncture and Oriental Medicine (AAAOM) and an herbal consultant for the California State Oriental Medicine Association (CSOMA). A recognized authority on Chinese herbal medicine and western (allopathic) pharmacology, Dr. Chen has written extensively on Oriental medicine and alternative complementary/integrative medicine for professional publications, journals and texts, drawing on his wealth of specialty post-graduate training and experience in mainland China in herbology as applied in internal medicine, and on his doctoral degrees from the University of Southern California (USC) School of Pharmacy and South Baylo University of Oriental Medicine. An editorial board member for the peer-reviewed journal of the American Academy of Medical Acupuncture (AAMA), *Medical Acupuncture*, John Chen was also a board member of the 1999 *Los Angeles Times* Festival Honorary Committee and speaker on Herbal Medicine for the City of Los Angeles First Annual Festival of Health. Appearing in the Discovery Channel 1999 six-hour documentary on alternative and complementary medicine, Dr. Chen served as the expert resource on Traditional Chinese Medicine. He also was a guest speaker on herb-drug interactions in 1998 for the annual USC Bergen Brunswig convention, during which he addressed over 400 pharmacists and medical doctors. Dr. Chen maintains his consulting practice in Southern California.

Tina T. Chen, M.S., L.Ac.

Tina Chen is an active and respected educator in Oriental medicine and Chinese herbal medicine. In addition to lecturing on TCM Gynecology and Cosmetology across North America through the widely-respected Lotus Institute of Integrative Medicine, Ms. Chen is active on the faculty of South Baylo University of Oriental Medicine and has been an active contributor to professional journals and publications. She has served as Southern California Chair of the Education Committee for the California State Oriental Medical Association (CSOMA), and as an examiner for the California State License Exam for acupuncturists, and from 1996-2001 maintained private practice of acupuncture and herbal medicine through Chen's Clinic in La Puente, California. Her teaching and consulting is grounded in extensive post-graduate training in herbal medicine, and TCM gynecology and cosmetology in numerous hospitals in mainland China. This included concentrated training sponsored by the World Health Organization (WHO) in Guang-An-Men Hospital of Traditional Chinese Medicine, Beijing, in the People's Republic of China, specializing in internal medicine, acupuncture and gynecology; also intensive clinical training in internal medicine and gynecology at First Tien-Jin Hospital, People's Republic of China; and at An-Hui Hospital, People's Republic of China, advanced training in internal medicine. Tina Chen's expertise in translation includes serving as translation specialist for the International Association of Integrating East-West Medicine from 1996-2000, the 1996 Third Annual International Acupuncture and Massage Conference sponsored by the Acupuncture and Massage Institute of America, and the California State Association of Oriental Medicine (CSOMA) in 1990. Licensed by the Acupuncture Board in California, Tina Chen also holds certification from the World Health Organization in internal medicine and gynecology. A graduate of South Baylo University of Oriental Medicine, she also earned a B.A. from the University of California at Irvine School of Humanities, in East Asian Language and Literature. She maintains a consulting practice in Southern California.
